MINUTES, &c.

PUPIL-TEACHERS.*

*At the Council Chamber, Whitehall, the 10th day of
December 1851 ;*

MINUTE BY THE LORDS OF THE COMMITTEE ON EDUCATION OF
HER MAJESTY'S MOST HONORABLE PRIVY COUNCIL.

THEIR Lordships had under consideration the fact that large numbers of the pupil-teachers apprenticed pursuant to the Minutes of August and December 1846 will henceforth annually be completing their apprenticeship.

Resolved—That such pupil-teachers be not admissible to be examined for certificates of merit, or to receive the augmentation grants which depend upon such certificates, until they shall have resided one year in some training school under inspection, or shall have acted for three years as principal or assistant teachers in schools rendered liable to inspection ; and that, after the year 1852, no candidate (not having been a pupil-teacher or a student in a training school under inspection) be admitted to be examined for a certificate until after he shall have completed his twenty-second year, and his school shall have been inspected, and favorably reported upon, by one of Her Majesty's Inspectors of Schools.

*At the Council Chamber, Whitehall, the 12th day of
May 1852 ;*

MINUTE BY THE LORDS OF THE COMMITTEE ON EDUCATION OF
HER MAJESTY'S MOST HONORABLE PRIVY COUNCIL.

THEIR Lordships, referring to the Minute of the 21st of December 1846, which holds out to pupil-teachers, who might not display the highest qualifications in their examinations for schoolmasters, the expectation of obtaining employment in the public service ; and considering that the said Minute may raise indefinite expectations which practically it would be found difficult to fulfil, and might have a tendency to divert the attention of the pupil-teachers from the main object for which grants of money in their behalf are made,—

Deem it expedient that the Minute referred to should not henceforward continue.

* Vide Circular to H.M. Inspectors, dated August 1852, in explanation of these Minutes (page 17).

*At the Council Chamber, Whitehall, the 23rd day of
July 1852;*

**MINUTE BY THE LORDS OF THE COMMITTEE ON EDUCATION OF
HER MAJESTY'S MOST HONORABLE PRIVY COUNCIL.**

Read—Minutes dated the 10th of December 1851 and 12th of May 1852, regarding pupil-teachers who have completed their apprenticeship pursuant to the Minutes of 1846.

Resolved,—In the case of such pupil-teachers, to recognize their employment as assistants in schools liable to inspection, under the following conditions; viz:—

1. That in each year of their apprenticeship they shall have acquitted themselves creditably upon examination before Her Majesty's Inspector, and shall have produced unqualified testimonials from the managers and teachers of their schools.
2. That the master or mistress of the school in which the assistant is employed hold a certificate of merit.
3. That the school be well furnished, and well supplied with books and apparatus.
4. That every such assistant shall be taken to be equivalent to two apprenticed pupil-teachers, in reckoning the number of such apprentices to be maintained at the public expense in any school.
5. That every assistant produce the same annual certificates as are required of apprentices, from the managers and principal teacher of the school, and be favorably reported of by Her Majesty's Inspector as to attainments and practical skill.

When the foregoing conditions are fulfilled, their Lordships will allow an annual stipend of 25*l.* in the case of a male, and 20*l.* in the case of a female, assistant teacher.

Assistant teachers of three years standing and upwards may be examined for certificates of merit, but will not be admissible to receive pecuniary augmentation on account of them, except on fulfilment of the conditions at present in force for such grants.

BOOK GRANTS TO SCHOOLMASTERS' ASSOCIATIONS.

*At the Council Chamber, Whitehall, the 21st day of
February 1853;*

**MINUTE BY THE LORDS OF THE COMMITTEE ON EDUCATION OF
HER MAJESTY'S MOST HONORABLE PRIVY COUNCIL.**

Read—So much of the Minute dated the 18th of December 1847 whereby it is provided that "a Schoolmasters' Association may obtain an order to purchase Books and Maps for the Library of the Association."

Read—The Minute dated the 10th of December 1851 whereby it is provided that pecuniary grants may be allowed “to Training Schools under inspection for the purchase of Books and Maps at the rate of Ten Shillings per student; the applicants in every such instance contributing Twenty Shillings to meet Their Lordships’ grants.”

Resolved—That it is expedient to extend this provision to Schoolmasters’ Associations, in respect of the number of enrolled members, under the following additional regulations :

1. The application to be transmitted through Her Majesty’s Inspector of Schools in the district where the Association is formed; to be recommended by him; and to be accompanied by a complete copy of the rules of the Association (including lists of its officers and members) for approval by Their Lordships.
2. No grant to be claimed in respect of any member who shall not have paid his subscription for the current year, or who shall not be employed in a school liable to inspection by Her Majesty’s Inspectors.
3. The proportionate sum to be raised by the applicants, to meet every grant of Ten Shillings by the Committee of Council, to be Ten Shillings, instead of Twenty Shillings.
4. Books and Maps obtained under this Minute are not to become the property (whether by resale or otherwise) of individual Members, but must continue to belong to the Association.

APPOINTMENTS OF INSPECTORS OF SCHOOLS.

(Copied from London Gazette of Tuesday, October 19, 1852.)

At the Court at Windsor, the 16th day of October 1852; .

PRESENT—

The QUEEN’S Most Excellent Majesty in Council. .

* Erase the words not applicable to the circumstances of the case

in manner aforesaid, and that the said premises shall at all times hereafter be held and enjoyed upon the trusts and in manner aforesaid without interruption from and free from all incumbrances by * (me) or * (us) or * (my) or * (our) heirs or any person lawfully claiming under or in trust for * (me) or * (us respectively) or them or any of * (my) or * (our) ancestors or testators and that * (I) or * (we) and * (my) or * (our) heirs and all persons claiming under or in trust for * (me) or * (us) or them or any of * (my) or * (our) ancestors shall upon every request and at the expense of the said

make and perfect all such further assurances of the said premises as may be required by them for conveying the same to the use of the said

in manner aforesaid IN WITNESS

Taken and acknowledged by

one of the parties to this deed this
at

day of

before me

a Master Extraordinary in Chancery.

(This deed must be enrolled in Chancery, under the Mortmain Act.)

. INSTRUCTIONS TO INSPECTORS.

CIRCULAR LETTERS, CONTAINING SPECIAL INSTRUCTIONS, TO HER MAJESTY'S INSPECTORS OF SCHOOLS, &c.

(No. 1.)

Inspection of Schools.

Committee of Council on Education,
Council Office, Downing Street,

REVEREND SIR,

24 May 1852.

I HAVE to request your careful attention to a point of great importance in regard to the administration of their Lordships' Minutes of 1846.

*Instructions
for meeting
inspection
of schools.*

Those Minutes, so far as they regard annual grants for the maintenance of schools, presuppose that one of Her Majesty's Inspectors has visited and reported upon each school to be aided in each year.

The Reports of Her Majesty's Inspectors constitute the foundation of the whole system.

It follows, therefore, that an extension of the system is limited by the number of Inspectors; and, this being the case, it becomes a material consideration to watch the multiplication of engagements with reference to the means of meeting them, so that the overplus may not have to reveal itself merely in the form of arrears and incompatible calls, but, being foreseen, may be declined, either absolutely or until due provision for it can be made.

The schools in your district may be regarded as—

- (1.) Schools simply liable to inspection.
- (2.) Schools in which annual grants are payable.
- (3.) Schools applying to be admitted to the receipt of annual grants.

Schools falling under the first division rest for inspection on the Circulars of the 26th of July 1849 (Minutes of 1848-49-50, p. xxx.) and the Minute of the 25th of July 1850 (Minutes of 1850-1, p. ix).

Schools falling under the second division constitute positive engagements which must be met.

Schools falling under the third division should be admitted only as there is the reasonable prospect of being able to inspect them, and accordingly every such case, when found to be *prima facie* admissible, will be referred to Her Majesty's Inspector in the Form No. 5 (revised as the copy herewith enclosed), the three first columns of the schedule being completed in this office, and the last column only remaining for the Inspector to fill up.

At this stage of each case it is desirable that Her Majesty's Inspectors should consider the month to be named not only in relation to the time fixed for the circle or sub-district in which the school may be situated, but also in relation to the effect of this new engagement on others to which they are already committed. A school to which no pecuniary liabilities have as yet been contracted is "*res integra*" for such consideration.

If it should appear that, taking in all those considerations of time and place which are adverted to in the Circular of 26th July 1849, the inspection

of the school in question cannot be suitably undertaken, Her Majesty's Inspector is at liberty to make an entry to this effect on the Form No. 5., and my Lords will undertake to have the requisite communication made to the managers from this office.

Cases so postponed will be collected, and the number of them will be an additional guide for my Lords in determining whether, when, and how far to augment the staff of Inspectors.

In referring to you the Forms 5, the following plan will be pursued:—

Reference will be made to the last detailed statement of grants for pupil-teachers which has been printed in their Lordships' Minutes (see, e.g., that printed in the Minutes of 1850-1, Vol. i., pp. 141-214), and the month or months which may be found to have been assigned by you to the county where the school is situated will be entered for your guidance on the Form, as well as a statement of the number of annual grant cases already requiring visits from you in the same month or months.

I have the honor to be, &c.

To the Rev. _____

(Signed) R. R. W. LINGEN.

Her Majesty's Inspector of Schools.

Enclosure (Form No. 5) referred to in foregoing Letter.

Committee of Council on Education,
Council Office, Downing Street,

SIR,

I HAVE the honor to annex a schedule of schools in your district the managers of which have applied to the Committee of Council for annual aid.

I am directed to request that you will have the goodness to enter, in the appropriate column, opposite to the name of each school, the name of the month in which you could best visit it from year to year.

This should be done with as little delay as possible, as the cases cannot be put forward until the requisite information has been received.

I have the honor to be, &c.

To _____

(Signed) R. R. W. LINGEN.

Her Majesty's Inspector of Schools.

SCHEDULE.

Mr.	District.		
Name of School.	County, and Month or Months already fixed for visiting Schools in it.	Number of Schools, with Annual Grants, to be visited in same Month or Months.	Month proposed for Annual Visit.

(Signed) _____

Her Majesty's Inspector of Schools,
this day of

(No. 2.)

Pupil Teachers and Assistant Teachers.(Referring to foregoing *Minutes* of 10 December 1851, 12 May 1852, and 23 July 1852.)Committee of Council on Education
Council Office, Downing Street,
August 1852.

SIR,

I AM directed to request your attention to the foregoing minutes, (the object of which has formed matter of discussion at several conferences of Her Majesty's Inspectors) concerning the position of pupil-teachers who will henceforth be completing their apprenticeship pursuant to the Minutes of 1846.

In explanation of recent Minutes, as to position of pupil-teachers, and as to assistant teachers.

The following explanatory paragraphs are numbered for the sake of convenience in referring to them :—

1. The apprenticeship of a pupil-teacher has never been contemplated as sufficient in point of preparation for the office of schoolmaster or schoolmistress. The Minutes of 1846 expressly advert to the further training of apprentices in a normal school.

2. The Minutes of 1846 confine certificates of merit, and the corresponding grants in augmentation of salaries, to those teachers who have been students in normal schools.

3. The examination of teachers who have not been trained in normal schools is provided for by a supplementary regulation, having reference to persons already engaged in the profession. At the date of that regulation (July 1847) it is evident that pupil-teachers, who were only then just beginning to be apprenticed, were not contemplated. There was, however, a large (nearly the whole existing) class of teachers to be borne in mind, who had entered upon their career at a time antecedent to the formation of training schools under Government Inspection.

4. The annual examinations, which now for five consecutive years have been open to untrained teachers in all parts of the country, may be assumed to have afforded to the majority of them an opportunity of obtaining the same rewards of proficiency and merit as were opened by the Minutes of 1846 to their juniors.

5. It would be equally inconsistent with the Minutes of 1846, and with the object for which the examination of untrained teachers was instituted, that this examination should become the means of diverting pupil-teachers from the training schools.

6. There is, however, manifest danger of this result, without some such declaratory provision as that set forth in the Minute of the 10th of December 1851. The effect of this provision will be to mark, perhaps with somewhat greater definiteness than has hitherto been attainable, the position of a certificated teacher as one which implies either special preparation in a normal college or considerable probation in practice. The number of normal colleges throughout the country, as compared with the number of pupil-teachers, is not such as would warrant the Committee of Council in making them the only entrances through which the public emoluments of the profession can be reached.

7. Applications for the appointment of assistant teachers must, in the first instance, be made to the Committee of Council by the managers of the school in which they are to be employed. Every such application should specify (a) the name of the school on account of which it is made, (b) the name in full of the proposed assistant, (c) the name of the school in which he has served his apprenticeship, (d) the exact date at which it is proposed that the Assistant shall begin to serve. *The application should precede this date by at least fourteen days.*

8. You will observe that assistant teachers are allowed in those schools only in which the principal teacher is certificated. It is not the intention of the Committee of Council to provide deputies by the side of inefficient masters and mistresses, but to place pupil-teachers who have completed their apprenticeship in a situation to improve themselves on the way to further advancement.

9. The office of assistant teacher (besides its important bearings on the work of instruction,—the new field of employment which it opens for pupil-teachers,—and its tendency to check any excessive increase in their number) will especially facilitate their passage through the required period of probation to the rank of certificated masters and mistresses. It will be observed that there is nothing in their Lordships' Minutes to prevent assistant teachers from competing for Queen's Scholarships. It will, therefore, be optional with them, at any time, to seek this entrance into their profession, or, after the end of three years, to be examined for a certificate of merit as assistant teachers and not as students.

10. The stipends of assistant teachers will be paid at the same time as those of the pupil-teachers in each school. No stipends (after the first) will be paid for fractional portions of a year, unless the year's service shall have been interrupted on account of death, sickness authenticated by a medical certificate, or removal to a training school on obtaining a Queen's Scholarship. The year's service will be deemed to have been interrupted by the dismissal or voluntary withdrawal of the assistant before the end of it, or by any unreasonable delay on the part of the managers in supplying vacancies in the appointment of principal teacher.

11. A question arises whether these assistants should receive special instruction from the principal teacher out of school-hours, and, if so, under what conditions. It may be anticipated that young persons of sufficient age and attainments to seek the office of assistant will be materially influenced, in the selection of schools wherein to serve, by the ability of the principal teacher to aid them in their studies. Such aid, however, would not be completely given by combining them with the apprentices, in the hours during which the latter are to receive special instruction; nor, on the other hand, would it be desirable to encroach further upon the principal teacher's leisure out of school-hours, by requiring him in all cases to give separate lessons to his assistants. As a general rule, therefore, their Lordships do not propose to allow any gratuity, or to lay down any regulations, for the special instruction of assistants by principal teachers. As matter of fact, it will commonly happen that sometimes by express arrangement between the parties, and oftener by tacit understanding and mutual good will, the senior will help the junior teacher. An assistant who is fit for his post will not need that constant succession of fixed lessons which is prescribed for a pupil-teacher, but will rather look for occasional assistance in difficulties arising out of his own studies, or for guidance to direct him from time to time in his further progress. No assistant ought to be appointed, or maintained in his place, who falls short of the standard prescribed for the end of the fifth year's apprenticeship; nor do my Lords feel warranted in offering any premium for the instruction of assistants up to that standard which they ought already to have attained. If, however, in geography, history, the analysis of language, arithmetic, linear drawing, vocal music from notes, or in any branch of physical science, or of pure or applied mathematics, the assistant shall, with the principal teacher's aid, have mastered some text book, to be submitted in the first instance for approval by Her Majesty's Inspector, and shall have given sufficient evidence of proficiency in the subject-matter of that text book upon examination, my Lords would, on the report of Her Majesty's Inspector, take into consideration the propriety of allowing the same gratuity to the principal teacher as if the assistant had been his apprentice. It is to be understood that this offer is strictly confined to special proficiency

in some one of the foregoing subjects. In the case of female assistants thorough acquaintance with the principles and practice of domestic economy in its several branches would be accepted in lieu of the foregoing subjects. Notice of the subject and text book selected must be given to Her Majesty's Inspector (who will report it to the Committee of Council for proper record) at least nine months before the end of the year, as reckoned for inspection in the particular school; i. e., if the inspection of the school falls due in December, notice must be given before the end of March in the same year; arrangements will then be made for the examination of the assistant out of the book selected. The assistant, if not offering any special subject for examination, might be annually required, at the discretion of Her Majesty's Inspector, to pass an examination, either oral or written, in all or any of the subjects required of pupil-teachers at the end of the fifth year of their apprenticeship. It would be proper to insist upon such an examination in cases where the state of knowledge in the school, or the inspector's observation of the assistant's manner of imparting any particular branch of instruction, might suggest a doubt as to the sufficiency of his attainments. *Her Majesty's Inspector would, in all cases, make the assistant teach for a considerable time in his presence.* In the pursuit of religious knowledge, the assistants will naturally seek advice and guidance from the ministers of religion who attend their respective schools.

12. Assistant teachers may be reported on in the Form X., but they must, of course, be carefully distinguished in it from the apprentices.

13. In accordance with the view herein-before stated, concerning the object of the Easter examinations for certificates of merit, and pursuant to the intimation conveyed in the Minute dated the 25th of July 1850, I have the honor to inform you that district examinations will be held as heretofore in the Easter week of 1853, but that thenceforth they will not be held as matter of course in each year. The examinations which are held at Christmas in each year, at the several training schools under inspection, are generally opened, by the courtesy of the authorities of those institutions, to teachers desirous of obtaining certificates of merit who are properly introduced, although such teachers may never have been students. District examinations will, after Easter next, only be held as it may from time to time become apparent that any considerable number of teachers has been unable to take advantage of the examinations at the training schools.

14. I am directed to remind you that the proposed appointment of assistants will require the most vigilant attention on the part of Her Majesty's Inspectors in carrying the examination of pupil-teachers for the end of the fourth and fifth years of their apprenticeship to the full extent of the several subjects named in the Minutes of 1846.

I have the honor to be, &c.,

(Signed) R. R. W. LINGEN.

To Her Majesty's Inspector of Schools.

(No. 3.)

Additional Assistant Inspectors of Schools.

Committee of Council on Education,
Council Office, Downing Street,
30 September 1852.

SIR,

ADVERTING to the letter from this office, whereby you were informed that you would be assisted by [in the inspection of schools in your district, I am directed by the Lord President of the Council to request your attention to the following instructions:—

Instructions with reference to appointment of additional Assistant Inspectors.

(1st.) It is not the intention of the Committee of Council that the addition now made to the staff of Her Majesty's Inspectors should become the

means of proportionately increasing the number of pupil-teachers apprenticed under the Minutes of 1846.

This caution would have been superfluous before the late increase to the number of Inspectors, because the annual payment of each pupil-teacher depends upon an annual report by one of Her Majesty's Inspectors, and those officers had already, for the most part, even more of such engagements on their hands than they could conveniently dispatch.

There are now nearly 6,000 pupil-teachers in various stages of apprenticeship; they cost in stipends and gratuities about 100,000*l.* per annum, and 1,200 of them in each year are completing their term of service.

The limit thus practically fixed, up to the present time, is one which in point of expense, and the probable demand for teachers, my Lords are of opinion ought not to be inconsiderately extended.

The Lord President desires, therefore, that you will continue to give full effect to the instructions (of which you are requested again to peruse the annexed copies) dated 13 June and 4 October 1851*, and that you will endeavour to find out which are the best schools in your district wherein to place the present number of pupil-teachers, the increase of which is not intended to be promoted by the additional means of inspection placed at your disposal.

The services of an Assistant Inspector are meant specially to meet the case of those schools which are liable to inspection, but have not of late been within the means of inspection.

Among these schools the business of inspection should be prosecuted with a view to raise them to the standard suitable for the reception of pupil-teachers, in order that the best of them may from time to time be advanced to supply the place of those schools which, having enjoyed the benefit of pupil-teachers, have nevertheless made no corresponding progress.

The managers of schools thus recovered to inspection should be encouraged to engage certificated teachers; to procure more and better books, maps, and apparatus; to build classrooms; and to set up galleries and groups of parallel desks and benches; being at the same time informed or reminded of the public assistance that is to be had for each or all of these objects. The annexed broad sheet†, memorandum‡, and circular§ contain the necessary information with which Her Majesty's Inspectors and Assistant Inspectors should make themselves familiar.

(2nd.) The Lord President desires that nothing in the nature of a permanent division of district be made between the Inspector and Assistant Inspector. The Inspector continues generally responsible for the whole district; he alone will ordinarily have to make the Annual Report for Parliament upon it; and it is essential that he should not permanently disconnect himself from any part of it. The Lord President thinks it best, therefore, that the tours of inspection should be varied, between the Inspector and Assistant Inspector, at least once in each year.

I am to request that when you have perused this letter and its enclosures you will hand them over to the Assistant Inspector acting in your district.

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

GENERAL ADMINISTRATION.

CORRESPONDENCE *with the BOARD of TRADE, relating to the proposal to establish a connexion between ELEMENTARY SCHOOLS and SCHOOLS of DESIGN, in the study of DRAWING* (continued from "MINUTES" of 1850-1, page lxvi.)

(No. 6.)

Department of Practical Art, Marlborough House,
28 July 1852.

SIR,

REFERRING to the correspondence on the formation of classes for elementary drawing which has already passed between the Lords of the Committee of Privy Council for Trade and the Lords of the Committee of Privy Council for Education, I am directed to transmit to you, for the information of their Lordships, the accompanying documents, which will be found to explain the system which the Board of Trade have resolved to adopt in future in forming elementary drawing schools and classes, and to request to have the assistance of the Committee of Privy Council for Education in giving effect to the system proposed.

My Lords submit for consideration whether in populous places, where several large schools are under the inspection of the Committee of Privy Council for Education, it might not be practicable, through the instrumentality of your board and the agency of the inspectors of schools, to arrange that a master, appointed and paid, in part at least, by the Board of Trade, should attend a series of schools in rotation; and, if it should be found to be so, I am to request you to furnish me with the names of places where the experiment might be tried.

The experience of many years has convinced my Lords that, until artizans and the public generally are systematically trained to a knowledge of form, by means of elementary drawing, so that they may be qualified to enter the schools of design as students, or to appreciate the results of the schools in improving manufactures as the consumers of them, it cannot be expected that the object of the schools of design should be accomplished, or that they should exercise any palpable influence upon the national taste. Hence it is the earnest wish of my Lords to receive the assistance of the Committee of Privy Council for Education in devising measures to render elementary drawing a systematic part of the education of all classes of the community.

I have the honor to be, &c.

(Signed) WALTER RUDING DEVERELL,

The Secretary of the
Committee of Council on Education, &c.

Secretary.

Minute enclosed in Letter No. 6.

DEPARTMENT OF PRACTICAL ART,

(Under the Direction of the Lords of the Committee of Privy Council
for Trade,)

Marlborough House, Pall Mall, London.

Establishment of Elementary Classes or Schools for Drawing and Modelling, during the Year 1852-3, so far as may be possible within the limits of the Parliamentary Grant.

At the Council Chamber, Whitehall, the Seventh Day of May 1852.

By the Right Honorable the Lords of the Committee of Council
appointed for the Consideration of all Matters relating to Trade
and Plantations.

Present :

The Right Honorable J. W. Henley, M.P.
The Right Honorable Lord Colchester.

My Lords are pleased to direct that the following Memorandum* be published on the principles which should govern the foundation of elementary classes or schools for drawing and modelling, in connexion with the Department of Practical Art.†

(Signed) J. W. HENLEY.
COLCHESTER.

APPENDIX.

(Also enclosed in Letter No. 6.)

- I.—Addresses by the Superintendents, on the necessity of acquiring a power of drawing form.
- II.—The mode of proceeding for establishing Classes or Schools for Elementary Instruction in Art.
- III.—The duties of the Masters, with a List of the Articles and Examples requisite for teaching in First and Distinct Elementary Drawing Schools.

I.

ADDRESSES delivered at the OPENING of an ELEMENTARY DRAWING SCHOOL at WESTMINSTER. Presided over by the Right Hon. J. W. HENLEY, M.P., President of the Board of Trade, &c., on the 2nd of June 1852.

(1.)—*Address by HENRY COLE, C.B., the Superintendent of General Management.*

Objects of
schools of
design.

FOURTEEN years have passed since it was admitted to be public policy that the Government should undertake to establish schools to afford instruction in the principles of art, with the view of improving and beau-

* A revised copy of the Memorandum here referred to will be found among the documents appended to letter No. 8., in the following correspondence.

† DEPARTMENT OF PRACTICAL ART.

Under the Authority of the Board of Trade.

The School of Design was established in 1837, upon the recommendation of the Select Committee of the House of Commons appointed in 1835 to "inquire into the best means of extending a knowledge of the Arts and of the Principles of Design among the people (especially the manufacturing population) of the country." This committee recommended the formation of an institution, where "not theoretical instruction only, but the direct practical application of the Arts to Manufactures ought to be deemed an essential element." A School was accordingly established in the metropolis, and hitherto the whole business of the Metropolitan School has been carried on at Somerset House, where its development was much contracted for want of room; but for the present, as a temporary arrangement, to meet the growing wants of the public for education in Art applied to Industry, accommodation has been afforded by the gracious permission of Her Majesty the Queen, for the offices, the museums, the lecture-room, and some of the class-rooms of the Department, at Marlborough House, Pall Mall, London.

PRINCIPAL OFFICERS OF THE DEPARTMENT.

Superintendent of General Management.—Henry Cole, Esq., C.B.
Superintendent of Art.—Richard Redgrave, Esq., R.A.
Secretary and Financial Officer.—Walter Ruding Deverell, Esq.
Librarian and Keeper of Casts.—R. Wornum, Esq.

The Offices for the transaction of Business are open from 10 to 4 daily, except the usual holidays at Government Offices.

tifying the objects of every-day use, such as the paper hangings which decorate the nakedness of our walls, the carpets and curtains which give warmth and colour to our rooms, the draperies which cover our persons, the utensils in metal and earth and glass which administer to our daily wants, comforts, and civilized habits. A Central School of Design was constituted in 1837, the express purpose of which was to provide for the architect, the upholsterer, the weaver, the printer, the potter, and all manufacturers, artisans better educated to originate and execute their respective wares, and to invest them with greater symmetry of form, with increased harmony of colour, and with greater fitness of decoration; to render manufactures not less useful by ornamenting them, but more beautiful, and therefore more useful. The establishment of the Central School at Somerset House has been followed by the organization of 21 other schools, located in all parts of the United Kingdom.

2. At the origin of these schools it seems to have been assumed as sufficient, that it was only necessary to decree to have a School of Design in any locality, and to find the funds and educational apparatus requisite for its foundation, and that a School of Design would become then and there established, and its fruits be manifested at once in the improvement of manufactures; but the experience of 14 years, not with any one but with all the 21 schools, has shown that the looked-for result was not to be produced by these means only. Experience in every one of the 21 schools has proved that students did not exist sufficiently qualified by previous art-education to enter them, but had to be trained, not merely to be able to understand and practise the principles of design, but to learn the very elements of drawing. Indeed, *principles* of design were hardly admitted to exist. Manufacturers were therefore slow to recognize them, and were not prepared to value any results from the schools; besides being necessarily under the thralldom of fashionable caprice, or, in other words, bound to obey the ignorance of the public, they could only look to the demand of the markets. And, lastly, the public have known little of the teaching of the schools; have been rather discouraged from attending them by mistaken rules, which attempted to limit their uses to artisans only; and although the public were the ultimate and absolute judges of the results of the schools, they have been allowed to remain uneducated in art and uninformed of the existence of principles of art which might assist in judging such results correctly.

Why the progress of Schools of Design has been slow.

3. Thus it has followed, that instead of being Schools of Design for teaching the principles and practice of applied art, the schools, by the irresistible force of circumstances, have been compelled to begin with being "mere drawing schools," as they have been often officially and candidly reported to be. They have been obliged to be mere drawing schools in their beginning, or they must have closed their doors. Instead of teaching the end, they have been, and still are, under the obligation of teaching little else than the mere A B C of art.

Schools of Design obliged to start as Drawing Schools.

4. It has taken a long period of 14 years to arrive at the conviction that in order to educate a competent designer, you cannot avoid the obligation of first teaching the very elements of art,—a power of drawing;—such being the low state of art-education in this country. In fact, to obtain a competent designer, care must first be taken to ascertain that the student really can draw even simple forms. This is a truth now generally acknowledged, and no longer a proposition, but an axiom; we now believe that it is idle and premature to talk to a student on the principles of design, who is unable to demonstrate to you by drawing that he can see a form correctly. Until he can give evidence that his eyes are able to see forms, lights, and shadows, and are sensible of the harmonies and discords of colour, and that his hand has been tutored to follow his perceptions, it must not be taken for granted that he can understand principles of design.

Necessity of elementary art-instruction before improved design can be produced.

Ignorance of
the public.

5. Another conviction which the progress of these schools has almost established—I say almost, for, although it is a truth perceived by a few, it is not quite yet a settled conviction with the public at large—is, that when you have taught the designer, his works will be of very little use indeed, if not absolutely useless, and his labour discouraging to him, unless those who are to use his works and judge of them really possess the knowledge and ability requisite to enable them to do so. If the public are insensible to the merits of his works, be they ever so great, what mockery is it to be training a band of designers, misdirecting their labours, and sacrificing their hopes! If the consumer of manufactures, who has to pay for them, and has, therefore, the absolute right of choice, is left without a knowledge of good and bad, and always pretty sure, in his ignorance, to select the bad,—what folly is it to affect to help the manufacturer to produce a good article which no one will buy, and which must therefore remain in his warehouse a dead loss to him! There are many retail salesmen who relate the thralldom they feel in the necessity of pandering to the low uneducated taste of the majority of their customers. If their shops contained only objects of correct taste the proprietors would soon find their names in the Gazette.

Education of
the public
of prior im-
portance to
the educa-
tion of a
special class.

6. My own conviction is, that if it were necessary to choose between two courses for fostering the production of improved design in manufactures, the education of the public at large or of a special class of artisans, the end would be more readily secured by teaching the public aright, and convincing it of its ignorance, than by educating the artisan only. If you leave the public ignorant, the educated artisan will not be employed; but if you lead the public to feel the want of beauty and propriety,—to be sensible of their presence and impatient at their absence,—to distinguish between symmetry of form and disproportion,—to demand from art, at least, the aspiration after the perfection of Nature and the recognition of Nature's eternal fitness and simplicity, I am sure the public will soon demand good designs in manufactures, and be willing to pay for them; and I feel morally certain that the instincts of traders will teach them to find the means of supplying such demands, and of causing their artisans to acquire the power of administering them.

Elementary
instruction
for all
classes:

7. It is the conviction, on the one hand, that you must prepare students by affording them the means of obtaining a sound elementary education before you admit them to Schools of Design, and on the other that you must use every means to remove the ignorance of the general public, and induce them to appreciate and judge wisely of the results of the teaching of the schools, that has led the Government broadly and unhesitatingly now to recognize, for the first time, the want of elementary instruction in art for all classes, and to assist the public in obtaining it. And the meeting held in this building to-day, presided over by the Chief of the Board of Trade, to inaugurate the first Elementary Drawing School, as the beginning of a systematic effort to afford such education to all classes, may be viewed as a token of the sincerity of the Government in this object.

to be afford-
ed in special
elementary
schools, and
in public
schools of all
kinds.

8. Hitherto elementary instruction in art has been given only at Schools of Design, which, being separate institutions, have been formed necessarily at great expense. The average total cost of a School of Design has usually been about 800*l.* a year to the public, a cost obviously so great that a limited number of places only could have them. But if the principle be recognized that art-education ought to be general, and that as soon as possible a rule be made that no one should be admitted to a School of Design or Practical Art who has not received proper elementary instruction; then, instead of having a few schools in a few places, we may hope to see many schools or classes for teaching art of an elementary kind; not separate institutions, but connected with mechanics institutes, with our public schools, and other educational institutions.

9. Wherever a desire is expressed to have the assistance of the Govern-

ment in forming such classes in any kind of schools already existing, such assistance will be cordially afforded, so far as the means permit, which Parliament places at the disposal of the Board of Trade for this purpose.

10. Towards aiding the establishment of Elementary Schools, or classes for drawing and modelling, in the advantages of which all classes of the community should share, the Board of Trade has already announced its willingness, on its part,—

Nature of aid given by Board of Trade.

1. To appoint a competent master, and to guarantee the payment to him of a certain income for a fixed period, in case the fees to be derived from the instruction of the scholars should not suffice to pay the master's salary.
2. To assist in furnishing samples of suitable drawing copies, models, coloured examples, and books, and contribute half the prime cost towards the purchase of them.
3. Also to furnish samples of drawing materials, such as black-boards, drawing-boards, paper, slates, chalk, pencils, &c.; and to give such information as will enable the managers and scholars to obtain those materials the readiest way.

On the part of the public the following are the conditions :—

1. A committee of management must be formed, either by corporate or parochial authorities, or persons engaged in schools of any description, or by persons interested in the object, who must find *three* public schools in the locality willing to be taught drawing, and engage to provide, keep clean, warm, and light a suitable room for a distinct drawing school, at their own liability, and to give the names of not less than 20 male or female scholars, who will attend the school, if opened, for a period of not less than three months, at a payment of not less than *6d.* per week each scholar.
2. Such committee must collect and account for the fees from the students; conduct and manage the school; provide for stated and periodical visits of inspection by the members of the committee; be responsible for the attendance of the master;—contribute at least half of the fees received towards his salary; dismiss him for incompetency or misconduct; engage to follow the course of instruction prescribed, and make an annual report on the proceedings of the school, on or before the 31st of October.*
11. Every effort should be made to render these schools as far as possible self-supporting, to divest them of any kind of charitable aspect, to attract all classes to use them for their merits only, and to pay for them; and there can be no doubt, if all are led to feel their value and to share in their advantages, this instruction may be made self-supporting. The highest point of ambition in the management should be, to become able to decline any pecuniary assistance from the Government.
12. The payment proposed for learning drawing appears very low, having too much, I fear, the look of a charitable donation: it is at the rate of *1½d.* per lesson of two hours, with the use of the best examples: no one, I think, can be deterred from attending by the cost; and it may be hoped that the evening classes in the proposed school will be frequented by the numerous artizans of the neighbourhood:—that every carpenter who has to cut straight lines, every smith who has to forge them, and every bricklayer who has to lay them, will attend this school at their leisure hours in the evening, to acquire a power of seeing accurately by means of drawing accurately, and that they will also send their children, both boys and girls;—for to see correctly and to draw correctly are quite as useful to one sex as to the other. In the morning it may be hoped that the upper and middle classes will learn to attend; that the pro-

Art-education should be made self-supporting.

Rates of fees proportioned to means of paying.

* For the mode of proceeding in establishing a school see page 31.

professional man and the tradesman will feel their children disgraced to remain in ignorance, and that artisans should be the only persons educated in art. If arrangements for the upper and middle classes are made, it would of course be at a rate of charge more closely proportioned to the value of the education and their means of paying, and so enable those who can less afford it to enjoy the advantages of these drawing classes.

Drawing a necessary branch of education for all classes.

13. A power of drawing is too commonly regarded as a luxury and superfluity in education; permissible to girls, who ultimately become women better educated and more refined than men, but unnecessary for boys, who become men intensely skilled in the anatomical points of a horse, but not of their own frame, and are unable to draw even straight lines. Drawing is regarded as "an extra" in school bills, which parents rather avoid than encourage. The same sort of mistake used once to be made with writing.

14. It should be felt to be a disgrace to every one who affects to be well educated if he cannot draw straight lines, and make at least simple geometrical forms. Those who cannot do so have no right to expect you to believe that they can even see correctly; yet such is the anomalous state of matters on this point, that persons who are unable to use a pencil will affect raptures at paintings, and will criticise art, and announce canons of taste with absolute dogmatism. A modern writer observes, "Ask a connoisseur who has scampered over all Europe the shape of the leaf of an elm, and the chances are ninety to one that he cannot tell you; and yet he will be voluble of criticism on every painted landscape from Dresden to Madrid, and pretend to tell you whether they are like nature or not. Ask an enthusiastic chatterer in the Sistine Chapel how many ribs he has, and you get no answer; but it is odds that you do not get out of the door without his informing you that he considers such and such a figure badly drawn."

Drawing easy to be learnt.

15. It is rather the province of my colleague than myself to speak of the doctrinal part of art-education; but I must request his leave to say a few words on the ease of learning Elementary Drawing, which, in its earliest stage, should be of a geometric character, and on the universal use of the power, when acquired.

Outline drawing easier than writing.

16. Geometrical drawing is an easier acquirement than writing. A child will sooner learn to make the outline of a square or an oblong accurately than the capital letter *N* of the usual Italian hand; and most children, before they acquire the power of writing, have passed through a stage of self-instruction in drawing simple forms rudely, and have acquired a power which would have been readily expanded, had it been at all cultivated. Drawing is a power of expressing *things* accurately. Writing is the power of expressing only *ideas*; and in daily life it constantly happens that it is far more valuable to have the *thing* itself denoted correctly by actual form than the vague expression of it by words. All material objects may be more accurately expressed by simple forms than by any number of words. Make the comparison between the verbal description and the outline drawing of a hat, or a basket, or a cabinet, or the front of a house. At the present time we all admit that writing is necessary to be taught to every one, and is serviceable in all relations of life, but it may be shown easily that the power of representing forms by drawing is frequently quite, if not more, needful. And it is equally useful to all classes of the community: to him who orders a house to be built and pays for it, to him who superintends its building, and to him who actually saws and joins the timber or lays the masonry. All would perform their respective parts with greater power and wisdom, and with greater saving of labour, if they all knew what straight lines were, and possessed the power of making them. But how rare is the possession of this simple

power! How many landlords in the country are able to draw a plan of the ground which their houses occupy, or to draw the shape of a cupboard they wish to order from the carpenter! How many manufacturers there are who direct the labour of thousands of persons in producing ornamental works, and realize thousands of pounds from them, but are unable to draw correctly the form of one of their simplest patterns!

17. Still we have had Schools of Design working for 14 years to improve manufactures. If the Schools have not fulfilled every expectation, is disappointment unnatural when producers and consumers alike remain in ignorance?—I hope I have succeeded in showing that the establishment of the present school and other Elementary Drawing Schools for the benefit of all classes is both a logical and an imperative step towards making Schools of Design what they were intended to be. First teach the public to know what good art is, and Schools of Design will soon learn how to provide it; but leave the public ignorant, and Schools of Design must be vain.

Elementary Drawing Schools indispensable to the success of Schools of Design.

Besides a manufacturing there is also a moral view to be taken of this question. The efforts of all who desire that the people of this country should acquire a power of perceiving and judging forms correctly should be directed in introducing drawing as a necessary part of instruction into every school in the kingdom:—this power will also assist them to obtain increased accuracy in all other ways, and therefore become all the more truthful and sensible of God's wisdom.

(2.) *Address by* RICHARD REDGRAVE, R.A., *the Superintendent of Art.*

The object of the meeting of this day is to found a class to provide elementary instruction in drawing—as a part of general education,—and as introductory to the study of ornamental art,—in order to give to all a knowledge of *form* as a means of expressing their thoughts, and to the improvement of all classes in a perception of what is really excellent in design applied to the things and uses of daily life. Everywhere there is evidence of an awakened desire for art-education on the part of the public; it is manifest in the meeting of this day; in the numerous demands for schools of ornamental art throughout the kingdom; and the extension of galleries of art; of art exhibitions in London and the provinces, public and private; in the support of art unions; in the increase of illustrated works; the sale of prints; and, above, all, in the increasing number and extensive sale of illustrated periodicals, and those, not merely of a pictorial, but many of them partaking largely of an ornamental character. All this manifests an increasing desire for information on such subjects, and an enlarged appreciation of the decorative and the beautiful; and to guide this desire aright, both as to the designer and the public, is the office of the new Department of Practical Art.

Public desire for art-education.

I will now endeavour to support what has been advanced by the General Superintendent; first, to show you how much all are interested in obtaining a power of drawing as a new language; and then, as the form and colour of the furniture of our houses, of the utensils we use and the garments we wear, are within the province of design, and, as these are all more or less ornamented, that they should be subjected to just laws and true principles of design, if they are to be in harmony with the educated taste, the want of which is felt and which is growing around us. Among those exhibitions which have before been spoken of as evidencing the growth of a public appreciation of art, there is one which consists of the works of amateur artists. This, I trust, may give us room to hope that hereafter we shall see amateur draughtsmen, as far at least as the power goes of making a comprehensible drawing of work sought to be performed, in which power even the most educated classes are at present singularly deficient.

All interested in acquiring a power of drawing.

Drawing is
a new lan-
guage.

I would therefore direct your attention to the primary object of the class about to be formed, which is, to give the student a power of drawing as a part of general education; and there are one or two points connected with this object which I may be permitted to enlarge upon. The first of these is, that we hereby obtain, so to speak, another language, another intelligible mode of communicating thoughts and explaining things; having, moreover, this advantage over other languages, spoken or written, that it is universal, that it is almost alike intelligible to all the diverse races of mankind, needing no translation, but at once "known and read of all men." But there is another and an equally great advantage, which is, that whereas words, spoken or written, even in our mother tongue, often convey but a confused and imperfect idea of things, dealing necessarily rather with generalities than with minute specialities, and requiring long and elaborate descriptions where accuracy is required, drawing supplies us with a power whereby long descriptions and pages of writing are at once superseded, and thus it is a condensed *short-hand* as well as a universal language; a short-hand, moreover, intelligible equally to him that writes and to him that would read it; useful not merely to the scientific man for his diagrams and illustrations, but in the every-day relations of life. By its means the tradesman or the manufacturer instantly understands and comprehends the wants and wishes of the employer, and as readily conveys them to the workman to execute. The master hereby may instruct his pupil, and greatly aid him in comprehending things, otherwise unintelligible; while the scholar, in his turn, is able to store and treasure facts, where words would fail him, and *language* is found to be almost useless.

Improves
the per-
ceptive
faculties.

Then, again, the course of study necessary to acquire correctness of eye and precision in delineating form, has a further valuable bearing on general education, since it greatly stimulates and improves the perceptive faculties, and induces correctness of general observation, and more clear and definite knowledge of things. The student is not only provided with another medium of explanation, but his *verbal* descriptions even will be clearer than those of one who has not been so trained; for, as it is impossible to draw any object correctly without a minute and careful examination of its structure and surface, and its relation to other objects, it must follow that his power of observation and of comparison is strengthened, and becomes more precise, and his perceptions sharpened and rendered more inquisitive; so that facts, often overlooked by others, are brought tangibly before the mind of the scholar exercised in the studies we are about to inaugurate. I may perhaps be permitted to glance at another inducement to these studies, in the happiness that is sure to arise, not only from the acquisition of knowledge, but from this very improved and enlightened power of observation, which opens to us pleasurable perceptions of beauty, symmetry, order, and structure, not only in the skilled works of our fellow men, but more especially in those of our great Creator. Such being a few of the advantages which a knowledge of drawing gives to one and all, it is needless to attempt to impress upon you further its value as a part of *General Education*. I say General Education, for as we have fortunately arrived at an age of the world when it is thought necessary that all should read and write, I trust, for the reasons I have stated, the time is coming when it will be felt necessary that a knowledge of drawing should, as far as possible, be imparted to every man. And here it may be necessary to remark shortly upon one or two exceptions which have been taken to such studies. Some there are who deny that all are capable of being taught to draw; while, on the other hand, some imagine that by such general teaching the land will be overrun with would-be artists. The fallacy contained in both these exceptions has in some sort a common origin. To begin with the first. If it were declared that all are *equally* apt to receive instruction in drawing, it would be as

Induces the
study of
Nature.

Objections
answered.

untrue in this case as it is in any and every other branch of education ; but no one doubts that all can be taught to write ; that is, that the eye can be taught correctly to perceive, and the hand be made obedient to describe, certain forms. And *drawing* is but the extension of this correct perception and hand-power to other and more complicated forms and relations ; in some cases, as in Linear Geometrical Drawing, guided and assisted by instruments, and governed by absolute measurement ; in others, an extension of the free-hand practice easily growing out of the power required for writing. And although, as has been said, the relations become more complicated and intricate as we proceed from the imitation of flat examples to draw solid and material forms, the point at which impossibility is theoretically fixed is not to be found, and recedes from us as we advance ; and the experience of the teacher tends to demonstrate, that a small and available amount of power is attainable by all. The truth seems to be, that the fallacy has arisen from substituting the idea of that inventive faculty which constitutes the true artist (and which, although improvable by proper culture, must exist independent of it) for the mere technical means for its expression, as drawing, painting, or modelling. These latter are in themselves, inasmuch as they are imitative, only mechanical, as purely so as reading or writing ; and this suggests the error of those who think that education in these elementary studies will produce a host of artists ; no more, it may be replied, than the general spread of reading and writing has filled the land with authors, since the inventive mind must in both cases be added to the expressive means. This leads us to the real value of widely-extended instruction ; it is to form an audience fitted to understand, in the one case, the true author, whether poet, historian, or dramatist ; in the other, the true artist, the poet in another tongue, in the language of beauty and ideality, the *Ornamentist*, the *Painter*, or the *Sculptor*. To educate such an audience is one of the first duties of the new Department of Practical Art ; preliminary even to the duty of educating designers in the principles of true taste ; for it were indeed worse than useless to improve design without an instructed public to appreciate it ; to call into existence works of chaste and refined excellence and beauty, whilst the public, grovelling in profound ignorance, are unable to appreciate them ; loving rather the coarse and tawdry finery which surrounds us on every side and wherever we turn, and which is made marketable from the want of that very education which it is our duty to endeavour to supply, and to which we are here this day to give the first impulse.

Inventive
and mechanical
power
defined.

Having said thus much on the classes about to be formed, as to the use of the knowledge of drawing which is to be acquired in them as a part of general education, I must now refer to them in connexion with "*Ornamental Art*,"—with those more advanced schools of which they tend to form a part, the Schools of Ornamental Art throughout the country. The object of all such schools is, in the first place, to "afford an opportunity of acquiring a competent knowledge of the fine arts, *as far as the same are connected with manufactures* ;" to enable our designers and manufacturers, by the instruction therein obtained in the principles of beauty, and the skill to embody those principles, to add beauty to utility,—to adorn and decorate the useful. With this view the studies, even of the most elementary classes, such as are now about to be opened, have a special direction, and are based on Practical Geometry, and, to a certain extent, on ornamental forms. But while this is necessary from the very nature of the schools, as partly introductory to schools of ornamental art, it is also most satisfactory to find from long experience that even as a means of training the hand and eye to do their duty, this is the best and most speedy method. In Practical Geometry is found the law of all forms, the constructing skeleton of all ornament, and the source of proportion and symmetry ; and, having laid a foundation in this study, the long flowing lines, the symmetrical curves and balanced quantities of ornament, are

Benefits of art-knowledge.

excellently fitted to form the hand to freedom and educate the eye; and it may with certainty be said, that one who has passed successfully through the geometrical and free-hand section of these schools will find but little difficulty in mastering the power to delineate any other forms. But here I must impress on the student the necessity of patience and of steady perseverance at the first outset of his labours. Ornamental forms, and what are called the skeleton lines of ornament, those balanced and principal curves which regulate the due distribution of details, and are the constructing or governing forms, are the first examples placed before the students. They require to be patiently and accurately copied until certainty is obtained; and as no secure progress can be made if these are imperfectly understood or insufficiently mastered, all would do well to be diligent in conquering the difficulty at the outset, that their after progress may be easy and satisfactory. As well may the carpenter who ~~gets~~ his tenon-~~cheek~~ awry, or shoulders it out of the square, hope that his framing will be true and "out of winding," as the ornamental draughtsman who neglects or distorts these constructing forms, expect that his drawing will be correct, or his ornament perfect. In this class the first elementary difficulties are to be mastered. The student then must be patient to overcome them here, so that if, in course of time, he seeks to obtain further instruction in the higher schools, he may not be found wanting in those qualities which can alone secure success; and all may be assured that if the time they are detained at elementary studies is or appears to be long, their progress will from this cause be more satisfactory and secure. The examples in this class which have been selected for them to copy have been selected for beauty of form, and many of them from the finest specimens of ancient ornament; they contain some of the choicest elements of beauty, such as elegance of line, proportion, and symmetry of parts with variety of detail, added to just and beautiful distribution of quantities; and their study will improve the sense of the beautiful, while they are fitted to give power of hand and correctness of eye.

Finally, I may remind you, that, since learning to draw is acquiring a new language,—a new means of expressing our thoughts, and only a means,—there is a period when the inventive powers, the thoughts themselves, of such as continue to study with a view to becoming ornamentists, are to be called forth, stimulated, and directed; and in the higher Schools of Ornamental Art, as well as in the Museum, the Library, and the Lectures of this Department at Marlborough House, these aids to invention will be found. In the Museum the student will see the best and choicest thoughts of others embodied and carried into actual execution. In the Library, and illustrated works therein, he will find the record and description, in the art language he has learnt, of those works which we are unable otherwise to possess; and he will do well to remember the remark of Sir Joshua Reynolds on this subject:—"Invention," says he, "is one of the great marks of genius; but if we consult experience we shall find, that it is by "being conversant with the inventions of others we learn to invent, as by "reading the thoughts of others we learn to think." Such acquaintance with other men's thoughts the Museum and Library are calculated to supply; and in the Lectures the student will have explained to him the laws of harmony and combination, which are the grammar of this new language, and the principles which are to guide and direct the ornamentist in the application of his acquired art to the purposes of the manufacture, and the means, the processes, and the powers of the manufacturer; while in the class rooms he will be aided and instructed in applying the knowledge he has acquired, and the thoughts which have been awakened and fostered, into actual practice.

All this, however, requires long and persevering labour. In regard to far higher things we are told, that it is "by a patient continuance in well-doing" we must "seek for glory and honour," and the same course is necessary as regards earthly emulation; and it is one of the great excel-

lences of art, that, nourishing, as it does, the love of beauty, order, and perfection, it is so far the enemy of vice that he who would succeed in it must cultivate his mind, and strive to improve his general intelligence and information, making him at the same time a better workman, a better artist, a better member of society, and a better man.

II.

The MODE OF PROCEEDING for establishing CLASSES or SCHOOLS for ELEMENTARY INSTRUCTION in ART.

No. 6.—*Announcement of the Board of Trade.—Establishment of Elementary Classes or Schools for Drawing and Modelling, so far as may be possible within the limits of the Parliamentary Grant.*

Mode of proceeding in establishing elementary drawing classes and schools.

"The Lords of the Committee of Privy Council for Trade having had under their consideration the Report of the Select Committee of the House of Commons on the School of Design, in which the Committee recommend "the important object of widely diffusing sound elementary instruction throughout the country," hereby give notice that they are willing to assist, so far as the means at their disposal permit, in establishing classes for acquiring elementary instruction in art in connexion with existing public schools and institutions in various localities, with a view of diffusing a knowledge of art among all classes of the public, whether artizans, manufacturers, or consumers, and of preparing students for entering the Schools of Practical Art, heretofore known as Schools of Design.

Schools of Practical Art already exist in the Metropolis: one for males, at Somerset House, with an elementary branch at Westminster; one for females, at 37 Gower Street, Bedford Square; and one mixed school, at Spitalfields; as well as mixed schools throughout the Kingdom, at Belfast, Birmingham, Cork, Coventry, Dublin, Glasgow, Leeds, Limerick, Macclesfield, Manchester, Newcastle, Norwich, Nottingham, the Potteries, Paisley, Sheffield, Stourbridge, Worcester, and York.

Towards aiding the establishment of classes or schools for acquiring elementary instruction in art, in the advantages of which it is desirable that all classes of the community should have the opportunity of sharing, my Lords are willing—

1. To appoint a competent master, and to guarantee the payment to him of a certain income for a limited period, in case the fees to be derived from the instruction of the scholars should not suffice to pay the master's salary.
2. To assist in furnishing samples of suitable drawing copies, models, coloured examples, and books, at half the prime cost of them.
3. To afford samples of drawing materials, such as black-boards, drawing-boards, paper, slates, chalk, pencils, &c.; and to give such information as will enable the managers and scholars to obtain those materials in the readiest way.

On the following conditions:—

1. That a committee of management be formed, either by corporate or parochial authorities, or persons engaged in schools of any description, or by persons interested in the object, or that a responsible person come forward who must engage to give effect to the following regulations:—
 - (a) To give the names of not fewer than three public schools for boys and girls in the locality willing to receive at least one lesson per week in drawing, and pay 5*l.* at least a year towards the expenses.
 - (b) If a distinct school for drawing is required, then the Committee are to provide, keep clean, warm, and light a suitable room, at their own liability; and to give the names of not less than twenty male or female scholars who will attend the school, if opened, for a period of not less than three months, at a payment of not less than 6*l.* per week each scholar.

2. That such Committee shall be prepared to collect, and account for, the fees paid by the several schools, and from the students in the separate schools; conduct and manage the school; provide for stated and periodical visits of inspection by members of the Committee; be responsible for the attendance of the master; contribute, at least, half of the fees received towards his salary; dismiss him for incompetency or misconduct, reporting the same to this Department; engage to follow the course of instruction prescribed, and make an annual report on the proceedings of the school, on or before the 31st of October.
3. The hours of attendance and the amount of fees to be paid by the scholars to be regulated by the Committee and the General Superintendent of the Department of Practical Art, according to local circumstances.

Communications respecting the establishment of such classes and schools, marked on the address "Elementary Instruction in Art," to be addressed—

To the Secretary of the

Department of Practical Art,

Marlborough House, Pall Mall, London.

Form of Re-
quisition for
an Element-
ary Draw-
ing School.

The following requisition (of which a printed copy may be obtained by application to the Secretary of the Department of Practical Art, Marlborough House, London) must be filled up. If the printed form is not used, then the requisition should be written out on foolscap paper.

Requisition for establishing Classes for acquiring of Knowledge in Form and Colour in the Public Schools, or for the Establishment of a School of Elementary Art (*as the case may be*) at

To the Secretary of the Department of Practical Art.

We, the undersigned [*Members of the Corporation of* ,
or of the Vestry of , *or connected with the School of* ,
or otherwise, as the case may be], being desirous of having elementary instruction in form and colour given in the public schools at
and of establishing a separate school for that purpose at [*as the case may be*]

in connexion with the Department of Practical Art, hereby request you to move the Lords of the Committee of the Privy Council for Trade to nominate a master for the purpose, and to assist in providing examples, copies, &c., necessary for the use of such classes and school, for which we are willing to pay half the prime cost.* And in consideration of such assistance, we hereby undertake to form ourselves into a Committee of Management, to see that instruction is given to all the scholars in each public school, and to provide, keep clean, warm, and light a suitable room, at our own liability, for the separate school; to keep the examples for the use of the school, and to preserve the same to the best of our ability; to collect and account for the fees according to such rates as may be agreed upon between ourselves and the General Superintendent of the Department of Practical Art; it being understood that in no case is the fee to be at a less rate than 6*d.* a week for each scholar attending the separate school; to apply the whole of the fees paid by the public schools and at least half of the fees of the separate school in paying the salary of the master and the expenses of the school; to conduct and manage the separate school; to visit and inspect it at proper intervals; to be responsible for the proper attendance of the master, and to dismiss him for incompetency or misconduct; reporting such dismissal to the Superintendent; to see that the course of instruction prescribed by their Lordships is properly followed; and to make an annual report on the proceedings of the school on or before the 31st of October.

And herewith we append the names of

* The prime cost to the Department of a full series of examples is estimated at 15*l.* 14*s.* for each separate public school, and 68*l.* for the central school. The Department is prepared to furnish the examples at half these amounts, viz., 7*l.* 17*s.* for each public school, and 33*l.* for the distinct school.

- 1.—
- 2.—
- 3.—

being public schools in
and also the names of twenty persons who are willing to attend the separate
school, if established, for a period of not less than three months.

[Here follow the signatures and addresses of the requisitionists.]

[Then follow the names and occupations of the persons who propose to attend
the separate school.]

No. 9. *Information to be furnished by the Locality.*

Department of Practical Art, Marlborough House, Pall Mall, London.

To enable the Board of Trade to consider, with reference to claims from
other places, the application dated the day of from Proofs of
desire of
neighbour-
hood to par-
ticipate in
drawing
school.
for assistance in forming an elementary drawing school, it is necessary
that replies to the following inquiries be returned to the Secretary of this
Department.

1. What public schools, for either sex, already exist in
which make any charge whatever for instruction?—(Underline those schools
where drawing of any kind is taught.)

2. State name of every school in
the managers of which would be willing to accept the advantage of in-
struction from a drawing master appointed by the Board of Trade, who
should give in that school an hour's lesson publicly, at least once a
week, to all the scholars; for which instruction those managers would be
willing to pay to such master a sum of at least 5*l.* a year.

3. Are the Committee of Management of the proposed drawing school
of opinion that they would be able to form a class for teaching drawing to
students occupying a higher position in society than artisans; and who
would pay at least 1*s.* a week?

4. Are the Committee of Management of opinion that they would be
able to obtain subscribers, say of 1*l.* and upwards a year, who might have
the privilege of presenting students to the proposed school, to pay a lower
fee than 6*d.* a week for the Artizan Class, and a lower fee than 1*s.* for the
General Class?

5. Would the Committee of Management, after duly encouraging the
teaching of the simplest elements of drawing in the local public schools,
be willing that every student, under 16 years of age, before admittance to
the proposed drawing school, should be required to possess the ability to
draw the letters **A O S** in fair outline,* of the height of 12 inches.

No. 27. *Official Arrangements for Elementary Schools.*

The requisition for elementary classes and instruction at
being under the favourable consideration of the Board of Trade, the requi-
sitionists are requested to supply information on the following points of
inquiry. Official ar-
rangements
for establish-
ing local
schools.

1. The names and addresses of the Chairman, Treasurer, and Secretary of
the proposed Committee.

2. The name of the party with whom correspondence from this Depart-
ment is to be carried on.

3. The name of the street in which the proposed school is to be
situated.

4. A ground plan of the room or rooms proposed to be used for the
School, and a statement of the arrangements proposed for lighting by day
and night, ventilation, &c., should be forwarded. (The Art Superinten-
dent will send advice on this subject, if the information supplied is not
sufficient.)

* Copies of these letters are published by Messrs. Chapman and Hall, of 193 Piccadilly,
London.

5. Whether the school be already provided with suitable desks and drawing boards? if not, it is recommended that those described in the accompanying pamphlet, pages and , be ordered by the Local Committee. If so ordered, when are they likely to be ready?

6. Are the Committee prepared to order the collections 1, 2, and 3, named at pages and .

7. When can the school be opened?

8. Do the Committee agree to pay the master the whole of the fees of the public schools, and half the fees of the distinct school, and concur in the conditions of the accompanying form of appointment of the master?

Arrange-
ments for
rooms.

No. 28. *Memorandum respecting the choice of Rooms for a Drawing School.*

1. It must be ascertained what number of students are likely to attend, or it must be decided whether any limit is to be set to the numbers.

2. Whether the greater number of pupils are likely to be evening or afternoon scholars; i. e., whether the school is to be opened in the afternoon or evening, or both.

3. The size of the apartment will depend on the number of students which it is proposed to accommodate. Generally speaking, it will be necessary to allow to each student a space of two and a half feet square; and hence, by marking off on the floor the space which, consistently with the direction of the light and other considerations, may be occupied by benches, it will not be difficult to ascertain the suitableness of a room for the accommodation of the proposed number of scholars, so far as space is concerned.

4. If the school is to be opened only during the evening, and consequently for the greater part of the year to be lighted by lamps or gas, one of the chief difficulties in the choice of a room, namely, the quality and direction of the daylight, will be in a great measure avoided. If it is to be a day school, the following rules respecting the light must be attended to:—

a. The aspect should, if possible, be northerly or easterly.

b. The windows should reach at least twelve feet above the floor; and in all cases side windows are preferable to skylights.

c. If skylights are unavoidable, the glass should be ground or otherwise rendered partially opaque, to prevent the passage of the direct rays of the sun. The same precaution must be taken if a room has side windows looking towards the south or west.

5. It is desirable that proper provision be made for the good ventilation of the room.

6. It is desirable that the walls of the room should be one colour—an olive green or rather a neutral tint is preferable.

7. A large press should be provided to hold the drawing copies, &c.

No. 21. *Form of the Appointment of a Master.*

Form of ap-
pointment
for masters.

At the Council Chamber, Whitehall,

the day of

185 .

By the Right Honorable the Lord of the Committee of Privy Council appointed for the consideration of all matters relating to Trade and Foreign Plantations.

With the view of affording temporary aid in promoting the establishment of a drawing school, and drawing classes in my Lords are prepared to contribute towards the income of the master of the proposed school, during the first year of its existence, at the rate of £ a year, certain; and, if the master's share of the fees to be received for instruction do not, when added to the sum of £ make his whole receipts £ for the year, then my Lords will be prepared to make up the deficiency so that his income shall amount to £ for the first year. After the expiration of the

first year, whether any allowance is to be afforded in aid of the master's income must depend upon the position of the school, and future arrangements with the Local Committee.

In granting this assistance, it must be understood that the master must teach only from the examples and copies recognized by the Department of Practical Art, and according to the course recommended by my Lords. He must endeavour to render the school useful to *all* classes of the community. He must give instruction in drawing in any schools which the Local Committee may select, besides the drawing school. He is to consider himself subject to the authority of the Local Committee, and their officer: and the continuance of his engagement after the first six months must depend upon the pleasure of the Local Committee. It is understood that the master is to be entitled to the whole of the fees of the several schools he teaches, and half the fees received from the students of the distinct school, in addition to the salary of

Upon these terms my Lords are pleased to appoint
to the office of master of the drawing school at _____ and
his duties and salary are to commence on the _____ day of _____

Secretary of the Department of Practical Art.

III.

The DUTIES of the MASTERS, with a LIST of the ARTICLES and EXAMPLES requisite for Teaching.

First Elementary Instruction.

Elementary instruction in art may be divided into two grades. The commencing or primary classes are established with the view to give instruction in drawing simply as a language useful in every relation of life, and have reference rather to a power of expressing FORM by lines than to any ornamental or other special direction of the studies. At the same time, the examples used and the instruction given are of a character to lay a right foundation for the studies of distinct elementary drawing schools. In these the teaching, although still of an elementary character, may have a special tendency to qualify the student for entering the Government Schools of Practical Art, or any local schools of the same kind which may hereafter be founded.

The Requisites for teaching drawing.

Qualifications and Duties of Masters.

Masters appointed to elementary drawing classes are expected to be acquainted with the works used in the Department of Practical Art on geometry and perspective; they must have passed successfully through the four first stages of the instruction given in the Schools of Practical Art, as well as a class for free-hand drawing of the solid forms used in the elementary schools; they must be acquainted with the simple laws of colour as embodied in the diagram of colour. Every distinct elementary drawing school should be the centre for instruction in drawing given to other schools for general education in the neighbourhood. The masters are required to give instruction at stated times, particularly in the evening, in the rooms of the central school to which they are appointed, and to attend at least once a week at each of the schools subscribing in the locality, as contemplated in the paper of questions. (See p. 13.)

Distinct Elementary Drawing Schools:

Beyond instruction in form—as a language useful to all in the daily business of life—which is given in the first elementary classes, the masters in distinct elementary schools are required to direct the studies of the students as they advance in power, with a view to their entering the Government Schools of Practical Art, established to improve the taste of the public generally, and to impart to the artizan or mechanic such an

Tendency of these classes to provide students qualified to enter Government Schools of Practical Art.

appreciation of what is really beautiful in design in the manufactures on which he may be employed as shall enable him successfully to execute the works of the designer.

Qualifications and Duties of Teachers.

Masters appointed to conduct distinct elementary schools are required to possess a certificate of having passed successfully through a course of geometry and perspective, through the six first stages and stages 10 and 12 of the Government Schools of Practical Art, and a drawing class for free-hand and colouring the solid forms supplied to elementary schools, and of possessing a knowledge of the simple laws of colour.

Furniture and Articles requisite, which must be procured at the Cost of the Locality.

The central school of a town or district, as well as the subscribing schools in connexion with it, will require to be furnished with,

Suitable desks and drawing-boards. If they have to be provided, then they should be of the character recommended in the accompanying plans and section.

Description of Drawing Desk.

Fig. 1. Front view. Fig. 2. Section endways.

AA, Fig. 1. A, Fig. 2. A wooden rail screwed to iron uprights cc to hold the examples.

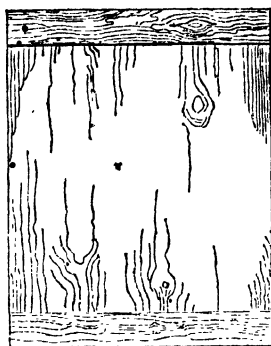

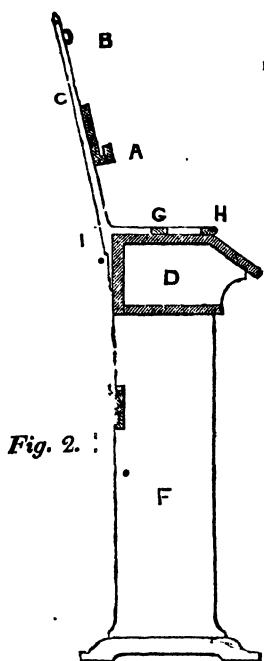

BB, $\frac{3}{8}$ inch rod passing through eyes in the $\frac{3}{8}$ inch iron uprights ccc to support the examples.

ccc, $\frac{3}{8}$ inch iron uprights screwed to the desk at 1, and punched at the upper end to receive the iron rod B.

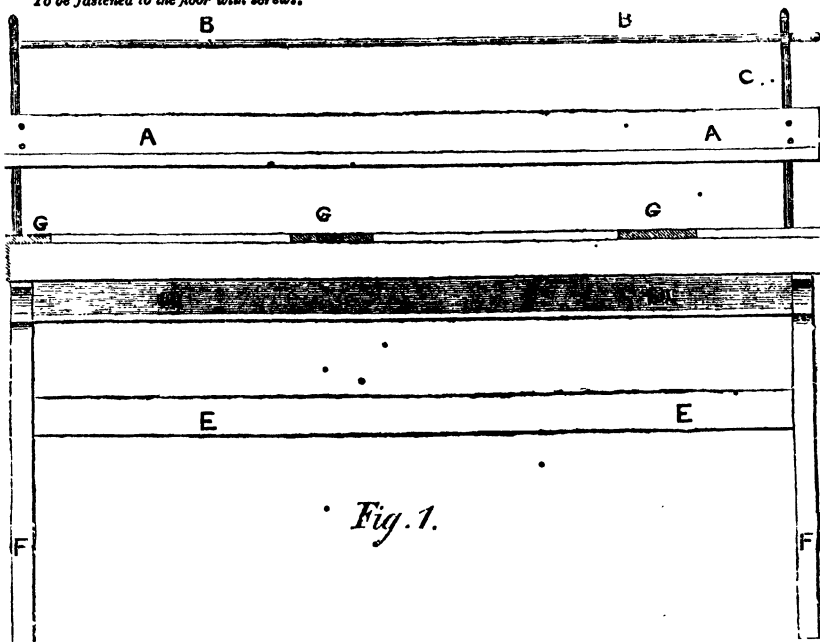

DD, hollow space to hold the students pencils, knives, &c.; EE wooden rail to stiffen the uprights FFF.

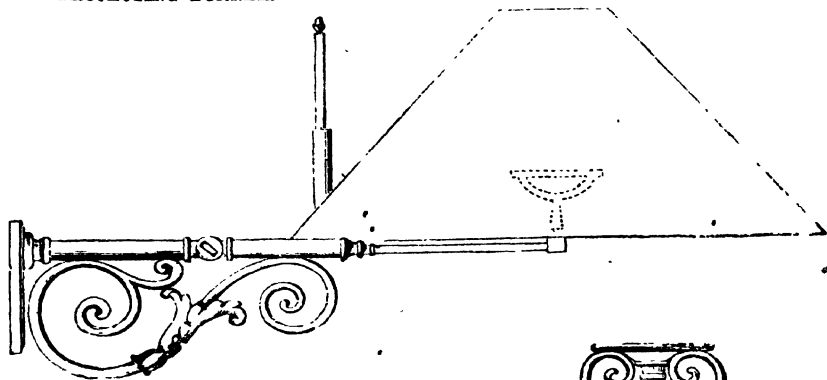

GG, Fig. 1, short fillets, as shown at G, Fig. 2, placed opposite each student, to retain the board or example more upright, if necessary.
H, Fig. 2, a fillet running all along the desk to prevent pencils or crayons rolling off.

*Elevation and Section of the Desk and Drawing Board recommended
for the use of the Drawing Schools in connexion with the Department.*

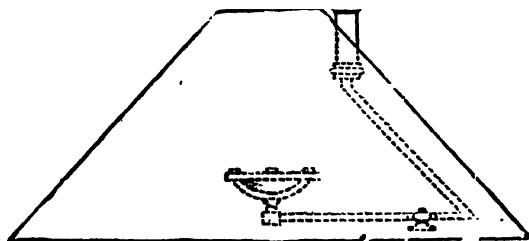

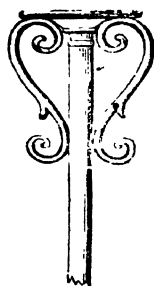

To be fastened to the floor with screws.

PROJECTING BURNER.**GAS BURNERS AND
SHADES,**

Both pendant and projecting from the wall, recommended for the use of schools in connexion with the Department of Practical Art. Supplied by Mr. Forrest, Neville's-court, Fetter-lane, Fleet-street, London; to whom all applications should be made, and not through the Department.

Two lights with burners such as are shown in the woodcuts, are, if properly disposed, sufficient for an apartment of 20 ft. by 30 ft.

LIST of the EXAMPLES, &c., which may be obtained through the DEPARTMENT OF PRACTICAL ART by National and other Public Schools at half the prime cost. Terms of supplying examples.

The Lords of the Committee of Privy Council for Trade having had under their consideration several applications from the managers and masters of National and other Public Schools for grants to be made to them of drawing copies, and examples used by the Department of Practical Art, in teaching elementary drawing, think it necessary to adopt some general principle which shall regulate the decisions of the Board in reference to such applications.

My Lords already have fully recognized the great importance of elementary drawing to all classes of the community, in all relations of life, and have expressed their opinion that the first step to be taken to elevate public taste in the appreciation of correctness of form, is to cause drawing to become a part of national education. Their Lordships are therefore desirous that the Department of Practical Art should assist, as far as possible, in promoting the distribution of the means of accomplishing this object; but as the indiscriminate gift of examples to all applicants might lead to abuse, it is necessary to require some guarantee that the examples will be duly appreciated, which the mere request to have them does not imply.

The principle which governs the whole proceedings of the Department, in all its branches, is to afford partial aid; and to encourage, but not supersede, public exertions in promoting education in art. Thus the means of study in the Museum of Ornamental Manufactures are afforded, lectures are given, and students are enabled to obtain the best instruction in all the schools by payment of low fees in aid of the expenses; and my Lords consider that the same principle should be observed in the distribution of examples. They have therefore resolved that the Department shall have the power to assist schools with examples for teaching drawing, upon the condition that the applicants are willing to pay half the prime cost of them. By this means, when a school is willing to subscribe 1*l.*, the Department will furnish examples of the value of 2*l.*, and so on, as far as the Parliamentary Grant will permit.

A list of the examples of drawing copies, models, casts, and materials, which the Department will be prepared to furnish on these terms, AS SAMPLES, may be obtained of the Secretary of the Department of Practical Art, Marlborough House, London. It should be distinctly understood, that the privilege of purchase of these samples can be obtained only by public and *not* private schools, and *not* by individuals.

It is desirable that every public school should possess *all* of the three following collections of examples, &c., if they can be afforded. If this be not possible, then it is recommended that they be procured in the order 1, 2, 3; any one of the three collections may be obtained, but *portions of a collection cannot be procured of the Department*. Applications for portions should be made to Messrs. Chapman and Hall, 193 Piccadilly, London.

COLLECTION 1,*

Which may be procured of the Department by any public school for *twenty-seven shillings*, being half the prime cost to the Department. If a further supply is required for the same school, then the full cost to the Department will be charged.

1. A black-board.
2. Brass holders for chalk, as samples.
3. Wooden compasses, and white chalk.
4. Slip and two set squares.
5. T. square.
6. A set of each of the letters A O S, mounted.
7. A set of twelve outlines on black and white grounds, mounted.
8. A set of twelve plates of outlines for the black-board, mounted.
9. A large diagram of colour, mounted.

* Private schools, or individuals, wishing to possess these collections, may obtain them, or any part of them, upon application to Messrs. Chapman and Hall, of 193 Piccadilly,

Collections
of examples.

10. A small diagram of colour, mounted.
11. A manual and catechism on colour.
12. Definitions in plane geometry, by Mr. Burchett.
13. Two colour boxes, as samples.
14. Two cases of instruments, as samples.
15. Catalogue of the articles in the Museum at Marlborough House, with six prospectuses of the Department.
16. Addresses of the Superintendents on elementary drawing.
17. Addresses of the Superintendents on the facilities afforded by the Department for acquiring art-education.
18. Five placards of the principles of decorative art.

COLLECTION 2,*

Which may be procured of the Department by any public school for *2l.*, being half the prime cost to the Department. If a further supply is required for the same school, then the full cost to the Department will be charged.

1. A stand with a universal joint, to show the solid models, &c.
2. One disc and two wires. One solid cube. One wire cube. One sphere. One cone. One cylinder. One hexagonal prism.
3. The elementary work on Practical Geometry, 12 inches by 17 inches. Diagrams opposite the text.
4. The elementary work on Practical Perspective. 12 inches by 17 inches. Diagrams opposite the text.
5. The drawing book of elementary outlines of ornament, by Mr. Dyce, 75 plates, mounted and "Kalsomined;" i. e. the surface may be washed.
6. A set of the 15 first plates of the elementary work on Practical Geometry (same as No. 3), mounted and "Kalsomined."
7. A set of 26 plates of Practical Perspective, mounted and "Kalsomined."
8. Three specimens of pottery. *Minton's bottle*, No. 508. *Indian Jar*, 487. *Celadon Jar*, 489.

COLLECTION 3,*

Which may be procured of the Department by any public school for *2l. 10s.*, being half the prime cost to the Department. If a further supply is required for the same school, then the full cost to the Department will be charged.

1. One set of outlines of ornament, by Mr. Herman, 12 plates mounted and "Kalsomined,"—i. e. the surface may be washed.
2. One set of outlines of the human figure, by Mr. Herman, 20 plates mounted, &c.
3. Four outlines of Tarsia, from Gruner's ornaments, mounted, &c.
4. One set of examples of ornament shaded, 4 plates mounted, &c.:—viz., the antique scroll, Greek honeysuckle, frieze from Ghiberti gates, and renaissance rosette.
5. Shaded examples of Biga, or ancient car, from Gruner, mounted, &c.
6. Six coloured examples of flowers, mounted and "Kalsomined":—viz. the pelargonium, petunia, nasturtium, camelia, wallflower, *althæa frutex*.
7. Three selected vases in earthenware (Wedgwoods No. 176, 882, 940).
8. Three selected pateræ.
9. Three selected pieces of ornament in relief.
10. Three large shells, such as *Dolium chinense*, *Murex colosseus*, *Pecten opercularis*.
11. Three other selected shells, such as the *Haliotis Virginea*, *Cassia Rufa*, *Cassia Glauca*.
12. Three selected stuffed birds, as examples of colour, such as *Crimson Tanager*, *Orange Oriole*, and *Blue Mountain Parroquet*.
13. One copy of Redgrave's Report on the "design" of articles exhibited in the Great Exhibition of 1851, half bound.

* * Payments must be made in advance. If the articles are not fetched away, they will be packed at an additional cost, and sent at the risk of the purchaser.

* Private schools, or individuals, wishing to possess these collections, may obtain them, or any part of them, upon application to Messrs. Chapman and Hall, of 193 Piccadilly.

A Collection of Casts* for use in Drawing Schools, recommended by the Department of Practical Art, and exhibited by permission at Marlborough House, of casts. Pall Mall, London.

No.	Subject, Where from, and Date.	Price of each Cast.

To the Secretary of the
Department of Practical Art.

2. Ordered to be sent the _____ day of _____ 1853.
3. Sent _____ day of _____ 1853.
4. Letter of advice sent _____ day of _____ 1853.

NOTICE.

The first step to be observed in order to obtain the appointment of a master from the Department of Practical Art, is to give the names of *three* public schools in the district, which are willing to procure the necessary examples for teaching by paying half the prime cost of them. This entails an expense to the school of about 7l. 17s., or less, according to its means.

What sum can be afforded should be stated, and each school must also pay 5l. a year for instruction, to be given once a week to the *whole school*, both boys and girls.

The next step, if deemed necessary, is to find a room, with firing, lighting, &c., for a central school where *all* classes may receive instruction in the afternoon and evening, as indicated in the form of requisition.

(No. 7.)

Committee of Council on Education, Council Office,
Downing Street, 18 August 1852.

SIR,

In reply to your letter of the 28th ultimo, and its enclosures, I am directed to renew the expression of the readiness with which the Committee of Council will contribute all the assistance in their Lordships' power towards effectuating the object of the Board of Trade in the formation of classes for instruction in elementary drawing.

You will see, from my letter dated 3 April 1851, that my Lords have already furnished the Board of Trade with a list of all the schools under the inspection of Her Majesty's Inspectors of schools in those places where the Board of Trade has established schools of design.

In the same letter my Lords have adverted to the fact that their powers are very much limited to those of recommendation.

They have published the correspondence with the Board of Trade in the Minutes (vol. 1. of 1850-1), and they are disposed to think that, if the managing committees of the local schools of design were severally instructed to communicate with the managers of the schools under Government inspection in the same places, and to bring under their actual notice the offer made, in your letters of the 30th of December 1850 and of February 1851, by the Board of Trade, for the gratuitous instruction of schoolmasters and the supply of apparatus, extensive advantage would be taken of the proposal; but it will probably be found necessary that the initiatory step be taken by the committees of the schools of design, as my Lords apprehend that the managers of elementary schools will hardly apply for themselves without some such impulse.

My Lords are disposed to think that the plan of gratuitously instructing schoolmasters at the school of design, and their supplying them with the means of teaching (what they may have learnt) in their own schools, is more likely to succeed than that of sending round a special instructor in drawing to the several schools at a fixed charge.

At any rate, my Lords would recommend that the former proposal should not be withdrawn, even if the second be added to it.

I have already stated that my Lords think that the local impulse should be communicated to the several elementary schools under inspection in each place by means of direct application to them from the committees of the schools of design in the same quarter. It appears to my Lords that in this way only can the facilities offered be brought home to the immediate cognizance of those whom they concern.

The committees of the schools of design, where such institutions already exist, should, by deputation or circular, make known specifically the facilities that are offered for forming schools of elementary drawing, for the gratuitous instruction of common schoolmasters, and for the attendance (and at what charge) of special instructors in the same art.

It might be a question, hereafter, what effect my Lords might give, in the examination of apprenticed teachers before payment of their annual stipends, to that passage in their Lordships' Minutes of 1846, which encourages proficiency in drawing in those localities where their Lordships had been certified that due facilities for such proficiency were within reach of the school.

In the meantime my Lords will be happy to place in the hands of Her Majesty's Inspectors copies of your letter of the 28th ultimo and its enclosures, if you will furnish me with thirty copies of your printed documents (No. 6. and No. 9.) for the purpose.

I enclose also a list of the training schools under inspection. These institutions are some of the most likely either to furnish students for attending a central drawing school, or to avail themselves of the services of, an attendant master.

It will be found, probably, that in all of them drawing is more or less taught; but it might be in the power of Her Majesty's Inspectors, in conjunction with the officers of the Board of Trade, to organize this part of the course of training much more perfectly than at present. While on this part of the subject, I may inquire whether it would be in the power of the Board of Trade to delegate some special officer who might assist Her Majesty's Inspectors in testing the proficiency of the students in drawing, and in reporting upon the means for their instruction. It might, perhaps, be requisite, if it were found that the authorities of these institutions were willing to enter into the views of the Committee of Council on Education and the Board of Trade, that the officer of the Board should arrange to accompany Her Majesty's Inspectors in their tours of inspection to the several training schools in the course of next year.

I have the honour to be, &c.,

W. R. Deverell, Esq.

(No. 8.)

Department of Practical Art, Marlborough House,

24 August 1852.

SIR,

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of your communication of the 18th instant, and to transmit to you, for the use of Her Majesty's inspectors of schools, fifty copies of a document * on the establishment of elementary drawing schools, at page 24 of which are copies of the papers enclosed in my letter of the 28th of July last.

With reference to the proposed inspection of training schools, and other points raised in your letter, I am to say that my Lords will give them their best consideration, and communicate with you further.

I have the honour to be, &c.

(Signed)

W. R. DEVERELL,

Secretary.

The Secretary of the

Committee of Council of Education, &c.

(No. 9.)

Department of Practical Art, Marlborough House,

4 November 1852.

SIR,

REFERRING to your letter of the 18th of August, on the subject of teaching elementary drawing, and to your observation that it might be in the power of Her Majesty's Inspectors of schools, in conjunction with the officers of the Board of Trade, to organize the teaching of elementary drawing in training schools much more perfectly than at present, and to your inquiry, whether it might be in the power of the Board of Trade to delegate some special officer who might assist Her Majesty's inspectors in testing the efficiency of the students in drawing, and reporting on the means for their instruction.

I am directed by the Lords of the Privy Council for Trade to express to the Committee of Council on Education the gratification they feel at their recognition of the importance of elementary drawing, and of their willingness to co-operate with my Lords in their endeavour to make elementary drawing a part of the education of all classes.

My Lords are of opinion, that an efficient system of teaching drawing in the training schools is one of the most necessary parts of the undertaking; and I am to say, that their Lordships will give every assistance in their power in aiding training schools to obtain the services of proper masters and proper examples.

I enclose a Minute † recently passed, by which the Committee of Council on Education will see that any public schools under their inspection may obtain drawing copies, &c., at half the prime cost to the Department.

My Lords entirely concur in the suggestion made by the Committee of Council on Education, as to the expediency of inspecting and reporting upon the system of elementary drawing taught in training schools, and on the importance of having a special officer charged with the duty of doing so; and they are of opinion that it is desirable that no time should be lost in

* See Appendix A., consisting of

- (1.)—Addresses delivered by Superintendents, on necessity of acquiring a power of drawing form.
- (2.)—Instructions as to mode of proceeding for establishing Elementary Drawing Schools or Classes.
- (3.)—Statement of Duties of Drawing Masters; with Lists of Articles and Examples requisite for teaching.

† See Appendix, Part II.

causing such reports to be made, in order that the system may be brought into proper action as soon as possible.

My Lords of the Board of Trade would, however, suggest that, as the system of inspecting normal and elementary schools for the education of the labouring classes has been organized by the Committee of Council on Education, it would be more consistent with what has been done to place the appointment of the proposed inspector of drawing in the hands of the Committee of Council on Education.

My Lords of the Board of Trade, however, think it desirable that the confirmation of the appointment should be made dependent on a certificate of competency for the peculiar duties of the office from the Department of Practical Art.

My Lords consider that an officer so appointed might properly be charged with the inspection (so far as relates to the instruction afforded gratuitously to masters and pupil-teachers of schools under the superintendence of the Committee of Council on Education) of the schools of ornamental art, and of the public schools subsidiary to them. His instructions, therefore, should be framed with a view to his reporting generally upon the means available for elementary art education throughout the country, and (as part of this subject) upon the degree in which these means are, or might be, turned to account in the schools inspected by the officers of the Committee of Council on Education. For this latter purpose he should be placed in efficient communication with Her Majesty's Inspectors of schools, and be directed to act in concert with them.

As an experimental arrangement in the first instance, my Lords would recommend that only one inspector should be appointed.

I have the honor to be, &c.

(Signed) W. R. DEVERELL,

Secretary.

The Secretary,

Committee of Council on Education.

APPENDIX.

Circular Letter to Her Majesty's Inspectors of Schools, relating to foregoing Correspondence.

Committee of Council on Education, Council Office,
Downing Street, 27 September 1852.

SIR,

I AM directed to request your attention to the correspondence between this department and the Board of Trade, on the subject of elementary drawing, which is printed at pp. 61-66 of the Minutes of 1850-1.

In continuation of that correspondence, my Lords have desired me to enclose copies of a Minute* adopted by the Board of Trade, together with corresponding forms of application† and inquiry.‡

The object of the Board of Trade in issuing these documents is further illustrated by the enclosed official pamphlet.‡

It is the wish of their Lordships of the Committee of Council on Education that you should use every opportunity which your official position may afford to encourage the formation of drawing schools, and the employment of the masters from them in common elementary day schools, pursuant to the intention of the Board of Trade.

You will notice that the development of instruction in elementary drawing is contemplated under two forms:—

1. A local committee is supposed to be constituted for the formation of a drawing school at which students are to attend in classes. Of course nothing but drawing would be taught in such a school.

* See foregoing Minute dated 7 May 1852.

† See foregoing Appendix, Part II.

‡ Appendix, Part I.

2. The managers of common elementary day schools within reach of the drawing school are supposed to put themselves in communication with its committee, in order to get the benefit of it for their own scholars. For instance they might subscribe so much in the name of their own schools, and thereby obtain the privilege of presenting so many of their own scholars as students in the drawing school; or they might obtain the attendance of the drawing master at their own school at a certain fixed charge. (See paragraphs 2 and 4 in the paper of questions.)

The proposal now made still leaves the former offer open, whereby the masters of elementary schools under inspection, in towns where the Board of Trade has established branch schools of design, may attend the classes in those schools gratuitously, and may obtain the assistance of the board's local officers in organizing classes for drawing in their own schools, as well as free grants of apparatus for the same purpose.

My Lords would be happy to learn that in any part of your district you had succeeded in giving practical effect to one or more of these recommendations.

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

Her Majesty's Inspector of Schools, &c.

Circular Letter to Principals of Training Schools under Inspection, referring to foregoing Correspondence.

Committee of Council on Education,
Council Office, Downing Street,
27 November 1852.

SIR,

I AM directed by the Lord President of the Council to request your attention to the correspondence between the Committee of Council on Education and the Board of Trade, which is printed in the Minutes of 1850-1, Vol. I., pp. 61-66.

In continuation of that correspondence, I am directed further by his Lordship to request your attention to the enclosed Circular, dated 27 September 1852, which has been addressed to Her Majesty's Inspectors of Schools, with copies of the documents therein named.

From a perusal of these papers you will see that considerable steps have been taken towards organizing local means of instruction in drawing, as part of elementary education.

It has, however, occurred to my Lords of the Education Committee, and to their Lordships of the Board of Trade, that the various training schools for masters and mistresses, which are under inspection, are the points at which the most effectual impetus can be given to the promotion of the object in view.

My Lords have felt sure that the authorities of the institutions in question appreciate the importance of this object, and will not have been slow to avail themselves of the means, already at their disposal, for obtaining supplies of apparatus, and the services of competent instructors.

But, in order to encourage and assist in organizing such efforts, it has been in contemplation, by the two departments, to appoint a special Inspector of Drawing.

This officer would be instructed to visit from time to time the several training schools under inspection, and to report to my Lords upon the means existing in each of them for instruction in drawing, and upon the success with which those means are applied.

He would further be instructed to ascertain how far the several Schools of Design, which have already been established by the Board of Trade in various parts of the kingdom, are available for, and frequented by, the teachers of

elementary schools for instruction in drawing; and he would endeavour generally to assist local managers in combining to avail themselves of the Minutes of the Board of Trade, or of other suitable means, for the promotion of drawing as a part of public education.

Before proceeding, however, to advise the Committee of Council to appoint an Inspector of Drawing, the Lord President is anxious to know whether the authorities of the training schools under inspection are generally disposed to receive the visits of such an officer. He would of course be placed officially in communication with Her Majesty's Inspectors of Schools, and his visits would be made subsidiary to, and under cover of, their general inspection (Minutes of 1850-1, Vol. i., p. 29.) He would probably be instructed to transmit his reports to this office through Her Majesty's Inspectors.

My Lords would contemplate it, as one of the results to follow in time from this step, that evidence of a certain proficiency in drawing should be afforded by each student on account of whose examination the training school receives a grant; and their Lordships would expect each training school desirous of receiving Queen's scholars to make adequate provision for imparting this branch of instruction.

In like manner my Lords might sooner or later regard it as improper to sanction the apprenticeship of pupil-teachers to masters or mistresses who had neglected to profit by the means, now about to be made generally available, for acquiring a practical knowledge of elementary drawing.

You will observe that elementary drawing is mentioned both in the Minutes of 1846,* and in the earliest document† explanatory of them, as one of the subjects in which an apprentice ought to be instructed, and as one of the attainments to be expected in a certificated teacher.

My Lords would, however, be most careful not to enforce any requirements of this nature until ample time had been allowed for making the necessary provision to meet them. They desire, however, emphatically to record their opinion that the power of accurately delineating the forms of objects ought no longer to be regarded as an accomplishment only, or the result of some rare natural aptitude, but as an essential part of education. The training and discipline which are afforded by the process of learning to draw systematically, and the value of the power when acquired, are forcibly and truly stated in the addresses (officially published and herewith enclosed among the documents previously referred to) which Mr. Cole and Mr. Redgrave delivered at Westminster on the 2nd of June 1852.

I am to request the favour of an answer as soon as it may be convenient to you to reply to this letter, after laying it before the managers of your institution.

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

SCHOOL REGISTERS.

(No. 1.)

SIR,

London, 23 December 1851.

I FEEL it to be my duty to direct attention to the imperfect manner in which attendance registers are kept in many schools, and the defective way in which consequently the average attendance is obtained.

It is impossible for the Inspector to verify the statements of the managers unless there be some prescribed form of school register adopted for that purpose.

I have the honor to be, &c.

(Signed) M. MITCHELL.

The Secretary of the
Committee of Council on Education.

(No. 2.)

Committee of Council on Education,
Council Office, Downing Street,
31 December 1851.

REVEREND SIR,

I HAVE the honor to acknowledge the receipt of your letter of the 23rd instant.

Her Majesty's Inspectors are required to note those schools in which the registers are either imperfect or imperfectly kept. The Committee of Council would consider continued neglect in this particular as a ground for ultimately withholding annual grants from the school in question.

I have the honor to be, &c.

RAGGED SCHOOLS.

(No. 1.)

BRISTOL INDUSTRIAL RAGGED SCHOOL.

Committee of Council on Education,
Council Office, Downing Street,
11 June 1852.

REVEREND SIR,

I HAVE the honor to acknowledge the receipt of your report on this school.

There is no objection to the apprenticeship of pupil-teachers in schools where industrial is combined with intellectual instruction ; but this is not the only feature, nor even the characteristic feature, of ragged schools. These institutions, by the offer of food and of gratuitous instruction, affect injuriously such schools as recognize the responsibility of parents to pay for the education of their children, and they tend in the same degree to weaken the sense of this responsibility in the labouring class. In the present state of society, these may be necessary evils, or even (in comparison with other and greater evils) benefits. It is, however, of extreme importance to maintain a distinction between those schools in which the children pay fees, and do not receive food, on the one hand, and those schools, on the other hand, which assume the scholars to be paupers. One way of making this distinction on the part of the Government is, to refuse to pay the stipends of pupil-teachers in schools of the latter class. Apprenticeships were sanctioned in some few

instances of the kind, before the subject had been much considered; but, although my Lords are not prepared to say that they would absolutely decline to repeat the experiment, still they are by no means disposed to do so on a large scale; and they would require very cogent reasons to be stated in any particular case for a departure from the general rule. The position of the pupil-teacher is a public one, and my Lords think that it should be understood, as it is formally declared*, to be a prize for the children of independent parents who make sacrifices to educate them properly.

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

The Rev. H. W. Bellairs,
H. M. Inspector of Schools, &c.

(No. 2.)

Philanthropic, Red Hill,
11 August 1852.

SIR,

I HAVE the honor to enclose to you a Memorial to the Committee of Privy Council on Education relative to the obtaining aid from Government grants to ragged schools, and to the conditions on which that aid may be most advantageously afforded; and I would beg the favor of your laying the same before their Lordships at your early convenience.

The memorial emanates originally from a meeting of those interested in the prevention of crime and the reformation of juvenile offenders, held at Birmingham in December last. Its presentation has, however, been delayed, partly from the desire of ascertaining the sentiments of the friends of ragged schools in our larger towns and cities, and partly from the feeling that the recommendations of the Committee of the House of Commons on Destitute and Criminal Juveniles might render it unnecessary to trouble the Committee of Council on the subject. The Parliamentary investigation having been necessarily left imperfect, and the promoters of ragged schools in Liverpool, Hull, Bristol, &c., &c., being anxious that no further delay should take place, I have the honor at once to forward it to you, and to express my hope that your own favorable consideration will be given to the best means of extending the aid which is now afforded by different channels, to the innocent on the one hand, and the criminal on the other,—to that intermediate and truly pitiable class, which, while below the level of the one, has not yet sunk to that of the other, and should be, if possible, saved from falling into it.

I have the honor to be, &c.

(Signed) SYDNEY TURNER.

Enclosures in No. 2.

(Enclosure A.)

MEMORIAL to the Committee of Privy Council on Education in behalf of
Ragged Schools or Free Day Schools for the Destitute.

YOUR Lordships memorialists respectfully beg to represent that an increasingly large class of schools called the ragged schools or free day schools for the destitute, intended for those children who, by reason of the vice, neglect, or extreme poverty of their parents, are inadmissible to the

* Vide "Pupil-teacher Broadsheet," page 67, as to certificates required for admission of a pupil-teacher to apprenticeship.

existing school establishments recognized by your Lordships, do not and cannot receive any fair proportion of the Parliamentary grant for public education, under the existing regulations, yet that for their maintenance in an effective condition they require it in a far higher degree.

They cannot at present receive such aid, for the following reasons :

1. The neglected condition of the children requires very peculiar qualifications in the master, and not only would it be impossible for many an excellent ragged school schoolmaster to go through the examination required by your Lordships for certificated teachers in ordinary schools, but, were he able to do so, such capability would by no means test his fitness for his peculiar duties, while other qualifications of a very different kind are indispensable. The masters therefore are not aided.
2. The arrangements respecting pupil-teachers and stipendiary monitors are inapplicable in ragged schools. Such arrangements are devised for the purpose of training teachers. It cannot be your Lordships desire to train teachers for the next generation from the most degraded children of this ; and even were it desired to form teachers from this class of society, the want of early training, no less than the character of the instruction given in ragged schools, would render the children trained in them unable to pass the examination which is required.
3. The industrial training given in ragged schools, which is a most important part of their system, tends to form habits of industry rather than to teach a trade ; and though its results have been found to be very beneficial, yet the fluctuating nature of such schools prevents that progress which your Lordships regulations require in the case of ordinary schools.
4. The buildings for such schools are necessarily in poor parts of towns, and, however well adapted they may be for the purpose, they will seldom be such as would receive a grant from the Committee of Council under existing regulations.
5. The schools themselves must necessarily be in such an educational condition that they would hardly be considered entitled to receive grants of books and apparatus under your Lordships present regulations.

Ragged schools or free day schools for the destitute are therefore at present virtually excluded from aid.

They perform, however, a very important work, by acting on a class as yet uninfluenced by religious or general education ; but such schools, to be of use, must be efficiently conducted. To be so, a much larger amount of support is required than suffices for the maintenance of ordinary day schools, inasmuch as no pence are paid by the children, and a larger staff of teachers, many of them industrial, is required.

The most strenuous efforts on the part of benevolent persons have hitherto failed to raise an adequate income for such schools, or to carry them on as they would desire.

Your memorialists would therefore respectfully but earnestly pray,

1st. That masters who give satisfactory proof that they are fitted to carry out the objects of ragged schools be aided by a grant from your Lordships.

2d. That monitors articulated for two or three years, and undergoing an examination calculated to test their fitness for assisting in these schools, should receive, as in ordinary schools, a reasonable payment for their services, and that a greater number of them should be allowed.

3d. That your Lordships conditions in respect of buildings, industrial training, and apparatus should be so modified as to meet the circumstances of such schools.

Signed on behalf of the Committee of Conference on Preventive and Reformatory Schools,

DAVID POWER, Treasurer.
 SYDNEY TURNER,
 JOHN MAGREGOR,
 Honorary Secretaries.

(No. 3.)

• Committee of Council on Education,
 Council Office, Downing Street,
 10 September 1852.

REVEREND SIR,

ADVERTING to the memorial enclosed in your letter of the 11th ultimo, on behalf of ragged schools and free day schools for the destitute, I am directed to inform you that the Committee of Council is not prepared to adopt any further Minutes for the special appropriation of a part of the present vote for education to schools of this class.

In reply, therefore, to the several prayers of the memorial I am desired to state that,—

1. My Lords, as guardians of the public purse, feel bound to require, in augmenting the salaries of teachers, that evidence of positive attainments up

to a certain point shall be given in a form capable of being recorded. Their Lordships cannot admit that the standard prescribed for the lowest class of their certificates exceeds what may fairly be required of every schoolmaster who seeks public recognition; nor do my Lords conceive that it falls within their province to remunerate, independently of this standard, the peculiar qualifications which you state to be essential in the masters of ragged schools.

2. My Lords would not object, where a boy in a ragged school had during a considerable period continued to give undeniable evidence of good character, and a special aptitude for becoming a teacher in such a school, to apprentice him to the master on the ordinary terms.

The enclosed Minute*, so far as it relates to assistants, might also be rendered available; but my Lords would not consent to sanction such apprenticeships with the same readiness as in common schools, nor generally to make this class of children direct recipients in their own persons of money raised by taxation.

3. Grants for the purchase of books and maps might be made to ragged schools on the same terms as to other schools, and my Lords have already adopted Minutes which would enable them to make grants for the erection or hire (one half the rent) of workshops, and for the purchase of tools.

Where master workmen (not being otherwise remunerated as teachers at the public expense) are retained, my Lords would consider themselves at liberty to allow a fee for the average number of children under each such master's instruction, at a rate not exceeding 10s. per annum for each scholar.†

Beyond admitting ragged schools to these forms of aid, my Lords are not prepared to recognize them specially in distributing the grant for education.

I have the honor to be, &c.

The Rev. Sydney Turner,
Red Hill, Reigate.

(Signed) R. R. W. LINGEN.

EVENING SCHOOLS FOR LABOURING CLASSES. ‡

(No. 1.)

Circular Letter to Her Majesty's Inspectors of Schools, &c.

Committee of Council on Education,
Council Office, Downing Street,
24 September 1852.

SIR,

I AM directed to forward for your information the enclosed copy of a letter (A), from your colleague, the Rev. J. P. Norris, relative to the employ-

* Minute dated 23 July 1852, vide supra, page 10.

† *Ragged Schools*.—The characteristic difference between ragged and common schools for the poor seems to be this:—the former are attended by a class of children who, without special provision, will never learn to work for their living; while the latter are attended by a class who will, in the common course of things, learn to work, but will fail to obtain any due measure of moral and intellectual preparation for life. In the former, therefore, *labour*, in the latter, *learning*, is the staple of instruction; not, of course, exclusively, but in the main. Now the average cost per scholar in common elementary day schools under Inspectors appears to be (including their Lordships annual grants) rather more than 28s. per annum, of which sum about 10s. 3d. is derived from public sources.—Minutes of 1851-2, Vol. i., p. 144.

‡ See Minutes of 1851-2, page 74, for a correspondence with the London Diocesan Board of Education, on the subject of *Evening Schools*.

ment of assistant teachers in evening schools, with their Lordships reply (B.) thereto.

I have the honor to be, &c.
(Signed) R. R. W. LINGEN.
Her Majesty's
Inspector of Schools, &c.

Enclosures referred to in the foregoing Circular.

(Enclosure A.)

SIR. 18 September 1852.
ADVERTING to the Minute of the 23d July 1852, and the explanatory letter which accompanied it, I beg to be informed whether their Lordships would allow such assistant teachers to attend for half the day in the day school assisting the master, and in the evening to take charge of an evening school under the master's general direction, but not necessarily in his presence.

Thus the great difficulty of providing for the conduct of night schools would be met.

Excepting for this purpose, I see no likelihood of any demand for assistant teachers in my district.

I have the honor to be, &c.
(Signed) J. P. NORRIS.

The Secretary of the
Committee of Council on Education, &c.

(Enclosure B.)

Committee of Council on Education,
Council Office, Downing Street,
22 September 1852.

REVEREND SIR,

I HAVE the honor to acknowledge the receipt of your letter, dated 18 September 1852, in which, adverting to the Minute of the 23rd of July 1852, and to the explanatory letter which accompanied it, you inquire whether their Lordships would allow *assistant teachers* to attend for half the day in the day school assisting the master, and in the evenings to take charge of an evening school under the master's general direction, but not necessarily in his presence; and in reply I am directed to inform you that my Lords, so far from entertaining any objection to the proposed arrangement, had it in view when they adopted the Minute in question.

It would, however, have to be understood that the evening school must be inspected by Her Majesty's Inspectors, and that the principal teacher, if not always present, would nevertheless be present at, and in personal charge of, the evening school sufficiently often to keep him acquainted with its state, and to make him personally responsible accordingly.

I have the honor to be, &c.
(Signed) R. R. W. LINGEN.
To the Rev. J. P. Norris,
Her Majesty's Inspector of Schools, &c.

(No. 2.)

Extracts from Letters concerning Evening Schools.

Extract from letter addressed to Committee of Council on Education, and from reply thereto.

"At present we have not before their Lordships any application in regard to pupil-teachers, and I presume this is no obstacle to the teacher obtaining the

government grant in aid,—although, in addition to a morning and afternoon class, he teaches an evening class for the six winter months of the year.”

[Reply.]

THEIR Lordships would not consider a certificated teacher disqualified, under the circumstances stated in your letter, for receiving a grant in augmentation of his salary, provided that Her Majesty's Inspector were able to report that the master's duties in the two schools were fairly compatible with each other.

My Lords desire, however, to impress upon the managers of your school the necessity of extreme caution with reference to the employment in an evening school of a teacher who assiduously discharges his duties in an elementary school during the day.

*Extract from letter from Committee of Council on Education, dated
15 January 1853.*

THE Committee of Council has not undertaken the promotion of night schools except in connexion with common day schools.

If a night school were established independently of a day school, my Lords might, on being satisfied with the particulars, assist it with a grant at the usual rate for the purchase of books and maps, but such a school would manifestly be unsuitable for the apprenticeship of pupil-teachers, and (except in connexion with a day school) would not be thought to afford sufficient employment for a master and assistants to warrant the payment of augmentation grants, or of stipends pursuant to the minute of 23 July 1852.

MIDDLE AND ENDOWED SCHOOLS.

CORRESPONDENCE relating to a MIDDLE SCHOOL.

(No. 1.)

Bromsgrove, King Edward the VIth's Grammar School.

SIR,

Bromsgrove, 22 April 1852.

THERE are always twelve boys here as blue-coats, who are educated in English (not classics), and between sixty and seventy whose education includes the classical languages, but who learn writing, arithmetic, &c. more or less from the blue-coat boys' master,

A young man, recommended to me by Mr. Wilson of Westminster, has just come as the master. He is very anxious to qualify for a Government certificate. Under what circumstances could this school be open to inspection so as to allow of his getting extra pay from Government, or at all events qualifying himself to stand an examination?

Will H.M. inspector examine the twelve blue-coat boys, and will their Lordships of the Education Committee certify the master on so small a number.

I have the honor to be, &c.

The Secretary of the
Committee of Council on Education.

(Signed) J. D. COLLIS.

(No. 2.)

Committee of Council on Education,

REVEREND SIR,

Council Office, Downing Street, 1 May 1852.

I regret to state, that as the grammar school at Bromsgrove is not primarily intended for the education of children of the labouring classes, my Lords could not admit a master from it to be examined for a certificate of merit.

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

The Rev. J. D. Collis, Bromsgrove.

(No. 3.)

SIR,

Bromsgrove, 3 May 1852.

IN reference to your reply of the 1st instant, I wish to observe that, though this grammar school is not intended primarily for the sons of the labouring classes, yet the *twelve blue-coat boys* are exclusively taken from the labouring classes; and the master I want examined and certified has the *entire* management and control of their education. Will this fact make any difference? Also, the certificate is what is wanted, not any gratuity to the master or school.

I have the honor to be, &c.,

The Secretary of the

(Signed) J. D. COLLIS.

Committee of Council on Education.

(No. 4.)

Committee of Council on Education,

REVEREND SIR,

Council Office, Downing Street, 7 May 1852.

IN reply to your letter of the 3rd instant, I am directed to inform you, that, as the twelve blue-coat boys appear to be mere accessories to the school, and do not determine its general character, it cannot be considered as falling within the scope of their Lordships' minutes, which are confined to schools for the children of the labouring classes.

The examinations for certificates of merit are confined to those teachers on whose behalf the managers of their respective schools apply for grants in augmentation of their salaries, and in whose cases the conditions of such grant are fulfilled. My Lords could not allow their certificates to become mere testimonials, or to lose that connection with the general scheme of their administration, which alone justifies such an expenditure of the time and labour of public officers as is employed on these examinations.*

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

The Rev. J. D. Collis, Bromsgrove.

Committee of Council on Education,

SIR,

IN reply to your letter of the 20th instant, I have the honor to inform you that the Committee of Council on Education has no authority to advise the trustees of endowed schools in acting under the powers which may be given to them by the terms of their several foundations.

The school of which you speak may be visited by one of Her Majesty's Inspectors in pursuance of an application to be made to the Committee of Council, by the trustees, in the enclosed form.†

* Vide Minutes of 1850-1, vol. i. page xevi.

† *Memorial inviting Inspection. Church of England Schools.*

To the Right Honorable the Lords of the Committee of Council on Education.

MY LORDS,

The undersigned, being *
of the School for the Education of the Children of the Poor in the Parish of
in the County of request that your Lordships will
provide for the periodical inspection of this School by an Inspector appointed under
the Order in Council dated 10 August 1840, and will cause this school to be
periodically examined in conformity with the instructions issued under that Order.

The undersigned will be careful to secure for the Inspector, at his periodical visits, every facility for the examination of the scholars and of the discipline and management of the School.

Signed this

day of

185

* The Sole
Trustee and
Manager
or
The Major
part of the
Trustees and
Managers.

Her Majesty's Inspector would confer with the trustees, and report to my Lords, as to the best mode of organizing the school so as to become an efficient institution for the daily instruction of children belonging to the labouring class of society, and attending school from their own homes; such schools only being those with which their Lordships' department is officially concerned.

It would be for the trustees, on a communication of his report, to consider whether their powers would enable them to act in the manner recommended.

The plan of allowing the master to take boarders of a superior class would place the school beyond the pale of their Lordships' administration; not so, however, if, in addition to the free boys (who are presumed not to be boarded), a certain number of other boys from the same rank in society were admitted at a rate of payment falling fairly within the means of a labouring man in the neighbourhood. The school would thus fulfil the purpose of an ordinary parochial school.

It is very undesirable in constituting a school of this description to engage a master who looks to children of the middle class as his proper pupils. The master of such a school should be one specially trained for the elementary education of the children of the poor. I enclose a list* of the institutions under Government inspection at which such masters are trained, and from the principals of which all information as to engagements may be obtained. You would not be likely to obtain a good master from one of those institutions for less than an assured income (from all sources) of 60*l.* per annum, with a house rent-free. One of the best masters would expect something like 100*l.*

The apprenticeship of pupil-teachers is not offered primarily as the means of augmenting the master's emoluments, but of providing him with a better, because permanent, class of monitors than he could otherwise obtain, whom, in return for this assistance in the management of his school, he is expected to train and instruct specially in his own vocation of schoolmaster. The Government pays the apprentices' stipends, and a moderate gratuity to the master for instructing them out of school-hours.

The Committee of Council makes grants to those schools only which fall within the description already given.

The principal forms of assistance available for the maintenance of schools are set forth in the enclosed schedules,† as well as the conditions on which such assistance is offered. The trustees, however, will do well to defer making any specific application of this kind until after the visit of Her Majesty's Inspector.

I have the honour to be, &c.

Sampson, S. Lloyd, Esq.,
Bank, Birmingham.

(Signed) R. R. W. LINGEN.

A MIXED MIDDLE AND ELEMENTARY SCHOOL.

Committee of Council on Education,

REVEREND SIR,

9 February 1853.

I HAVE the honour to acknowledge the receipt of your letter of the 2nd inst.

It appears from the copy of the regulations, which you enclose, that the school is now divided into an upper school and a lower school; the scholars in the former making larger payments quarterly; those in the latter making smaller payments weekly. I am directed to remind you that this arrangement is contrary to that which was in force when my Lords consented to make annual grants to the school, as you will perceive from the following extract from a letter addressed to this Office on the 17th of August 1849, in reply to a special inquiry on the subject:—"In the practical regulations of the school,

* Vide *supra*, page 45.

† "Broad Sheets" and Book Schedules.

"no difference is at present made between the quarterly and weekly scholars
"in any particular whatever."

My Lords do not make grants to schools constituted, in this respect, as the school is at present.

In order to bring it within the scope of their Lordships' administration, whatever subject or degree of instruction is to be had in the school must be offered at the usual school-fee (viz. a sum fairly within the means of the working class to pay); and all the scholars, while within the walls, must be treated upon a footing of perfect equality. If certain scholars of superior station pay a higher rate, this must remain strictly matter of private arrangement between their friends and the authorities of the school, as the price of their admission to an institution intended for the benefit of a more indigent class.

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

BUILDING GRANTS.

RESERVATION OF MINES.

Form of Covenant and Declaration to be inserted in School Deeds containing a Reservation of Mines.

AND this Deed further witnesseth that the said [*party in whose favor the Mines are reserved*] doth hereby for himself his heirs executors and administrators covenant with Ralph Robert Wheeler Lingen of Downing Street in the City of Westminster Esquire on the part of the Lords Commissioners of Her Majesty's Treasury his executors and administrators that in the event of injury or serious inconvenience being occasioned to the use of the premises hereby granted or intended so to be granted for a school by the working of the said Mines the said [*party in whose favor the Mines are reserved*] his heirs executors administrators and assigns will repay to the Lords Commissioners of Her Majesty's Treasury for the time being so much money in proportion to the injury done as shall have been advanced out of the Parliamentary Grant for the purposes of Education towards the erection of such School and that if full compensation for the injury done shall exceed the value of the money so advanced then the said [*party in whose favor the Mines are reserved*] doth hereby covenant for himself his heirs executors and administrators with the said [*grantees*] to pay over to them the difference And it is hereby further agreed and declared that all such sums so to be received whether by the said Lords Commissioners of Her Majesty's Treasury or by the said [*grantees*] shall be applied in effectuating the intent of these presents in such manner as Her Majesty's Principal Secretary of State for the Home Department for the time being shall by writing under his hand direct.

When this Covenant is inserted, the Deed must be executed in duplicate; and one part must be deposited in the Office of the Committee of Council on Education.

CONSTITUTION FOR SCHOOLS IN TRUST FOR MORE THAN ONE PARISH.

Extract from Letter, as regards superintendence of religious instruction, and as regards general management.

WITH reference to your letter enclosing a draft of the Deed whereby it is purposed to convey the site of a school in trust for two different parishes, I am to remark that, by the Deed as now framed, the superintendence of the religious instruction of the scholars is confided to the ministers of those two

parishes indifferently. The Committee of Council on Education, in similar cases, and with a view to leave no disputable points upon the face of such instruments, has advised that the superintendence of the religious instruction should be assigned to the principal officiating minister of the parish *in which the school is situated*, and that the minister or ministers of the other parishes included in the trust of the school should be appointed to be *ex-officio* members of the committee of management.

I am directed to return the draft Deed for reconsideration with regard to the foregoing point, which, if left unsettled, might hereafter raise a question of powers as conferred by the Deed and as incident to the office of the parochial clergyman.

(Signed) R. R. W. LINGEN.

BOOK GRANTS.

DEPÔT LIBRARIES.

Letter inquiring as to a Grant of Specimen Copies of Books and Maps for Libraries of a Training School.

SIR,

Westminster, 16 June 1852.

I AM instructed to ask of their Lordships the favour of the grant promised in their Minutes of a specimen copy of each of the books named on their Lordships' list, to be deposited in the library appropriated to the use of the male students in our training institution.

And the favour of a similar grant on behalf of the library appropriated to the use of our female students. You are aware that our institution is designed for 40 female, as well as 60 male, students, and that the apartments of each branch of the institution are as independent and isolated as though they had been provided in separate buildings. The library, therefore, of the male students is inaccessible to the female students, and for them we have, of necessity, a distinct library for their sole use. We trust that on this ground our female students will be allowed to participate in this very important donation of their Lordships.

I have the honor to be, &c.

(Signed) M. C. TAYLOR,
Secretary.

The Secretary of the
Committee of Council on Education.

Reply to foregoing Letter.

Committee of Council on Education.
Council Office, Downing Street,
28 June 1852.

REVEREND SIR,

ADVERTING to so much of your letter of the 16th instant as relates to specimen copies of the books and maps named in their Lordships' Schedules, I am directed to refer you to the correspondence (Minutes of 1850-1, Vol. i., pp. lxxiv-ix), in pursuance of which such grants are made.

From a perusal of that correspondence, you will see that these grants are made for the purpose of establishing depôts which the managers of schools and other promoters of education may be able to visit in their own neighbourhood.

When the training school is made the place of such a depôt, it is an additional advantage that the students, as well as the public, can make use of it; but the use in both cases equally is intended to be that of seeing what any particular work is, and not that of employing it in private study.

Students in training schools must be supplied conformably to the Minute of the 10th of December 1851.

My Lords could not grant duplicate copies to the Wesleyan College at Westminster, since one of the sets at least would in that case have been granted for the sake of the students only, and not for the sake of visitors.

At the same time My Lords will be happy to consider an application from the Wesleyan Education Committee, pursuant to the correspondence which is herein-before mentioned, for the establishment of one or more specimen depôts, either at Westminster or in such situations as may be the most convenient for the local promoters of Wesleyan Schools.

I have the honor to be, &c.

Rev. M. C. Taylor,
Wesleyan Training School,
Westminster.

(Signed) R. R. W. LINGEN.

ANNUAL GRANTS.

(No. 1.)

PUPIL TEACHERS AND CERTIFICATED TEACHERS.

Kirkby Overblow, Wetherby, Yorkshire,

31 August 1852.

SIR,

I shall feel greatly obliged by your informing me—

1. If any other persons than pupil-teachers or stipendiary monitors are eligible for Queen's scholarships in the event of their entering at any of the training schools in connexion with the National Society, or with Diocesan boards, &c.?

What is understood by a pupil-teacher being "advanced a year?"

Is the age reckoned from the preceding birth-day? *E.g.*, would a youth aged 16 on June 21 last be now ineligible to become a candidate at the succeeding examination?

4. Is it requisite that a candidate should have been under instruction for any particular period of time in the school at which he presents himself for examination in order to become a pupil-teacher, or is it sufficient that he should have been long known to the clergyman and schoolmaster of the parish, and have already had some practice in teaching?
5. What are the rules and regulations under which persons are permitted to become candidates for a master's certificate?

I am, &c.

The Secretary of the
Committee of Council on Education.

(Signed)

Curate of Kirkby.

(No. 2.)

Reply to foregoing Letter.

Committee of Council on Education,

Council Office, Downing Street,

2 September 1852.

REVEREND SIR,

I HAVE the honor to acknowledge the receipt of your letter dated the 31st of August 1852.

1. Upon reference to the passages marked on the first and second pages of the enclosed letter (Form 35)*, you will perceive that those only are eligible to compete for Queen's scholarships who have completed their apprenticeship as pupil-teachers, or are within a limited time of doing so.

period has not always harmonized with the season allotted by Her Majesty's Inspector for his annual visit to the school, or with the date of the indentures of the pupil-teachers apprenticed in it. Serious inconveniences having arisen from this discrepancy between the school year as reckoned from the date of the Inspector's visit, and as reckoned from the date at which each annual augmentation grant falls due, my Lords have directed—

1. That in every school in which pupil-teachers are engaged, the pupil-teacher year, i.e., the year reckoned from the month assigned in the indentures for the commencement of the apprenticeship, shall henceforth be regarded as the school year for all purposes, and that all the annual grants awarded in support of the school shall be calculated with reference to years thus computed.
2. That in schools where no pupil-teachers are engaged Her Majesty's Inspectors be requested to appoint certain months for their annual visits, and that the school year in each case be henceforth reckoned from the 1st day of the month so allotted.

In accordance with this plan, the school year in your school commences on the 1st day of _____, but the yearly grant in augmentation of your salary is conditionally due at _____

There is an interval of _____ months between these two periods; and the augmentation of your salary for the current year, which is proposed to be paid up to the 1st day of _____ next, will consequently have to be calculated for _____ instead of twelve months. In future years the usual amount will be conditionally payable on the 1st day of the above-named month, and payment will be made as nearly to that day as possible.

For further information as to the effect of the arrangements now announced, I beg leave to refer you to the enclosed broadsheet.*

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

(No. 5.)

Letter from Her Majesty's Assistant Inspector of Schools, the Rev. J. W. D. Hernaman; with reply thereto.

Certificate of merit held more than five years; further endorsement thereon.

SIR,

Clifton, 3 February 1853.

I SHALL feel obliged if you will inform me what course to pursue when a certificate has been held by a master more than five years, and is consequently filled up.

The case which has induced my present inquiry is that of Mr. B. Wilson, master of St. Michael's National School, in Bristol, in whose certificate favourable entries have been made each year by the Rev. F. Watkins.

I have the honor to be, &c.

The Secretary of the

(Signed) J. W. D. HERNAMAN.

Committee of Council on Education, &c.

(No. 6.)

Reply to foregoing letter.

Committee of Council on Education,
Council Office, Downing Street,
9 February 1853.

REVEREND SIR,

I HAVE the honor to acknowledge the receipt of your letter of the 3rd instant.

* Vide Minutes for 1850-51, vol. i. page xcvi.

I am directed to inform you that My Lords see no impediment to entering additional notices of inspection on the back of a certificate after the five spaces on the face of it have been filled up.

Supposing the sixth notice to be unfavourable, and the other five to be favourable, My Lords think that thus much allowance should be made for the number of notices that (in some sense) might appear to be fixed by the structure of the document, viz., that, except in an extreme case, the sixth entry should not be forthwith made, but the teacher should have a year's grace to act upon the caution verbally conveyed to him by Her Majesty's Inspector, before having the producible value of his certificate reduced. Such a caution would, of course have to be reported to the Committee of Council by Her Majesty's Inspector.

I have the honor to be, &c.

The Rev. J. W. D. Hernaman, (Signed) R. R. W. LINGEN.
H. M. Assistant Inspector of Schools, &c.

EXAMINATIONS FOR CERTIFICATES OF MERIT.

Committee of Council on Education,
Council Office, Downing Street.

SIR,

I AM directed to request that you will have the goodness to prepare the papers named in the enclosed list, to be used at the ensuing examination of candidates for certificates of merit.

Instructions issued to H. M. Inspectors for the preparation of papers whereon to examine candidates for Certificates of Merit.

The number of sections which each paper is intended to comprise is stated in a separate column in the list. Each section should comprise three questions, with a certain connexion in the subject matter, and progressive in difficulty. Questions exceeding this number will be omitted in printing.

I beg leave to request that you will refer to the papers which were set upon those subjects at examinations which have been recently held, and that you will adhere to the same character and standard of questions.

I am to state expressly their Lordships wish that every question should be worded in the simplest and least ostentatious language, and that the first question in each section should be of such a character as that ignorance of it would be inexcusable in any person professing even a moderate acquaintance with the subject of the paper.

The questions generally, without being vague, should be such as would naturally suggest themselves to a well-informed person, and not such as might be thought to be curious rather than essential.

The simplest questions are found to be precisely those by which it is easiest to discriminate the merits of the answers.

I have the honor to be, &c.
(Signed) R. R. W. LINGEN.

Circular Letter to Her Majesty's Inspectors of Schools, &c.

Committee of Council on Education,
Council Office, Downing Street,
16 October 1852.

SIR,

I AM directed to inform you that complaints have been made to my Lords concerning the very small degree of attention which reading (as part of elocution) receives in elementary schools.

Reading (as part of elocution) in schools under inspection.

It has been brought under their Lordships notice that out of nine Queen's scholars in a training school under inspection not one was found qualified to read the lessons in chapel.

In order to direct attention to this deficiency, my Lords think it desirable that you should, on all occasions of examining pupil-teachers, make it a point to require each of them to read to you a passage from some book, with the words of which you are not familiar, while you stand yourself at some

distance from the reader, without any book in your hand; the result to be recorded under the appropriate heading in the Form No. X.

It is unnecessary to remark that the power to read well does not depend upon distinct articulation, correct accents, and a certain exertion of the voice only, although even these mechanical parts of the matter appear to be receiving inadequate attention. It depends also, and principally, upon an intelligent analysis of the several parts of every sentence, upon the distinction of subject and predicate, of principal and accessory clauses, and, generally, upon a knowledge of the relation of each word, in sense and construction, to the rest.

The reading will be found to be best in those schools where a passage not longer than will suffice to go round the class is selected for the purpose, and is then both read aloud and analyzed with reference to the mode of reading it.

Reading lessons are, in most cases, made to serve merely as texts for lectures and questions in the subject matter of them, and it may be necessary to read much with this object principally in view. It is, however, desirable that *every school time-table should contain an entry of one daily lesson for each class in the art of reading as such.*

I am to request that you will give effect to these observations forthwith in your examinations of pupil-teachers, and that you will, as you have opportunity, direct the attention of the school managers and school teachers to the deficiency which exists.

You will receive instructions to include an exercise in the art of reading in the oral part of the next Christmas examination at the training schools.

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

To Her Majesty's Inspector of Schools, &c.

HER MAJESTY'S MOST HONORABLE PRIVY COUNCIL.

Minutes of 1846-7.

TEACHERS OR STIPENDIARY MONITORS.

Managers of the School for which such assistance is desired. Proper Forms of Application, Privy Council Office, Downing Street, London," together with such Orders under their Lordships' Minutes, and of the terms upon which such benefits are

The managers of such schools have inquired whether, seeing that instruction required, girls may be apprenticed as Pupil Teachers or Stipendiary they receive instruction in sewing and knitting from the woman? Upon their Lordships are of opinion that such apprenticeship is inadmissible. Their Lordships, to be reported by Her Majesty's Inspector, permit girls to be apprenticed, but always in her presence, such parts of the intellectual instruction

confessedly incompetent to instruct the Pupil Teachers or Stipendiary of their apprenticeship, their Lordships have been asked whether they are of opinion in communicating such additional instruction? As the condition of an apprentice in the art of teaching and managing a school, must depend

almost entirely on the conduct of the engagement except to a Pupil Teacher Monitor.

Candidates must be at least as useful as Pupil Teachers.

Their Lordships have decided that persons afflicted with infirmity, such as scrofula, fits, disease, or the loss of an arm, or a tendency to insanity, are to be rejected.

In the case of scholars given to a school, if the instruction is accidentally interrupted, the want of due proficiency becomes a deficiency of the teacher, the Inspector. Their Lordships will not

MEMORANDUM.

The period of eighteen months from the date of each award is allowed for claiming payment of Building-Grants. Grants for improvement, or enlargement, *if exceeding 50l.*, may be claimed within twelve months; *if less than 50l.*, within six months from the date of the award. Beyond these periods the Committee of Council on Education do not hold themselves responsible for payment. From this arrangement it results that a great proportion of the grants for building, improvement, or enlargement, *paid* in each year, were *awarded* in preceding years. *See two following Tables.*

The following Explanatory Table (A.) exhibits, under the foregoing heads, all the *payments* made between 1 January and 31 December 1852, including the foregoing sum of 12,184*l.* 12*s.* 3*d.*

EXPLANATORY TABLE A.

(No. II.)

DETAILED STATEMENT of GRANTS conditionally awarded by Committee of Council on Education, in aid of ERECTION, ENLARGEMENT, or IMPROVEMENT of SCHOOL-BUILDINGS for ELEMENTARY SCHOOLS; in year ended 31st of December 1852.

ABBREVIATIONS.—The letter *s.* denotes that Grant was awarded towards Erection of School; *s.* and *r.*, towards both School and Teachers' Residence; *r.*, Residence alone; *e. s.*, Enlargement of School; *e. r.*, Enlargement of Residence; *i.*, Improvement of School-premises; *f.*, Fittings; *g.*, Gallery.

* * * *N.* signifies that the School is, or is to be, in connexion with the *National Society*; *B.*, with the *British and Foreign School Society*; *W.*, a *Westleyan School*; *C. of S.*, with the *Established Church in Scotland*; and *F.C.*, with the *Free Church*.

The Grants marked * were claimed before the 1st of January 1853.

206 Annual Grants payable from Parliamentary Fund.

(No. V.)

DETAILED STATEMENT OF ANNUAL GRANTS conditionally payable, by Committee of Council on Education, in Year ending 31 October 1853, on account of PUPIL-TEACHERS and STIPENDIARY MONITORS (with Names of Apprentices, and Month in current year in which Annual Examination is to be held); as also in AUGMENTATION OF SALARIES of Certificated Schoolmasters and Schoolmistresses.

* * This Statement has been corrected to show the results of all Examinations reported to the Committee of Council before the end of December 1852, but does not include any decisions subsequent to that date. In cases therefore where reports are in arrear for more than two months (November and December), the number and standing of the apprentices have had to be stated for the current as they were for the past year. These cases are marked with an asterisk (*).

ENGLAND.*

INSPECTORS' REPORTS.

Special Report on the South Staffordshire Iron and Coal Masters' Prize Scheme for the year 1852; by the Rev. J. P. NORRIS, Her Majesty's Inspector of Schools.

SIR,

10 June 1852.

I HAVE the honor to present to you, for the information of the Committee of Council on Education, a Report on the examination of candidates and award of prizes which I undertook, with their Lordships' sanction, at the request of *The Iron and Coal Masters' Association for the Encouragement of Education in the Mining Districts of South Staffordshire*, in the months of February and March of this year.

The establishment of this Association may be regarded as an epoch of no little interest in the history of South Staffordshire. More than ten years have elapsed since the Reports of the Children's Employment Commissioners, disclosing the demoralized condition of this and other mining districts, led to the enactment of the 5 & 6 Vict. c. 99. Some of the more tangible causes of evil were arrested by this Act. Among other restrictions, the employment of children under 10 years of age, and the payment of wages in public-houses, were prohibited. Still the Reports of the School Inspectors, and more particularly those of the Commissioners appointed to inquire into the operation of this Act, showed too plainly that the root of the evil had not been reached. The Rev. H. Moseley, Her Majesty's Inspector of Schools, who visited this neighbourhood in 1846, a period of great commercial prosperity in the iron trade, thus writes:—

"The earnings of these men were, at the time of my visit, probably greater than those of any equally large body of workmen in the kingdom * * These men and their families, notwithstanding, live in more squalid and miserably dirty and worse furnished abodes, their children appear worse clad and more neglected, their wives more slatternly and poverty stricken, and about each of them fewer appliances of comfort and fewer sources of happiness have been collected, than I have observed in respect to any other labouring population. The country, not less in its moral than in its physical aspect, seems to be scorched up; and as I have stood at night on some of the surrounding eminences, and seen it extending beneath my feet like one vast and multitudinous city, lighted up by unearthly flames, and sending up from all parts great volumes of smoke and other than earthly sounds, I have been unable to separate in my mind this prospect from the impression I have received of the condition of the people who inhabit it."—(Minutes of Committee of Council on Education for 1846, vol. i. p. 177.

In Mr. Tremenhare's Report for 1850 to the Secretary of State for the Home Department, the state of society in this district is thus characterized:—

"The distinguishing feature at the present moment unquestionably is, that, as regards the labouring classes, the half savage manners of the last generation have been exchanged for a deep and almost universally pervading sensuality."

My own experience entirely confirms this statement. My duties have led me to spend some portion of each of the three last years among the village towns which lie between Stourbridge and Wolverhampton. I have visited the colliers and iron-workers both at their homes and at their work, whether in the pits or at the forges, and have at the same time been careful to put myself into communication with those who seemed best to know the real condition of the people.

I know that generalizations in these matters are for the most part untrustworthy; and with regard to other classes of operatives, I have found it difficult, and sometimes impossible, to sum up in one word their distinctive character; but in respect of the miners and iron-workers of South Staffordshire I have no such difficulty. *Improvvidence* is too tame a word; it is *recklessness*. Elsewhere improvvidence and sensuality exist to a lamentable extent, but qualified, and, as it were, under protest. Among the mill operatives of the cotton and silk districts these faults are beginning to be redeemed by a thoughtful and almost reflective cast of countenance which convinces the visitor that counteracting influences are at work. In the agricultural parts of my district, alongside of the notorious incontinency of the farm-servants, one may often observe in the improved dwellings and neatly kept gardens of the married labourer evidence that these vices are very generally giving way to sobriety and thrift in later life; but *here* young and old, men and women, married and unmarried, are uniformly and almost avowedly self-indulgent spendthrifts. One sees this reckless character marring and vitiating the nobler traits of their nature: their gallantry in the face of danger is akin to foolhardiness; their power of intense labour is seldom exerted except to compensate for time lost in idleness and revelry; their readiness to make "gatherings" for their sick and maimed comrades seems only to obviate the necessity of previous saving; their very creed—and, after their sort, they are a curiously devotional people, holding frequent prayer meetings in the pits—often degenerates into a fanatical fatalism. But it is seen far more painfully and unmistakably in the alternate plethora and destitution between which, from year's end to year's end, the whole population seems to oscillate. The prodigal revelry of the *reckoning night*, the drunkenness of

Sunday, the refusal to work on Monday, and perhaps Tuesday; and then the wretchedness of their homes towards the latter part of the two or three weeks which intervene before the next pay-day, their children kept from school, their wives and daughters on the pit-bank, their furniture in the pawn-shop; the crowded courts and miry lanes in which they live, their houses often cracked from top to bottom by the "crowning-in" of the ground, without drainage or ventilation or due supply of water—such a state of things as this, co-existing with earnings which might ensure comfort and even prosperity, seems to prove that no legislation can cure the evil. The whole character of the people must be changed, and they must be taught early in life habits of forecast and self-control.

Happily the cause and the remedy are no less patent than the evil itself.—*The cause may be found in the reckless habits of the people; the remedy is to be sought in improvement of the home and of the school.*

The same admirable series of Reports which have opened our eyes to the real state of this district have portrayed also in sharp contrast the condition of other mining districts, where improved homes and improved education have taught the people to be thrifty and temperate instead of prodigal and sensual. I need only refer to Mr. Tremenhoe's description of the Duke of Portland's collieries in Ayrshire, and those of Lord Fitzwilliam and Mr. Milnes Stansfeld in the West Riding of Yorkshire. The picture there given (Report for 1845, page 25) of the daily life of the colliers, their detached cottages, neat flowerplots, pigsties, schools and village libraries, choral societies, and manly sports, present a striking example of what may be the condition of a mining population.

Of all the results that may be gathered from Mr. Tremenhoe's evidence, that which is to me most interesting is the growing conclusion which may be traced through his several Reports, that it is not from *without* but from *within* that improvement is to be looked for. It is not from legislative enactment, from restrictions of age or apprenticeship, or the abolition of this system or that system, that we are to expect any general amelioration, but from the local energy and enlightened efforts of those upon whom, after all, rests the heavy responsibility of the continuance of the present state of things.

These efforts, as I said before, are chiefly needed in behalf of the *home* and the *school* of the operative.

It may, perhaps, be considered beyond my province to inquire how far it would be possible for the leading firms of South Staffordshire to improve the dwellings of their men. There can, however, be no doubt that much might be done by

drainage, sewerage, metalling of the bye-roads and small streets, and the introduction of water, either by placing the village towns under the Board of Health, or by the efforts of individuals.

Of the need of improved schooling, and of the existing means of promoting it, I can speak with more confidence.

The evidence which Mr. Tremenhoe has multiplied from all parts of the country shows that the increase of immorality with the increase of wages, so notoriously the case in these parts, is attributable to the low tastes and desires of the people,—that the obstinate refusal of the men to exert more than two thirds of their fair powers of work,* by which the cost of production is largely enhanced, capital crippled, and the public mulcted, is due to the same cause,—that their readiness to become the prey of unionists and agitators is traceable to their want of the most elementary principles of thought†,—that most of the accidents, which are of weekly occurrence, are occasioned by their stupidity and ignorance‡,—that wherever they have advanced in intelligence they have become more skilful, more subordinate, and more industrious§.

These facts have convinced the more thoughtful and far-sighted masters of South Staffordshire that the only sure means of maintaining their ground under increasing foreign competition, and averting a social crisis, is to reform the character of the rising generation of operatives by *education*.

It was due, I believe, to the prevalence of this feeling, as well as to a growing sense of their responsibility before God, that Mr. Tremenhoe's appeal to the Iron and Coal Masters at the beginning of last year was so readily and liberally responded to.

He represented to them, that although the school accommodation of the district had been largely increased during late years, and the race of teachers remarkably improved by the measures adopted by Government in 1846, yet that all would be of no avail unless the children could be retained for a longer period at school. It appeared from my own careful examination of the schools in the district between Wolverhampton and Dudley (including these towns) that the average stay at school was only fifteen months, and that half of the children were under eight, and very few above ten years old! It may be very possible in this brief interval of a boy's life to cram some little knowledge into his memory, but it is impossible to do what the Iron and Coal Masters, and all right-minded people, most desire, viz., *to produce a lasting impression upon a boy's*

* Report for 1847, p. 10. † Report for 1844, p. 61.

‡ Report for 1847, p. 7.

§ Report for 1844, p. 61, and Report for 1845, p. 15, and *passim*.

character, and give him habits of honesty, order, and industry. A few years ago teachers did not care much about the children's habits so long as they learnt to read and write and say their catechisms; now, happily, the training of their dispositions by gentle but steady discipline, has come to be considered the most important part of a master's task.

In order, then, to retain them longer under the good influences of school discipline, Mr. Tremenhoe proposed that a fund should be raised, and prizes offered, to such boys as could produce certificates of good character and of having continued regularly at school for two years or more, being at least eleven years of age. Twenty-three firms at once came forward, and united to form an association for the institution of these prizes, to be called "The Iron and Coal Masters Prizes." Their subscriptions for the first year were as follows:—

	£		£
Williams and Brothers	10	Brought forward	105
Thomas Davies and Son	10	Edward Cresswell and Sons	5
W. & J. Sparrow and Co.	10	Patent Shaft Company	5
John Bagnall and Sons	10	Parkfield Company	5
Richard Haines and Sons	10	H. B. Whitehouse	5
Executors of the late W. Ward	10	George R. Hickman and Son	5
Burrows and Hall	10	W. H. Dawes	5
George Jones	10	John and Edward Walker	5
W. Bullock and Co.	5	William Bennitt	5
T. & J. Badger and Co.	5	R. Rant	5
William Baldwin	5	Joseph Bennitt	5
Edward Page and Sons	5		
Richard Smith	5		
			£ 155

Carried forward - £ 105

To this the Earl of Dartmouth, being resident and interested in the neighbourhood, added subsequently a subscription of 5*l.*, making in all 160*l.*

This sum was considered sufficient for the first year's experiment, otherwise many other gentlemen would gladly have added their names to the list.

Mr. Walter Williams consented to act as Treasurer to the fund, and his son, Mr. Walter Williams, jun., as Honorary Secretary. The President of the Association is the Venerable the Archdeacon of Stafford, and the Vice President the Rev. J. H. Sharwood, Rural Dean and Vicar of Walsall.

Towards the close of the year the following circular was addressed by the Secretary to the clergy and schoolmasters of the district:—

South Staffordshire Iron and Coal Masters' Prizes, for the Encouragement of Education.

An Association having been formed among the Iron and Coal Masters of South Staffordshire for the establishment of Annual Prizes in the National Schools connected with the mining population, the following Regulations

have been adopted, subject to such amendment as further experience may suggest.

1. The examinations will be conducted by the Rev. J. P. Norris, Her Majesty's Inspector of Schools, in the months of February and March each year, in the same manner as the examinations for pupil-teacherships.

2. Candidates are to be boys of not less than eleven years of age, with a preference to such as may be older.

3. They must have been at least two years in attendance at their respective schools.

4. These schools must be under Government inspection.

5. Those who may have already obtained pupil-teacherships will not be admitted as competitors.

6. The minimum standard of attainment will be, reading fluently from the First Class Reading Book; writing correctly from dictation from ditto; the first four rules of arithmetic, simple and compound; general conduct and progress in religious knowledge being also ascertained to be satisfactory.

7. The examination for the higher prizes will extend to the higher rules of arithmetic and mensuration, and include a short essay on some subject connected with the geography or trade of the district.

8. The number of prizes allowed in each school will depend on the size and character of the school, and also on the number of candidates presented for examination. A fairly good school of 100 boys may hope to obtain one prize of 4*l.*, one prize of 3*l.*, and an additional sum of 1*l.*, to be divided or given in books, at the discretion of Her Majesty's Inspector.

9. If any school should fail to produce candidates of the minimum standard of attainment, the Inspector may transfer the amount of prize money which might have been gained by that school to any other school furnishing more than its proportion of qualified candidates.

A list of schools, from which candidates will be admissible, is being prepared by H. Seymour Tremenhare, Esquire, who originated this scheme of prizes; the Rev. J. P. Norris; and Walter Williams, jun., Esquire, the Hon. Secretary of the Association, who will communicate with the managers of the several schools respecting the time and place of examination.

(Signed) WALTER WILLIAMS, jun.,
Hon. Sec. of the Association.

Address—West Bromwich.

The result was, that early in January the Secretary was able to forward to me a list of 102 candidates who had sent in their names, specifying their ages and the employment of their parents.

On Friday the 24th of February 85 candidates presented themselves for examination in St. Bartholomew's school-room at Wednesbury; and on the following Monday 12 additional candidates were examined supplementally at Wolverhampton. The examination was the same for all; they wrote some short sentences from dictation, read a few verses from the New Testament, were severally asked one or two questions on what they had read, and worked, as far as they could, the following sums in arithmetic:—

1. Divide ten thousand six hundred and fourteen by six.

2. Subtract thirteen pounds fourteen shillings and twopence halfpenny from twenty-four pounds nine shillings and fivepence.

3. If 8 men share 7 tons 15 cwt. 24 lbs. equally among themselves, how much will each man have?

4. What is the value of 112 pigs of iron, weighing 60 lbs. each, when iron is 3*l.* per ton?
5. If 3 men can pick 100 cubic feet of coal in 9 hours, how much could 5 men pick in 4 hours?
6. What is the square root of 267,289?
7. What will be the expense of sinking a shaft 4 feet in diameter to a depth of 100 feet, at 3*s.* 6*d.* per cubic yard?
8. What amount of brickwork will it need?

The result was, that about forty boys showed an elementary acquaintance with arithmetic; twenty-four worked the first three sums without any mistake; and of these, seventeen answered the fourth question in simple proportion correctly. None showed any knowledge of mensuration. The reading and acquaintance with Holy Scripture appeared to be very unequal. The writing from dictation, with a few exceptions, was unsatisfactory; in no part of the examination were the candidates from good schools distinguished from those that belonged to inferior schools so clearly as in this exercise. The most pleasing feature in the examination was the excellent behaviour of the boys. I took occasion, after our short prayers, to say a few words on the duty of going through the examination honorably, not only "working heartily," but "as unto the Lord." And it is my belief that, with about three doubtful exceptions, not an attempt was made by any one to obtain an unfair advantage over his neighbour. This, together with the certificates of good conduct, which, with a very few exceptions, were produced, gave me unmixed satisfaction; and I could not help wishing that some of the Iron and Coal Masters could have been present to share it with me.

Eleven out of the ninety-seven candidates were found, on a further scrutiny, to be disqualified by age or character; the remaining eighty-six were invited to assemble with their teachers and parents at Walsall, in the National school-room, on Saturday the 13th of March. Here they were met by Archdeacon Hodson, Mr. Sharwood, Mr. Williams, Mr. Bagnall, and several of the clergy. The nature and object of the Association were explained, some account of the examination was given, a few words of encouragement were addressed to the boys, and the prizes were distributed by the President of the Association. The plate containing 130 sovereigns seemed to create no little sensation among the boys. Ten received 4*l.* each, and thirty, 3*l.* each. The remaining forty-six, who had failed to come up to the required standard, received books of the value of five or ten shillings, according to their degree of merit. With each prize was given a card, specifying the nature of the prize, and the merit of the candidate, signed by the President of the Association. The card has an ornamental border, containing emblems of the trade of the district, taken

chiefly from the designs on the Coal-Exchange, in London. It was debated whether the money should be given to the boys themselves, or to others for them; it was decided by the President that it should be given to the boys; and I have reason to believe that in most cases it has been deposited in a savings bank.

The masters and boys dined together, afterwards, at the expense of the Association, and drank the health of the Iron and Coal Masters most heartily. The only drawback to the general feeling of satisfaction with which the day's proceedings were viewed, was the unavoidable absence of Mr. Tremenheere, whose energy and perseverance had originated and matured the scheme.

Every one present appeared to think that this first year's trial had been a most auspicious one. The manner of the boys throughout, and especially their conduct under examination, their prompt obedience to my regulations, the serious way in which each addressed himself to his task, the perfect order and silence among a hundred boys, during three hours of examination, and, above all, the integrity with which they severally did their work, seemed to give fair promise that the Iron and Coal Masters Prize-men will be distinguished in after life for *habits of self-control and thoughtfulness*.

I wish that I could conclude my Report with these expressions of congratulation; but I must not do so. If this first year's operation of the prize scheme tends to prove (as it clearly does) that a small and select proportion of our scholars, who have been regular in their attendance for at least two years, are beginning already to manifest the true and proper fruits of education,—it has also shown, in respect of the rest, to a far greater degree than was anticipated, the magnitude of the evil which the scheme is specially intended to correct.

In order to exhibit as clearly as possible the leading results of the statistics which I collected, I will give them under two heads; showing, first, the proportion of children who attend school at all; and, secondly, the sort of schooling which they receive. For the sake of simplicity I shall give round numbers, taking care to be in each case rather under than over the mark.

And, first:—The population of the 18 parochial districts, from which the 18 schools comprehended in the scheme draw their attendance, may be put down at 120,000.

The aggregate number of children (boys and girls) on the books of these 18 schools is under 3,000.

Hence it appears that one in forty of the population are attending the *National* schools.

According to the standard estimate of the National Society (which allows for the existence of denominational and other schools) this is one fourth of the number who might fairly be expected to be so attending.

Let us, secondly, inquire what amount of schooling this fourth part of the children of the district are receiving.

About one half of the 3,000 were found to be under eight years old; and 2,300 were reported to have come and gone in the space of one year.

These facts are, I think, quite sufficient. They tell us that *a very large majority of the children of this district go to no school at all; and that of those who attend the National schools the general practice is to enter the school at seven years old, attend about three or four days in the week, for little more than a year, and then leave.*

Need we wonder that many of the iron and coal masters complain that they see little or no good resulting from our National schools? Nay, I will go further, and venture to inquire whether such schooling is not, in many cases, doing more harm than good. To talk of training the character of a child by giving him twelve or fifteen months of desultory schooling, before he is ten years old, is a cruel mockery. It may give him the knowledge of good and evil; but it cannot possibly train him to hate the evil and love the good. He is sent forth as he came, with his passions unsubdued; the only difference being that his wits have been sharpened for the devil's service. You have taught him to read—that he may drink in the poison of a treasonable press; you have taught him to write—that he may one day sign his name in a prison register, to the scandal of education; you have taught him the Holy Name of God—that he may the more fluently blaspheme Him!

And yet this is the sort of schooling that is being given to the children of the iron-workers and colliers of South Staffordshire; and this is the sort of schooling which some people still affect to think sufficient for them. "A poor man needs no more," we are told; "more than this it would be dangerous to give him." Dangerous, to give him any other than bodily pleasures! Dangerous to give him any other than worldly hopes. Dangerous to extend his view beyond the next reckoning night; to school him into habits of industry and honesty and obedience; to teach him that his greatest foe is not he who bears authority over him, but his own rebellious will! If these be the dangers of education, then ignorance has her dangers too. There may be some danger in allowing wayward children to become headstrong men, fools in virtue to graduate in vice, babes in reason to acquire the passions of age; it may be dan-

gerous that our mass of operatives should feel the daily increase of their physical force, while of moral force they have never learned the meaning. Monopolists of education may one day find that their folly has endangered their monopoly of property. Signs are not wanting that the people will endure neither monopoly much longer. It behoves us then to be wise in season; to anticipate an infidel and disloyal education by giving one that is sound and Christian. The Iron and Coal Masters who form this association have shown this timely wisdom. Two things are wanting to complete the good work:—that employers of labour should say, “we will give work to none who cannot produce certificates of at least two years regular attendance at school;” and that promoters of schools should give up the folly of supposing that mere book-learning constitutes education.

I have the honor to be, &c.

J. P. NORRIS.

*The Secretary of the Committee of
Council on Education.*

POSTSCRIPT.

January 1853.

BEING anxious to ascertain as accurately as possible the effect of the first distribution of the Iron and Coal Masters prizes, I circulated the following questions at the close of the year among the masters of the schools included in the scheme:—

1. What use did your prize-boys make of their money?
2. Did they remain at the school?
3. Do you know of any boys who are staying at the school longer than they otherwise would for the sake of competing for the prizes to be given next March?
4. What has been the effect on the school generally?

In answer to the first question, I am informed that, out of the forty boys who obtained money prizes of 3*l.* and 4*l.*,—

Seventeen have placed their money in the savings bank.

Ten have laid it out in clothes.

Five have given it to their parents.

Two have been apprenticed by means of it.

One, who became a pupil-teacher, laid it out in books.

In the five remaining cases it appears to have gone to meet the immediate needs of the family.

From the answers which I have received to the second and third questions, it appears that *two thirds* of the eighty-six boys who gained prizes of one sort or another have continued to attend school. Forty-eight boys were particularly mentioned to me, who, but for the prospect of next year's prizes, would certainly have gone to work; and the masters assure me that this is the case with several others, although their parents may not have assigned this motive so distinctly. Not a few who had recently left school are reported to have returned in the hope of gaining a prize next March. It seems likely that the number of candidates who will then be presented to me will be at least 150.

The replies to my fourth question were most satisfactory. If my space permitted, I would gladly print them at full length; but I must content myself with giving a few extracts:—

"I think the prize-scheme has had a good moral effect on the school generally. I took especial care to explain to the boys that good conduct was made the first consideration. I was much pleased to find that no ill feeling existed on the part of those boys who did not obtain prizes; but all appeared anxious to gain them at some future time."

"They set great value on their cards; they have all had them very nicely framed and glazed. I had them for some time hung up in the school-room, and I often observed very anxious glances directed towards them on the part of the elder boys. The owners of them consider them as a kind of character."

"Cooper has just left us to go into a good situation; his prize-card was of great service to him as a recommendation."

"I am certain that the prizes will have a good effect in keeping the boys longer at school."

"The boys set to work in right good earnest, with a determination to acquit themselves better at the forthcoming examination; and this too, I have every reason to hope, in a kindly and Christian spirit one towards the other."

"Westwood's father was so proud of his son's success that he has had the card framed, and it now adorns the wall of his cottage."

"All who had hopes of competing next year or soon after were stimulated to exert themselves, and have been more eager to buy books. The parents, too, of some have been more punctual in sending their children to school; and some fault-finders have not opened their mouths since their sons got 3l. or a good book, thinking, I suppose, they had wrongly estimated their progress at school."

"All the children in the two upper classes are exceedingly anxious to obtain prizes; and many of them have worked hard, getting up early in the morning, and meeting together for work, so that they may be successful in the coming struggle, not only for the prize, but also for the certificate. The school has increased considerably since last March, and this has been, I think, chiefly owing to the prizes."

"The average age of the first-class boys was 9½ years; it is now nearly 10½ years."

The reports of the schoolmasters are entirely confirmed by my own statistics.

In 1851 it appeared from the returns of these schools that out of the whole number of children above the age of infancy only sixteen per cent. were turned eleven.

In 1852 the proportion of these latter was found to have risen to twenty-five per cent.

It was feared by some that, in a district where boys of eleven and even ten years old may earn from 3s. to 7s. a week, the doubtful prospect of obtaining a prize of 3l. or 4l. would prove insufficient to retain them at school.

The facts given above prove most satisfactorily that these fears were unfounded. They prove what I have always hoped and believed to be the case, that the parents are willing to make some sacrifice for their children's education if it is offered to them in an attractive form. I believe it was the distinction of the thing, and the friendly interest thus manifested in their children by the iron and coal masters, fully as much as the prospect of 3l. or 4l., which induced the parents to allow their children to remain a year longer at school in order to enter this examination.

However this may be, the experiment has been clearly successful. The Iron and Coal Masters have the satisfaction of knowing that in the very first year of the operation of the scheme their 160l. have had the effect of securing an additional twelve months of valuable schooling to at least 100 boys.

If this had been the only result the money would have been excellently well spent; but the indirect results have been no less important.

All the schools of the neighbourhood have been stimulated, and their teachers encouraged, by this friendly notice on the part of the Iron and Coal Masters.

In other parts of my district the example has been followed, and attention has been generally called to the desirableness of extending this kind of stimulus to our elementary schools.

On the further side of Dudley a prize scheme has been proposed by W. Foster, Esq., for his own and the neighbouring works, which will be in some respects, I think, an improvement upon the South Staffordshire plan.

Messrs. Chance have, I believe, proposed similar prizes in their excellent schools at Smethwick and Oldbury.

The trustees of the Weaver Navigation in Cheshire have requested me to undertake the award of certain prizes which they have offered in the schools connected with the Trust.

The most important result, however, has been the formation of an *Association for the advancement of education in the Mining and Manufacturing District of North Staffordshire*.

By the kind assistance of Lord Harrowby and Mr. Smith Child M.P. I was able to lay my plans for the formation of a North Staffordshire Prize-scheme before a public meeting convened at the Stoke railway station by the following circular:—

(Circular.)

Council Office, Downing Street,
22 October 1852.

SIR,

It has been proposed to form an Association in North Staffordshire for the establishment of prizes in connexion with the National schools of the Mining and Potteries district, similar in some respects to that which already exists, and promises to succeed completely, in South Staffordshire.

For this purpose a public meeting will be held in the directors room at the Stoke railway station on Friday the 29th of October, at eleven o'clock; the Earl of Harrowby in the chair.

The following scheme will then be considered:—

That an examination be held in the month of October of each year to which the children of the National schools of the district will be admitted, who can produce certificates of character, and of having attended school for two years, being at the time of examination at least eleven years old. Those who pass this examination creditably are to receive small prizes, and cards stating that the bearers may present themselves three years after that date for re-examination, and then compete for larger prizes of the value of £3 or £5 each, provided that the subjoined certificates are satisfactorily filled up. Then will follow forms of certificate to be filled up, at the end of the first, second, and third years, by their employers, and also by the clergymen of the districts in which they severally reside.

The subjects of the first examination are to be one of the four Gospels and the book of Genesis, the elements of arithmetic, reading, and writing on paper from dictation.

At the second examination the elements of drawing, including the first principles of geometry, will be added to the above subjects.

It is hoped that the large prize may, by being postponed, operate as an incentive to continued study, and may be obtained at an age when its value can be appreciated.

The above scheme is merely put forth, in order to elicit further suggestions at the meeting on the 29th, at which your attendance is earnestly requested.

I have the honor to be, &c.

(Signed) J. P. NORRIS,

Her Majesty's Inspector of schools.

At this meeting the following resolutions were adopted:—

1. Popular education, by which is principally intended the formation of the character, being much hindered by the difficulty of keeping children in our public

schools after the age of infancy, and by the yet greater difficulty of maintaining any influence over them when they have left school, it is the opinion of this meeting, that means ought to be adopted to remedy these evils: (1st) By inducing children to remain for a longer period at school; and (2dly), By encouraging them to take advantage of such educational appliances as may be within their reach when they have engaged in their several employments.

2. That an association be formed "for the advancement of education in the mining and manufacturing district of North Staffordshire," by the establishment of annual prizes in connexion with the schools of the district that are under Government inspection; these prizes to be awarded with special reference to the character and conduct of the candidates.

3. That an application be made to the Committee of Council on Education, to allow their inspectors* to hold an annual examination on behalf of this association, similar to that which was held last March for a like purpose in South Staffordshire.

4. That a committee be formed for arranging the details of the examination, and of the subsequent award of prizes according to the general plan set forth in the circular letter of the Rev. J. P. Norris, subject to such alterations as may seem desirable.

5. That the following gentlemen be appointed the committee, with power to add to their number :—

William Baker, Esq., Honorary Secretary.
James Bateman, Esq.
Frederick Bishop, Esq.
Smith Child, Esq., M.P.
The Rev. F. F. Clark, Rural Dean of Stoke.
R. H. Haywood, Esq.
J. E. Heathcote, Esq.
Rev. C. Hebert, Rural Dean of Newcastle.
Herbert Minton, Esq.
Rev. J. P. Norris.

I hope to be in a position at the close of the ensuing year, to report as favourably of the operation of this Prize-scheme as I have been able to do with respect to the results of the South Staffordshire scheme during the past year.

Nor am I without hope that the success of these experiments may induce benevolent persons who may wish to confer a lasting benefit on the education of any particular district, to found prizes, by bequest or otherwise, in connexion with the parochial schools, similar to those with which the liberality of our forefathers has endowed our grammar schools and universities. I believe that 100*l.* could not be more beneficially devised than in the foundation of an annual prize in some good elementary school whose permanence had been properly secured by trust deed. The prize might be in money, or in books, or in the way of apprenticeship, according to the wishes of the founder, or it might assume the form of an exhibition to some school of higher instruction.

The necessity of extending encouragement of this sort to the children who attend our elementary schools, has not, I think, been sufficiently recognized in this country. If the schools of Practical Art and Science—the proposal of which has been one of the many valuable results of the Industrial Exhibition of 1851—become general in the manufacturing districts, it would appear most desirable that our elementary schools should be placed in the same relation to them as that which our Grammar Schools bear to the Universities. This might perhaps be most naturally effected by the establishment of such exhibitions as I have suggested.

J. P. NORRIS.

* My colleague, M. Arnold, Esq., has kindly promised his co-operation on behalf of the British and Denominational schools under his inspection in this district.

APPENDIX.

EDUCATION OF CHILDREN in the MANUFACTURING DISTRICTS of
CHESHIRE and NORTH STAFFORDSHIRE.

AT the public meeting held at Stoke-upon-Trent on the 29th of last October, some remarks made by the Earl of Harrowby on the desirableness of extending the educational provisions of the Factory Act to the Pottery District were very favourably received by the leading manufacturers who were present.

That an extension of the factory *half-time* system is urgently needed will not be questioned by any friend of education; but, with the extension, it seems no less needful that there should be an amendment of the law.

In this connection it may be well to offer the following observations on the educational effect of the law in those districts to which it is at present applied.

In 24 parishes which I have visited, large numbers of children are employed in the cotton or silk manufacture, under the provisions of the Factory Act (7 Vict. c. 15., amended by 13 & 14 Vict. c. 54.)

I believe it may be affirmed that in 17 of these 24 places the cause of education is deriving no benefit from the operation of the law.

And the reason is simply this: that the law requires no security for the efficiency of the schools attended by the factory children.

Cotton
factories.

In the cotton-manufacturing towns which lie along the upper streams of the Mersey, it is true that a great number of "half-time children"* are employed; and these are obliged by the law to attend some school for 2½ or 3 hours of each day. Where the millowner cares about education he requires that they shall go to a National or British school under inspection, and the result is so far good; but where he is careless about it, they attend any small private school which they or their parents may choose to patronize, and neither the Factory Inspector nor the School Inspector has any power to interfere. (7 Vict. c. 15. § 39.) Hence the great uncertainty which attends the operation of the law. On the one hand, in Staley, Tintwistle, and St. John's Dukinfield, nearly all the factory children attend the National or British schools, and (if I may judge by the 300 who came before me in the National schools of the above places) make tolerable progress; while, on the other hand, in St. Mark's Dukinfield, where the millowners are opposed to the National school, not a single factory child is allowed to attend it. Again, in Stockport, almost all the factory children attend irresponsible private schools, for the efficiency or even respectability of which the Factory Inspector, under the present imperfect law, can have no sufficient guarantee.

Silk
factories.

In the silk district the case is still worse; for not only is there no security for the character of the school attended by the factory children, but there is scarcely any occasion for them to attend school at all. In this species of manufacture the law only requires school attendance from children under 11 years of age (7 Vict. c. 15. § 72.); and it is hardly worth the millowners' while to employ "half-time hands" at all. Hence, in Leek, where the demand for children's labour is greater than in any town that I know†, no

* They are "children" in the language of the law, and may be employed "half time" in cotton mills, between the ages of 8 and 13. After 13 they pass for "whole-time," and are called "young persons" until 18. In silk mills they pass for whole time as early as 11 years old.

† To illustrate the amount of evil which continues untouched by the law, I will quote the following extract from my diary:—

"Leek.—In the 2 Church schools there are only 250 children; there are besides a Wesleyan and a Roman Catholic school in the town. The mass of the children in Leek go into the "shades" to twist silk at 7 or 8 years old. I went over one of these domestic manufactories, and found about 12 boys from 7 to 10 years old working under an old man, from sunrise to sunset, and sometimes, I am told, after dark. Behind most of the houses there is a long building running back, divided into stages each 6 feet high. Each stage is a sort of running-course for the manufacture of sewing silk. It has been calculated that many of these children run

"half-time hands" are employed; in *Congleton* only 25; in *Macclesfield* their number varies from 100 to 350 (in October I found 227 attending the 7 National schools of the town). Thus it appears that in these three towns, in which thousands of children are employed in the silk manufacture, the law is sending to school on an average only 250.

The Inspectors of Factories, in their Reports, have frequently alluded to the need of amendment of this part of the law.

I find the following passage in the Report of Alexander Redgrave, Esq., for the half year ended the 31st of October 1852, which he has kindly allowed me to make use of:—

"The uncertain and fluctuating nature of the attendance at school of children employed in factories is one of the principal causes which detracts from the amount of good the provisions of the Factory Act in regard to education were intended to confer. Another but minor cause (operating in some localities) arises from the selection by parents, whose choice is unrestricted, of an inferior inefficient school. Every child between 8 and 13 years of age must pass in school 3 hours of every day on which it is employed in a factory. The millowner cannot legally employ a child without having obtained certificates of its having attended school, and the parent is responsible if it be permitted to neglect school; but the law has imposed no condition and provided no security that anything shall have been learnt at school. The master must be able to teach, and have the materials for teaching reading and writing; but of the occupation of time in school and of its results the law takes no cognizance. * * *

It is vain to expect any material improvement so long as this unsatisfactory system is permitted to last. The present qualification for the labour of youth is simply age and health; it is therefore the interest of the parent, in making out the right of his child to work for longer hours and to earn increased wages, to prove it to be older than it really is, and to lessen the period of its attendance at school, which thus becomes a burden upon the parent, who relieves himself from the irksome responsibility the instant he can. But if employment were made the reward of education; if a certain amount of acquired knowledge, or a certain number of years attendance at school, were made the qualifications for labour, an interest would at once be created in the right direction; the value of education would be appreciated by those who are now insensible to it; the punctual attendance at school, and the advancement of his child, would then be the objects of a parent's solicitude; and even though that anxiety were limited by the selfish advantages he would derive from his child's qualification for employment, the great moral duty of the parent would be performed, of securing to his child the important advantages of an uninterrupted and extended course of instruction."

The remedy for this unsatisfactory state of things appears to be very obvious; that a clause should be inserted in the Act requiring that all schools attended by factory children should be under the inspection of the Committee of Council on Education.

Postscript.—I have submitted these remarks to the Inspectors of Factories, Mr. Horner, Mr. Howell, and Mr. Redgrave, and am glad to be able to subjoin the additional evidence on this subject contained in the two following letters:—

DEAR SIR,

Matlock Bath, 24 February 1853.

The particular localities mentioned in the appendix to your report are in the districts of my colleagues, Mr. Horner and Mr. Howell; but your remarks upon the proportion of schools in which the children derive any of the benefits of "education" from their compulsory schooling would apply generally to my own district. I mean that the proportion is lamentably small; not that I can commit myself precisely to figures.

Employments such as that which you found in existence at Leek are not only great evils in themselves, but incidentally, as affecting labour generally, are the cause of much injury; for even if the millowner were desirous of employing "half-timers," the option of unregulated employment makes

the factory unpalatable to parents, and infant labour is thus thrown entirely into the hands of those who give the longest day's work.

I have several instances of similar employments in my own district, which escape, with manifest injury to the mill occupiers and the hands, the regulations of the Factory Acts.

The Rev. J. P. Norris.

I remain, &c.,
(Signed) ALEX. REDGRAVE.

82, Upper Brook Street, Manchester,
24 February 1853.

MY DEAR SIR,

* * * I entirely agree in all you have said as to the very imperfect operation of the law in respect of the schooling of the factory children. It would be a very great improvement of the law if all schools attended by factory children were placed under the inspection of School Inspectors, with power to them to disallow the certificates of those which they consider unfit, under such guards as might be reasonably provided.

I earnestly hope that an Act to regulate the labour of children in the Potteries, and to make the education of them obligatory, may be brought forward. No one could do it with more effect than Lord Harrowby, and it would be a very appropriate measure to be originated in the House of Lords. I believe it would be carried there by a large majority.

The Rev. J. P. Norris.

I remain, &c.,
(Signed) LEONARD HORNER.

Report, for the Year 1852, on the Schools for Apprentices in Her Majesty's Dockyards; by Her Majesty's Inspector of Schools, the Rev. HENRY MOSELEY, M.A., F.R.S., Corresponding Member for the Royal Institute of France.

MY LORDS,

THE following table contains a statement of the number of apprentices whom I have found attending the dockyard schools at the five successive annual visits which I have paid to them.

Dockyards.	Number of Apprentices attending the schools at the time of inspection in the years				
	1848.	1849.	1850.	1851.	1852.
Chatham - -	132	92	100	61	40
Deptford - -	62	63	50	27	6
Devonport - -	231	122	110	40	37
Pembroke - -	84	64	61	54	28
Portsmouth - -	117	162	128	87	44
Sheerness - -	105	61	51	42	27
Woolwich - -	100	100	65	65	31
Total - -	831	664	571	365	213

I regret to have to call your attention to the diminution which has steadily taken place in these numbers.

The attendance of the apprentices is not voluntary, but is strictly in accordance with the regulations of the Admiralty.

The first dockyard school was opened at Chatham in 1842, when Admiral Shireff was superintendent of that dockyard, and Mr. Fincham master shipwright; and that at Portsmouth in the following year. All the apprentices were then required to attend the schools; but the mingling of youths of 19 or 20 years of age with younger boys was found to be subversive of order, as the elder were then as ignorant as the younger. By circulars under the date of June 1846 and November 1847, the attendance was therefore limited to apprentices in the four first years of their servitude. By a circular of the 19th of December 1850, it was further limited to those in the three first years.

It is not, however, so much by these limitations, as by the admission every year of fewer apprentices into the yards, that the schools have been thinned.

Last year but very few new apprentices were admitted, and this year none whatever.

The same Admiralty circular of 1851 which stopped the admissions of 1852, ordered also those of 1853 to be stopped. Should this order be carried into effect, some of the dockyard schools will be left next year almost without scholars.

Besides those apprentices who may attend them voluntarily, there will then be only —

3 in the Deptford School,
5 " Sheerness "
13 " Chatham "
15 " Plymouth "
17 " Portsmouth "

It could not but afford matter of regret to the friends of education if any exigency of the public service should lead to the destruction of these schools,

Present
efficient
state of the
instruction
in the
schools.

Apprentices
who attend
the schools
voluntarily.

which promise to make of the shipwrights in Her Majesty's dockyards the most intelligent body of workmen in the kingdom.

At no previous period have I been able to report so favourably of the state of instruction in the schools. The standard of knowledge has advanced in them. Many prejudices unfavourable to them have died away, and there has been created among the apprentices a love of learning and a spirit of self-instruction which were heretofore unknown.

Of this fact the number of apprentices who, having completed the term during which they are required to attend the schools, attend them voluntarily, affords evidence. The number is stated in respect to each school in the last column of the following table. It constitutes 40 per cent. of the whole number attending the schools.

Dockyards.	1852.		
	Whole number of Apprentices in the Dockyard.	Whole number attending the school.	Number attending the school voluntarily.
Chatham - -	104	40	16
Deptford - -	40	6	3
Devonport - -	134	37	9
Pembroke - -	65	28	16
Portsmouth - -	180	44	11
Sheerness - -	70	27	16
Woolwich - -	79	31	15
Total -	673	213	86

Among the apprentices who thus voluntarily attend the schools are included some of the most active, intelligent, and promising young men of their respective dockyards,—those, in fact, into whose hands lesser offices of trust and responsibility in the service of the dockyards must hereafter fall.

The influence of the education they have received in qualifying them, professionally, for such offices, is sufficiently evident in itself, and it is attested by that eminent naval architect, Mr. Fincham, master shipwright in Her Majesty's dockyard, Portsmouth, in a letter which I have appended to this report.

The strictly professional bearings of this question are not, however, the only ones in which it involves the interests of the public service. Education must in the case of these youths fail of one of its usual and its legitimate results if it is not associated with higher principles of action, and a more faithful and self-sacrificing discharge of public duties, than is to be expected from men raised without education to offices of trust and responsibility.

Examina-
tion of the
candidates
for admis-
sion.

By the Admiralty circulars of June 1846 and November 1847, it is provided that the schoolmaster shall examine all the candidates* for apprenticeship, and prepare a list, graduated according to the results of this examination, to be submitted to the Lords of the Admiralty.

Their Lordships state it not to be their intention by this "altogether to supersede the claims of long servitude in the father or nearest relative, but they wish it distinctly to be understood that servitude will be of no avail unless accompanied by education, and that, with the exception of some special cases, *the best educated boy will be preferred.*"

The spirit and intention of the Admiralty is shown plainly in this passage, and the entries of apprentices to the different yards were, I believe, for a year or two, made strictly in accordance with it. In an Admiralty order

* These candidates are limited to the children of persons employed in the dockyards or in Her Majesty's naval service connected therewith.

having reference to the Devonport School, under the date of 29th January 1848, their Lordships express their "regret to find the standard of education, "so low," but state that "they have done all in their power to raise it at the "next annual entry, by taking the candidates precisely as they stand upon "the schoolmaster's list, without regard to recommendations of any "kind," and they "desire the officers' particular attention to be called to "this fact."*

The apprentices entered at that time according to an educational standard constitute the present upper classes of these schools. The advantages of the regulation are not less apparent in its influence on the dockyard schools than in the impulse it has given to education outside the walls of the dockyards.

A knowledge that appointments so much desired by the dockyard workmen for their sons were not to be given, as heretofore they were supposed to be, by political influence or by private favour, but by merit, and according to education, caused them to seek out the best schools for their children, and to support the labours of the schoolmaster by their own admonitions at home.

From the dockyard workmen an opinion favourable to education appeared, moreover, to extend to their neighbours, for the schools in dockyard towns became singularly prosperous †; and there can be little doubt that if the regulations had continued to be fully carried out the standard of education and intelligence in the populations which surround the dockyards would have been largely raised thereby. ‡

The practice, however, in different yards, as it respects the examination of candidates for apprenticeship, has been very different. In all, the regulations appear at first to have been adhered to in the spirit as well as in the letter; but the letter only came afterwards to be followed in some of them. It was the obvious intention of the Admiralty, in their regulations of November 1847, to provide that the Superintendent's list of candidates should be open to the use of all persons in the service of the dockyards, and that, "except in some special cases," the best of these should have the preference. Accordingly I find that at Plymouth there were—

The educational standard for the admission of apprentices has not been adhered to.

In 1848, 78 candidates, of whom 43 were entered.

„ 1849, 77 „ 10 „

„ 1850, 65 „ 14 „

„ 1851, 77 „ 10 „

In all these entries, except the last, the spirit of the regulations was adhered to, the boys apprenticed being those who stood highest on the examination lists, except in the special cases which the regulations contemplated.

* The entries were that year 43 in number.

† I can bear testimony to this fact at Portsmouth, having been at that time inspector for Hampshire, and I have heard the same on good authority of Pembroke and other dockyard towns.

‡ Of this kind of influence the history of Devonport affords an example. I am informed that 10 years ago the Mechanics Institute of that place met over a stable, and that 30 people could scarcely then be got together to hear a lecture. There have since been three large buildings erected in Devonport for mechanics institutes; besides one (called St. George's Hall) in Stonehouse, one in Plymouth, and one at Tor Point.

With this evidence of the progress of the working classes in knowledge is associated the following, of a corresponding social and moral improvement. There is a savings bank in the dockyard (instituted in 1817), in which the workmen have invested 24,537*l.*, many having from 150*l.* to 200*l.* deposited there. There are, moreover, 3 building societies among them, of which 2 flourish well. There has been, I am assured, a marked progress in the order and subordination of the men, and in their morals. They are said to be sober men. Drinking is discountenanced, and held to be disreputable among them; and pilfering, which some years ago was carried on to a great extent, is now of rare occurrence.

In 1851 the rule was departed from, very little attention being then, for the first time, paid to the results of the examination in the selection of the boys to be apprenticed. But in January 1852 there was a yet more remarkable departure from the meaning and intention of the regulations. Instead of the Superintendent's list including, as heretofore, 70 or 80 candidates, it was reduced to six, there being four vacancies. Even in respect to these six candidates the examination list was not followed; and I can myself speak to the gross ignorance of one at least of the four apprentices admitted.

At Chatham the Superintendent's list in like manner consisted, in the years 1848 and 1849, of 70 or 80 candidates, and the examination list was in those years adhered to in the selections made. At the last entry the number of candidates was reduced to 8, from among whom 2 were to be selected. I have heard it alleged as an objection to the education test, that it takes no account of the fitness of a boy to become a workman in respect to strength and stature. As the apprentices entered at the Chatham yard stood before me, I could not, however, but reflect, that this had had nothing to do with their selection.

At the other dockyards the regulations appear to have been always adhered to. At the last entry, which was in 1851, there were—

At Portsmouth,	50 candidates and 9 entries.
„ Pembroke	40 „ 4 „
„ Sheerness	50 „ 5 „

the examination list being in all these cases, I believe, followed, with such exceptions only as are contemplated by the circular.

Discourage-
ments of the
schools.

The apprentices schools are intimately connected with a new system of promotion in the dockyards, introduced at the time when Lord Auckland was First Lord of the Admiralty, and may be said, indeed, to lie at the foundation of that system. From the admission of an apprentice to the yard, through all the grades of subordinate officers up to that of assistant to the master shipwright, the relative qualifications of the candidates as practical men, attested by examination, was, according to that system, to be made the ground of promotion.

From the First Lord of the Admiralty down to the lowest officer there was scarcely any one in authority in the dockyards who was not stripped of patronage by it. It was not likely under these circumstances to be a popular measure. The very dockyard workmen were disposed to prefer a chance of promotion by interest or by good fortune to one founded on a simple consideration of their qualifications to be advanced.

To the unpopularity which falls to the share of the schools, as part of this new system of promotion, is to be added that which grows out of their interruption of the hours of labour of the apprentices, and a jealousy of the superior education of the apprentices on the part of the shipwrights under whom they work.

Nor have the schools experienced, I fear, much support or encouragement at the hands of those gentlemen who now fill the principal offices of trust in Her Majesty's dockyards, and who received a scientific education in the Naval Architectural School which formerly existed at Portsmouth. They were formed under a different system, and they generally, I believe, desire a return to that system. They were selected by an examination which was not limited to the sons of persons employed in the dockyards, but was open to all; and the successful candidates at that examination had generally received a liberal education, and were the sons of gentlemen.

As a permanent arrangement this was objected to, because it blocked up the road of advancement in the dockyards, and displaced the practical knowledge and experience of the workman, when associated with superior intelligence and character, from a useful and honourable position in the public service.

It was to open again this road of promotion to the dockyard workman, and at the same time to provide that offices of high trust and responsibility should not be filled by uneducated men, and that the naval architecture of the country should not be without the guidance of that scientific knowledge which experience has shown to be so necessary to the skilful construction of ships, that the dockyard schools and the Central School of Mathematics and Naval Architecture at Portsmouth were established.

The alteration in the period of the attendance of the apprentice at the school from the first four to the first three years of servitude has operated unfavourably in this respect, that by fixing the examination of the candidates for admission to the Central School at the end of the third instead of the fourth year it has rendered the selection of the best qualified candidates more difficult. The minds of youths do not grow alike, some get an early development, other minds do not show themselves until late; and in many cases I have no doubt that a different and more satisfactory selection of the candidates would have been made if the examination could have been postponed another year, and the results would probably have differed yet more widely and been far more certain if it could have been postponed three or four years.

The selection of certain apprentices from among the rest for promotion made too early in life.

The moral and intellectual qualities which develop themselves about this later period are those which characterize the man, and everybody experienced in such matters will, I think, agree with me in considering promotion given on the ground of merit thus early in the career of life scarcely fair to the competitors.

Another source of difficulty in making a selection of so much importance to the public service at the end of the third year of the apprenticeship of these boys lies in the imperfect attainments of *all* of them at that time. They do not know enough to compete with one another. They are not educated enough to be submitted satisfactorily to an educational test. In order that their powers of reasoning and understanding may be fairly tried against one another, there must be subjects in which they have been accustomed to reason and understand, independently. For this purpose a certain stage of educational progress, more or less advanced, must have been reached by them in common. This necessity has been felt in the dockyard schools, and to satisfy it the education has been forced in a mathematical direction, which is that the examinations cannot but take. Whilst the attempt thus to force it has not been satisfactory for the object contemplated, it has been prejudicial to the schools in this respect, that it has given to the instruction a direction too exclusively mathematical.

A third inconvenience arising from the early period of their apprenticeship at which the candidates for the Central School are selected, lies in the interruption of their career as workmen. Taken away from it at the time when they are beginning to acquire manual skill, and made to devote their time chiefly to study, it is possible that they may be found when they come to be officers without that knowledge of the use of tools which is useful, perhaps indispensable, to men who have to direct others how to work. These difficulties in the present working of the schools might all be overcome if the examination for the Central School were postponed until after the fifth year of apprenticeship. Attendance on the school might remain, as at present, voluntary after the third year. Those apprentices who were desirous to be candidates for the Central School should, however, have a course of reading prescribed for them, and this would best be done by the head master of the Central School, the Rev. Dr. Woolley, who might exercise a general direction and control over their studies, which would be much in advance of those of the other apprentices.

Expediency of fixing the examinations for the Central School at a later period of the apprenticeship.

They should, moreover, be specially examined from time to time, and reported upon by the master shipwrights of their several yards as to their practical knowledge and manual skill in shipbuilding, and no apprentice should be admitted to the final examination for the Central School who was not in these respects, for his standing, a good workman.

Results of
the last exa-
mination.

The following Table contains a tabulated statement of the results of my last examination, similar to those which have been given in my former reports.

Name of School.	Number who sent in papers.	Number, per cent., of Apprentices in each school, who have												
		Have written a sentence from dictation correctly.	Worked correctly one or more sums as far as			Worked correctly one or more questions in Algebra as far as Simple Equations.	Solved one or more propositions of Euclid, in Books						Worked correctly one or more questions in Industrial Mechanics.	Answered correctly a question in Trigonometry, or some of the higher branches of Algebra.
			Reduction.	Proportion.	Fractions, and the higher Rules.		I.	II.	III.	IV.	V.	VI.

Candidates
selected for
re-exami-
nation at
Portsmouth.

The following were the eight candidates for the Central School whom I selected at the different dockyards for re-examination at Portsmouth, in compliance with the Admiralty instruction of December 1850. They had all completed the third year of their servitude in January last.

Alfred Murray	-	Chatham.
Joseph Allen	-	} Devonport.
William Harvey	-	
John Froyne	-	Pembroke.
Thomas Harris	-	} Portsmouth.
Samuel Jessop	-	
Alfred Usher	-	Sheerness.
George Macavoy	-	Woolwich.

I examined these candidates at Portsmouth on the 9th of June, and selected the following four as having acquitted themselves the best in my examination.

George Macavoy,
Joseph Allen,
Thomas Harris,
Alfred Usher.

By the Admiralty circular of November 1847 it is provided that every student of the Central School who shall have made due progress in his studies, and conducted himself well, shall, at the expiration of his term of residence, be entered as a "leading man" in one of Her Majesty's dockyards.

The Lords of the Admiralty, taking into account the small annual number of vacancies in the office of leading man, have determined not to admit any candidates to the Central School during the present year.

Six students have thus completed their terms of residence; but it has not yet been determined how to dispose of these young men.

Besides the apprentices whose names I have given, the following have acquitted themselves well in their examinations; some of them, indeed, better than those who were re-examined at Portsmouth, with whom they were disqualified from competing by not being in the prescribed year of their servitude. Other apprentices, who acquitted themselves well in the examinations.

— Pearce	-	-	} Chatham.
E. Rich	-	-	
I. W. Fletcher	-	-	} Devonport.
N. B. Burt	-	-	
T. Thornton	-	-	
R. G. Moses	-	-	
S. B. Brummage	-	-	} Pembroke.
W. H. Turner	-	-	
E. Warder	-	-	} Portsmouth.
A. Gilham	-	-	
M. Ollis	-	-	
A. Kerby	-	-	
W. Batt	-	-	} Sheerness.
S. Banks	-	-	
H. Robinson	-	-	} Woolwich.
• George Loe	-	-	
Joseph Smale	-	-	

On the whole, I have a confidence in reporting to your Lordships, that the discipline of the schools, heretofore so difficult, is now easily maintained; that the apprentices are advancing in knowledge, a large proportion of them having learned to appreciate and to value it; and the prejudices of the workmen themselves have, as I am credibly informed, given way.

I have the honor to be, &c.,

HENRY MOSELEY.

To the Right Honorable

The Lords of the Committee of Council on Education.

REPORTS ON NORMAL SCHOOLS.

Rev. H. MOSELEY'S SPECIAL REPORTS on the MALE TRAINING SCHOOLS of the CHURCH OF ENGLAND.

*Special Report, by Her Majesty's Inspector of Schools, the
Rev. HENRY MOSELEY, M.A., F.R.S., &c., on the Church
of England Training School, at Worcester, for School-
masters for the Diocese of Worcester.*

MY LORDS,

Wandsworth, 14th September 1852.

IN compliance with your Lordships' instructions, I visited the Worcester Training School on Tuesday and Wednesday, the 7th and 8th instant, accompanied by Her Majesty's Inspector of Schools, the Rev. H. W. Bellairs.

Situation.

The institution is situated in the parish of Saltley, near the line of the North-western railway, about two miles from the Birmingham station, on a hill, and surrounded by fields, but in a direction towards which Birmingham is rapidly extending, so that Saltley will soon be included in it as a suburb. The parish has been recently formed, and the (new) church stands near the training school. As a considerable population is collecting around the training school, the means of filling a practising school from the immediate neighbourhood will probably soon be supplied. At present the scholars of that school must come from dwellings scattered over an area of from one to two miles round the school. I entertain no doubt, however, of an abundance of scholars, whenever the reputation of such a school shall be established. In adverting to the elevated healthy character of the site, I cannot but bear testimony to the importance which appears to me to attach to a selection made with reference to those characteristics, and the more so as the grounds are destined to be surrounded by houses.

Exterior of
building.

The building is in the form of a quadrangle. The front, which is towards the north, and three stories high, is destined for the training school. The other sides were erected for a middle school. These remain unfinished internally, excepting that the Principal's house, which forms a portion of one of them, is completed. The material of the building is a hard sandstone of the country, with Bath-stone facings. The character of the architecture is massive and severe, the masonry good, and the elevation simple and beautiful.

Site.

The site covers five acres, of which three belong to the training school, and the rest to the middle school, which is a separate foundation. Between the premises of the training

school and the railway there are two acres of land which it is desirable to add to the site, for other reasons, and because there stands on them a low public house, which it would be well to get rid of. Three quarters of an acre only of the site is at present set apart for a garden; the rest, except that occupied by the building and its approaches, is meadow land. A site has been marked out for a chapel, but none has yet been erected. A plot has also been marked out for a botanical garden, the Principal being desirous to cultivate in the students a taste for botany and horticulture.

A corridor runs round the internal area of the quadrangle, giving access to the lecture-rooms. The offices, which occupy the western angle of the front, are spacious, and well fitted up, and their separation internally from the rest of the building is complete. The lecture-rooms and class-rooms are well adapted to their uses, and conveniently arranged. The dormitories, of which there are two, run along the whole length of the front. They are divided by partitions into separate sleeping apartments, each seven feet by nine and a half. The partitions are about eight feet high; but they do not reach to the ceiling, which is about ten feet high. At the eastern extremity of each dormitory is a suite of apartments for a master, and contiguous to it a bath-room and a sick ward.

It was a matter of great regret to us to find the ventilation of the building very inadequately provided for. Excavations had been made under the basement story, and flues had been built in the walls, for introducing Sylvester's ventilating apparatus; but, after an expense of 400*l.* had been thus incurred, the plan had been abandoned, it being found to involve a further outlay of 1,000*l.* No other expedient for ventilation had been adopted in the place of this. The dormitories and the classrooms are nevertheless of such dimensions as will render some process of artificial ventilation necessary to the health of the inmates, whenever any considerable number of them shall be assembled in the institution. In recording this fact, I cannot but express my regret that in several of the training schools recently erected the ventilation is very imperfect.

The apartments for the Vice-Principal and other officers, at the extremities of the dormitories, besides being imperfectly ventilated, are ill lighted. The cost of the building in its present state, and of the site, has been 10,408*l.* 6*s.* 2*d.*, of which 6,654*l.* 4*s.* 10*d.* have been expended on the part appropriated to the training school, and 3,754*l.* 1*s.* 4*d.* on the middle school. The site was the gift of C. B. Adderley, Esq., M.P., and is valued at 1,450*l.*

Interior of
building.

Defective
ventilation.

Practising school.

No room has been provided for a practising school; but a portion of the buildings of the middle school is to be set apart for the purpose, and a contract has been entered into for its completion before Christmas, at which time a practising school is to be opened.

Officers.

The Principal of the institution is the Rev W. Gover, M.A., of Corpus Christi College, Cambridge, a gentleman of much experience in matters connected with parochial schools and other institutions for the benefit of the working classes*, acquired as curate of a large parish in Birmingham, and afterwards of the parish of Marylebone, in London. The appointment of a Vice-Principal is postponed until thirty students shall be resident. Mr. Joseph Draper, a certificated master (class 1., division 3.), educated at the Cheltenham Training School, has been appointed to the office of assistant master. A master of the practising school and a master of model drawing are to be appointed at Christmas; for both which appointments there are eligible persons in view. The garden work is done under the direction of an industrial master. The secretary is W. Hare, Esq.

Exhibitions.

Six exhibitions have been founded by the Worcester Diocesan Board of Education, each of 15*l.* annually, and one of the same amount, by C. B. Adderley, Esq., M.P.

Income.

The income of the institution, arising from annual subscriptions or donations,—exclusive of contributions to the building fund, the fees of the students, and exhibitions,—is, for the year terminating 31st of October 1852, 54*l.* 8*s.* 6*d.*

Students.

The institution affords accommodation for sixty students. It was opened in April 1852. At the time of our visit only five were resident in it. The fees of three of these were paid by themselves or their friends. The two others held exhibitions. The smallness of the number of students is accounted for by the following fact:—1st, that the class of persons who have hitherto been candidates for the office of schoolmaster are now deterred from seeking it by the competition on which they have to enter with the pupil-teachers; 2d, that all the pupil-teachers who completed their apprenticeship last year were otherwise disposed of when this institution was opened; and, 3d, that if they were not, yet, from the fact of the college not being as yet recognised as one where Queen's scholars may be appointed, they would not be likely to resort to it. The divisions which unhappily prevail in the Church on questions of education, as well as others, may not have been

* Mr. Gover is the Honorary Secretary, and was one of the principal founders, of the Birmingham Provident Society; an extremely well-conducted and prosperous institution.

without their influence in bringing about this result, but I am disposed to attribute it chiefly to the reasons here given. The students were all under the age of twenty, and appeared to be favourable examples of the class of persons who seek the office of schoolmaster, not having been first apprenticed as pupil-teachers.

We examined them orally, and can bear an unqualified testimony to the careful and judicious way in which they had been instructed; and, considering the short time of their residence, to the good progress they had made. They all seemed to hold out a fair promise of becoming useful teachers; and our examination afforded to us ground for confidence, that, if your Lordships should decide to admit this into the number of training schools where Queen's scholars may be appointed, as we cordially recommend, full justice will be done to their instruction, in that practical spirit to which you are accustomed to attach its due importance.

Oral examination:

Recommended as a data for training Queen's scholars.

The great number of pupil-teachers who will complete their apprenticeships at Christmas next renders it desirable that there should then be numerous vacancies in training schools for their reception. This institution will offer fifty-five such vacancies, at a time when they will probably be easily filled up,—when, at any rate, the vacancies in the other training schools will not be nearly sufficient to receive the pupil-teachers who will be desirous to enter them.

It is gratifying to know that the appointment of fifteen Queen's scholars, for which the Worcester Training School will have a claim, will largely supplement its funds, and that, together with a permanent income of 548*l.* 8*s.* 6*d.* arising from subscriptions, and of 105*l.* from exhibitions, besides the fees of students, and your Lordships' grants consequent on certificates, the managers will have ample funds placed at their disposal to minister to the educational wants of such an institution.

I have the honor to be, &c.

HENRY MOSELEY.

To the Right Honorable

The Lords of the Committee of Council on Education.

Special Report, by Her Majesty's Inspector of Schools, the REV. HENRY MOSELEY, M.A., F.R.S. &c., on the Church of England Training School, at Winchester, for Schoolmasters for the Dioceses of Winchester and Salisbury.

MY LORDS,

Wandsworth, 6 October 1852.

IN compliance with your Lordships' instructions communicated to me in a letter dated, the 8th of June, I visited the Winchester Diocesan Training School on Thursday the 30th of September, accompanied by Her Majesty's Inspector of Schools, the Rev. W. H. Brookfield. On the first day of our inspection we were present at the lectures then being delivered to the students, and on the second day we examined them orally.

Site.

The building is the ancient palace of the Bishop of Winchester, called the Wolvesey Palace. It is the property of the bishop, who has granted it for the use of the school, *during the term of his episcopacy*. A portion only of the original palace remains, but it includes the chapel, a suite of apartments used as class-rooms &c. by the students, and a range of dormitories. It affords ample accommodation for fifty students. The site covers apparently five or six acres. It includes a large garden, pleasure grounds, and a plot covered by the ruins of a more ancient palace; affording to the students space for exercise. The whole is surrounded by a high wall. It is situated near the banks of the river Itchen, and is within the city of Winchester, communicating by a gateway with the cathedral close.

Object of institution; and present results.

The institution was first formed in the year 1840, to educate national schoolmasters for the dioceses of Winchester and Salisbury. It has sent out, from its commencement, 115 masters. During the last year thirteen left it. The salaries of none of those who left it last year to become masters exceed 50*l.*, with a house, and one of them has only 35*l.* without a house. No higher salaries than these, we were informed, can, under present circumstances, be provided in a larger proportion of the schools of the two dioceses; and it is the object of the institution to educate masters for such schools. The prescribed period of training is three years. The average time of residence of the masters who went out last year was, however, only one year and ten months.

Income.

The fee is 23*l.* per annum for each student. The funds arise from the fees of the students, and from subscriptions or dona-

tions specially for the support of the training school. The income from January to Christmas 1851 arose as follows:—

	£	s.	d.
By subscriptions, donations, &c.	403	4	6
By fees of 25 students	305	4	6
By fees of yeoman's school	82	17	4
	791	6	4

The expenditure for board, tuition, &c., was 773*l.* 6*s.* 6*d.* Expenditure.
 The cost *per head* for the board, washing, &c., of the students, including servants' wages, amounted to the very moderate sum of 23*l.* 1*s.* 7*d.*, and the tuition per student to 33*l.* 7*s.* The cost of medical attendance was at the rate of 7*s.* 5½*d.* per student. A yeoman's school of twenty day scholars is taught in the building by the principal and other masters, assisted by the students.

The following are the officers of the institution:—

Officers.

The Rev. John Smith, M.A., of Magdalen Hall, Oxford, Principal.

Mr. John Blain, certificated schoolmaster, class 1, division 3, late student at Battersea, Vice-Principal.

Mr. Edward Sheppard, late student at Battersea, industrial master and assistant teacher.

Vocal music is taught by Dr. Wesley, the organist of the cathedral; and Mr. Weaver, a scientific gardener employed by the Warden of Winchester College, whose garden adjoins, instructs the students in horticulture.

In addition to these regularly appointed teachers, the institution has had the benefit of occasional courses of lectures, delivered in the evening, by the Rev. Canon Woodroffe, the Rev. Dr. Maberley, Head Master of Winchester School, the Rev. Professor R. C. Trench, the Rev. C. Walters, the Rev. W. Williams, the Rev. N. Midwinter, and the Rev. G. A. Seymour. The lectures of the Rev. Chevenix Trench on the "Study of Words" have been published in three successive editions. Lectures.

The subjects of instruction are those usually taught in training schools, together with the elements of the Latin and Greek languages. The schools were examined at Midsummer by the Dean of Hereford, the Archdeacon of Surrey, and the Rev. N. Midwinter; and the reports of these gentlemen have been placed in my hands. Subjects of instruction.

In our oral examination, which was strictly limited to the subjects of elementary instruction, the students answered very fairly in religious knowledge, and extremely well in English grammar and arithmetic. They did not acquit themselves so well in geography and English history as in these subjects. Oral Examination.

The national school of St. Michael's parish is the practising school of the institution. It is a good example of a Practising school.

small parochial school. The master of it is an efficient teacher, and the clergyman of the parish, the Rev. N. Midwinter, devotes to it, and to the instruction of the students in the art of teaching, a great deal of time and attention. All the students attend there on Monday afternoon from two to four o'clock. Those who are in the last four months of their residence attend every afternoon.

Hours of study.

The hours of study begin at twenty minutes past six in the morning, and end at nine, with intervals for exercise and recreation.

Number of students.

The number of students resident at the time of our inspection was thirteen, and the average time of their residence had been ten months. There were, however, *five* who had not resided more than three months.

Buildings.

As the general result of our inspection, I have to report, that the building is of ample dimensions, and, on the whole, well adapted to its use, or capable of such adaptation. A portion of it remains yet unfurnished; and furniture, fittings, and apparatus are but sparingly provided for the rest. The rooms are of a good height, but apertures are needed for ventilation in the ceilings of the dormitories, and in the passages which lead to them.

Qualifications of teachers.

There being three resident teachers, besides others occasionally employed, the opportunities of instruction for so small a number of students as thirteen are great. The Vice-Principal's certificate bears testimony to his knowledge of the subjects he has to teach; and his manner of teaching appeared to us to afford a model on which the students might with advantage form their own. We heard the third master deliver a lecture on the geography and history of the United States, which showed a very complete knowledge of the subject, and considerable power and judgment in treating it. On the whole, the duties of these officers appeared to be very faithfully and efficiently performed. The experience of this institution, as of others, appears, indeed, to show that the best officers for training schools will eventually be found among the men who have themselves been educated in them.

Principal.

The Principal, the Rev. John Smith, M.A., graduated, we are informed, with some distinction in the University of Oxford. He is devoted to his work, appears to maintain the discipline of the institution successfully, and having a taste for experimental science, and some knowledge of it, it is in his power to encourage and cultivate among the students a department of study which will be very useful to them when they become schoolmasters.

I have the honor to be, &c.

HENRY MOSELEY.

To the Right Honorable

The Lords of the Committee of Council on Education.

*Special Report, by Her Majesty's Inspector of Schools, the
Rev. H. MOSELEY, M.A., F.R.S., on the Church of England
Training School for Schoolmasters at Caernarvon.*

SIR,

Wandsworth, 30 July 1852.

IN compliance with their Lordships instructions, communicated to me in your letter of the 20th of March, I visited the Caernarvon Training School for masters on the 25-26th of May, accompanied by the Rev. H. Longueville Jones, Her Majesty's Inspector for Wales; and I beg leave to report, for the information of their Lordships, that this training school originated in the year 1844, under circumstances which are detailed in a memorandum which I have appended to this Report, and which was communicated to me by the vicar of Caernarvon, the Rev. T. Thomas, a gentleman who was among the most active of its founders, and to whose constant, intelligent and active support, it owes a large measure of its success.

It presents the remarkable example of a successful effort on the part of a body of gentlemen (chiefly laymen), resident in a remote part of the country, to provide for its educational wants, and, with that view, to work out for themselves the hard problem of a training school for teachers. I will venture to express a hope that their Lordships may consider that attempt worthy of their approval, and that they will extend to it their sanction and support.

The committee of management is composed of the beneficed clergy of the dioceses of Bangor and Saint Asaph's, who are subscribers, and of certain of the laity.

The officers of the Institution are the Rev. B. J. Binns, B.A., of Trinity College, Dublin, formerly curate of Caernarvon, principal; Mr. James Foster, master of the Caernarvon National School, normal master; Mr. R. S. Hayden, music and singing master; H. P. Manley, Esq., honorary secretary.

It possesses no property in buildings or lands.

A room erected for a private school serves it for a lecture-room, being rented for that use; to which it is well adapted by its situation, its dimensions, and the character of its architecture.

But if a vice-principal be hereafter appointed a second lecture-room will be required.

The students reside in lodgings in the town. We visited some of these lodgings. They appeared for the most part to be kept by respectable persons in the grade next above the working classes. We were assured that the utmost circumspection is used in the selection of these lodgings, and that the freedom from restraint implied in this arrangement has been attended with no result unfavourable to the morals of the students; not a single case of immorality having been brought under the notice of the authorities since its commencement. The charge usually made in such lodging-houses is 2s. 3d. per week to each student for lodgings and tea; every thing else is purchased by the students for themselves; the whole cost of their board and lodging being from 5s. 6d. to 6s. per week each.

They manage, we were informed, at this small cost, to eat meat daily, real being only 3d. per pound, and mutton 6d.

Towards the expense of their board the institution allows each student 2s. 6d. per week. Two students receive from the institution 4s. per week.

No charge is made to them for tuition.

The whole cost to the student, answering to the fee of other training schools, is, therefore, about 3s. 6d. per week, which (as they reside forty-three weeks) is at the rate of 7l. 10s. 6d. a year.

Besides the allowance of 2s. 6d. per week, made by the institution towards the board and lodging of the students, there are five exhibitions—three of 5s. a week, and two of 2s. 6d.—paid out of an annual grant of 100l., placed at

the disposal of the Bishop of Asaph for educational purposes by the Welsh Committee of the National Society.

The funds of the training school for the year ending Midsummer 1852 arose as follows :—

	£	s.	d.
By annual subscriptions and donations	52	4	0
By grant from the Welsh Committee of the National Society	300	0	0
By exhibitions for four students from the Bishop of St. Asaph, as explained above	10	0	0
	362	4	0

The following were the items of expenditure :—

	£	s.	d.
Salary of the principal	150	0	0
„ the normal master	25	0	0
„ the singing master	10	0	0
Allowances to students for board	100	11	6
Fuel and lights	4	16	0
Books, apparatus, stationery, &c.	10	13	0
Rent, taxes	20	0	0
Other current expenses	1	17	4
	322	17	10

During the first day of our inspection, the business of the institution went on in its usual course. The teaching is chiefly oral. It devolves almost wholly upon the principal, whose labours, by reason of the variety of subjects which he is obliged to teach, and the hours he has to occupy in teaching, are excessive. He is occupied, chiefly in oral teaching, six hours daily. It is the more to be regretted that so valuable a teacher should be charged with this amount of labour, as his health has obviously suffered from it.

The subjects of instruction are those usually taught in elementary schools, together with geometry, algebra, and mechanics, and the art of teaching.

The teaching of a Welsh training school acquires, however, a distinctive character, from the fact that English is to the great majority of the students a foreign tongue, which they are occupied in learning with everything else which they learn, and which must be taught them with everything else.

The principal combines with many other qualifications for the important office he fills, this, that he is a good Welsh scholar. He can explain to them in Welsh what they are unable to comprehend in English.

All his lectures have thus, in many respects, the characteristics of teaching a tongue foreign to his audience.

The institution is well supplied with books, and the lecture-room contains all the ordinary apparatus of instruction.

On the second day of our inspection we examined the students orally, and inspected the model school.

In recording an opinion of the attainments of the students, it is but just to take into account the great amount of labour with which the principal, who may be considered almost the single teacher of this institution, is charged. Taking this into my view, I cannot but bear testimony to the evidence our examination afforded of the faithful, zealous, and able way in which his duties have been performed. He has a faith in education, and he labours in its cause in an enlightened, an enterprising, and a devoted spirit. In conjunction with the master of the model school, he has conceived a good practical idea of what belongs to a training school; and in this remote spot, with little sympathy, and but a small measure of support, these gentlemen have made great progress towards realizing that idea.

But few training schools are provided with so good a model school as that at Caernarvon; its buildings are excellent. The children, about 200 in number, are taught in one large school-room, divided in the centre by a curtain, and provided with parallel desks. The apparatus of instruction is good. The senior students attend the school daily, and there are four pupil-teachers.

The master, who has been long resident at Caernarvon, appears to afford an example of whatever is useful and respectable in the character of a national schoolmaster—a consideration the importance of which it is impossible to overrate, for it is on the character of the master of the model school, above all the other officers of a training school, that the students have a tendency to form their own characters as teachers.

The expedients which Mr. Foster has adopted in his school, particularly those for teaching English to the Welsh children (a principal part of the school business), reflect great credit on his professional skill; and the discipline of his school is apparently founded on a moral ascendancy over the minds of the children. It is impossible to look at his collection of remarkable coins from the site of the ancient Segontium, or at the minerals and fossils which cover the shelves and tables of his little apartment, without recognizing in him a man raised by his tastes and pursuits above the ordinary level of national schoolmasters.

On the second day of our inspection we had the advantage of conferring personally with the committee of the training school.

I am desirous to acknowledge, for my colleague and myself, our sense of the courtesy with which we were received by these gentlemen, and the desire they manifested to comply, as far as the means at their disposal admitted, with various suggestions we were invited to make for the welfare of the school.

I regret to have to record my impression, that by reason of its straitened means the efficiency of this institution as a training school is impaired in the following respects:—

In the first place, the lodging (and perhaps the maintenance) of the students is not duly provided for. The payment of two shillings and three-pence a week for lodging and tea is not sufficient to make it worth the while of the persons in whose houses they lodge to receive them singly; several lodge, therefore, in the same house, and two occupy the same bed.

Their bed-rooms, calculated for one person only, are small, and often ill ventilated, and in some instances the separation of their apartment from others in the same house is insufficient.

An arrangement like this, which compels them to the exercise of forethought and of a rigid economy, and which places them in a position of greater independence and moral responsibility, cannot be without its advantages. I hesitate, therefore, to express any opinion as to the question whether it is expedient that the students of a training school should live in private lodgings, and provide for their own board; but there cannot, I think, be a doubt that care should be taken to secure for each a separate bed and a separate bed-room, and to see that it should be well ventilated.

It is, moreover, a question which ought, I think, to be duly considered, whether three shillings and sixpence a week is a sufficient sum to be expended on the food of youths of the age of these students.

The students in the training schools in Scotland reside, for the most part, as these do, in private lodgings. The allowances made to them for board and lodging, under the name of bursaries, are there commonly ten shillings a week. (Minutes 1851–52, p. 129, vol. i.)

Of the students present at our examination, some were as remarkable for their pleasing deportment and good manners as for the intelligence with which they answered the questions we proposed to them. It was impossible, however, not to observe with regret a want of carefulness in the persons and the attire of others. Nor could the reflection but present itself, how necessary to the accomplishment of the great purposes of education is the agency of

teachers who, besides the necessary school learning, have acquired manners, habits, and tastes above the class whose social condition it is their function to elevate. It seems, therefore, of importance to insist on a scrupulous observance by these students of all the proprieties of civilised life, destined as they are to form the educators of a people whose neglect of them is remarkable and conspicuous.

It cannot be a normal condition of the Welsh schoolmaster to be rude in his aspect and slovenly in his attire. It is true that the stipends of Welsh schoolmasters are very low. Of six students who were sent out as schoolmasters by this institution during the year terminating at Midsummer, one was receiving a salary of 46*l.*, one of 40*l.*, one of 30*l.*, and three of only 25*l.**; and there is a tendency in men to come down to a condition of moral and social depression commensurate with their incomes, which no education can be expected altogether to counteract.† If this evil is impossible to be remedied, I fear that the question of education in Wales, for any useful purpose, must be given up. A country which is too poor to provide a decent remuneration for its teachers is too poor to educate itself.

The second point on which the smallness of the income of the institution affords ground for regret is the impossibility of providing adequate stipends for the officers, or a sufficient number of them for conducting the institution efficiently.

It is only by labours, which have impaired his health, that the excellent principal has hitherto been able to conduct the institution with that measure of success to which I have borne testimony, and which, under the circumstances, must be considered remarkable. It is unreasonable to expect that such labours should be continued. They have, moreover, been most inadequately remunerated. The appointment of a vice-principal is indispensable. As, moreover, there is a great demand for teachers of navigation in Wales, it would seem desirable to have a third master capable of teaching this subject, and who might fill the office of assistant to the normal master.†

On the whole, referring to your letter of the 20th March, and to the memorial enclosed therein, I am of an opinion that the students of the Caernarvon Training School should be examined annually for certificates at Christmas, and that the institution should receive the same grants in respect to students who obtain such certificates as other training schools receive.

And although I am unable to report that with its present limited staff of officers, and with its imperfect arrangements for the board and lodging of the students, this training school is adapted for the education of Queen's scholars, yet I cannot but express a hope that it will hereafter become so; and the more so as their Lordships will then be enabled to extend to it from the public educational fund that more liberal aid which otherwise they would be precluded from affording to it, but of which it stands so much in need.

In bringing under your notice the inadequate funds of this institution, I cannot but advert to the fact, that the local subscriptions for its support amount to no more than 52*l.* 4*s.* annually. It has been customary, I know, to assume, whenever the question of education in Wales is brought under discussion, that it is a poor country; and this is probably true of it as a whole, and of its inland and rural districts in particular. But the country around Caernarvon is the seat of a great and lucrative industry. It draws a large revenue from its slate quarries, supplying a great part of the consumption of the entire kingdom. The cottages of the workmen in these quarries are seen strewn thickly over the face of the country. They earn high wages;

* It is not stated in the returns whether houses are allowed in addition to these salaries.

† Some of the pupil-teachers in the Royal Naval School, Greenwich Hospital, would be found eligible for this office.

and no class of persons could probably be found to whom it is more desirable to afford the means of education, or who would be more likely to avail themselves of them. I have made these observations, in the hope of bringing the claims and the necessities of the Caernarvon Training School under the favourable notice of some of those gentlemen who are locally interested in its success, but to whom those claims and those necessities, and the great merits of the institution, may possibly be unknown.

I have the honor to be, &c.

The Secretary of the
Committee of Council on Education.

HENRY MOSELEY.

MEMORANDUM.

TRAINING INSTITUTION.

The institution originated in the year 1844, in connexion with the National School, Caernarvon, the committee of which had had the said lack of masters in North Wales frequently and urgently pressed upon their attention. Up to 1849, Mr. James Foster, the master of the National School, alone instructed the pupils in training. As these very humble efforts of the committee were successful, and a large fund having been collected by the Welsh Education Committee of the National Society for the purpose of promoting education in both North and South Wales, and which had the effect of withdrawing many of the subscribers from the training institution, application was made to them for assistance, which, being supported by the bishops of Bangor and St. Asaph, was successful, when a liberal grant was made. The institution now assumed a more permanent character. The Rev. B. J. Binns was then appointed principal by the bishops of North Wales, and Mr. James Foster, normal master. This occurred in the year 1849; since which year seven masters have taken Government certificates, and the committee of the institution have had the great satisfaction afforded them of seeing very favourable reports from Her Majesty's Inspector of the state of the schools in North Wales to which masters had been sent from the institution. The whole number sent out since 1844 amounts to eighty-seven masters.

The circumstances respecting North Wales are very peculiar, and in every respect dissimilar to what exists in England. The population is principally rural. North Wales is a poor district; the emolument paid to masters is very small indeed; the resident gentry are not numerous, and very lukewarm on the subject of education. From these causes, and from the experience of the committee in making application for money for educational purposes, they felt convinced that had an attempt been made to obtain funds to erect a large building for the purpose of a training institution it would have resulted in certain failure. They, therefore, were driven to the simple and cheap course of renting an appropriate class-room, &c., &c.

From the same cause the committee have been forced in every instance to make grants for the support of the pupils while in training. Unless this course had been pursued, no candidates would have offered. The committee, however, are gradually reducing these grants, the many advantages offered to masters by the Committee of Council's Minutes beginning to operate most successfully.

In addition to the pecuniary consideration just referred to, other reasons operated with the committee to induce them to prefer the system of allowing young men to lodge out rather than reside together in the institution. They would thus be more thrown on their own resources, and, therefore, the better able to support themselves, and to husband frugally the very small incomes they would receive as masters.

The utmost care and circumspection are used by the committee in selecting lodgings; and they have the great satisfaction of stating that not a

single instance of impropriety of moral conduct has occurred among the pupils since the institution was established.

The young men are under the immediate eye of the principal and normal master for twelve hours daily, and the rest of their time is devoted to study.

APPENDIX.

Preliminary Correspondence relating to Caernarvon Training Institution.

SIR,

Caernarvon, 15 March 1852.

I BEG to transmit to you herewith a memorial from the committee of the Caernarvon Training Institution, which I request you will have the goodness to lay before the Lords of the Committee on Education, at their next meeting.

I have the honor to be, &c.,

(Signed) H. P. MANLEY,

Secretary.

To the Secretary,
Committee of Council on Education.

to the Right Honourable the Lords of the Committee of Council
on Education,

The respectful Memorial of the Committee of the Training Institution
of Caernarvon

Showeth,

THAT this Institution was established in the year 1846, since which period seventy masters have been trained and appointed to National schools in the dioceses of Bangor and Saint Asaph.

That in the year 1848 the attention of the Welsh Education Committee of the National Society was called to the humble efforts of its promoters to supply the grievous lack of duly qualified masters in North Wales, when, through their liberality, a clerical instructor was appointed, the Rev. B. J. Binns, A.B., at present the principal of the institution (in addition to Mr. James Foster, the normal master). Since his appointment the institution has been more fully appreciated, and it now has every prospect of permanency, and of greatly increased usefulness. (The report of the past year is respectfully enclosed.)

Your memorialists therefore pray, that to secure to this institution the pecuniary benefits so liberally offered by your Lordships' minutes, and enjoyed by all other similar institutions, your Lordships will be pleased to place it under inspection, so that the students may be submitted to an annual examination for certificates of merit, which your memorialists feel assured would act as a great stimulus to the pupils, and which they respectfully entreat your Lordships to grant as a measure of fairness and justice to one of the poorest though most peaceable and loyal portions of Her Majesty's dominions.

And your memorialists will ever pray, &c.,

(Signed)

THOMAS THOMAS,

Vicar of Caernarvon,

Chairman of the Committee.

H. P. MANLEY,

Secretary.

Caernarvon, 15 March 1852.

Committee of Council on Education,
Privy Council Office, Downing Street,
20 March 1852.

SIR,

I HAVE the honor to acknowledge the receipt of your letter of the 15th instant, with its enclosures.

I am directed to request your attention to the instructions to H.M. Inspectors of Schools printed at page 29, vol. i., of their Lordships minutes for 1850-1.

The Rev. Henry Moseley has been requested, in arranging his tour for the current year, to include the Caernarvon Training School in the number of those to be visited by him.

The Committee of Council have desired Professor Moseley to be so good as to make a preliminary report upon the institution, immediately after his visit in company with the inspector of the district, and after consideration of his report my Lords will be prepared to inform you of their decision upon the present application.

Professor Moseley may always be addressed by a letter directed to him at this office.

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

H. P. Manley, Esq.,
Caernarvon.

Committee of Council on Education,
Privy Council Office, Downing Street,
2 September 1852.

SIR,

ADVERTING to a letter from this office, dated the 20th of March last, which I had the honour of addressing to you on the subject of an inspection of the Caernarvon Training School, I am now directed to enclose, for the information of your Committee, a copy of the Report made by Professor Moseley.

The Committee of Council learns with much interest the progress which has been made, with such very slender means, in the great work of training schoolmasters for employment in North Wales; and they are desirous of encouraging the labourers in so good a cause by every means consistent with the principles on which the public grant is administered.

Professor Moseley suggests that, as conditions of the public assistance,

1. Better provision for lodging the students should be made; that
2. A vice principal, and that
3. An assistant master of method, should be appointed.

With regard to the plan of lodging students in private houses, my Lords entertain very strongly the apprehensions which Professor Moseley states as to the degree in which it is probable that such a system can generally produce a class of men capable of elevating the habits of the peasantry from which they are themselves drawn, and into whose ranks they are to return. No one can have moved among the agricultural population in Wales without observing that their personal and domestic habits fall much below the standard which might have been expected from the intellectual acuteness that is generally evinced by them. Decency and cleanliness are not less consistent than the opposite qualities with coarse fare and hard lodging. In these latter respects, the introduction of a collegiate discipline for the students need cause no change; but without some such discipline it is not apparent how the habits of home are to be corrected. It is well known how completely the system of private lodgings failed to answer the purposes of discipline in connexion with the Welsh grammar schools which preceded the establishment of the college at Lampeter. My Lords do not doubt that all these difficulties have presented themselves to your Committee, and that there has been the utmost anxiety on the part of that Committee to remedy evils and supply deficiencies. Their

Lordships, however, are disposed to question whether any ground of hopeful assurance can be reached until the students are gathered within the walls of a college.

In whatever effect, therefore, my Lords may give to Professor Moseley's recommendations, they desire to express to your committee the strong opinion which they entertain of the importance of keeping the erection of suitable premises in view as an object to be accomplished, and to reserve to themselves a discretionary power of withdrawing, according to the report of Her Majesty's Inspectors, such provisional sanction as they may have given to the existing arrangements. My Lords would certainly be unable to hold out the prospect of continued assistance from the fund at their disposal, if Her Majesty's Inspector had a second time to report, that there were instances of students sleeping together, or occupying apartments imperfectly separated from those of the family in which they board.

Subject to these observations, and assuming for a moment the appointment of a vice-principal and third master, my Lords will direct an examination of students and other masters desirous of obtaining certificates to be held next Christmas at Caernarvon, and on account of such students as fulfil the usual conditions with respect to attainments and period of training will allow to the institution two-thirds of the ordinary grants; hoping that the occasion may soon be afforded of raising these grants to the full amount, and of adding to them the offer of Queen's scholarships, by the provision of a building suitable for the residence of students within its walls.

The salary of a vice-principal may in part be defrayed out of the grants to be allowed on the successful students, and an augmentation grant may be obtained towards procuring a third master, pursuant to the Minute of 6 August 1851. (Minutes 1851-2, vol. i. pp. 24 and 26-7.)

I have the honor to be, &c.

H. P. Manley, Esq.

(Signed) R. R. W. LINGEN.

Committee of Council on Education,

Privy Council Office, Downing Street,

7 October 1852.

SIR,

WITH reference to the letter from this office dated the 2nd of September last, in which, under certain conditions therein stated, my Lords agreed to hold an examination of students and schoolmasters desirous of obtaining certificates of merit next Christmas at Caernarvon, I am directed to inform you, that my Lords have learnt with pleasure from Professor Moseley that the prescribed terms will in all probability be fulfilled. In the course, however, of arranging what Inspectors shall hold the several examinations of the same kind, which (one of the same series of papers being used) have to be provided for concurrently, their Lordships find themselves greatly straitened by the disproportion between the number of Inspectors at their disposal and the claims to be met.

You are doubtless aware, (from the Minutes of the Education Committee 1850-1, vol. i. p. 29,) that the Christmas examinations are to be distinguished from visits of inspection. Her Majesty's Inspectors, in holding these examinations, have no duties to perform beyond those of superintendence while the candidates are at work, except so far as they have to make a report upon each candidate's ability to conduct the public instruction of a class of children.

According to precedent, the Christmas examination at Caernarvon would be held by one of Her Majesty's Inspectors appointed pursuant to the Order in Council dated 10 August 1840. The pre-occupation, however, of all the officers so appointed obliges my Lords to propose (subject to my letter of the 2nd of September last) to provide for the examination at Caernarvon in one of the following ways; and I am to request that you will inform me which of them would best meet the views of your Committee:—

1. My Lords would instruct T. B. Browne, Esq., one of Her Majesty's Inspectors of workhouse schools, to supply the place of an Inspector appointed under the Order in Council of 10 August 1840. Mr. Browne is a member of the Church of England, and in the commission of the peace. You will find reports of his in each of the three enclosed volumes. His proposed employment is not strictly regular, and therefore my Lords could not think of directing it, except with the consent of your Committee. Should your committee consent, it must be equally understood, that my Lords must afterwards regard Mr. Browne's report (on the skill evinced by the candidates in teaching a class before him) to be in all respects as conclusive as if his attendance at Caernarvon had been regular.

2. That your students should attend for examination (i.e. so many of them as it is intended shall try for certificates) at Chester or Caernarthen.

3. That the examination shall be postponed until the Easter week in next year.

The next Christmas examination will begin on Monday the 13th of December next.

H. P. Manley, Esq.

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

SIR,

Caernarvon, 9 October 1852.

I AM instructed by the committee of the training institution to acknowledge receipt of your favours of the 2nd ult. and 7th inst., and to express their sense of your courtesy in transmitting a copy of Professor Moseley's Report.

This report, and the very full and explicit letter with which you favoured the committee, have been maturely considered by them, and the necessary steps taken to secure the services of a vice-principal and third master, so that the privilege of having the institution placed under inspection may be accorded to it by the Committee of Council.

Referring to your letter of the 7th instant, the committee desire me to express their preference for the first suggestion you make, namely, that the examination should be held at Christmas by Mr. Browne, whose appointment as Inspector will be in every way satisfactory to the committee.

I have the honor to be, &c.

(Signed) H. P. MANLEY,
Secretary.

The Secretary of the
Committee of Council on Education.

SIR,

Caernarvon, 2 November 1852.

THE committee of the training institution beg the favour of your submitting to the Lords of the Committee of Council on Education the accompanying memorial, praying that Queen's scholars may be admitted to the institution.

I have the honour to be, &c.

(Signed) H. P. MANLEY,
Secretary.

The Secretary of the
Committee of Council on Education.

To the Honourable the Lords of the Committee of Council on Education.

The respectful Memorial of the Committee of the Caernarvon
Training Institution,

Showeth,

THAT your memorialists received with great satisfaction and thankfulness your Lordships favourable reply to the prayer of their memorial, conveyed to

them by Mr. Lingen on the 7th of September last, consenting, under certain conditions, which your memorialists are making arrangements to comply with, to place the institution under Government inspection, and to allow to such students as fulfil the usual conditions two thirds of the ordinary grants.

Your memorialists presume again to address your Lordships on the subject of Queen's scholars, and very respectfully to impress upon your Lordships their matured opinion that should Queen's scholars from Wales be placed in English training institutions their services will be lost to the principality, through the superior inducements offered and the higher salaries paid to National schoolmasters in England. Your memorialists, to meet, as far as in their power, the conditions named in Mr. Lingen's letter of the 7th September, on the subject of Queen's scholars, have made arrangements with the Rev. B. J. Binns, the principal of the institution, to board and lodge them in his own residence.

Your memorialists hope that this arrangement will be satisfactory to your Lordships, and that the privilege of receiving Queen's scholars may be conceded to the Caernarvon Training Institution.

And your memorialists will ever pray, &c.

(Signed) THOMAS THOMAS,
Chairman.
H. P. MANLEY,
Secretary.

Caernarvon, 1 November 1852.

Committee of Council on Education,
Privy Council Office, Downing Street,
5 November 1852.

SIR

ADVERTING to the memorial contained in your letter of the 2nd instant, I am directed to inform you that my Lords cannot consent to subject the pupil-teachers in Welsh schools to any special restrictions as to the field of their future service.

The result aimed at can be reached only by encouragement and moral influence. Prohibition would defeat the object of them, by excluding superior candidates, or by retaining unwilling labourers. The schoolmaster's office requires both ability and devotion.

The means to be relied upon are such as tend to render the training schools in the principality more attractive in respect of cheapness and efficiency. Much also may be done by the friends of education in their respective neighbourhoods, to raise the schoolmaster's position in respectability and consideration, if not also in emolument; much also by the selection of such scholars to apprentice as offer the promise of sober characters, open to impression of duty towards those whom they have peculiar means of benefiting, *i.e.*, in this instance, their own countrymen.

It is by influences such as these that my Lords look to see the Minutes they have framed for the promotion of education generally in Great Britain adapted to the peculiar circumstances of the principality.

Considering the present position of the training school at Caernarvon, my Lords are not disposed to increase the offer which they have made for the present year. It would not be consistent with their Lordships practice to grant Queen's scholarships on the terms proposed (that the Queen's scholars should board in the private house of the principal). It must be understood to be a condition of this form of assistance (as was stated at the end of the letter from this office of 2d September last), that the provision of a building suitable for the residence of students within its walls should be contemplated.

I have the honor to be, &c.

H. P. Manley, Esq.

(Signed) R. R. W. LINGEN.

*Special Report, by Her Majesty's Inspector of Schools, the Rev.
HENRY MOSELEY, M.A., F.R.S., on the Church of England
Training School for Schoolmasters at Caermarthen.*

SIR,

Wandsworth, 11 February 1853.

THE Caermarthen Training School is supported at an annual cost of about 1,600*l.*, of which 600*l.* is contributed from the Welsh Education Fund of the National Society and the general fund of that society, 150*l.* from the foundation of exhibitions by private patrons, 400*l.* from the fees of students, and the rest from Government grants. It affords accommodation nominally for sixty-three students, practically for forty-five, it having been found necessary to cut off some of the dormitories of the students for servants apartments.

The arrangements for the ventilation of the buildings are, as is too frequently the case in training schools, defective; the offices are inconvenient and ill arranged, and the court-yard is not properly gravelled. The elevation appears, in an architectural point of view, to be faultless, and the site is commanding and beautiful, but subject to the inconvenience of the want of water, in search of which a well sixty feet deep has been sunk, which requires to be deepened. The material of the building, being stone of the country, has been found to be pervious to the wet, to exclude which the front has been coated, at a considerable expense, with a coarse sort of varnish.

The garden, cultivated by the students, does credit to their industry, and in the careful and judicious management of the little farm of the college, and the use of manure tanks, they have the best opportunity of learning how much may be made of a few acres of ground, two or three cows, and a poultry yard. This kind of knowledge, valuable in the education of a schoolmaster anywhere, is specially so in Wales.

The following are the officers of the institution :—

The Rev. W. REED, M.A., Queen's College, Oxford, Principal.

The Rev. W. EDMUNDS, Lampeter College, Vice-Principal.

Mr. CHARLES MORGAN, St. Mark's College, Master.

Mr. THOMAS RICHARDS, St. Mark's College, Master of the Practising School.

The studies begin at nine in the morning, and terminate at five minutes past four in the afternoon, being a less time than is, I believe, usually allotted to the studies of a training school.

An important part of the business of the college consists in the teaching of English to the Welsh students. This is done by making them translate English books into Welsh, and Welsh books into English; and, indirectly, by English being the vehicle of their instruction in all other subjects.

I have before me examples of the writing from dictation of nineteen of the Welsh students. The spelling and the penmanship are alike imperfect.

Many of them read English also with difficulty.

The cause of this is not, however, to be visited on the college. Not one of these nineteen students had been resident in it a year; and three-fourths of them not half a year.

The fact is, that they are too poor (and the experience of the Caernarvon Training School is the same) to remain, at their own cost, long enough to be trained for the office of the teacher. They are constantly leaving the college, to be replaced by others, who remain no longer.

Of an average number of thirty-seven students resident during the year which terminated at Midsummer 1852, thirty-two had entered in the course of that year.

No other Welsh students than those who held Queen's scholarships, and were, therefore, able to stay longer at the college, have ever obtained certificates.

The students of the first class answered very fairly in their oral examination in English grammar and geography, and worked simple questions in arithmetic accurately and rapidly. The notes taken by some of them of the lectures of the principal on history, showed careful attention to them; and I heard them read with great satisfaction, showing, as they did, that this subject was not taught them only as a chronological arrangement of historical facts, but in an enlightened and philosophical spirit.

As a general result of my inspection, I am happy to be able to record the impression, that, notwithstanding the peculiar disadvantages with which it has to contend, *the college is making substantial progress.* One of the most serious of these disadvantages is, that it is without any other practising or model school than the Caermarthen National School, distant nearly a mile. The time of my inspection happening to be that of the Caermarthen fair, the children of this school were not assembled. My colleague, the Rev. Longueville Jones, therefore kindly undertook to report to me upon it, when, in the ordinary course of his inspection, he should visit Caermarthen. From his report, now before me, I gather, that although the school (consisting of 120 boys) takes a respectable, indeed a creditable, place amongst the national schools in this part of the country, yet that he “does not understand why it arrogates to itself “the title of a model school,” and that “he sees nothing in it which is not “surpassed by many common national schools.”

He states that "the students who came down from the training school to exercise themselves in the classes taught *moderately well* as a body of teachers, but only those who had been apprentices taught with notable tact or skill."

I have the honor to be, &c.

(Signed) **HENRY MOSELEY.**

The Right Honorable

The Lords of the Committee of Council on Education.

APPENDIX.

MEMORANDUM presented by Lord Dynevor; with Reply.

MY DEAR LORD,

Dover Street, 16 July 1852.

I HAVE had placed in my hands a memorandum, drawn up by some friends of education in Wales who are members of the Welsh Education Committee of the National Society. I venture, as one of that body, to ask you to consider with as much favour as you can the appeal thus made to you. I can say with truth, that, whether we look at the circumstance of our having to contend with the difficulties caused by the Welsh language, or by the smallness of the resources of the principality, we may, I trust, hope for a patient, if not for a favourable, consideration of our request, that, the exhibitions heretofore granted may not now be withdrawn. I venture to add we do not make this appeal without having made every effort in our power amongst ourselves; witness the number of those connected with Wales who have given some 100*l.*, others 50*l.*, and smaller sums, to be continued annually for ten years from 1846, when the movement first took place. We have also been nobly supported by many who knew little of Wales but her wants in respect to education.

I am, my dear Lord, &c.

(Signed) **DYNEVOR.**

**The Lord President of the Council,
&c, &c. , &c.**

MEMORANDUM intended for the Lord President of the Council, in support of an application from the Welsh Education Committee of the National Society that a limited yearly Grant for Exhibitions to Students of the Training School at Caermarthen may be continued by the Committee of Council on Education.

THE training school at Caermarthen was completed in the year 1848, at a cost exceeding 9,000*l.*, including a grant of 3,000*l.* made by the Committee of Council. The number of students in residence has exceeded on an average thirty, and has recently amounted to forty-four. The class of society in Wales from which the teachers of the poor are taken is unable to provide for the support of its members in training schools; the endowments of the clergy are too scanty to afford substantial assistance for that object; and in many districts there is no resident gentry. By means of subscriptions promised for ten years from 1846, the Welsh Education Committee have supported an adequate staff of officers, and provided a suitable domestic establishment. The payment required by them from students is 21*l.* a year, for education, board, lodging, and washing; but, of forty-four students now in residence, two only can provide from their own resources, or by the aid of friends, the very moderate charge made for their maintenance.

On the 12th of May 1848 the Welsh Education Committee represented to the Lord President, that, if the Committee of Council would confer, or, by adequate grants, enable the Welsh Education Committee to confer, a sufficient number of exhibitions on deserving young persons, important aid would be given to the objects for which the institution at Caermarthen was founded; and on the 8th of June 1848 the Committee of Council undertook to select a certain number of students to whom exhibitions would be given; and twelve exhibitions of the aggregate value of 200*l.* have been granted yearly since that time by the Committee of Council, after an examination conducted by one of Her Majesty's Inspectors of schools.

In a letter addressed from the Council Office on the 16th of March 1849 to the Welsh Education Committee, the motives which actuated the Lord President in conferring exhibitions, and the regulations under which they would be granted, were explained; and an assurance was given of his Lordship's anxiety to grant such exhibitions as might be conferred without establishing any precedent injurious to the public service.

In June 1850 the Lord President expressed misgivings at the exceptional character of the grant; and in May 1851 it was notified to the Welsh Education Committee that the grant made for the year ending Midsummer 1852 was the last occasion on which the Lord President could advise the Committee to allow exhibitions, except to Queen's scholars, pursuant to the Minutes of December 1846 and July 1850.

The grounds assigned for discontinuing the exhibitions were that several candidates qualified for Queen's scholarships would be admissible before Christmas 1851 to compete for Church of England schools in Wales.

The expectation of the Committee of Council, that an adequate number of Queen's scholars would become candidates for admission at Caermarthen, has not been realised, and only two Queen's scholars from Church of England schools in Wales have hitherto presented themselves as candidates for admission to that institution.

Of the peculiar difficulties by which the work of training teachers is obstructed in the principality, one of the most embarrassing is found in the existence of a separate language, and the necessity for a familiar acquaintance with two living languages in the teachers of the children of the poor; and Caermarthen is the only training school recognized by the Committee of Council at which instruction is given in the Welsh language to the students.

To meet the difficulties created by language, the Welsh Education Committee venture to urge two measures on the Committee of Council :—

1st. That pupil-teachers apprenticed at schools in Wales shall be required to proceed to Caernarthen for training.

2nd. That, inasmuch as such teachers will not, for some time at least, supply an adequate number of masters for schools in Wales, the Committee of Council shall continue to grant a limited number of exhibitions to students, who, although they may not have been apprenticed as pupil-teachers, shall be found, on examination by one of Her Majesty's Inspectors, to possess suitable qualifications for teachers of schools in Wales.

The benefits derived from exhibitions to the Caernarthen Training School have not been limited to the grants made by the Committee of Council, but the Welsh Education Committee have expended 200*l.* or thereabouts yearly in exhibitions varying from 10*l.* to 20*l.* each.

Such exhibitions have supplied means of support to young men who must otherwise have been withdrawn from the institution, but who, by means of the assistance thus afforded, have either already completed or are still pursuing their studies in a satisfactory manner; and many of the students on whom such exhibitions were conferred have owed their subsequent success, in gaining exhibitions granted by the Committee of Council, to the encouragement which had been afforded them by private exhibitions awarded to them by the principal or bestowed upon them by the donors.

The fund for such exhibitions was promised for a limited period of five years, which will expire in 1853; but those friends of the institution who have hitherto laboured in its behalf will be encouraged to promote a continuance of the private exhibitions, in case the public exhibitions are continued by the Committee of Council.

The efforts made by the Welsh Education Committee to instruct and educate the poor of the principality in suitable learning, works of industry, and the principles of the Christian Religion according to the doctrines and discipline of the Established Church, have entailed a large outlay; and the following abstract of their expenditure for the year ending Lady Day last will show that the permanent charge upon their funds is considerable :

Caernarthen Training School, beyond the sum of 215 <i>l.</i>		£	s.	d.
received for certificates from the Committee of Council, and exclusive of exhibitions	- - -	738	19	0
North Wales, training at Caernarvon, and grants for training teachers, and for harvest meetings in Bangor and St. Asaph	- - -	785	12	11
Llandaff, organizing schools and harvest meetings	-	108	11	5
Training teachers at Westminster, &c.	-	36	8	2
Miscellaneous expenses	- - -	68	19	7
		<hr/> £ 1,738 11 1		

The expenditure at Caernarthen only, including the sum appropriated for private exhibitions, considerably exceeds 900*l.*, and the outlay made during the same period by the Committee of Council for the same objects in the principality at large is limited to the following sums :—

	£	s.	d.
Exhibitions to students at Caernarthen	-	142	10 0
Queen's scholars at the same place	- -	10	5 0
Grants to the institution for masters who obtained certificates	- - -	219	0 0
		<hr/> £ 371 15 0	

Reply to foregoing Memorandum.

Committee of Council on Education,
Council Office, Downing Street,
2 September 1852.

MY LORD,

IN reply to the memorandum from the Welsh Education Committee of the National Society, which was forwarded to the Lord President by your Lordship on the 16th of July, I am directed to inform you, that the subject of the memorandum has received the most careful consideration.

The Committee of Council recognizes the fact that the co-existence of two languages, and the small value of the Church livings in South Wales, are circumstances which may fairly be pleaded as peculiar to that part of the united kingdom, when compared with England.

The former of these two circumstances, which requires that the elementary schoolmasters in many parts of Wales should understand two languages, limits the choice of them, in the like degree, to natives of the country; while the latter of the two circumstances diminishes the means of the local class most likely to be actively interested in the training of such masters.

On the other hand, it is to be stated that Wales is a cheaper country to live in than England, and that young men qualified to become schoolmasters in it are tempted by fewer opportunities under their immediate notice to enter other professions.

Weighing all these considerations, and looking to the change likely to accrue from the operation of the Minutes of 1846, their Lordships have not felt justified in permanently committing themselves to a system of special grants in favour of the Caernarthen Training School, but they have rather trusted that, with certain temporary forms of assistance, the promoters of the institution might, after a few years, and by balancing their difficulties with their advantages, be able to assume a position that would enable them to proceed with the same amount of public assistance as suffices for other training schools, more especially if, in the selection of Queen's scholars, allowance were to be made for a knowledge of Welsh in lieu of some other acquirements.

My Lords have proved (Minutes of 1850-1, vol. i. p. lxxx.) that, under the existing Minutes, five eighths of the entire cost of training schools under inspection may be reimbursed from public sources, and they have since stated (Minutes of 1851-2, vol. i. p. iii.) that they do not feel justified in increasing the proportion of this charge.

It is impossible not to see that the question now proposed to my Lords is in effect whether, in respect to the Caernarthen Training School, they will depart from this ground. Special assistance has been given for four years, and the minutes of 1846 are now in full operation in Wales. At Christmas next sixty pupil-teachers will be in a position to compete for Queen's scholarships from Welsh schools.

From among this number it is not too much to expect that the number of Queen's scholarships to be given away at Caernarthen (probably 11 or 12) may be filled up. My Lords could not sanction a rule which should bind the Welsh pupil-teachers to resort to Caernarthen for training, nor could my Lords acquiesce in any proposal which goes upon the assumption that pupil-teachers are not the proper class from which to draw the students of training schools. So long as the Caernarthen Training School is conducted efficiently and in accordance with the wishes and wants of the principality, there can be no doubt but that the Welsh apprentices will resort to it. If, however, it should be found that (notwithstanding the greater competition, and the absence of any allowance for a knowledge of Welsh,) they prefer other training schools, this would be a circumstance requiring the gravest consideration on the part of the Welsh Education Committee, in order to see whether an increased measure of public assistance be the proper, because the only remedy.

If eleven Queen's scholarships be filled up at Christmas next, the value of them will be nearly equal to that of the four Queen's scholarships and eleven exhibitions now enjoyed; and when, with this increase of aid, it is found that the accommodation for sixty is now occupied by so many as forty-four students, my Lords do not see that there is any reason to despair of the ability of the Caernarthen Training School to keep its ground upon the same terms of public support as the rest.

In order, however, to mark the desire which their Lordships feel to promote the cause of education in the principality, they have so far admitted the arguments set forth in the memorandum as to make the following offer for the next three years, beyond which time my Lords desire to record their opinion that it ought not to be continued.

When the number of students certificated is ascertained, after the examinations to be held at Christmas 1852, Christmas 1853, and Christmas 1854 respectively, my Lords propose to allow an additional sum equal to one half of the pecuniary value of the certificates in the year to end at Christmas next, to one-third of such value at Christmas 1853, and to one-fourth at Christmas 1854, to form in each of those years a fund for additional exhibitions, on the following terms:—

1. The Welsh Education Committee to contribute at least an equal sum; and,
2. To continue the same guarantee relative to the exhibitors as is contained in the letter from the Secretary of the National Society, dated 30 July 1850, to the Secretary of the Committee of Council.
3. The candidates for exhibitions out of this fund to be examined by Her Majesty's Inspector in March or April (when his duties bring him to Caernarthen in each year).
4. No exhibitor to be elected to an exhibition more than twice, nor to hold an exhibition with a Queen's scholarship.
5. No Queen's scholar to be eligible as an exhibitor.
6. The exhibitions to be of one uniform value, 18*l.*, and the standard of examination to be the same as for the end of the five years apprenticeship.
9. No pupil-teacher to be admissible as an exhibitor until he shall actually have completed his apprenticeship.

With regard to the amount of their Lordships grants for education in Wales, it is hardly possible to regard any one class of them as independent of the rest. To the grants, therefore, which are mentioned in the Memorandum should be added, for the year 1851-2,—

	£	s.	d.
Towards building elementary schools	1,366	8	4
Towards augmenting the salaries of certificated teachers	1,142	10	0
On pupil teachers	4,693	10	0
Total	7,202	8	4

I have the honor to be, &c.

(Signed) R. R. W. LINGEN.

Special Report, for the Year 1852, by Her Majesty's Inspector of Schools, the Rev. HENRY MOSELEY, M.A., F.R.S., &c., on the National Society's and the Diocesan Training Schools for Schoolmasters.

MY LORDS,

THE Carnarvon Training School, the Winchester Diocesan Training School, and the Worcester Diocesan Training School have this year been added to the ten training schools for masters heretofore inspected. These thirteen institutions afford accommodation for 729 students, and when I visited them in the months of October, November, and December, 513 students were resident in them, being an increase of 163 on the number reported last year. As the three training schools added to the list only contained thirty-six students, it follows that the ten training schools reported on last year, have increased their numbers by 127 students.

Eighty of the resident students were Queen's scholars, a number which the succeeding Christmas examination brought up to 150. In addition to this number, twenty-five Queen's scholars were appointed in the Oxford Training School, ten in the British and Foreign Society's, and ten in the Wesleyan Training School.

The total number of male candidates for Queen's scholarships at Christmas 1852 was 412. The total number of boys whose apprenticeships were completed in that year was 773* ; but those who completed their fourth year in 1852 were eligible for Queen's scholarships at Christmas of that year, and many probably of them were among the 412 candidates. It appears, therefore, probable that little more than one half of the teachers whose apprenticeships expired in 1852 were candidates for Queen's scholarships at the end of that year. Two hundred and three of these candidates were admitted Queen's scholars. On the supposition, therefore, that all these had completed their apprenticeships, none of the fourth year candidates being successful, it will follow that 570 male pupil-teachers, out of their apprenticeships, remain without Queen's scholarships.

Number of pupil-teachers out of their apprenticeships who have not gone to any training-school.

Now I have ascertained that of the students assembled in the Church training schools after Christmas† there were on the whole fifty-eight†, not being

* Minutes, 1851-2, p. 140.

† They were distributed as follows.

Students, not being Queen's scholars, who had been pupil-teachers :—

Carnarvon	-	-	1	
Carmarthen	-	-	0	
Highbury	-	-	2	
St. Mark's	-	-	10	
Cheltenham	-	-	20	{ These were all last year Queen's scholars, and remain as exhibitioners.
York	-	-	11	
Worcester	-	-	0	
Winchester	-	-	3	
Exeter	-	-	0	
Battersea	-	-	20	{ Of these seven were Queen's scholars last year. All the rest are exhibitioners.
Chester	-	-	1	
Chichester	-	-	0	
Total	-	-	58	

Twenty-seven of the above having already resided one year as Queen's scholars, there were thirty-one students admitted at Christmas who had been pupil-teachers, but were not Queen's scholars.

Queen's scholars, who had been pupil-teachers. But of these, twenty were in their second year of residence, having been Queen's scholars in the previous year. So that only thirty-one of the 773 apprentices whose apprenticeships were completed in 1852, and who have not obtained Queen's scholarships, have entered the training schools; and there remain 539, for whose further education as teachers no provision has been made, in Church training schools. On the whole the account stands thus.

Number of male pupil-teachers in England and Wales who completed their apprenticeship in Church schools in the year ending Christmas 1852	-	-	-	773
Number who obtained Queen's scholarships at all the training schools	-	-	-	203
Number admitted to the Church training schools, when they re-assembled after Christmas	-	-	-	31
Number whose further education is not provided for in Church training schools	-	-	-	539

Unless we conclude that more pupil-teachers have entered the British and Foreign and Wesleyan training schools without getting Queen's scholarships than have entered all the Church training schools, it follows that more than 500 have entered no training school.

The table on the following page contains a general statement of the statistics of the Church training schools at Midsummer 1852, and of the number of certificates and Queen's scholarships obtained by them at the Christmas examination.

Three hundred and twenty-five new students came to them between Midsummer 1851 and Midsummer 1852, and 192 left them; there was still room at the latter period for 216. In respect to 145 of the 192 who left, I have returns which show their average period of residence to have been one year and nine months.

I have ascertained the salaries and other emoluments of ninety of these.

For forty-seven of them houses were provided, in addition to their salaries, and forty-three had no houses.

Of those for whom houses were provided :

Salaries
obtained by
trained
teachers.

4	received £10 a year.
1	„ 45 „
15	„ 50 „
10	„ 60 „
8	„ 70 „

Of those who had houses there were, besides these, seven who received the children's pence. These had in addition to the pence the following salaries:—One 30*l.*, two 40*l.*, three 50*l.*

One received his board and lodging, and 20*l.*, as the remuneration of his services.

Of those for whom no houses were provided the following were the salaries :

1	received £30 a year.
5	„ 40 „
10	„ from 50 to 60 a year.
8	„ 60 a year.
11	„ 70 „
2	„ 80 „
3	„ 100 „
2	„ 120 „
1	„ 150 „

In the instruction of the students of these institutions, thirty-four masters are employed constantly, and forty-one occasionally.

The Table in page 394 contains a statement of the cost of their maintenance, and that in page 395 a statement of the sources of their income.

* The returns from Battersea and Cheltenham are made up to Christmas 1852.

† Besides this number, 12 were trained in 1819 for short periods, 41 in 1850, and 71 in 1851.

‡ Five of these were recommended to withdraw after three months probation, on account of ill-health, or inaptitude for the office of the teacher.

§ Four of these afterwards obtained situations as masters of schools.

* The Government grants for certificates and Queen's scholarships are those made for the year ending Christmas 1852, and are taken from the Minutes 1851-52, Vol. I, p. 248.

This was a special grant for Welsh exhibitions.

Income
training
schools

Several heads of expense calculated per student.

The expense of the maintenance of these institutions is 26,179*l.* 6*s.* 10*d.*, being at the rate of about 56*l.* per annum for each resident student. Of the whole expense, 7,374*l.* 17*s.* 7*d.* is incurred for tuition, being at the rate of 15*l.* 15*s.* 1*d.* per student. For books, apparatus, stationery, &c., there is paid at the rate of 2*l.* 8*s.* per student, and for rent and taxes 2*l.* 1*s.* per student; and for household and other current expenses 26*l.* 2*s.* per student. The rest of the cost is for new buildings, repairs, new furniture, &c.; and which, although for any given institution they are not current expenses, are so in respect to the *whole*.

Increase of income. Proportions of income arising from different sources.

The total year's income was 25,209*l.* 5*s.* 5½*d.*, being an increase of 6,005*l.* 14*s.* 9½*d.* on that reported last year. The accounts of last year did not, however, include Highbury and Winchester. Deducting the income of these, the increase is reduced to 2,550*l.* 4*s.* 6*d.* Of the whole income, 5,000*l.* 8*s.* 10*d.*, or about one fifth, arises from subscriptions and donations specially for the support of training schools; 5,958*l.* 8*s.* 7*d.*, or somewhat more than another fifth, from grants of the National Society and of Diocesan Boards of Education; 6,752*l.* 13*s.* 9*d.*, or somewhat more than one fourth, from the fees of students; and 3,952*l.* 10*s.*, or somewhat more than a sixth, from Government grants,

These proportions will probably be changed by the operation of the Minutes of 1846.

The five years for which your pupil-teachers were apprenticed expired for the first time in 1852. The Queen's scholars appointed at previous examinations, not more than 100 in number, were those who had been put on in their apprenticeship, as the reward of remarkable good conduct and progress in their studies.

Influence of Queen's scholarships and grants for certificates on the income of training schools.

Supposing the training schools on which I am now reporting to be full of students, and your Lordships to continue to limit the number of Queen's scholars in any training school to one fourth the whole number of students, they may educate 182 Queen's scholars. If 160 be at any time resident, the training schools will derive twice the income they at present do from that source.

When the present class of students are replaced, as it is probable they will be, by students who have been pupil-teachers, the number of certificates granted every year will probably be increased; so that from this source there will be a larger revenue.

On the other hand, as such students have for the most part to be maintained, wholly or in part, by means of exhibitions paid from the college chest, the income arising from fees will by this substitution, of students who have been pupil-teachers for the old class of students, be diminished. These considerations show that the proportion of the Government grant to the total income of each training school, may be expected to be increased; but they do not show that the income itself, or, at any rate, the part of it available for educational purposes, will be increased.*

* The fees returned to me as paid this year by the students of those colleges on which I reported last year amount, including those of the Queen's scholars, to 7,048*l.* 5*s.* 10*d.*; those similarly returned last year amounted to 6,017*l.* 19*s.* 0*d.*; showing an increase of 1,030*l.* 6*s.* 10*d.*; but I found 127 more students resident in these colleges this year than last. If they had been resident all the year their fees would have increased the total amount by 3,175*l.* The maintenance of these 127 students could scarcely cost less than 1,030*l.*

The income arising from different sources in the two years is stated in the following Table, those two colleges being omitted from the comparison which were not reported upon in both years.

Income.	Years.	
	1851.	1852.
By Government grants -	£ 1,976 s. 0 d.	£ 3,031 s. 6 d.
By fees of students, paid by themselves or their relatives -	5,791 9 0	5,772 15 10
By grants from various boards of education, being the produce of voluntary contributions -	6,198 3 0	5,958 8 7
By subscriptions and donations, specially for the use of training schools -	3,668 10 0	3,032 17 6
By exhibitions founded by private patrons -	632 10 0	194 6 0
By income arising from other sources -	976 13 6	3,782 6 2½
Total - - -	19,243 10 6	21,754 11 7½

The last item in the Table includes special contributions to the building funds of training colleges. These have during the last year amounted in the case of one college, that at Cheltenham, to 1,533*l.* 14*s.* 6*d.* The whole income arising from this source was 1,743*l.* 2*s.* 5*d.* As no special contributions to the building fund were returned last year, this reduces the total increase in the current income, notwithstanding the accession of 127 students, to 767*l.* 18*s.* 8½*d.* The returns of income, having (for the most part) reference to the year terminating at Midsummer, do not include the grants payable at the following Christmas. A difference thus arises between them and the official returns. The latter have reference to the year terminating at Christmas. The following are the total sums actually paid to the Church of England training colleges which I have inspected as the fees of Queen's scholars and for certificates:—

In the year ended Christmas 1852, 9,846*l.* 13*s.* 4*d.*

The Christmas Examination.

I have appended to this report copies of the questions proposed to candidates for Queen's scholarships and the students of training schools at the Christmas examination.

The questions in each paper were formed into two divisions, those in the first division being more elementary than those in the other. The former were divided into four sections, only one question in each being allowed to be answered by the same candidate. The more difficult questions in the second division were not divided into sections, but the candidates were instructed that "no answers to this part of the paper would be read by the examiners if the answers to the first part were unsatisfactory."

It was intimated in my last report* that the examination in the Holy Scriptures, whilst it included the whole of the Old and New Testaments, would be directed more minutely and textually to the subject matter of one of the Gospels and the Acts of the Apostles.

The same course will, with your Lordships' permission, be pursued in the next examination, the Gospel taken with the Acts of the Apostles being that according to Saint Mark.

Having found the masters of schools very generally ignorant of the subject matter of the reading-lesson books they use in their schools, an ignorance which, strange to say, remains unshaken by the constant habit of teaching the children to read from them, so that all the advantage which might be

The questions proposed at the Christmas examination.

The same course to be pursued at future examinations as at the last.

derived from those books, except in teaching the children to read, is thrown away,—I stated it to be my intention, with your Lordships' sanction, to set in the paper on school management one section of questions from sections 1 and 4 of the Fourth Irish Book, and another section from sections 1 and 2 of the Fifth Irish Book, and also two sections of questions from M'Culloch's Course of Reading; leaving to the students the option of the two Irish Books or M'Culloch's, but not allowing them to answer from both.

I selected the Irish Books and M'Culloch's simply because I found one or other of them to be actually used in all the Church training schools under inspection. Finding that the same papers on school management which are used for Church training schools are used for the British and Foreign School Society's training school, I propose in my next examination to set the like number of questions in their Fourth Reading-lesson Book.

It has been a frequent subject of complaint in regard to the instruction of teachers, that it covers too large a surface, and is wanting in depth, precision, and reality. The measures I have described have for their object to remedy this defect. If it be a necessary condition in the education of the elementary teacher that his knowledge should not embrace the whole of the subjects to which his attention must be directed, yet as far, as he goes, his knowledge may be perfect. He will thus have the advantage of that intellectual training which a complete mastery even of the elements of a subject supplies. The principle of "a little and well,"—the habit of compassing entirely whatever he undertakes, however little that may be, and of making a permanent possession of it,—impressed upon his mind at the training school, he will carry with him to the village school, of which it will become the rule; and, a daily lesson of honesty and faithfulness to the children.

The Queen's Scholars.

The same questions were given to the candidates for Queen's scholarships as to the rest; the first division including questions easy enough for them.

The following Table contains a statement of the number appointed in each training school.

Queen's Scholarships obtained in the different Training Schools at Christmas 1852.

* Masters, formerly students in a training college, who have left it without obtaining their certificates, are allowed afterwards to attend the examinations of those colleges as candidates. The proportion which such candidates trained in former years bear to the existing students of each college should be taken into account in estimating the success of the present administration of the college, as shown by the preceding Table.

TABLE of the Number of Candidates in each Training School whose Exercises were classed Excellent, Good, or Fair in subjects not usually taught in elementary Schools.

Name of Training School.	Number of Candidates.	Number per Cent. of Candidates in each Training School whose Papers were marked Excellent, Good, or Fair.

Numerical
estimate of
the effi-
ciency of
each train-
ing school.

If the number per cent. of candidates in any college whose exercises are favourably marked on a given subject, be taken to represent a certain educational result, then this number divided by the average number of months of the residence of those students will show the proportion of that result attained every month, and may be considered a measure of the efficiency of the teaching. One of the defects of this estimate is that it supposes the whole result to be attained at the training school, taking no account of that part of it which is attained before the students enter it. To allow for this, it is obvious that some number should be subtracted from the numbers per cent. before the division is made of the number of months, the number so subtracted being supposed to represent, on the same scale, the average result attained in the instruction of a candidate before he enters a training school. The results of the examinations of the candidates for Queen's scholarships, if digested in the same way, would give this number, with perhaps a fair degree of approximation, for each subject.

TABLE in which the Results given in the preceding Tables are compared with the Times in which these Results have been attained in different Training Schools.

Name of Training School.	Numbers per Cent. of Candidates in each Training School whose Exercises were marked Excellent, Good and Fair, divided respectively by the average Numbers of Months during which the Candidates had been resident in those Training Schools.

I hope during the present year to be able to devote a longer time to the inspection of each training school, and begin my visits to them before Midsummer.

Method in which the inspection was conducted.

In the inspection of each I have been accompanied by Her Majesty's Inspector of Schools for the district in which it is situated. During the first day of our inspection the instruction of the students went on in its ordinary course; the second day was devoted to an oral examination of the students, and on the third day we examined the practising school. On the last day of inspection the committee of the institution usually assembled to meet us. The opportunity thus afforded us of laying before these gentlemen the results of our inspection, and conferring with them on matters calculated to promote the welfare of the institution, is one of the most important of our functions.

Unabated zeal in the work of training schools.

It has been a subject of gratification to me, in the inspection of training schools, which now extends over ten years, to observe that the interest which in other undertakings is so apt to flag when the novelty passes away, has suffered in these institutions no diminution. I attribute this partly to the nature of the work in which they are engaged, and in no slight degree to the stimulus of those measures which are taken by your Lordships for promoting the education of the country. They seem to me to be pursuing their useful career in the same hopeful and enterprising spirit as when I first visited them, but with a larger measure of success.

Influence of the examinations in causing teachers to acquire a sounder knowledge of elementary subjects.

The certificate examinations, and your Lordships' grants to the colleges, in respect to such candidates as obtain those certificates, are a principal motive to exertion; and the special value which in your examinations is assigned to a knowledge of those subjects, the teaching of which is the business of an elementary schoolmaster, has a useful tendency to direct the studies of the candidates particularly to those subjects, and thus, by limiting in some degree the surface of their knowledge, to deepen it. Besides the wholesome discipline of learning well whatever they learn themselves, not the least advantage of this is, that it gives a greater *reality* to his teaching. There is no more unfavourable position in which a teacher can stand before children, than one in which he assumes to know what he does not. It is one which the children soon learn to understand, and a lesson given under these circumstances becomes to them a lesson of untruthfulness.

It may be a question whether the subjects at present taught in elementary schools are the best which could be taught, or whether the forms under which they are taught are the best adapted for children, but there can, I conceive, be none, that as long as they are taught they should be taught *well*.

Reason why other than elementary subjects are taught to elementary schoolmasters.

With reference to the fact, that other subjects than those of elementary instruction are taught to the students in training schools, I have to repeat the opinion expressed in my former reports, that such subjects as grammar, and history, and geography, might, and, I think, ought to be so taught as to yield to no others in their power to exercise the understanding and expand the mind; but I cannot shut my eyes to the fact, that so long as grammar, and history, and geography continue to be taught,—the first as a classification of words, about which no two grammarians are agreed,—the second as a mere detail of occurrences in chronological order,—and the third simply as a topographical description of divisions of the earth's surface,—it is necessary to have recourse to other things to educate *men* upon. The mind of a man will not thrive on the intellectual food of a child.

It would greatly tend to a higher development in training schools of the subjects proper to elementary instruction, and thus, to render it unnecessary to carry their instruction into subjects foreign to the business of the elementary school, if the officers of those institutions were encouraged to carry their studies in them beyond the limit of your certificate examinations, by conferring upon them augmentations of salary consequent on special examinations affording evidence of those higher attainments.

Augmentations of salary for

I am aware that your Lordships have provided that certificated teachers may receive, if employed in training schools, the augmentations of salary

they would receive if employed in elementary schools. The examination which I propose is one of a higher order than that for certificates, limited to one or at most two subjects of elementary instruction; and the augmentation, is greater in amount. officers in training schools.

It is one of the advantages of this arrangement that it would facilitate the appointment of a class of assistant lecturers similar to those known in the French colleges as *repetiteurs* (repeaters), whose business it is to be present at, and assist in, every lecture, to take notes of it, and to repeat it to the class in a subsequent lesson, fixing it in the minds of the students by examination, and by further explanation and development. Expediency of creating a class of assistant lecturers in training schools.

Such an assistant lecturer attached to every lecturer, or rather to every subject, would be an invaluable adjunct. Devoted to the study of a single subject, he would attain in it a high standard of instruction; and formed in the class of the teacher, he would the more easily reproduce his method of teaching it.

I have for some years past recommended the appointment of officers of this class in training schools. This recommendation has in some cases been so far adopted as to appoint young men to be repeaters who remain students. I anticipate but little advantage from such persons. They are, under another name, monitors. To be of any use they must have completed the usual course of instruction, must have made a special study of subjects intrusted severally to them, and have afforded, on examination, evidence of higher attainments in those subjects than are contemplated in the certificate examinations.

BATTERSEA. The Battersea Training School, established in the year 1840 by Sir James Kay Shuttleworth and Mr. E. Carlton Tuffnell, may be considered the parent of all those on which I am about to report. It is now supported—by the National Society, and by subscriptions and Government grants—at an annual cost of about 4,000*l.*; of which sum somewhat more than 1,000*l.* is raised by subscriptions specially for that purpose, 1,000*l.* contributed by the National Society from its general fund, and about 1,100*l.* paid in fees by the students. For the remainder of its income it is dependant on Government grants.

A new wing has been added to the buildings of this institution, and it now affords comfortable accommodation to eighty-four students, the number actually resident at the time of my inspection.

The crowded state of the dormitories would still have rendered this extension necessary if the operation of your Lordships' Minutes had not increased the number of candidates for admission. Besides new dormitories, three new class-rooms have been provided.

One is employed as a laboratory and lecture-room on physical sciences, a second is to serve as a library and museum, and the third is used as a common room for the students and occasionally as a lecture-room.

The committee has decided on the establishment of a new school, to be called a model school, as distinguished from the practising school.

This school is to be so conducted, under the direction of the Principal, as to serve as the model of such schools as the students may hope, and should endeavour, to create for themselves.

With this view it is proposed that the classes should not be taught by the students for practice, as they are in the practising school, but that the whole should be in charge constantly of the same teacher aided by two pupil-teachers. The fees charged being, like those in the King's Somborne school, according to condition in life of the parents, the school is to be made as nearly as possible self-supporting. The apparatus of instruction is to be changed from time to time as improvements are introduced, so as to present to the students always the model of what in this respect is most perfect. The organization is to be that which is recommended for the adoption of the students. The methods of instruction are to be constantly under the

eyes of the students; and it is hoped that a master may be found to conduct the school on whose manner of teaching they may with advantage form their own as a model. It is to be looked at by them, but not touched. Their practice of the art of teaching is to be obtained in the other or village school. The increasing population of Battersea will supply children for both schools.

The Battersea Training School has always been remarkable for the excellence of its practising school, and for the care and pains it has bestowed on teaching its students to teach. Other institutions have, however, of late made great progress in the same direction; and if Battersea no longer claims the first place in this honourable competition, the erection of the new model school shows a determination to keep in the first rank.

The officers of the Battersea School are:

The Reverend Samuel Clark, M.A., Magdalen College, Oxford, Principal.

The Reverend Robert Graves, M.A., St. John's College, Cambridge, Vice-Principal.

Mr. Frederick Rowbottom, Certificated Master, Assistant Master.

Mr. George William Martin, the Choir School, St. Paul's, Resident Music Master.

Mr. George Henry Taylor, Master of the Model School.

Mr. John Charles Buckmaster*, Industrial and Drill Master.

Mr. Hullah and Mr. May, Musical Instruction.

Mr. Warren, Instruction in Model Drawing.

The labours of the students begin at seven in the morning and conclude at nine, with the usual intervals. The principal and vice-principal divide equally the instruction in religious knowledge. The principal undertakes the whole instruction of the two senior divisions in grammar, geography, and history. The correspondence of the institution, the accounts, and the general superintendence, moreover, devolve upon him.

The duties of the vice-principal and of the other officers of the institution, placed as they are in more immediate contract with the students, are scarcely less responsible, and they are not less laborious. It is my duty to bear testimony to the zeal and discretion with which they appear to me to be discharged. The results of the Christmas examination as stated in the tables, pp. 401-403, justify me in recording this testimony. A spirit of enterprise in the cause of education, and of faith and hope in the work of the Christian teacher, has always been characteristic of the Battersea training school, and is perhaps due to the circumstances in which it originated. This spirit it is not likely to lose under its present Principal. In its influence on the formation of the mind of a training school, and on the development of the character of the teacher in its students, it is invaluable.

In his lectures on Church history the Principal allows to the students time to take down in writing copious notes, or nearly the whole, of what he says. This is an excellent exercise in spelling and in composition; it fixes in their minds whatever they are taught; and, accustoming them to a constant attention, and to receive instruction under that condensed form and with that accurate information and precision which adapts it to be written language, it tends to check in them a habit of discursive and careless attention which oral instruction has a tendency to foster.

This method is not of course applicable to all lectures, nor is it perhaps desirable that it should be exclusively followed. The reproduction of the information recorded in the notes taken at every lecture is the work of the first part of the next lecture. It is a task from which the lecturer might with advantage be relieved, by giving him the help of an assistant lecturer (answering to the officer who in foreign institutions is called the *repetiteur*),

* Mr. Buckmaster gives one lesson a week to the students on physics and elementary chemistry.

whose function it might be to go over each lecture again with the students, to correct their notes and recollections of it, and to fix its leading features in their recollection.

All the students devote four hours weekly to the study of the art of teaching, and six hours and a quarter to the practice of teaching in the practising school. To give a practical form to their study of the art of teaching, lessons are delivered by two or three of the students to a class of children once a week, in the presence of the rest, and, of the officers of the institution. These lessons are afterwards discussed and criticised. I myself heard all the students who were candidates for certificates,—between fifty and sixty in number,—deliver lessons, each of twenty minutes' duration, in the model school, and took notes of each lesson.

In speaking of these lessons I am desirous to bear testimony to the excellent knowledge of geography shown by them, and to the skill with which they teach that subject. A few lines boldly drawn on the black-board give the broad outline and characteristic surface features of the country. On these they rivet the attention of the children, and never leave them until they are fixed in their memories.

They have no common advantages in the lectures of the Principal on geography. Nothing can be more apparent than the aid which he derives from a profound and comprehensive knowledge of the subject in adapting it to the work of the elementary teacher.

CARMARTHEN.—The Carmarthen Training School is supported at an annual cost of about 1,600*l.*, of which about 600*l.* is contributed from the Welsh Education Fund, and the general fund of the National Society; 150*l.* from exhibitions founded by private patrons; 400*l.* from the fees of students; and the rest from Government grants. It affords accommodation nominally for sixty-three students,—practically only for forty-five,—it having been found necessary to cut off some of the dormitories of the students for servants' rooms. The arrangements for the ventilation of the buildings are, as is too frequently the case in training schools, defective; the offices do not appear to me to be convenient; and the courtyard is not properly gravelled. The elevation is, in an architectural point of view, faultless, and the site is beautiful; but subject to the inconvenience of a want of water, in search of which a well sixty feet deep has been sunk, which requires to be deepened. The material of the building, being stone of the country, has been found to be pervious to moisture, to exclude which the front has been painted over with a sort of varnish. The number of students resident at the time of my inspection was forty-three, of whom four were Queen's scholars.

The following are the officers of the institution:—

Reverend William Reed, M.A., Queen's College, Oxford, Principal.

Reverend William Edmunds, Lampeter College, Vice Principal.

Mr. Charles Morgan, Certificated Master, St. Mark's College, Master:

Mr. Thomas Richards, Certificated Master, St. Mark's College, Master of Practising School.

The studies appear, from the time-table before me, to begin at nine in the morning, and terminate at five minutes past four in the afternoon; being a less time than is, I believe, usually allotted to the labours of a training school. An important part of them consists in teaching the English language to the Welsh students. This is done, directly, by making them translate English books into Welsh, and Welsh books into English, and, indirectly, by English being the vehicle of their instruction in all other subjects.

I have before me examples of the writing from dictation of nineteen Welsh students. The penmanship of all these exercises is imperfect, and nine of them contain many mistakes in spelling. Many of the Welsh students also read English very imperfectly. The blame of this is not to be visited, altogether, on the college. Not one of these nineteen students had been

resident in it a year, and three fourths of them not half a year. They are too poor—and the experience of the Carnarvon School is the same—to remain at their own cost long enough to be trained for the office of the teacher. They are constantly leaving the college, to be replaced by others who remain no longer. Of an average number of thirty-seven students resident during the year terminating at Midsummer, thirty-two had entered in the course of that year. These remarks do not apply to those Welsh students who hold Queen's scholarships or exhibitions. No others have ever, I was informed, obtained certificates.

The Rev. Longueville Jones, Her Majesty's Inspector for Wales, accompanied me when I visited the college, and assisted me in the oral examination of the students. They answered very fairly in English grammar and geography, and made simple computations in arithmetic accurately and rapidly. I regret, however, to have to record that the results of the Christmas examination at this college, as stated in the tables pp. 401–403, are far from satisfactory.

The garden, cultivated by the students, does credit to their industry; and in the judicious management of the little farm of the college they have the best opportunity of learning how much may be made of a few acres of ground, two or three cows, and a poultry-yard. This kind of knowledge, valuable in the education of a schoolmaster anywhere, is especially so in Wales.

It is a serious disadvantage to this college that no other practising or model school is provided for it than the Carmarthen National School, distant nearly a mile. It is, I believe, impossible to give to the instruction of a training school that professional bearing on which its success mainly depends without the intimate connexion of an elementary school with it, so that the theory of the one may be studied in the constant view of and in an intimate connexion with, the practice of the other.

The time of my inspection happening to be that of a Carmarthen fair, the children of the National school were not assembled.

Mr. Jones therefore undertook to report on this school when, in the course of his ordinary inspection, he should visit it. I regret that his report is but little favourable to it.

ST. MARK'S COLLEGE, CHELSEA.—This college is supported at an annual cost of about 4,670*l*.* Its income for the year terminating at Lady Day 1852 was about 6,500*l*., of which 3,100*l*. was contributed by the National Society, 290*l*. from donations and subscriptions specially for the use of the college, 1,130*l*. from students' fees, 1,270*l*. from Government grants, 135*l*. from the fees of the practising school, 113*l*. from special contributions to the building fund, and 422*l*. arose from the chapel, the cost of clothing repaid by the students, the farm and garden, &c., &c.

The surplus of the year's income has been applied to the erection and furnishing of new buildings, and to repairs.

The prescribed time of training is three years; but Queen's scholars may not merely receive a "*hene dicessit*" at the end of the second year, but a recommendation to an appointment, if they deserve it. Except in special cases, they are, however, advised to remain a third year, which they may do free of cost. The average time of residence of the students who left in the year terminating Midsummer 1852 had been two years eleven months.

One side of a new quadrangle has been erected. It contains a noble dining hall, lecture-rooms, and, above these, two ranges of excellent dormitories and officers' apartments. It now affords accommodation for eighty-four students.

Encouraged by the prosperity of the institution, the committee propose to complete this quadrangle.

The present buildings being, moreover, wholly insufficient to receive the children who flock to the practising school, they propose to make a large

* This sum includes certain expenses for the chapel, students' clothing, &c., which are repaid to the college fund.

extension of its buildings, so as to supply space for the instruction of 500 children.

The following are the officers of the college :—

The Reverend Derwent Coleridge, M.A., St. John's College, Cambridge, Principal.

The Reverend Arthur Rawson Ashwell, M.A., Caius College, Cambridge, Vice-Principal.

The Reverend C. F. Eastburn, B.A., St. John's College, Cambridge, Mathematical Lecturer.

The Reverend Charles Daymond, St. Mark's College, Normal Master, and Master of Practising School.

The Reverend Storer Lakin, St. Mark's College, Assistant Tutor.

George Manton, Steward.

Rev. Thomas Helmore, M.A., Prefector.

Mr. John Hullah, Teacher of Music.

Mr. Thomas Rawlings, Drawing Master.

Mr. Cousins, Drill Master.

The studies begin at half past six in the morning and terminate at half past six in the evening, except on two evenings of the week, when they are continued until nine in the evening.

The results of the Christmas examination for certificates, as recorded in the Table, pp. 401–403, are not, on the whole, quite so favourable to the students of this college as some former ones have been.

It is, however, but just to state that the success of the course of instruction pursued in this training school is not to be measured exclusively by the results of that examination, or to be considered as wholly recorded in that table. Our examinations have—and must always have—a special reference to the knowledge acquired by the students in training schools, of those subjects which are ordinarily taught in elementary schools.

In this institution they study other subjects than those. A large portion of their time is devoted to Latin and Greek; and although their attainments in these subjects do not appear to be very considerable, yet a large influence is attributed to the study of them.

Although I have no ground for recording, as the practical result of this classical instruction, the more special adaptation of the students of this institution than others, to the office of the elementary schoolmaster, yet that a certain higher standard of *general*, if not of *professional*, education is ultimately reached by them, is not, I think, to be questioned. There are functions of the teacher to which this is a necessary introduction. Accordingly I find that two principals of diocesan training schools have been students in this college, three vice-principals, two normal masters in training schools, and a third acting as such, two tutors of training schools, and two organizing masters.

I was accompanied in my inspection by the Rev. F. Cook, Her Majesty's Inspector for the metropolitan district, who assisted me in the oral examination of the students, and in the examination of the practising school.

The practising school, under the skilful direction of Mr. Daymond, has acquired a state of efficiency which certainly places it second in point of efficiency to that no other Church training school. On the day of my inspection, upwards of 300 children were present in it, and if it were possible to receive more, this number might, I was informed, be very greatly increased. It is taught in three principal divisions, each of which forms in itself a complete school, and has a different fee; the third is organized as a model school on the tripartite system. Besides these three divisions of the practising school, there is an infant school.

The college owes to one of its own students the remarkable success of this school. It is no slight testimony in its favour that it has created so good and faithful a schoolmaster as Mr. Daymond.

CHELTHENHAM.—The Cheltenham Training School was founded in the year 1845, by an association formed for that purpose, chiefly by the exertions of the Reverend Francis Close, the incumbent of Cheltenham. It affords accommodation for 125 students, and is supported at an annual expense of about 2,500*l.*, of which sum 558*l.* arises from annual subscriptions and donations, 812*l.* from the fees of students, and 475*l.* from Government grants.*

A further sum of 1,533*l.* was raised by subscription during the year, for the erection of new buildings, to be used as model and practising schools.

The officers of the college are:—

The Reverend C. H. Bromley, M.A., St. John's College, Cambridge, Principal.

Thomas Bodley, Esq., B.A., Queen's College, Cambridge, Vice-Principal.

Mr. Robert Ross, Assistant Master.

Mr. J. Sutcliffe, Glasgow Normal College, Assistant Master.

Mr. Gill, Master of the Practising School.

Mr. Evans, Music Master.

I was accompanied in my inspection by Her Majesty's Inspector, the Rev. H. Bellairs. We found seventy-seven students assembled, whom we examined orally in Scriptural knowledge, English history, geography, and arithmetic. We moreover attended during one day the course of lectures usually delivered to the students, and we inspected the model school.

I have before borne testimony to the spirit of progress, the just estimate of the work of a training school, and the entire devotion to that work, which characterises the system of this institution.

In its course of instruction the school is kept constantly in view. The students are accustomed to value all they learn with reference to that, and shape all their knowledge of it, more or less, according to its uses in the school. It is not only thus that they acquire the *knowledge* of the teacher, but that the *character* of the teacher—a far more important result—is built up in them.

It contributes greatly to this end that the Reverend the Principal and the other officers take an active part and the warmest interest in the affairs of the model school. The two assistant masters have themselves been successful elementary teachers.

Your certificate examinations show that by this devotion to what belongs specially and distinctively to elementary teaching, nothing is lost of the efficiency of the institution in other respects.

The practising school is conducted on the tripartite plan; it is formed into three divisions; but in respect to the children who compose these divisions, there are two distinct organizations, into which the school resolves itself at different periods of the day. In the one, they are divided according to their proficiency in reading, and in the other according to their knowledge of arithmetic. In each division there are two classes, and in each class two drafts. Each class has a time-table in which the subject of every lesson is specified, and the student who gives that lesson is required to bring in his hand notes of it. I have appended the time-table for three months of one of these classes (Appendix A.), each class being differently composed at different times. The time-table is double. There are few elementary teachers who bring to their work so much experience and such a thorough intelligence of it as Mr. Gill, the master of this school; and the students have before them in him a rare example of energy, zeal, and devotion to the interests of education. I have seldom entered a school where every child appeared to be more actively employed according to its capacity in the work of the

* The remainder of the year's expenditure appears from the accounts before me to have been borrowed from the building fund.

school, or from which the dreaminess and listlessness, which is the conspicuous defect of schools in which oral teaching is much used, was more entirely banished. It appeared to be a principle in the management of the school that no instruction should be spilt on the ground; that every child should be made to receive, under some form or another, whatever was undertaken to be taught to it. The better teaching of the children is not the only result thus obtained. It is a useful discipline to the teacher, accustoming him not to include in his lessons things which cannot be understood by children; and to the children, accustoming them to attend to all they are taught. The power of attention is no unimportant acquisition.

Every school, however good, has, to the eyes of an Inspector, its characteristic defect. It would I think be an improvement in this school if the results to which I have referred could be accomplished with less effort on the part of the teacher, and in a somewhat less demonstrative manner.

CHESTER.—The Chester Diocesan Training School is supported at a cost of somewhat less than £1,500, of which sum about £400* is contributed by the Chester Diocesan Board of Education, £700 by the fees of students, and £300 by Government grants. It affords accommodation for seventy students. The number resident at the time of my inspection was forty-four, of whom nine were Queen's scholars.

The following are the officers of this institution:—

Rev. A. Rigg, M.A., Christ College, Cambridge, Principal.

Rev. W. J. Constable, B.A., Clare Hall, Cambridge, Vice-Principal.

Charles D. Craven, B.A., Lincoln College, Oxford, English Tutor.

Mr. H. Greenhalgh, Certificated Master, Assistant Master, chiefly employed in the Model School.

Mr. J. Berncastle, Lecturer in Geography and History.

Mr. J. E. Hardy, Certificated Master, Nominal Master, and Master of Practising School.

Mr. H. Simms, Royal Academy of Music, Singing and the Organ.

Mr. Herdman, Object Drawing.

Mr. J. Bishop, Class Discipline.

The building and approaches are now complete; and in all that relates to its structure this institution may, I think, be studied as a model in the construction of others. The original plan and design of the building was suggested by the Rector of Warrington, the Hon. and Rev. Horace Powis; and no small proportion of the funds expended in its erection was contributed through his advocacy of its cause.†

It is by the untiring zeal and energy of the principal, persevered in through many discouragements, and, in no inconsiderable degree, by the manual labour of the students, that the fabric has at length been perfected—a beautiful chapel being added to the original design. The arrangements for ventilation and lighting are specially worthy of observation. Cold air is admitted to a heating apparatus in the basement story by very large ducts, which may be opened at will from one side or other of the building; this air passes between metal plates forming the sides of flat vessels in which hot water circulates, each apparatus—for there are two—being composed of thirty or forty of such vessels. Thus heated, the air is distributed through the building by flues, entering each room by numerous valved apertures, and escaping by two or three large circular apertures in the ceiling, which admit of being closed, more or less, by circular wooden covers suspended in the middle by ropes passing over pulleys. The cold air ducts are opened on the one side or the other of the building according to the direction of the wind. The manipulation of them in this way is a very important part of the arrangement, but it is an easy one.

* £70 of this sum is for exhibitions founded by the Board.

† The architects were Messrs. Bucklers.

Having visited the college at different seasons of the year for nine successive years, I can bear testimony to the success of this method of ventilation, applied and managed as it is here,—judiciously.

To economize the consumption of gas, which is paid for by the meter, pressure gauges connected with the mains which supply the principal apartments and floors are by a simple and by no means an expensive arrangement grouped together in the principal's house. By looking at these he can at any time tell in what apartments the gas is burning, and in what quantities.

The kitchen and cooking apparatus, and the arrangement of the offices, are excellent. The board of the students is provided by a steward, formerly a cook in one of the colleges at Cambridge, at so much per student.

I have often borne testimony to the remarkable efficiency of the industrial department of this institution. Its workshops include a large carpenter's shop, a smithy, a bookbinder's shop, a chemical laboratory, and an engineer's shop. The variety of the occupations of these workshops may be judged of from the following list of the employments of the students at a given time:—

Employment.	No. of Students.
Boxmaking	2
Circular sawing	2
Electrical apparatus making and chemistry	5
Gardening	4
Iron forging	4
Marquetry work	2
Metal boring	3
Metal turning	8
Metal fitting	5
Map mounting and varnishing	9
Model making	6
Painting and woodstaining	4
Peg and wedge making	5
Sectional model making	5
Soldering	1
Wood carving	9
Wood turning	15
Wood work, as carpentering and joining	17

To this list of workmen must be added the masters, who all take a part in the labour of the workshop, and the boys of the commercial school, fifty-eight in number, who are among the best and most industrious of the workmen.

The articles made are chiefly school apparatus, and they are sold for the benefit of the college. Among the principal purchasers are the Bishop of St. Asaph, for the use of the Welsh schools, the National Society, and the department of Practical Art of the Board of Trade. I was accompanied in my inspection of this college by Her Majesty's Inspector, the Rev. J. P. Norris, and we devoted, as heretofore, the first day to observing the usual course and daily routine of the institution. Two of the lecturers, Mr. Craven and Mr. Berncastle, had been appointed during the preceding year.

We were present at a lecture delivered by Mr. Berncastle on geography. He is a Prussian; and it was impossible not to be struck with the great accuracy and precision of his knowledge of the subject, and with his skilful manner of teaching it, especially by the use of the blackboard. It is no common advantage to have the opportunity of learning from this gentleman the expedients of instruction adopted in a country where education has been so systematically studied as in Prussia.

I regret that the hopes we had formed from our oral examination, of an improvement in the knowledge of the students have not been confirmed by the results of the Christmas examination. These results, as recorded in the Table printed in this report, pp. 401–403, are very unsatisfactory.

If the pursuit of so many industrial occupations, which, although they may occupy only a small portion of the time, cannot but engross a large portion of the attention and interest of the students, be found, after so long a trial, and the experience of every succeeding year, incompatible with the ordinary studies of a training school, it is worthy of grave consideration whether it should be continued. It is with sincere regret, and not without much doubt and hesitation, that I have expressed this opinion.

For a normal school destined to educate trade schoolmasters, the industrial course of the Chester School would be admirable. But the students of such a school should not, I conceive, enter it until they have gone through the course of an ordinary training school.

It is with pleasure that I turn from this subject to speak of the model school. It has made remarkable progress since the appointment of Mr. Hardy to the office of master. The students have in him the example of an experienced and a skilful teacher, and from the care with which he appears to guide and encourage their efforts in teaching, and to correct their defects, it is impossible not to hope that they will greatly profit by his instructions.

CHICHESTER.—Eighteen students were resident in the Chichester Training School at the time of my inspection, of whom six were Queen's scholars. Being situated near the episcopal residence, the bishop of the diocese gives to it the sanction of his paternal care, and constant supervision. It is supported at an annual cost of about 800*l.*, of which sum 380*l.* is contributed by subscriptions and donations specially for that object, 180*l.* by the fees of students, and 190*l.* (for the year 1852)* by Government grants. The only officer resident at the time of my inspection (October 1852) was the principal, the Rev. Matthew Parrington, M.A., Christ College, Cambridge; an assistant master, Mr. R. Ward, had, however, been employed from the preceding Christmas until the month of August.

The following are non-resident masters :

Mr. Thomas Bennett, Music Master.

Mr. John Cawthorne, Master of the Model School.

Mr. Edward Bell, Lecturer on Perspective and Model Drawing.

The building affords accommodation for twenty-four students. In the character of its architecture, and in its internal arrangements, it appears to me a model for small training schools.

The chapel is nearly completed, but the fences and approaches are unfinished, and in a bad state.

The results of my oral examination of the students were satisfactory, and they have acquitted themselves remarkably well in the Christmas examination, as will appear by reference to the Table. It is, however, but just to state with reference to the case of this and other training schools in the first year of their inspection, that being allowed Queen's scholars at the rate of twenty-five per cent. of the number of students they can receive, and not upon the number actually resident, they have in point of fact a larger proportion of Queen's scholars resident than other training schools have. Thus at Chichester 33 per cent. of the resident students were Queen's scholars, being a larger proportion than in any other training school; at Durham there were no Queen's scholars; at Cheltenham only fifteen per cent.; at Battersea sixteen per cent.; and at St. Mark's twenty per cent. Notwithstanding the advantages which the college thus possessed during the last year, in a larger proportion of Queen's scholars than any other, I cannot but record my

* During the first year in which a new training school is inspected your Lordships have allowed to it Queen's scholars at the rate of twenty-five per cent., calculated, not upon the number of students actually resident, as in other training schools, but upon the accommodation. This privilege is allowed, however, only for the first year, as a means of establishing the college on an efficient footing. Thus the grant of 190*l.* to Chichester, and other colleges similarly situated, is not to be considered permanent.

opinion that the results of the Christmas examination attest the industry and success with which the principal has laboured in the discharge of the very arduous duties of his office. It was a satisfaction to me to be informed that an additional master would be appointed after Christmas, and that this appointment would be followed by that of a vice-principal.

The practising school is the National School of Chichester. I cannot report of it, that in respect to its organization, its fittings, and its apparatus of instruction, it is placed on the same efficient footing with the practising schools of some other training schools. It takes, however, I think, a respectable rank as a national school.

DURHAM.—Twenty-five students were resident in the Durham Diocesan Training School at the time of my inspection, being the whole number for which it affords accommodation. None of them were Queen's scholars. It is supported at an annual cost of 580*l.*—The sum of 357*l.* is contributed to it annually by subscriptions especially for that purpose, 25*l.* by the Diocesan Board of Education, 237*l.* by the fees of students, and 175*l.* by Government grants.

The officers are—

The Rev. John G. Cromwell, M.A., Brasenose College, Oxford,
Principal.

Mr. James Wright, University of Edinburgh, Assistant Master.

Mr. John Sullivan, Certificated Master, Battersea Training School,
Master of the Model School.

Mr. Charles Ashton, Singing Master.

The building, situated upon the high bank of the River Wear, and commanding a beautiful view of the castle and the cathedral, although of very pleasing and appropriate architecture is internally ill arranged for the use of a training school, especially in the imperfect separation of the domestic part of the institution and of the Principal's apartments from the rest of the building. It is proposed to make considerable alterations in its arrangement, and to enlarge it so as to contain forty students.

Scarcely a less important addition would be that of a model school on a plan similar to that about to be erected at Battersea, the national school remaining, as heretofore, the practising school of the institution.

That it was expedient to enlarge the building is sufficiently shown by the fact, that in the year ending January 1852 there were thirty-seven candidates for admission, of whom only twelve could be admitted, and that between March and November 1852 there had been thirty-two applications for masters, of whom there were only seven to appoint. I have before me the exercises of the five candidates for admission in January 1852, who were selected as the best, and admitted. They form a striking contrast to those of the pupil-teachers who are now candidates for admission to our training schools.* In fact these candidates for the office of the teacher were without an exception grossly illiterate.

It is significant of the progress which education is making in this part of the country, and of the high estimation into which the training school is

* Six questions were proposed to them. I give the answers of some of these successful candidates to two of the questions. The answers to the other questions, where any were given, are scarcely better than these.

Question 1.—What three sovereigns reigned before George 1st?

Answer 1.—The three *severings* which reigned before George 1st were James 2d and William prince of Orange and Queen Mary.

Answer 2.—The three *soverigns* who reigned before the ascension of George 1st were James 2, and William Prince of Orange, and, 3dly., Queen Mary.

Question 2.—Mention three counties on the east coast of England?

Answer 1.—The three counties on the east coast of England is *Nottingham, Rutland, and Leicester.*

Answer 2.—*Norwich, Chichester, Lincoln.*

Answer 3.—The three counties are *Nottingham, Leicester, Rutland.*

rising, that whereas in former years I have had to report the extremely low rate of salary offered to masters trained here, I find now that they obtain equal salaries to those offered elsewhere.*

I was accompanied in my inspection by my colleague, Her Majesty's Inspector, the Rev. J. D. Stewart, who resides in Durham, and who has thus been enabled to render essential services to the training school. Of the lectures we heard delivered to the students, I cannot but express a very high commendation. The subjects were those proper to a training school, and they were so treated as to serve as models on which the students might with advantage form their own manner of teaching.

Among other particulars in which this was apparent, was the constant and judicious use of the black board. Great attention is paid to their reading, and some of them read remarkable well. Their attention is moreover specially directed to passages of our great authors which characterize their modes of thought and expression. A healthy taste for literature is thus sought to be created; and nowhere have I seen this design more vigorously or more judiciously carried out. Although none of the students were Queen's scholars, or had, I believe, been pupil-teachers, they included some young men of much intelligence and promise, and who acquitted themselves excellently in their oral examination.

It is, however, on the results of their written examination for certificates at Christmas that I report to your Lordships with greater confidence. Sixteen of the resident students competed for certificates, and sixteen obtained them. Five schoolmasters, some years before students, who came up to the college to attend the examination, were the only candidates who failed.

Notwithstanding that the numbers given in the Table, pages 401-403, are materially affected by the failure of these five masters, for which the present administration of the college is not responsible, and notwithstanding that the material out of which these results are evoked is very different, as I have shown your Lordships, from that on which training schools have now generally to work, yet that table affords conclusive evidence of the success of its teaching. I can speak in no less favourable terms of its discipline, so far as the means of forming an opinion upon it were afforded me.

The practising school, a large endowed school known at Durham as the Blue Coat School, is conducted under the direction of the principal of the training school, who devotes to it much time and attention. The senior division of students attend it during two afternoons of the week. It is composed of 200, boys and is taught by a master and five pupil-teachers, and ranks as an efficient school of its class, having been much improved during the last year.

EXETER.—The Exeter Diocesan Training School is supported at an annual cost of £717., of which sum 380*l.* is contributed by subscriptions specially for that object, 170*l.* by a grant from the Exeter Diocesan Board of Education, and 280*l.* by fees of students. The number of students resident at the time of my inspection was twenty-one. A house belonging to the dean and chapter, in the cathedral close, is at present occupied by the institution; but a site has been purchased which is beautifully situated beyond the precincts of the city, and a new building is proposed to be erected upon it, at an estimated cost of 10,000*l.*

* Six applications were made for masters between the 1st May and the 7th July, at which latter date I visited the college. The following were the salaries offered. H denoting house, G garden, and P school-pence. These salaries were exclusive of Government grant.

£60 + H + G
£50 + H
£20 + P
£70
£50

The following are the officers of this training school :—

Rev. William David, St. Mark's College, Chelsea, Certificated Master, Principal.

Rev. E. C. Harrington, M.A., Oxford, Chancellor of the Cathedral, Lecturer on Theology and Ecclesiastical History.

Mr. Abraham Haworth, St. Mark's College, Certificated Master, Vice-Principal.

Mr. James Ingham, Music Master.

None of the candidates for certificates from this college at the Christmas examination having been Queen's scholars, the fact that sixty-six per cent. obtained certificates is conclusive evidence of the efficient way in which the Rev. the principal and the vice-principal have laboured for their instruction, and reflects honour, not only on themselves, but on St. Mark's College, of which they are alumni. It is impossible not, however, to feel how deep a debt of gratitude the college owes to the watchful care and supervision of the chancellor of the cathedral, whose learning and ability are well known, and who fills gratuitously the office of lecturer on theology and ecclesiastical history. In the oral examination of the students of the first class by Her Majesty's Inspector, the Rev. E. D. Pinling, and myself, they answered remarkably well in English grammar, and very satisfactorily in Scriptural knowledge and geography and arithmetic. In English history they did not acquit themselves so well. In ecclesiastical history their knowledge appears to be at once extensive and accurate.

Having in my last report to your Lordships spoken of it as a "serious defect in the arrangements of the institution that the boys of the cathedral choir attend it daily, and are taught with the students," I have great satisfaction in stating that the attendance of the choristers has been discontinued.

The large parochial schools in Exeter are partly taught by the students, and serve as practising schools. These are in many respects very good schools of their class; but when the new college is erected I would suggest the expediency of forming a 'model school,—as distinguished from a practising school,—in immediate connexion with it.

HIGHBURY METROPOLITAN TRAINING SCHOOL.—Forty-eight students were resident in this institution at the time of inspection. It is supported at an annual cost of about 2,500*l.*, of which sum 1,564*l.* is contributed by subscriptions, and 102*l.* by collections in churches specially for the use of the college, 674*l.* by the fees of the students, 260*l.* by the fees of the practising school, and 270*l.* by Government grants. The following are its officers :—

Rev. Vincent W. Ryan, M.A., Magdalen College, Oxford, Principal.

Rev. W. J. Edwards, M.A., "Pembroke College, Cambridge, Vice-Principal.

Mr. Bowman, Tutor and Singing Master.

Mr. Daintree, Master of Method and of the Model School.

Mr. Viner, Drawing Master.

Mr. G. W. Martin, Music Master.

Mr. W. Hughes, Lecturer on Geography.

Mr. Randall, Drill Master.

Mr. Theobald, Writing Master.

This training school is situated on high ground on the northern side of the metropolis. Its site covers six acres. No other, has more substantial buildings, or better adapted for the purposes of a training school. It has separate dormitories for eighty students, and these dormitories are of ample dimensions. The Principal has a good residence, and there are apartments for the other officers.

Beside it, stands a practising school and master's house. The grounds include a large garden and shrubbery, and a paddock. I visited it in the month of November, accompanied by Her Majesty's Inspector, the Rev. F. Cook. Some of the members of the committee were present during the whole of our inspection.

We were present at various of the lectures delivered to the students. We examined the students orally, and inspected carefully the practising school. The students take copious notes of the lectures, and some of these on history and on school management are now before me. They afford abundant evidence of the useful character of the instruction they receive in this subject, and of the care and pains with which the writers of the notes have sought to profit by it. To fix in their minds the chronology of history, they are furnished with blank tables, divided horizontally by ten columns, and vertically by the same number. On each such table the characteristic events of a century in a given department of history are to be recorded. Each horizontal column is to contain those of a decade of the century, and the vertical divisions of it mark the successive years of the decade. Thus the square upon the table in which each event is recorded marks its date. Since our last inspection, and in pursuance of a recommendation we then made, certain of the students have been appointed to the office of assistant lecturer or repeater, of which the duties have been described in a previous part of this report. In their oral examination in Scriptural knowledge the students acquitted themselves well, showing that great progress had been made by them during the preceding year. In arithmetic they are skilful, working rapidly and accurately. They passed in their written examination at Christmas an excellent examination in school management and in English grammar, and did tolerably well in English history, and extremely well in geometry, which is taught them by the vice-principal; but they did not pass so well in religious knowledge as at the preceding oral examination. I have an unfavourable record of their reading, and they acquitted themselves but ill in geography. The practising school is composed of 175 boys, of whom 135 were present on the day of examination. They are above the class of labourers' children, the school fee being 10s. per quarter, and the annual income arising from the fees, 259l. 10s. They are taught in one large school-room and in a large class-room, the latter being occupied by a gallery, and set apart for oral instruction. Another class-room is about to be built.

The school is organized on the tripartite plan, and when the new class-room is built, it will form an excellent model of a school conducted on that plan. The master, Mr. Daintree, formerly master of the Parkhurst School, is a man of much experience in his profession, and is skilful in the management of a school. On one afternoon in every week all the students and the masters attend the school, and lessons are delivered by two or three of their number, taken in succession, of which the rest take notes. These form the subjects of a discussion afterwards, at which the Principal presides as moderator.

It is in this way that the attention of the students is directed to the art of teaching, and that an interest is kept alive in the work of the teacher.

I cannot record a very favourable impression of the success of the students in the lessons we heard them give.

The children read well, as is generally the case in a tripartite school. I have before me specimens of the writing on paper from dictation of the boys of the first division. The writing is very good; the spelling bad.

We were present at a very interesting lesson delivered to them on experimental philosophy. They listened to it with great interest, and answered questions upon it with much intelligence.

They are accustomed to write abstracts of these lessons at home. One of the best of these abstracts of every lesson is selected, and copied into a book, which is kept in the school. Some of the exercises entered in this book were interesting and well expressed.

WINCHESTER. My report to your Lordships on the application of this college for inspection, and for the appointment of Queen's scholars, having been printed in the present volume, I need not further advert to it than to point out the excellent way in which its students passed the Christmas examination. Those of no other college obtained a like proportion of certificates, as appears by the Table, page 402.

This success is as remarkable in what are called the higher subjects of instruction as in those which are proper to elementary instruction.

The results of the examination of this college and of those at Durham and Exeter is the more worthy of observation as there were no Queen's scholars or (I believe) pupil-teachers included among their candidates. They 'justify your Lordships' decision to admit these lesser diocesan colleges to a full share of the privileges offered by your Minutes of 1846.

YORK AND RIPON. Forty-five students were resident in this institution in October, when it was inspected by Her Majesty's Inspector, the Rev. F. Watkins, and myself. It is supported at an annual cost of 2,144*l.*, of which sum 331*l.* is contributed by a grant from the York and Ripon Diocesan Board of Education, and 275*l.* from exhibitions founded by that board, 900*l.* arises from the fees of students, and 655*l.* from Government grants.

The extensive buildings of the college, with the exception of the fences, are now completed, and are, I believe, in an architectural point of view, unimpeachable; but the brick-work appears in some parts to be defective; and in respect to their ventilation they are open to grave objections.

The following is the staff of officers:—

Rev. George Hodgkinson, M.A., Trinity College, Cambridge, Principal.

Rev. B. Pix, M.A., Trinity College, Cambridge, Vice-Principal.

*Mr. C. S. Buncombe, Music Master, assists also, otherwise, chiefly in English.

Mr. J. T. Fowler, St. Mark's College, Certificated Master, Normal Master.

*Mr. James Birchall, Writing and Drawing Master.

Mr. Robert Charlton, York Training School, Certificated Master, Assistant Master.

A clergyman resident in the neighbourhood also assists, taking chiefly a Scripture history and elementary Latin class.

The hours of study appear, from the time-table before me, to be from nine A.M. to five P.M., with an interval of two hours for dinner. We were present at lectures delivered by the principal on Church history, and by the vice-principal on English history, and we attended one of the weekly meetings of the students, at which a model lesson was delivered by one of them, of which the rest take notes, which are afterwards read, the masters taking a part in the discussion of them, and the Principal acting as moderator. The method adopted by the Principal and vice-principal in lecturing is to leave time to the students to take copious notes, or in some instances to write their lectures verbatim. This method appears to me well adapted to the teaching of a training school. It is a motive to the careful selection of his matter by the lecturer, it impresses it on the mind of the student, and it compels his attention, opposing itself effectually to that dreaminess which is apt to grow on a certain class of minds under oral instruction, however judiciously given, and which, becoming a habit of the teacher, soon becomes a habit of the scholars.

Each lecture begins with an examination upon the subject of the preceding lecture, for which the students are expected to prepare themselves by a perusal of their notes. No teaching could be better adapted to the purposes of such an institution as this than the two excellent lectures to which I have referred. The subject of the vice-principal's lecture was the history of commerce in the fourteenth and fifteenth centuries. It appeared to me to be treated with ability and originality, and with a very just appreciation of the form under which history should present itself to the mind of the elementary teacher. The model lesson, and the subsequent discussion on the art of teaching, have been introduced since my last inspection; they will contribute greatly to give to the course of instruction that professional bearing in which I have thought it at some of my previous inspections to be deficient.

* These masters are also employed in the training school for mistresses, and Mr. Birchall also in the young man's school.

The idea of good teaching, although as yet but imperfectly formed among the students, appears to be in process of development; and to this end nothing will more contribute than such discussions. The practising school, which forms part of the college building, is largely attended. It is under the charge of a master trained at St. Mark's College. I have a very favourable record of the results of our oral examination in religious knowledge, English grammar, and arithmetic, but an unfavourable one of the reading of the students, and of their knowledge of history.

On the whole I have a confidence and a great pleasure in reporting to your Lordships that this training school is making steady and substantial progress, and in looking forward to the time when it will take a high place among institutions of its class.

APPENDIX A.

TIME TABLE for Three Months of the Sixth Class in the Practising School of the Cheltenham Training College.

Reading Classes.		Class 6.	
RELIGIOUS.	CATECHISM.	GALLERY LESSONS.	
Monday Morning.	Thursday Morning.	Monday.	Wednesday.
1. God our Father, Matt. VI. 2. God our Creator, Gen. II. 7. 3. God's goodness, Gen. I. 31, Ps. 104. 14. 4. God gives man a companion, Gen. II. 18. 5. God should be obeyed, Gen. II. 16 & 17. 6. God disobeyed, Gen. III. 6. 7. Sin brings shame, Gen. III. 8. The expulsion, Gen. III. 9. Sin produces sin, Gen. IV. 3-8. 10. God approves of good men, Gen. V. 11. Bad company, Gen. VI. 7. 12. Deluge.	1. Why baptised. 2. Child of God. 3. Sin should be avoided. 4. Grace is needed. 5. God is Father of all. 6. Jesus is the Redeemer. 7. Holy Spirit makes men holy. 8. God is to be worshipped. 9. Duty to parents and teachers. 10. Good Samaritan. 11. Golden rule. 12. Prayer.	1. Sugar. 2. Bread. 3. Salt. 4. Butter. 5. Cheese. 6. Soap. 7. Candles. 8. Ink. 9. Blacking. 10. Apple. 11. Potato, onion, &c. 12. Sponge.	1. Cat. 2. Dog. 3. Horse. 4. Ass. 5. Cow. 6. Sheep. 7. Pig. 8. Goat. 9. Duck. 10. Hare. 11. Sparrow. 12. Swallows.
Wednesday Morning.	Grammar: Simple sentences containing subject and predicate only. Idea of noun, verb, and adjective.	Tuesday.	Friday.
1. Jesus the Saviour, from St. Matt. I. 21. 2. Jesus loved God's house, Luke II. 42-49. 3. Jesus obeyed his parents, Luke II. 57. 4. Jesus increased in wisdom, &c. Luke II. 53. 5. Jesus loved prayer, Mark I. 35. 6. Jesus loved those who obey God, Matt. XII. 50. 7. Jesus kind to little ones, Mark X. 13-16. 8. Jesus healed his enemy, Luke XXII. 50-51. 9. Jesus and Judas, Matt. XXVI. 47-50. 10. Jesus spit upon, Matt. XXVI. 67. 11. Jesus prays for his murderers. 12. Jesus and Peter.	Words of like endings. Spelling: Fed, bend, mill. Bed, lend, mill. Led, mend, bill. Red, tend, fill. Wed, rend, hill. Send, gill.	1. Slate. 2. Mica. 3. Clay. 4. Lime, Chalk. 5. Coal. 6. Plumbago. 7. Gold. 8. Silver. A Shilling. 9. Copper. A Penny. 10. Iron. 11. Lead. 12. Tin.	1. Pin. 2. Needle. 3. Button. 4. Flannel. 5. Glue. 6. Leather. 7. Hat. 8. Pinafore. 9. Scissors. 10. A Teacup. 11. A Stove. 12. A Fire.

Time Table—*continued.*

Arithmetic Classes.

Class 6.

MAPOLOGY.	GEOGRAPHY.	ENGLISH HISTORY.	ARITHMETIC.
Monday and Thursday.	Tuesday and Friday.		
1. Plan of school-room. Scale of points of compass. E.W.N.S. Walls. Area. 2. Plan of school district. Scale. Direction of street, &c. 3. Plan of town. Take a well-known building, and lay bearings and distances from it. 4. Draw usual symbols for rivers, hills, sea, &c. 5. Draw a map of adjacent county, marking hills, rivers, and towns. 6. Draw map of county, with hills, rivers, and towns. 7. Map of county, and adjacent counties on north. 8. Ditto, ditto, on east. 9. Ditto, ditto, on west. 10. Ditto, ditto, on south. 11. Draw a map of the Severn or Thames, with all the tributaries and towns. 12. Draw a map of England. N.B.—Children to do the same on their slates.	1. Points of compass by means of sun-rise, &c. Notice length of shadow. 2. Notion of extent of country. Notice modes of travelling. Give idea of boundary, sea boundary, &c. 3. Give idea of a slope, ascent, bank, brow, hillock, hill, mountain. 4. Uses of hills. Minerals. Show chalk, tin, &c. 5. Uses of hills. Shelter from wind. Clouds. Rain and Springs. 6. Idea of a hill, brook, streamlet, stream, rivulet, river. 7. Idea of the fall of a river, torrent, cascade, cataract. 8. A well-known river. Source, head, current, course, channel, bed, mouth, &c. 9. Tributaries and drainage. 10. Pond, pool, lake, sea, fresh and salt water fish. 11. Field, plain, valley, dell, ravine. 12. Hamlet, village, town, city.	1. Present period, Victoria. Persons. Clothes. Compare with former times. 2. Present period, Victoria. William 4. Persons. Servitude. Compare with former times. 3. Present period, Victoria. William 4. George 4. Persons and food. 4. Ditto. Habits. Manners. Cleanliness. 5. Ditto, and George 3. Liberty. Serfs. Pillory. Curfew. 6. Ditto. Dwellings and their materials. 7. Ditto. Dwellings inside. 8. Ditto. Religion. 9. Ditto, and George 2. Education. 10. Ditto. Roads. British, Roman, &c. 11. Ditto, and George 1. Protection. Police. Navy. Soldiers. &c. 12. Revise.	1. Idea of number. 2. Mental calculation. 3. How to make figures, associating symbols with value. 4. Addition of dots, &c. and of figures, unit column only. 5. Local value to the ten's place.

APPENDIX B.

GENERAL EXAMINATION OF TRAINING SCHOOLS.

CHRISTMAS 1852.

N.B.—All your answers are to be written on this Paper. Answers written on any other Paper will not be looked over.

You are not permitted to answer more than one question in each Section.

Before beginning your answers, you are to fill up the following Table so far as it applies to you.

<i>The Name of the Training School at which you are now being examined.</i>	<i>Your Christian Name and Surname in full, and the current Year of your Age.</i>	<i>Do you attend this Examination, as— 1. A resident Student. 2. A Candidate for a Queen's Scholarship, and from what School. 3. A Teacher to be examined for a Certificate of Merit, and from what School.</i>	<i>If you are, or have been, a Student, state the Month and Year in which you entered this Training School, or the Month and Year in which you left it.</i>

In order to limit as little as possible the opportunities by which peculiar talents may be exhibited, it is not perhaps desirable to prescribe which of the subjects of examination the candidates for Queen's scholarships shall be at liberty to select, further than to state *strongly their Lordships' opinion that they should not attempt answers upon all the subjects.*

The following subjects must not be wholly omitted by any candidate, viz.

1. The Holy Scriptures, the Catechism, and the Liturgy of the Church of England (in Schools connected with the Church of England).
2. English History.
3. Geography.
4. Arithmetic (including Vulgar Fractions and Decimals).
5. English Grammar and Composition.
6. The Notes of a Lesson, or some observations on the practical duties of a Teacher.

A Candidate who answers in *these subjects* really well may obtain an exhibition of £20 for one year.

A Candidate who answers in the foregoing subjects really well, *and also in one other subject* really well (to be selected by himself out of those proposed to the candidates for certificates of merit, but with a preference on the part of my Lords for the three first books of Euclid,) may obtain an exhibition of £25 for one year.

If a candidate attempts a greater number of subjects, he will do so on his own responsibility. My Lords could not but be happy to find that he was able to answer in a greater number of subjects well; but the extent of the subjects attempted will not be accepted in lieu of mastery over those which are indispensable.

Candidates for Queen's scholarships in FEMALE training schools will not be required to answer questions in Vulgar Fractions or Decimals. For the higher exhibitions they will be at liberty to select one of the subjects proposed to Female candidates for certificates of merit, such as Book-keeping, Biographical Memoirs, or Domestic Economy. Their Lordships would prefer a knowledge of some good Manual upon the last-named subject, in connection with which they will be prepared to give due weight to certificates from the Managers of the candidate's school, attesting her practical knowledge of household duties.

The exhibitions awarded to Females will be at the rate of two-thirds of those awarded to Males, viz. £13 6s. 8d. and £16 13s. 4d. instead of £20 and £25, to correspond with the different expense of boarding in training schools for Males and Females respectively.

The first question in each Section has been framed more especially with reference to Candidates for Queen's scholarships.

SCRIPTURAL KNOWLEDGE.

(Three Hours allowed for this Paper.)

DIVISION I.

Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

1. State, shortly, what is recorded in Scripture of Abraham.
2. What were the principal events in the life of Joshua?
3. Give some account of the captivity of the Jews in Babylon and of their return.

Section 2.

By what considerations did our Lord in his Sermon on the Mount enforce—

1. The love of our neighbour.
2. A reliance upon God and heavenly-mindedness.
3. The emptiness of a profession of the gospel without obedience to its precepts.

Section 3.

1. Relate, carefully, the events in our Lord's life which immediately followed his Sermon on the Mount, as recorded by St. Matthew.

2. Matthew xvi. v. 13, "Whom do men say that I am?" Relate the conversation which followed this inquiry.

3. Matthew xviii. v. 1, "At the same time came the disciples to Jesus, saying, who is greatest in the Kingdom of Heaven?" continue the narrative. The subject is returned to in the next chapter; state under what circumstances.

Section 4.

1. What is recorded in the Acts of the Apostles of St. Barnabas?

2. State, fully, the particulars of the examination of St. Peter and St. John before the Sanhedrim, after the healing of the lame man at the gate of the Temple.

3. Describe the planting of the church at Antioch in Pisidia, at Philippi in Macedonia, and at Corinth.

DIVISION II.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. What principal events are recorded in the book of Jeremiah?
2. Among the reasons for believing the gospel of St. Matthew to have been addressed specially to the Hebrew Christians, is this—that he makes frequent reference to prophecy in proof that Jesus was the Messiah. Give examples of such reference.
3. What forms of idolatry prevailed chiefly among the Jews; whence were they introduced, and how, and by what means were they supported?
4. Give some account of the history of the Jewish nation between the time when the Old Testament narrative ends, and that when the New begins.
5. Give some account of the writings of St. John, and, of what is known from Scripture and tradition of his life and labours.
6. Give some account of the Epistle General of St. James.
7. Give a short analysis of the Epistle to the Galatians.
8. Explain the following passages:—
 “But ye say, Whosoever shall say to his father or his mother, It is a gift by whatsoever thou mightest be profited by me; and honour not his father or mother, he shall be free. Thus have ye made the commandment of God of none effect by your tradition.” Matt. c. xv. v. 5, 6.
 “And when they were come to Capernaum, they that received tribute money came to Peter, and said, Doth not your master pay tribute?” Matt. xvii. 24.
9. Explain the words printed in italics in the following passages, and state anything worthy of observation in connexion with them.
 “When they were past the first and second *ward* they came to the iron gate which leadeth to the city.” Acts xii. 10.
 “Now when they had gone throughout Phrygia and the region of Galatia, and were forbidden of the Holy Ghost to preach the word in *Asia*,” Acts xvi. 6.
 “And when Gallio was the *deputy* of Achaia.” Acts xviii. 12.

CATECHISM, LITURGY, AND CHURCH HISTORY.

(Three Hours allowed for this Paper.)

DIVISION I.

Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

1. “What is thy duty towards thy neighbour?” Write the answer to this question, and give a Scriptural illustration of four consecutive clauses of it.
2. “Why was the Sacrament of the Lord’s Supper ordained?” Illustrate from Scripture the answer to this question.

Section 2.

1. Write the last sentence in the “Absolution,” and the four first verses of the “Te Deum.” What Psalms (besides those for the day) are used in the office for Morning Prayer, what Hymns, and what Canticle?
2. What is a Litany? When is the Litany appointed to be used? Give supplications from the Litany which belong respectively to the Invocation,

the Deprecation, and the Intercession. To whom do we specially address ourselves in the Deprecation, and why? What sins do we specially pray to be delivered from?

3. Give some account of the order of the ecclesiastical year.

Section 3.

Write out one of the following "Articles of Religion," and prove it from Scripture:—

1. Of the resurrection of Christ.
2. Of the Old Testament.
3. Of Christ alone without sin.

DIVISION II.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. Give some account of the persecutions of the early Church.
2. What is known of the history of the Church under the following Emperors,—Trajan, Marcus Aurelius, Constantine?
3. Who were the Apostolic Fathers? Give some account of Polycarp.
4. What authors wrote against Christianity, and who were the apologists of the early Church? Give some account of one of them.
5. Give some account of Irenæus, Cyprian, and Origen.
6. Give some account of the conversion of the Anglo-Saxons.
7. On what principal occasions before the Reformation, and for what causes, did contests arise between the State in England, and the Pope.
8. Against what practices and what doctrines of the Church of Rome did the reformers in England chiefly protest? Give some account of John Rogers, Bishop Hooper, and Rowland Taylor.

ENGLISH GRAMMAR, AND THE HISTORY OF ENGLISH LITERATURE.

(Three hours allowed for this paper.)

DIVISION I.

Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

1. Define an article, an adverb, and a preposition; give the etymologies of these words, and examples to illustrate the definitions of them. When is the article *a* to be used, and when *an*?
2. How do nouns ending in *y*, *fe*, and *f*, respectively, form their plurals? Give a reason for the rule in the last case, and state the exceptions. How do nouns ending in *y* form the possessive case?
3. Distinguish between a proper and a common noun, and define a collective noun and an abstract noun, giving examples of each.

Section 2.

Parse the words printed in italics in one of the following sentences. Paraphrase and explain the last sentence.

1. *Him* the Almighty power hurled headlong.
2. Give me that book, that I may read it, for it is mine.
3. The mind of man being naturally limited, it is impossible that all its faculties can operate at once; and the more any one predominates, the less room is there for the others to exert their vigour.

Section 3.

Paraphrase one of the following passages from Milton's *Paradise Lost* :—

1.

Thus far these beyond
Compare of mortal powers, yet observed
Their dread commander ; he, above the rest
In shape and gesture proudly eminent,
Stood like a tower ; his form had not yet lost
All her original brightness, nor appeared
Less than archangel ruin'd, and the excess
Of glory obscured : as when the sun new-risen
Looks through the horizontal misty air,
Shorn of his beams ; or, from behind the moon,
In dim eclipse, disastrous twilight sheds
On half the nations, and with fear of change
Perplexes monarchs : darken'd so, yet shone
Above them all the archangel : but his face
Deep scars of thunder had intrench'd, and care
Sat on his faded cheek ; but under brows
Of dauntless courage, and considerate pride
Waiting revenge. Book i.—587.

2.

O, myriads of immortal spirits ! O, powers
Matchless, but with the Almighty ; and that strife
Was not inglorious, though the event was dire,
As this place testifies, and this dire change
Hateful to utter : but what power of mind,
Foreseeing or presaging, from the depth
Of knowledge past or present, could have feared,
How such united force of gods, how such
As stood like these, could ever know repulse ?
For who can yet believe, though after loss,
That all these puissant legions, whose exile
Hath emptied Heaven, shall fail to reascend
Self-raised, and repossess their native seat ?
For me, be witness all the host of Heaven,
If counsels different or dangers shunn'd
By me have lost our hopes : Book i.—622.

Section 4.

1. What are the different sounds of the vowels ?
2. Distinguish between the uses of *shall* and *will*. What rule is applicable to this distinction ?
3. Give an example of an *assertion*, point out its *subject*, and *predicate*, and define these terms. Give examples of other parts of speech than nouns or pronouns used as *subjects*. In what sense are they so used ?

DIVISION II.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers ; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

Give some account of the life and writings of one of the following authors :—

1. John Milton.
2. John Dryden.
3. Samuel Johnson.

GEOGRAPHY AND POPULAR ASTRONOMY.

(Three hours allowed for this paper.)

DIVISION I.

Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

Mention in succession, or draw a map to show, the principal headlands, bays, rivers, and sea ports on one of the following coast lines :—

1. The southern coast of England.
2. The eastern coast of Scotland.
3. The eastern coast of the United States.

Section 2.

Give some account of one of the following countries :—

1. Australia.
2. Russia.
3. Austria.

Section 3.

1. How is it known that the fixed stars are greatly more distant from us than the sun?
2. Explain the phases of the moon.
3. Explain the causes of eclipses of the sun and moon, and of the different kinds of eclipses. Why do not eclipses occur every month?

Section 4.

Draw a map, showing the mountain and river systems of one of the following countries ; mark the principal towns on the rivers, and trace, if you can, the river basins :—

1. England north of the Wash.
2. Spain.
3. South America.

DIVISION II.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers ; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. Give some account of the winds which prevail in different regions, of their causes, and of their influence on the climates of those regions. Why is the climate of a western coast in the temperate zone always milder than that of a corresponding eastern coast ?

2. Give some account of the prevalent rains of different regions, of their causes, and of their influence on the river systems of those regions.

3. Give some account of the forms of vegetation which prevail in different regions, and of their connexion with the mean temperatures of those regions, as shown by the isothermal lines. What are the vegetable substances chiefly used as food by different races of men ?

4. Give some account of the table lands of the New World ?

5. The surface of the globe may be divided into two hemispheres, of which one contains nearly all the land, and the other little but water ; where must a line be drawn to separate these hemispheres, and how does Great Britain lie in respect to it.

6. Mention some of the obvious characteristics of the human race in the tropical regions, the polar regions, and the temperate regions of the earth respectively. What difference is apparent in the law of the geographical distribution of the lower animals and of man ?

HISTORY.

(Three hours allowed for this paper.)

DIVISION I.

Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

State the principal events in the history of England during one of the following centuries:—

1. The ninth century.
2. The fourteenth century.
3. The sixteenth century.

Section 2.

Give some account of one of the following reigns, stating what you know of the manners and customs of different ranks of society at these periods:—

1. Edward III.
2. Charles I.
3. George III.

Section 3.

Relate the principal events in the history of one of the following periods:—

1. The settlement of America by the English.
2. The conquest of British India.
3. The wars with France from 1793 to 1815.

Section 4.

1. Give an account of the causes which led to the formation of a standing army in the United Kingdom, and of the reasons which have been alleged for and against such an institution.

2. What are the several functions of a judge, and of a jury, in the administration of justice?

3. What are the several stages through which an Act of Parliament must pass before it becomes part of the law of the land, and what are the advantages of each of these stages?

DIVISION II.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. Give some account of one of the following eminent persons of antiquity:—

- Themistocles.
Caius Marius.
Pompey.

2. When, and under what circumstances, were knights of the shire and burgesses first called to sit in Parliament?

3. What were the chief provisions of Magna Charta? Mention instances in which they were violated.

4. Give examples of the assertion by Parliament of its independence, and of the responsibility of the ministers of the Crown. Under what circumstances were these rights finally established?

SCHOOL MANAGEMENT.

(Three Hours allowed for this Paper.)

Section 1.

How you would organize a school if placed under your charge in one of the following cases,—draw a plan, showing the arrangement of your classes,—and give a copy of your time-table.

1. 60 children, mixed, with no pupil-teacher, but with a mistress who attends all day, and can teach reading and sewing.
2. 80 children, mixed, with a pupil-teacher, and a mistress who attends in the afternoon to teach sewing.
3. 120 boys in a town, with two pupil-teachers.

Section 2.

1. Give the heads of a lesson on one of the following subjects:—

1. Lime.
2. The seeds, stems, and flowers of plants.
3. The transformations of insects.

Section 3.

1. What are the proper sources of authority in a school.
2. What are the characteristic dangers to himself of the schoolmaster's profession?
3. What do you understand by the education of a child? What are the resources of a schoolmaster for accomplishing it?

Section 4.

1. In what particulars may the following defects in the character of a teacher show themselves to the children of his school and their parents?—selfishness—untruthfulness—improvidence.

2. In what way may the following Christian graces find their exercise in the work of the teacher, and, under God's blessing, with what probable results?—humility—love—a fervent spirit.

Section 5.

Extract from Professor Moseley's Report on Training Schools under Inspection.—Minutes, 1851-52, p. 288.

"I have ascertained that the reading-lesson books which are most generally used in the higher classes of schools, are the Fourth and Fifth Reading-Lesson Books of the Commissioners of National Education in Ireland, and that known as M'Culloch's "Course?" and I propose, with your Lordships' permission, to set, in the paper on school management, at Christmas, 1852, one section of questions from sections I. and IV. of the Fourth Irish Book, and another section from sections I. and III. of the Fifth Irish Book, and also two sections of questions from M'Culloch's Course, leaving to the students the option of the two Irish Books or M'Culloch's, but not allowing them to answer from both."

Candidates have the option of answering from the Irish Commissioners' Books, or from M'Culloch's; but no account will be taken of answers from both books.

Questions from the Fourth Reading-Lesson Book of Irish Commissioners,
Section IV.

1. On what does "value" depend? Why are gold and silver valuable? Give examples of things without value, and show why they are without it.

2. How must money be laid out to become "capital?" Give examples of different ways of so laying it out. Show, by an example, what would be the condition of a community without "capital."

3. What is the use of taxes? Give examples of the state of countries where no taxes are paid. Show that it is just to make everybody pay them. What have the taxes to do with the national debt?

Questions from M'Culloch's Course of Reading.

1. Give examples, from Dr. Arnott, of the wonders of civilization.
2. Give examples, from Adam Smith, of the division of labour.
3. Give an abstract of the lesson on the British Constitution.

Section 6.

Questions from the Fifth Reading-Lesson Book of Irish Commissioners,
Sections I. and III.

1. In what manner are stratified and unstratified rocks found associated with one another? What are the great divisions of stratified rocks?
2. Give some account of the different kinds of organic remains, and of the strata in which they are found.
3. Give some account of the organs of digestion and respiration.

Questions from M'Culloch's Course of Reading.

Give an abstract of one of the lessons entitled as follows:—

1. The animal economy.
2. Aqueous vapour.
3. First lines in optics.

ARITHMETIC.

(Three Hours allowed for this Paper.)

DIVISION I.

Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

Work one of the following sums so that the reason of each step in the working may appear:—

1. Subtract 35,968 from 52,071.
2. Multiply 4,963 by 307.
3. If 13 things cost 15*l.* what will 19 cost?

N.B.—This sum is to be so worked as to be intelligible to children who have no knowledge of fractions.

Section 2.

1. A man buys 148 yards of cloth at 2*s.* 7½*d.* per yard; at what price must he sell it to gain 12*l.* 12*s.* 10*d.* by the whole?

2. Find by the rule of practice the cost of 6 tons 7 cwt. 2 qrs. 17lbs. at 3*l.* 10*s.* 7*d.* per cwt.

3. Having bought goods for 20*l.*, I sell half of them so as to gain 10 per cent.; for how much must I sell the remainder so as to gain 20 per cent. on the whole?

Section 3.

1. Having bought goods for 18*l.*, I sell them four months afterwards for 25*l.*; what is the gain per cent. per annum?

2. Extract the cube root of 7 to 4 places of decimals, and cube the result.

3. Find the area of a floor whose length is 13 feet 7 inches and its breadth 11 feet 9 inches, and show, by means of a diagram, what surface is represented in each term of the answer.

BOOK KEEPING.

Section 4.

What books are used in keeping a tradesman's accounts, and for what purposes?

Give examples of the headings and entries in these books respectively.

DIVISION II.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. Prove in such a way as to make it intelligible to children one of the following rules of mental arithmetic:—

a. To find the price of 20 articles, every shilling in the price is to be taken as 11. and every penny as 1s. 8d.

b. If the price of an article be expressed in farthings, the price of 100 may be found by taking those farthings as pence, and their double as shillings.

c. To find the interest of any number of pounds for a given number of months at 5 per cent. per annum; take the pounds as pence and multiply by the months.

2. A and B can build a boat together in 18 days, and with the assistance of C they can build it in 11 days; in what time could C do it by himself?

3. Taking any number of two or more places of digits, show that that number must leave the same remainder when divided by 9, that the sum of its digits does.

4. Approximate by the method of continued fractions to the value of $\sqrt{11}$, and show that the difference between any two of the consecutive fractions in the result has unity for its numerator.

 EUCLID.

(Three Hours allowed for this Paper.)

DIVISION I.

Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

1. Upon the same base and upon the same side of it there cannot be two triangles that have their sides which are terminated in one extremity of the base, equal to one another, and likewise those which are terminated at the other extremity.

2. The greater side of every triangle is opposite to the greater angle.

3. To a given straight line to apply a parallelogram, which shall be equal to a given triangle, and have one of its angles equal to a given rectilineal angle.

Section 2.

1. If a straight line be divided into any two parts, the square of the whole line is equal to the squares of the two parts, together with twice the rectangle contained by the parts.

2. If a straight line be divided into two equal and also into two unequal parts, the squares of the two unequal parts are together double of the square of half the line, and of the square of the line between the points of section.

3. If from any point without a circle two straight lines be drawn, one of which cuts the circle and the other touches it, the rectangle contained by the whole line which cuts the circle and the part of it without the circle shall be equal to the square of the line which touches it.

 MENSURATION.

Section 3.

1. What is the cost of a wall of brickwork 72 ft. 6 ins. long, 19 ft. 3 ins. high, and 5½ bricks thick, at 4l. per rod?

2. A coach wheel turns 280 times in a mile; what is its radius?
3. A pipe 2 inches in diameter discharges 20 gallons of water in a minute; what is the uniform speed at which the water is issuing?
4. What is the content of a tree whose length is $17\frac{1}{2}$ ft. and which girths, in 5 equidistant places, as follows, viz. $9 \cdot 43$ ft., $7 \cdot 92$ ft., $6 \cdot 15$ ft., $5 \cdot 74$ ft., $3 \cdot 16$ ft.?

Section 4.

Give an example of a field book, and calculate the area of the corresponding field.

DIVISION II.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. Equal straight lines in a circle are equally distant from the centre; and, conversely, those which are equally distant from the centre are equal to one another.
2. About a given circle, to describe a triangle equiangular to a given triangle.
3. If two triangles have one angle of the one equal to one angle of the other, and the sides about the equal angles proportionals, the triangles shall be equiangular, and shall have those angles equal which are opposite to the homologous sides.
4. Show that straight lines, which are perpendicular to parallel straight lines, are themselves also parallel.
5. If from any point in the diagonal of a parallelogram, straight lines be drawn to the angles, the parallelogram will be divided into two pairs of equal triangles.
6. If tangents be drawn at the extremities of any two diameters of a circle, and produced to intersect one another, the straight lines joining the opposite points of intersection will both pass through the centre.

ALGEBRA.

(Four Hours allowed for this Paper, with that on Higher Mathematics.)

DIVISION I.

Section 1.

1. Add together, $2(a+b)xy^2$, $3(a-2b)xy^2$ and $4(2a-b)xy^2$.
2. From $(a+b)x + (b+c)y$, take $(a-b)x - (b-c)y$.
3. Prove that $(a-b)(x-a)(x-b) + (b-c)(x-b)(x-c) + (c-a)(x-c)(x-a)$ is equal to $(a-b)(b-c)(a-c)$.

Section 2.

1. Reduce to their simplest forms $\frac{a+b+\frac{b^2}{a}}{a+b+\frac{a^2}{b}}$ and $\frac{a^2y}{bx^2y^2}$.

2. Multiply $(3 + \sqrt{-5})$ by $(2 - \sqrt{-5})$.
3. Reduce to its simplest form —

$$\frac{1}{x-1} + \frac{1}{1+\frac{x}{4-x}}$$

and find the square root of $13 + 2\sqrt{3}$.

Section 3.

Solve one of the following equations—

$$(x-1) \cdot \frac{x-1}{2} = 3\frac{1}{2}$$

$$2. \ 2x^2 - x - 2x\sqrt{1-x^2} = 1\frac{1}{2}.$$

3. A farmer buys a flock of sheep at the rate of 7*l.* for every 5 sheep, he afterwards loses 9, and sells the remainder at the rate of 16*l.* for every 11, and the sum for which he sells the flock is 24*l.* more than that which he gave for it; how many sheep were there?

DIVISION 2.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. A blank paper book containing 48 sheets is sold for 14*s.*, and another containing 78 sheets of the same size for 19*s.*, the binding cost the same in both, and the paper was of the same quality. What was the price of the binding?

2. A rectangular field is to be enclosed from the waste with a fence 40 chains long, it is to be surrounded, within the fence, by a gravel walk 6.05 yards wide, and there is to be left in the middle, an area of 6.05 acres of grass. What must be the dimensions of the field?

$$3. \frac{1}{x^2+3x+5} + \frac{1}{x^2+6x+8} + \frac{1}{x^2-9x+7} = 0$$

4. Find what sum of money at *r* per cent. compound interest will amount in *n* years to £*a*? And find the number of years in which a sum of money will double itself at *r* per cent. compound interest.

5. What annuity, to commence at the end of two years and to continue two years certain, can be bought for 1,000*l.*, allowing 5 per cent. compound interest?

6. If the present population of Great Britain be thirty millions, and the annual emigration—supposed to take place at the end of the year—be one quarter of a million, by what proportion must the number of births in each of the next two years exceed the number of deaths that the population may have increased at the expiration of that time by one-twentieth?

HIGHER MATHEMATICS.

(Four Hours allowed for this Paper, with that on Algebra.)

DIVISION I.

Section 1.

1. Find the common difference of a series in arithmetical progression, whose first term is 8, and the sum of the eight first terms 28.

2. Find the present value of an annuity of £*A* to be paid for *n* years, allowing compound interest.

3. Required the vulgar fraction equivalent to the decimal .PQQQ, &c.; where P contains *p* digits, and Q contains *q* digits recurring in *inf.*

Section 2.

1. Prove generally the rule for pointing off in the product of two decimal numbers as many decimals as there are in the multiplier and multiplicand together.

2. Define the logarithm of a number, and show that

$$\log_{10} \left(\frac{m}{n} \right) = \log_{10} m - \log_{10} n$$

3. What is meant by the *radix*, and what by the *digits* of a scale of notation? What is the number which is expressed by 2 4 3 1, in the scale of notation, where radix is 5? Prove the rule for expressing a number in any scale of notation.

Section 3.

1. Prove one of the following formulæ of plane trigonometry:—

$$\cos(A + B) = \cos A \cos B - \sin A \sin B.$$

$$\sin \frac{1}{2} A = \sqrt{\frac{(S-b)(S-c)}{bc}}$$

2. How might the height of the top of St. Paul's above Wimbledon Common be determined by observations made on Wimbledon Common, from whence St. Paul's can be seen?

3. By what means can the distance from one another of two remote objects, C and D, be determined by observations taken from stations A and B, whose distance from one another is known, and whence the objects C and D are visible? Give the formulæ which must be used in this computation.

Section 4.

1. Investigate an expression for the area of a triangle in terms of its sides.

2. Prove the expressions for the circumference and area of a circle in terms of the radius.

3. Show that the solid content of a cone or pyramid is found by multiplying the area of its base by one-third its height.

DIVISION II.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. Find the sum of the series $1^2 + 2^2 + 3^2 + \&c.$ to n terms.

2. Find the number of combinations of n things taken r together, and show that is the same as the number of combinations of n things taken $n - r$ together.

3. Prove the binomial theorem in the case in which m is a positive integer, and expand $\left(a - \frac{1}{b}\right)^4$.

4. Show by the method of indeterminate coefficients that

$$\frac{x+1}{x^2-7x+12} = \frac{5}{x-4} - \frac{4}{x-3}$$

5. Solve the equation—

$$x^3 - 441x + 2430 = 0$$

6. Expand a^x , and deduce from the expansion an expression—in a converging series—for the logarithm of a number to the base a .

PHYSICAL SCIENCE.

(Three Hours allowed for this Paper.)

DIVISION I.

Section 1.

Describe and explain one of the following instruments:

1. A barometer.
2. An air pump.
3. An electrifying machine and Leyden jar.

Section 2.

Describe and explain one of the following machines :

1. A locomotive engine.
2. A hydraulic ram and a fire engine.
3. A clock.

Section 3.

1. What must be the diameter of an iron wire to sustain 11 cwt., the tenacity of the iron being 25 tons per square inch ?

2. How long will ten men be in pumping dry the hold of a ship which contains 3,000 cubic feet of water, the centre of gravity of the water being 14 feet below the deck, and each man being supposed to yield 1,500 units of effective work per minute ?

3. Describe the wheel and double axle, and show how the relation of the power to the weight may be determined in this machine.

Section 4.

1. What experiments serve best to show the expansion of metals, and the currents produced in liquids and gases by the application of heat ?

2. Give some account of nitrogen and of its compounds.

3. By what different methods may the chemical constitution of water be ascertained ?

DIVISION II.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers ; but no answers

- to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. Show how it may be determined, by geometrical construction, whether the wall of a reservoir will stand or not, and prove fully the rule you use.

2. Wanting to determine the quantity of water discharged per minute from a pipe, I place under it a vessel, in the bottom of which is a rectangular aperture which I can close by means of a slide. I find that when the dimensions of the aperture are 4 inches by 3 the water stands steadily in the reservoir at a height of 3 feet. What is the efflux per minute from the pipe, neglecting the effects of contraction ?

3. Given the number of units of work, u , which a man can do on each stroke of a pump, the depth, a , of the water in the well beneath the bottom of the barrel, and the section, k , of the barrel. It is required to find the length of the stroke, so that the whole work on each stroke may just be expended in raising the water.

4. What experiments show the influence of the state of the surface of a body on the radiation of its heat, and what experiments show the existence of latent heat ?

5. Explain, fully, what is meant by the law of chemical equivalents, and what by that of gaseous volumes. Give some account of chemical nomenclature and chemical notation.

6. What are the chemical properties of oils and fats ? What application is made of those properties to the uses of life ?

QUESTIONS IN FARMING.

1. Write out a farmer's calendar from February to June.

2. How has the ground to be prepared for turnips ? What is the time for sowing them ? What rules are to be observed in hoeing turnips ?

3. What is meant by the four course system ? What are the advantages of keeping up stock as compared with pasture ? What rules are to be observed in applying liquid manure ?

MUSIC.

(Four Hours allowed for this Paper, with that on Languages.)

DIVISION I.

Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

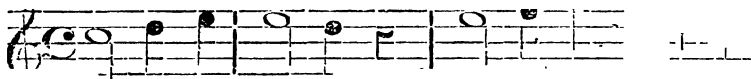

1. Write out the substance of a lesson on beating time, with examples of all the ordinary cases.

Section 2.

1. How is a very gradual increase or decrease of velocity or of loudness expressed? When a note is to be forced how is it distinguished?

2. How many sounds are there in a *tetrachord*? How many tetrachords are there in a major scale? Give the names of the sounds of the tetrachord.

3. What rules ought to be observed with regard to *the turn* in singing? Write out the following melody with a *direct* and with an *inverted turn* introduced.

Section 3.

1. Supposing that in a musical composition the time were to change from $\frac{3}{2}$ to $\frac{6}{4}$, what change would be required in the manner of beating? What would be the value of each of the beats in each case?

2. In what scale is the following passage written? State how you determine it.

3. What is meant by *reading in time*? Show how the following passage should be read in time.

SUPPLEMENTARY PAPER.

DIVISION II.

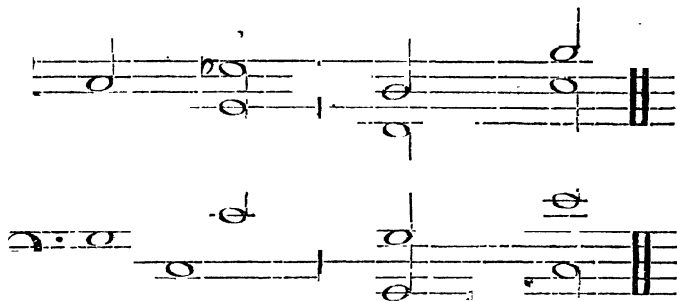

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. Explain, as you would to a class, what is meant by the terms *prime*, *harmonic chord*.

2. What rule is observed in arranging chords for more than and for fewer than four voices? On what principle is the rule based?

3. What are *sequences*? Explain the differences between *tonal* and *real sequences*.

4. Is there anything objectionable in the arrangement of the following

5. In musical composition what relation ought to exist between the chords in order to produce the best effect?

6. Give a list of the *consonant* and *dissonant intervals*, distinguishing what are *anomalous*, *perfect*, and *imperfect*.

PERSPECTIVE.

1. Explain what is meant by a perspective representation of an object.

Give such a representation of a right-angled triangle when one of the sides which contain the right angle is vertical and the triangle is (1) above, (2) below the eye.

2. Define the following terms:—the intersection of the original plane, the parallel of the original plane, the vanishing point of a line, and the centre of the picture.

Illustrate your definitions by a diagram.

3. Make an accurate drawing of a cube, supposing the plane of the picture to be parallel to one of the sides, and the cube to be below the eye on the left.

Place upon it another cube of half the linear dimensions exactly over its centre.

4. Draw an accurate perspective representation of a square, the sides of which are parallel and perpendicular to the plane of the picture, having given the centre and distance of the picture, the side of the square, and the seat of one of its corners.

LANGUAGES.

(Four Hours allowed for this Paper, with that on Music.)

1. Translate, literally, one of the following passages:—

(1) Καὶ ἐγένετο ἐν τῷ· ἐλθεῖν αὐτὸν εἰς οἶκόν τινος τῶν ἀρχόντων τῶν Φαρισαίων σαββάτῳ φαγεῖν ἄρτον, καὶ αὐτοὶ ἦσαν παρατηρούμενοι αὐτόν. καὶ ἰδὼν, ἀνθρώπος τις ἦν ὑδρωπικὸς ἐμπροσθεν αὐτοῦ· καὶ ἀποκριθεὶς ὁ Ἰησοῦς εἶπε πρὸς τοὺς νομικοὺς καὶ Φαρισαίους, λέγων, “Εἰ ἐξεστὶ τῷ σαββάτῳ θεραπεύειν;” Οἱ δὲ ἡσύχασαν. καὶ ἐπιλαβόμενος ἰδαστο αὐτόν, καὶ ἀπέλυσε. καὶ ἀποκριθεὶς πρὸς αὐτοὺς εἶπε, “Τίνος ὑμῶν υἱὸς ἢ βοῦς εἰς φρέαθ ἐμπεσεῖται καὶ οὐκ εὐθέως ἀνασπάσει αὐτὸν ἐν τῇ ἡμέρᾳ τοῦ σαββάτου;” Καὶ οὐκ ἴσχυσαν ἀνταποκριθῆναι αὐτῷ πρὸς ταῦτα.

(2) Ἐτόγχανον λέγων ὅτι πολλὰ καὶ καλὰ ἐλπίδες ἡμῶν εἶεν σωτηρίας. πρῶτον γὰρ ἡμεῖς μὲν ἐμπεδοῦμεν τοὺς τῶν θεῶν ὄρκους, οἱ δὲ πολέμοι ἐπιωρκήκασι τε καὶ τὰς σπονδὰς καὶ τοὺς ὄρκους λελύκασιν. οὕτω δ' ἐχόντων εἰκὸς τοῖς μὲν πολεμίοις θανάτους εἶναι τοὺς θεούς, ἡμῶν δὲ συμμάχους, ὅπερ ἱκανοὶ εἰσι καὶ τοὺς μεγάλους ταχὺ μικροὺς ποιεῖν καὶ τοὺς μικροὺς, κἂν ἐν δεινοῖς ὄσοι, σώζειν εὐπετῶς, ὅταν βούλωνται. Ἐπειτα δέ, ἀναμνήσω γὰρ ὑμᾶς καὶ τοὺς τῶν προγόνων τῶν ἡμετέρων κινδύνους, ἵνα εἰδῇτε ὡς ἀγαθοὶ τε ὑμῖν προσήκει εἶναι, σώζονται τε σὺν τοῖς θεοῖς καὶ ἐκ πάντων εἰσῶν οἱ ἀγαθοί.

Parse the words printed widely in the passage which you translate.

2. Translate into literal English prose one of the following passages :—

Quæ civitates commodius suam rem publicam administrare existimantur, habent legibus *sanctum*, si quis quid de re publica a finitimis rumore ac fama acceperit, uti ad magistratum deferat, neve cum quo alio communicet; quod sæpe homines temerarios atque imperitos falsis rumoribus terri et ad facinus *impelli* et de summis rebus consilium capere *cognitum* est. Magistratus, quæ visa sunt, occultant; quæque esse *ex usu* indicaverint, multitudini produnt. De re publica nisi per concilium loqui non *conceditur*.

Sæpe fugam Danaï Troia cupiere relicta
moliri, et longo fessi discedere bello;
(*fecissentque* utinam!) sæpe illos aspera ponti
interclusit hiems, et terruit Auster euntes.
Præcipue, quum jam hic trabiibus contextus *acernis*
staret equis, toto sonuerunt *athere* nimbī.
Suspensi Eurpylum scitatum oracula Phœbi
mitimus; isque adytis hæc tristia dicta reportat:
Sanguine *placastis* ventos et virgine cæsa,
quum primum Iliacas Danaï venistis ad oras,
sanguine quærendi reditus, animaque *litandum*
Argolica.—Vulgi quæ vox ut venit ad aures,
obstupuerunt animi, gelidusque per ima cucurrit
ossa tremor, cui fata *parent*, quem poscat Apollo.

Parse the words printed in italics.

3. Translate literally the following passage, and parse the words printed in italics :—

La conduite d'un homme n'est vraiment morale que quand il ne *compte* jamais pour rien les suites heureuses ou malheureuses de ses actions, *lorsque* ces actions sont dictées par le *devoir*. Il faut avoir *toujours* présent à l'esprit, dans la direction des affaires de ce monde, l'enchaînement des causes et des effets, *des* moyens et du but; mais cette prudence est à la vertu comme le bon sens au génie: tout ce qui est vraiment beau est *inspiré*, tout ce qui est désintéressé est religieux.

WELSH.

1. Translate into English one of the following passages :—

"Pan eisteddych i fwytta gyd â thywysog, ystyria yn ddyfal beth sydd ger dy fron: a gosod gyllell ar dy geg, os byddi ddyn blysig. Na ddeisyf ei ddanteithion ef: canys bwyd twyllodrus ydyw. Nac ymfina i ymgyfoethogi: dod heibio dy synwyr dy hun. A beri di i' th lygaid ehedeg ar y peth nid yw? canys golud yn ddiau a gymmer adenydd, ac a eheda ymaith megis eryr tu h'r wybr."

"Mor belled ag y gellai golwg y llŷgad gyrhaeddyd, i'r dehau, i'r aswy, ac ym mlaen, nid oedd dim i'w weled ond yr un dorf yn ymsymmud. Rhessau hirion o asynod ac ychain, yn llwythog o bebyll duon, crochanau anferth, a

llawrlenni amryliwiog; hen wragedd a hen wŷr, heb allu mwyach gerdded, yn glymmedig wrth bentwr o ddodrefn teuluaidd; babanod wedi gosod mewn cyfrwygydau, a'u pennau bychain wedi ei gwrthio allan drwy yr agoriadau culion, ac yn cael eu gwrthbwysu yr ochr arall i'r anifail gan fynnod neu a yn wedi eu clymmu a'u sierhau. Y cyfryw ydoedd y dorf gymmysgliw, trwy ymuno yn yr oeddyr i fyned am oriau lawer."

2. Parse, in full, the first period in whichever of the above passages you have translated.

3. Translate into Welsh one of the two following passages:—

"Take care that your children come punctually to school, and that they all have clean hands and faces. It is an old but true saying, that "Cleanliness is next to godliness." If, however, you wish your scholars to behave well in these respects, set them a good example yourself; an idle, careless, dirty teacher does almost as much harm as good in a school, no matter what may be his acquirements."

"This is a great and glorious land we live in; rich in many of the most precious gifts of Providence, and powerful, beyond what could have been expected, among the nations of the earth. The people, however, are torn by civil factions and religious dissensions; exposed to the extremes of misery and prosperity; fond of sensual enjoyment, notwithstanding their boasted spirituality; and easily deceived by designing men, notwithstanding their constant pretence to a more than ordinary share of common sense."

4. In this sentence—

"A gwybyddwch hyn, pe gwybuasai gwr y tŷ pa wyladwriaeth y deuai y lleidr, efe a wylasai, ac ni adawsai gloddio ei dŷ trwodd,"—explain clearly the reasons of *all* the initial mutations of letters. Why is "*pe*" used here instead of "*os*"?

5. Compare the grammatical treatment of the negative particles "*na*" and "*not*" in the Welsh and English languages.

Special Report, for the year 1852, on the Church of England Training Schools for Schoolmistresses. By Her Majesty's Inspector of Schools, the Rev. F. C. COOK, M.A., &c.

MY LORDS,

January 1853.

IN the report which I had the honor to lay before you last year I had the gratification of being able to state that there were manifest symptoms of a general improvement in the training schools for female teachers. The facts which have since presented themselves to my observation will fully justify that statement, and confirm the hope which I then expressed, that a large number of well-taught and completely trained schoolmistresses will be regularly supplied by these institutions. Whether, indeed, the annual supply, though large, will be sufficient, is a question with reference to which, upon further consideration, I have seen reason to modify the opinion which I then expressed. I have adduced facts in my general report of this year which point to a different conclusion. A searching inquiry into the actual state of elementary schools, the number of female teachers employed, and the average duration of their engagements, will assuredly prove that, unless the existing institutions are considerably enlarged, and others established, especially in the northern districts of England, a large proportion of schools must continue of necessity to be conducted by untrained and incompetent schoolmistresses.

My report of this year includes,—1. An account of each institution which I visited, either alone or accompanied by the Inspectors of the several districts, in the spring and summer of last year. 2. An inquiry into the proficiency of the students, as ascertained by the results of the general examination at Christmas 1851, with a brief reference to the papers worked by the candidates at Christmas 1852. And, 3, a few observations upon facts bearing upon the progress of elementary education, and of normal training as connected with these institutions.

In this tour of inspection I had generally the advantage of meeting the committees of management, and of conferring with the principals and governesses upon all subjects of importance. In some training schools I was assisted by the Inspector of the district, whom I have consulted upon all points which are noticed in the following reports: Having devoted a considerable time to the inspection of these institutions this year, I was enabled to form a more complete and exact idea of the principles upon which they are conducted, and the methods by which those principles are carried into effect, than on former occasions.

WHITELANDS, NATIONAL SOCIETY'S TRAINING SCHOOL.—In last year's report I gave a brief account of the extension and alteration of the buildings. No change of importance has been made since; but it may be useful to state how far the objects contemplated by the committee of management have been attained. It is certainly my impression that at present this institution is not deficient in any essential points connected with the external arrangements, although some improvements might be suggested in order to make it a model building. The principal lecture-room is very large, and admirably adapted for all purposes, and especially for collective lessons and examinations. The want of such a room is much felt in some institutions. The library is in this room; although far from complete, it contains a good assortment of books of reference, and is much used by the students. The committee-room, refectory, and the apartments of the teachers, and principal superintendent, are unusually good and convenient. Great praise is due to the architect for the arrangement of the dormito-

ries. Each student has a neat and comfortable room, well lighted and well ventilated, and all are under the regular superintendence of the teachers, whose apartments are placed at the end of the corridors, giving them a perfect oversight and control over the whole. It is often made a question how far such unremitting oversight is attainable or desirable. For my own part I consider that the age of the students, and the previous training of a great proportion of them, render it necessary to take every precautionary measure; nor do I understand how the superintendent can be held responsible for the moral discipline of an institution, unless she has constant opportunities of observing the conduct of the students. The lower part of the building contains offices, in which the students are instructed in all branches of domestic economy by Mrs. Harris. Great pains have been taken to introduce a complete system of industrial training in such a manner as not to interfere with the professional instruction and education of the students. I understand that the difficulties, which were certainly formidable, have not been found insurmountable. The managers and all the officers of the institution are fully alive to the importance of the subject. The space for exercise is of course not very extensive; but it is of great value in such a situation. The domestic arrangements appear to combine every requisite for comfort, household discipline, and physical well-being. The infirmary has been little used, and the charges for medical attendance have been remarkably low during the last two years.

The staff of officers remains unchanged; the chaplain, the Rev. H. Baber, conducts the religious instruction, and exercises a general control or superintendence over the institution; he also discharges the duties of secretary, which of course occupy much time. Mr. Knighton gives lectures on grammar, geography, and history, superintends the practising schools, and instructs the students in the art and principles of teaching.

These gentlemen reside near, but not on the premises; there are two governesses, Miss Cuckow and Miss Gillott. I have more than once had occasion to record my opinion that these teachers discharge their duties with skill and remarkable diligence; still taking into consideration the large number of students,—at present seventy-nine—* the inequality of their attainments, the vast quantity of written papers which require careful revision and correction, the necessity of fixed and sufficient leisure hours for due preparation of lessons, and for private study, both for the sake of recreation and improvement,—I am clearly of opinion, that at least one additional governess is needed, nor do I think that two assistants would be too much. It would then be practicable to apportion to the officers just that amount and kind of work for which they are severally best adapted; and I should anticipate a marked and continuous improvement in those branches of elementary instruction which form at once the most important and the most laborious part of a system of normal training.

The practising schools are under the general superintendence of Mr. Knighton; each school, however, is conducted by a certificated teacher. An account of these schools is given in the appendix; the organization, including both the external arrangements and system of teaching, is at present under the consideration of the committee. Hitherto it must be admitted that the results have not been satisfactory. The difficulties of combining model lessons, good methods of instruction, and practice in teaching for the students, with a steady, equable, and progressive improvement of the children, have certainly not been overcome; but the rooms are good and convenient, the mistress of the practising school has been well trained, and there is both the will, and I believe the power, to adopt and carry out a thorough system of elementary education. I could not report fairly upon

* Compare the proportion of teachers to students at Warrington, Cheltenham, Derby, Brighton, the Home and Colonial, and Bishop Stortford.

such an institution, without pointing out what in my opinion has been of late years a serious defect; I should not do justice to my own feelings or to the exertions and intentions of the managers, did I not also record my hopeful anticipation of their success.*

HOME AND COLONIAL SCHOOL SOCIETY'S TRAINING SCHOOL, GRAY'S INN LANE.—This institution is not more remarkable for the extent and variety of its undertakings, than for the unity of spirit which pervades and animates the energies of its officers in each department. During the year 1851 the society trained 206 young persons, 59 for twelve months (of whom 44 obtained certificates of merit), 94 for shorter periods, the remainder being intended for assistants, or governesses, with the exception of ten missionaries for foreign stations. At present 156 females are in training. The proportion of students who receive a 'complete course of instruction and training is increased since last year from 59 to 109. The society state in their last annual report, "It is satisfactory to report that mainly owing to the inducements held out by Her Majesty's Government to teachers of schools for the lower classes, a considerable addition has been made to the number as well as to the respectability of the candidates applying to be trained." Great benefits have undoubtedly accrued to the cause of education, especially in poor localities and in infant schools, from the large supply of teachers whose training has not exceeded six months; and considering how far the demand for teachers exceeds the supply, it is not probable, nor do I think it desirable that the society should discontinue or materially diminish its efforts in this direction; but there can be no doubt that pecuniary and other external hindrances being removed, at least one year's training will ere long be justly held indispensable for the formation of a teacher. The number of applications for admission, which continues to increase, sufficiently indicates the general estimation in which this institution is held.

The buildings have been gradually extended and altered during several years. Much allowance must of course be made for any deficiencies or inconveniences that do not materially affect the physical well-being or proper training of the students. The managers have had no alternative but to refuse candidates for admission, or to receive them in apartments which must be admitted to be scarcely sufficient for their proper accommodation; they have always been of opinion that, due provision being made for health, cleanliness, and moral discipline it would not be advisable to encourage habits of over-refinement; students, may, in their opinion, sleep in the same room, or in the same bed, without any real inconvenience. The students are lodged in four adjoining houses, each house under the charge of a resident matron, and several of the governesses occupy apartments among them. I should be very unwilling to suggest any unnecessary interference; but I acknowledge that I should consider it a great advantage if at a future time it should be found practicable to place the whole establishment under the superintendence of a resident matron, whose station, authority, and character might be felt as an abiding influence, and who might be responsible for the domestic arrangements, as well as for the conduct of the students. Any marked difference in the treatment of Queen's scholars and of other students is to be deprecated, yet the peculiarity of their position may perhaps make it justifiable to require that the provision made for their accommodation should be nearly on a par with that supplied by other training schools.

* Since this report was written the committee of Whitelands have taken the whole subject into consideration. They have adopted a plan which will probably bring the schools into a satisfactory condition. The whole of them are placed under the superintendence of a single officer, with increased power and responsibility, and three well-trained mistresses are now engaged. An additional governess has also been appointed since this report was written.

With regard to other arrangements, although I should be glad to see better refectories, more convenient rooms for private study, and offices adapted for the purposes of domestic and industrial training, yet they appear not to be indispensable adjuncts to such an institution, and it would be impossible to provide them on the existing premises. With regard to the teaching department, good and sufficient arrangements have been made; there are three principal and four occasional lecture or class rooms, well arranged and constantly used. The managers have never allowed any obstacles to thwart them in their main object of providing fully for the professional training and education of all their students.

The staff of officers is complete and efficient. The chaplain is engaged from morning to evening in the religious instruction, taking part also in other important branches of education. Another clergyman has also assisted during the last year in the religious instruction. The master of method is Mr. Dunning, of whose able and successful exertions I have more than once had occasion to speak in terms of well-merited praise; and there are six governesses, three of whom hold first-class certificates. Regular lectures are given by Professor Reiner, which are equally valuable for the information which they convey, and for the admirable development and exemplification of normal principles.

The exercises of the students are also revised by some members of the ladies committee, to one of whom the society acknowledges peculiar obligations as the clearest expounder and most practical and consistent inculcator of the Pestalozzian system. With so many able and energetic teachers, it is especially to be observed that a perfect uniformity of method and harmony of action are the most striking characteristics of the institution. This must be attributed partly to the powerful influence of religious principle, and partly to the clear recognition of the simple and intelligible principles upon which the educational system adopted by the Home and Colonial Society is based.

I devoted a considerable portion of time this year to the inspection of the practising and model schools. These consist, first, of the infant school in two divisions, the smaller conducted by Miss B. Dunning, daughter of the master of method. In this, forty infants under four years, or averaging three years old, receive the first rudiments of education. They are taught to observe external objects, to remark differences of form, colour, and place, to name things in common use, &c.

The upper division, conducted by Miss Sunter with four pupil-teachers, is a complete model of a large infant school. Great care has been taken to bring every detail of method into perfect accordance with the Pestalozzian principle of progressive and harmonious development. The lessons are well graduated, each step resting on the preceding, and forming a basis for the next in advance. The children on leaving this school have usually made very satisfactory progress in reading, writing, and arithmetic, have acquired a good deal of general information, and a satisfactory acquaintance with the leading facts of Scriptural history. But they have above all things learned to think. They have been accustomed to observe and compare objects of natural history, to reflect on the adaptation of parts of organized bodies to their functions and uses, and to draw practical inferences from what they observe.

The arrangements of this school are excellent. All the work is full of life, and it is evidently animated by a spirit of love. From the age of seven the children pass into the model schools of boys and girls in two rooms, one partitioned by a curtain, under the general management of Mr. Coghlan, who is assisted by four pupil-teachers.

The instruction in this school, which I examined in detail, is most satisfactory; the characteristic excellence being the lively and systematic development of the mental faculties. The children acquire a very competent

knowledge of the usual subjects of instruction, and possess more information than is usual at their age, which is generally under thirteen, and averages about eleven and a half. It might have been apprehended that their proficiency in what are considered more technical branches of instruction, such as in elementary or practical arithmetic, penmanship, spelling, and perhaps reading, would be comparatively less satisfactory, less time being allowed, of necessity, than in schools where the course is more circumscribed. With the exception of penmanship, however, this is not the case; the results of a searching examination convinced me that great and successful efforts had been made to keep up a fair standard of attainment in all these subjects. The methods of instruction in this school could be successfully adopted elsewhere, although their success must necessarily depend upon the ability and zeal of the teachers, and the discretion shown in the application of general principles to local circumstances.

Practising Schools.—At present 180 children in two rooms are under instruction. The students give lessons here under the superintendence of two teachers. The lessons which I attended showed that due pains had been taken to prepare the students thoroughly for their work, and the children are very well taught.

In addition to these, a mixed school for boys and girls has lately been opened. The object of the managers is to make this a model, in its arrangements, system, and methods of teaching and general organization. A large proportion of the students, will probably take situations where the mixture of boys and girls is necessary and indeed for various reasons desirable. To conduct such properly it is essential that they should not only be guided by right principles and have a complete theory, but that they should have seen it in actual operation. I shall have an early opportunity of reporting upon the success of this experiment.

Upon the whole it cannot be doubted that students in this institution have every opportunity of preparation both intellectual and professional. There may be some danger lest in the attempt to master the subjects proposed for annual examination, some may neglect or undervalue the practical benefits of methodical school-work; and it may be advisable to hold out inducements for a lengthened period of training; but the managers are fully alive to the paramount importance of that work for which the institution was founded. To use their own words, they consider "*efficiency as teachers* the all-important point, and trust that it will never be lost sight of by any student, or by those who train them, whatever may be the effort to gain certificates."

CHELTEMHAM FEMALE TRAINING SCHOOL.—I visited this school with Her Majesty's Inspector of Schools, the Rev. H. W. Bellairs, in June. No change has been made in the building or domestic arrangements since last year. I then noticed the improvement in the dormitories, which are very good and well arranged.

The infirmary is on the ground floor, but there is not sufficient accommodation, and the arrangements may be much improved. There is a large piece of ground attached to the building, a most valuable and important adjunct to an institution situate in a great town. It is, however, planted with potatoes, and therefore only in part available for purposes of exercise and recreation. This appears to be an unwise economy, the produce being of course inconsiderable, while the health and spirits of the students ought to outweigh all considerations. Mr. Bellairs agrees with me in recommending that it should be laid out with exclusive reference to the benefit of the students. The domestic arrangements are altogether under the control of Mr. and Mrs. Waterworth, and appear from the accounts, which we inspected, to be conducted with due regard to economy and to the comfort of the pupils. We should consider it an advantage if the students received practical instruction in various branches of domestic economy, for which the house might be adapted at no great expense, but the managers appear either

to have deemed it undesirable, or to have found it difficult to devise a plan for carrying it into effect without interfering with the course of professional training. Some important changes have been made in the teaching department. Previous to our visit last year (1850) there was a deficiency of power. It was then evident that although the lectures to which the students are admitted were of great excellence, it was doubtful to what extent these young persons were individually benefited by them. Certainly, the results, so far as could be ascertained by a written examination, were less satisfactory than had been anticipated. It appeared that there was not sufficient time at the disposal of the teachers to correct the exercises, to test the progress of the students by frequent written examinations, and to fix the substance of the lectures upon their minds by oral questioning and repetition. The committee of management, after a conference with Mr. Bellairs and myself, determined to increase the staff, and at present, instead of two teachers, one of whom was only employed occasionally, three are wholly occupied in tuition. They have also the occasional assistance of Mr. Waterworth, and of the masters of the male department, who lecture on a variety of important subjects. The principal, the Rev. C. Bromby, continues to exercise a watchful superintendence over the training and general management of the institution, directing his attention more specially to the religious instruction, the formation of character, and the inculcation of systematic and comprehensive views in educational questions. There can be no doubt that the students have great and peculiar advantages; their mental faculties are fairly and systematically developed; the amount of information communicated to, and apparently received and appropriated by them is considerable; and they are habituated to reflect upon all matters connected with their professional duties. Mr. Bellairs examined the children of the practising schools with me, and attended several lessons given by the students. We were of opinion that elementary subjects, reading especially, are taught with skill and success; and that many of the collective lessons evinced great ability and careful training.

It may be a question to what extent the simultaneous system of instruction can be advantageously introduced into schools for females; but it is certain that the experiment will be tried under very favourable circumstances at Cheltenham. The managers and officers have but one desire, to raise the intellectual and moral condition of the children of the poor; and while they attach great importance to the system which they have adopted, they are neither blind to its possible tendencies under injudicious teachers, nor indisposed to make any modifications which further experience may indicate to be needed. Mr. Bellairs unites with me in the opinion that the normal and elementary instruction at this institution is equally creditable to the managers who devised the system, and to the officers by whom it is carried into effect.

SALISBURY DIOCESAN TRAINING SCHOOL.—I inspected this institution for the first time in the year 1848, and on that occasion made a special report, embodying various suggestions. These were taken into consideration by the committee of management, and a subscription was commenced, in order to purchase larger and more commodious premises, and to supply them with all things requisite for the complete instruction and training of school-mistresses.

The plans then adopted have at length been carried into effect. A large sum has been expended, including a grant from your Lordships to the amount of 2,500*l.*, and this year I had the gratification of inspecting at Salisbury one of the handsomest and most perfectly arranged institutions in the kingdom. In the preceding year I unfortunately visited the schools just on the eve of their removal, when the staff of officers was incomplete, and many important questions connected with the system of instruction, especially in the art of teaching, were yet unsettled. Under those circumstances, I thought it advisable to defer a report, the more especially since I had pre-

viously had occasion to express a high opinion of the ability and moral influence of Mrs. Duncan, the superintendent. The points which seem to require more special notice at present refer to the buildings, the industrial training, the staff of teachers, and the practising and model schools.

The building is remarkable for its beauty and convenient situation in the centre of the city and diocese, as well as for the completeness and ingenuity of its arrangements. The lecture-room is one of the largest as well as handsomest in England, admirably adapted for collective examinations and other educational purposes. There are good class-rooms. The dormitories are airy, spacious, and arranged on a peculiar plan, which combines requisite privacy with a free circulation of air. The buildings include an excellent laundry, bake-house, and other offices required to give the students practical acquaintance with the details and processes as well as the principles of domestic economy. Too much praise can scarcely be given to the managers for the liberality and care displayed in all that pertains to the external arrangements of this institution. There is a large garden and a piece of ground for exercise and recreation, and also a covered space under part of the building in which the students can take exercise in rainy weather. The hall of this building is used as a depository for school apparatus.

The industrial training has been carried on to a great extent; indeed to an extent which, after full consideration, has been deemed by the committee of management scarcely compatible with the objects more especially contemplated by the founders and supporters. The domestic work has hitherto been done all but exclusively by the students, one servant only being employed on the premises. It is the wish and intention of the committee to give the students full opportunity of becoming acquainted with all points of domestic economy, and to make them practical housekeepers, able and willing to wait upon themselves, to manage their own housekeeping, and to instruct pupil-teachers, and to superintend industrial schools. But it is their wish to do this without interfering with the mental instruction, which they hold very justly to be equally indispensable for a schoolmistress. At the conference which I attended during my visit to Salisbury it was resolved to revise the whole system, to employ additional servants, and to adopt such measures as might secure the regular progress of mental and educational training in combination with a complete and practical course of industrial occupations. I have no doubt that these intentions, in which the Bishop and the committee are unanimous, will be carried into successful execution.

The staff of teachers was not sufficient at the date of my visit. Mrs. Duncan, whose time is occupied by the multitudinous details of housekeeping, has had but one assistant during the early part of the year, Miss Barrett. At the same time I bear willing testimony to the goodness and soundness of the instruction to the extent which has been found practicable under these circumstances. Notwithstanding the extreme ignorance of many students at their entrance, I was very favourably impressed this year by the religious knowledge elicited by oral examination, by the tone and expression of the reading, by the marked improvement in arithmetic and grammar, and by the general interest and animation of the lessons given by the teachers. It should, moreover, be stated that the Bishop addressed a letter to the managers in which they entirely concurred, recommending that immediate measures should be adopted to engage whatever teachers might be required to give efficient instruction in all subjects taught in this and similar institutions. That some difficulty will be experienced in completing the organization of the teaching department may reasonably be expected; but I feel satisfied that no unnecessary delay will be incurred, and that the managers will proceed upon a liberal and efficient system.*

* I am informed that satisfactory arrangements have since been made, and that the staff of teachers is now complete and efficient.

The practising school is unfortunately at a considerable distance, and the arrangements are not satisfactory to the committee. Various plans for supplying this defect have been suggested, and measures will be taken to bring the lessons given by the students under the immediate superintendence of the principal.

The model school on the same premises is well arranged; the discipline appears to be excellent. The instruction will include all subjects taught in the best National schools; but sufficient time has not elapsed since its commencement to enable me to express a decided opinion upon its efficiency. The mistress is an able school manager, but will unfortunately remain here but a short time.

Upon the whole, I feel justified in speaking hopefully of the prospects of this institution, so far as regards the mental and professional training of the students, and in expressing very strongly my conviction that the moral discipline, the habits and disposition of the students, as well as their religious knowledge and principle, reflect high credit on the principal superintendent, Mrs. Duncan, and upon those who have assisted her in the discharge of her onerous and important duties.

WARRINGTON (CHESTER DIOCESAN) TRAINING SCHOOL.—The report of last year, in which I expressed a very favourable opinion of the efficiency of the instruction and the liberality of the arrangements, may be repeated without modification. The building, which has been considerably enlarged, now affords accommodation for 100 students. The institution is equal to any in the size and commodiousness of the lecture and class-rooms. The dormitories in the new part of the building will give each student a separate sleeping-room, an arrangement which I consider to be a considerable improvement upon the present system. A large room is fitted up as a kitchen, in which a class of pupil-boarders are instructed in cookery and the usual details of housekeeping. When the buildings are completed there will be every facility for carrying out a complete system of industrial training. The whole building is remarkably handsome, well situated, and in every respect adapted for its purposes. The staff of officers includes the chaplain, Rev. C. Stubbs, who, in addition to the religious instruction, gives lessons on all subjects connected with the art of teaching, and superintends the professional training of the students. Miss Wilson, assisted by a certificated teacher, Miss Mellor, is exclusively engaged in the preparation of the students' lessons, while arithmetic, some portions of geography, and vocal music are taught by Mr. Plant. The vigor and efficiency of the system of instruction was tested by the Christmas examination of 1851, at which the students obtained an unusually large proportion of high certificates. The practising school is in an adjoining building; it is conducted by able and well-informed teachers, one of whom, holding a first-class certificate, was trained in this institution. The organization of the school may be improved, and it is probable that some important modification of the existing system of elementary instruction may be advantageously adopted. Upon the whole the training school of Warrington may be represented as offering an excellent course of professional training and instruction, and it is to be hoped that its influence will be increasingly felt in the large and important district for which it was especially designed.

YORK AND RIPON DIOCESAN TRAINING SCHOOL.—I inspected this institution with Her Majesty's Inspector of Schools, the Rev. F. Watkins, in September, having postponed our visit in order to meet the committee, who could not be conveniently summoned at the time we had first appointed. No change of importance has been made since my last report. The premises are conveniently situated, and have accommodation for a much larger number of students than are actually in residence. The sleeping-rooms are comfortable and well-arranged. There are three lecture or reading-rooms; but the

students have not the exclusive use of them. No arrangement is made (nor indeed could any satisfactory one be made with the present offices) for practical instruction in domestic matters. The ground attached to the premises is not more than is required by the practising school for a playground and a small garden. The whole institution is still under the superintendence of Miss Cruse. This lady is the mistress of the house; she is responsible for the moral discipline, the domestic arrangements, the religious and intellectual instruction, and the professional training of the students. So far as regards these students, she has no assistant residing on the premises, her sister now being exclusively occupied with the pupils of the middle school, which is conducted in the same house. Masters, however, attend regularly, and give lessons in arithmetic, drawing, and music, taking also some part in other branches of instruction. Miss Cruse, moreover, receives all visitors, and conducts a great part of the general correspondence. Mr. Watkins concurs with me in the opinion that, while very great credit is due to this lady, whose moral influence, in fact, pervades the institution, and whose exertions have achieved results beyond all reasonable anticipation, yet that it is scarcely possible for any person permanently to discharge such multifarious and, to some extent, incompatible duties. All other institutions have found by experience that even a small number of students require a staff of teachers, some of whom have to devote their time and attention exclusively to the work of instruction. It does not appear that sufficient provision can be made for the training of Queen's scholars without some considerable addition to the present organization.

Mr. Watkins had examined the practising school previously; we both passed some time in it, sufficient to ascertain the general system, the external organization, and the methods of instruction in most elementary subjects. There is a marked improvement since our last report. The school has attracted a larger attendance, the discipline is satisfactory, and it is evident that the girls are now receiving a useful and tolerably comprehensive education. But we cannot report that it has reached, or that it appears at present likely to reach the standard which ought to be regarded as of indispensable attainment in the practising or model school of a training institution. The committee of management, after conferring with us on the subject, passed a resolution to take measures for building a good school on the premises. Since the deficiencies of the school appeared to Mr. Watkins to depend rather upon the external arrangements than upon the internal organization or the character of the mistress, of whose ability and zeal he expresses a high opinion, there is fair reason to expect that all just cause of complaint will be removed when this resolution is carried into effect. Until the practising school is in a satisfactory state the institution can scarcely be regarded as one in which Queen's scholars will receive a complete professional education.

DERBY (LICHFIELD DIOCESAN) TRAINING SCHOOL.—I visited this institution in company with Her Majesty's Inspector of Schools, the Rev. J. J. Blandford, in June. We passed three days in inspecting the organization and arrangements, examining the students, visiting the practising schools, and conferring with the officers and the committee of management. We have pleasure in recording a very favourable impression as to the general results. The building, of which I spoke briefly in last year's report, is a handsome edifice in the Elizabethan style, without any superfluous embellishments, and reflecting equal credit upon the liberality and good taste of the founders. The entrance hall is paved with encaustic tiles, a present from Mr. Minton. The lecture-rooms afford sufficient accommodation for the ordinary business of instruction. It appears, however, very desirable to have one room larger than any now in use, for occasional purposes, such as collective lectures and examinations. Should it be found necessary to extend the building, which is not improbable, this suggestion will probably be taken into consideration by the committee. The dormitories are very good, and

well arranged; each room has a washing apparatus, which consists of one piece of earthenware, this is peculiarly convenient, and might be advantageously adopted in other institutions. Each student has a separate and convenient room. The infirmary, which is placed near the apartments of the principal superintendent, might perhaps be improved and extended; there will be ample scope for introducing a system of industrial training in the lower part of the building, which is spacious and commodious, and could be easily adapted to this purpose. Hitherto little use has been made of the offices, excepting for the usual details of housekeeping. This institution has the advantage of a large piece of ground, in which the students may enjoy exercise and recreation, but its uses will be much extended when the improvements contemplated by the managers are carried into effect.*

The staff of officers, which appeared last year to be scarcely sufficient, has been much increased. The Rev. J. Latham, who has hitherto discharged the duties of chaplain gratuitously, conducts the religious instruction, manages the correspondence, and exercises a general control over the institution. Miss Richardson is the resident principal; she has full authority in all matters connected with the moral discipline, domestic and industrial training of the students, and also takes part in their religious and to some extent in their general instruction; she is exclusively responsible for the domestic arrangements, which appear to be judicious and liberal.

Mr. Blandford concurs with me in anticipating the best results from the moral influence of this lady, whose practical acquaintance with the condition and habits of the poor, and experience in all matters of domestic management, acquired in the house of her father, a beneficed clergyman, peculiarly qualify her for the efficient discharge of these duties. Two governesses, both trained at Whitelands, and holding first-class certificates, are exclusively engaged in the instruction of the students; Miss Bradshaw, though young, has had considerable experience in school matters, and gives valuable instruction in the art and principles of teaching. Music is taught by a non-resident master. There can be little doubt with such a staff, that students who are tolerably well prepared and disposed to work, will be properly instructed in all the subjects of the annual examinations. It is, however, but fair to state that while Mr. Blandford and myself were on the whole well satisfied with the lessons given by the teachers, we found many, indeed most, of the students who had entered the institution lately very ignorant in subjects of elementary importance; few read well, many spell incorrectly, the composition of most showed great deficiency in the knowledge of their own language, and few could work the elementary rules of arithmetic with ease and accuracy. The religious examination was more satisfactory, but it was evident that great skill in the teachers and persevering exertions in teachers and students would be indispensable conditions of success. The practising school is unfortunately at some distance, and at the date of our visit the arrangements were not satisfactory; there was not a clear understanding as to the employment of the students in school hours, or the system upon which the various branches of elementary instruction ought to be conducted. This matter was brought under the notice of the committee by Mr. Blandford and myself, and will doubtless receive due consideration. Upon a general review of the present condition and future prospects of this institution, we are of opinion that the students enjoy the advantages of a comfortable, happy, and well-disciplined home, of a sound and practical education, and that a fair proportion are likely to become useful and successful teachers. It is, however, evident that the annual supply of teachers will not be sufficient for the wants of the diocese, in which about 700 female teachers are employed, unless the number of students be greatly increased; nor can the

* A wall has been lately built, inclosing this ground. • The managers intend to level it, and to give up a portion to the students for flower gardens

institution be regarded as thoroughly efficient until the practising school is organized upon a satisfactory plan, and brought into perfect accordance with the methods and principles of instruction approved by the committee of management.

ROCHESTER DIOCESAN TRAINING SCHOOL, AT BISHOP STORTFORD.—This institution is now open for the admission of students. I visited it in order to confer with the committee, and to report upon their plans. The building stands on an elevated site, and is in every respect well adapted for a training school. It appears to me that the managers have secured the advantages and avoided the inconveniences which have been remarked in some institutions of earlier date. There are large lecture-rooms, more classrooms than will be required for some time, a good refectory, convenient apartments for the superintendent and governesses; the dormitories are neat, comfortable and easily inspected. There is a good infirmary, capable of enlargement, and sufficiently isolated. Especial care has been taken to give the students every opportunity of learning the details of washing, cooking, baking, brewing, in the extensive range of offices which occupies one side of the interior quadrangle.

The staff of teachers, all of whom have been appointed, is equal to the highest requirements. With a wise liberality, the committee determined at once to make complete provision for the instruction and training of a full class of students. The chaplain, who resides near the premises, will take charge of their religious instruction, superintend the lessons in the model schools, and take general cognizance of the progress of the pupils. A lady superintends the domestic arrangements, taking also some part in the instruction. Two young persons, both of whom have been educated in the best schools of my district, now Queen's scholars at the Home and Colonial, are engaged as teachers, and Miss Kyberd, holding a first-class certificate, and long known to me as one of the best schoolmistresses in London, will take charge of the general instruction of the students, and especially of their improvement in the art of teaching; all that could be done, has been done, in the best spirit and with the fairest prospects of success. The practising schools will include, 1st, an infant school; 2nd, a mixed school for boys and girls between six and a half and ten and a half or eleven years of age; and, 3rd, a school for girls of eleven years and upwards. The object of the middle school will be to present a perfect model of what ought to be attempted in agricultural parishes where separate schools are not easily maintained, nor indeed, generally speaking, desirable. In the girls school a thoroughly good education will be provided for the children of respectable parents at a small expense.

The committee have taken great pains with the organization of these schools, and a sub-committee has been appointed to report upon the best system now in use. With a sufficient supply of students, this institution cannot fail to accomplish its high object, and to requite its benefactors for their liberality and zeal.

BRIGHTON (CHICHESTER DIOCESAN) TRAINING SCHOOL.—No change had been made in the external arrangements of this institution when I visited it last June. I have, however, the gratification of reporting to your Lordships, that the committee of management, whom I met on that occasion, have determined to build spacious and complete premises on a site which they have procured in a convenient part of the town. Since that time a large sum has been subscribed, and plans have been approved which combine all requisites for the domestic accommodation of 40 students, for their industrial training, and thorough instruction in all professional studies.

The teachers of this institution have discharged their duties in an efficient and satisfactory manner. The principal, Miss Romney, of whose abilities and

peculiar qualifications I have frequently spoken, is assisted in the general preparation of the lessons by a former student, and in those lessons which refer especially to the art and method of teaching by the mistress of the practising school. Both of these teachers have obtained first-class certificates. The results of the examination in 1851 were less satisfactory than I expected; but it should be remembered, that no Queen's scholars have hitherto been admitted to this training school, and the general attainments of the students at their entrance have been so low that it has been difficult to prepare them in the most elementary subjects of instruction. The attention of the governess has very properly been directed mainly to the formation of character and the professional training of the students.

NORWICH.—The plans upon which I reported last year are now completed, and arrangements have been made for the accommodation and instruction of 40 students. There can be no doubt of the success of this institution, under the able management of the Rev. C. Bath Power. The model schools are well arranged, and in a high state of efficiency.

At Truro, in Cornwall, some additions have been made to the staff of teachers. A training school for mistresses would be most beneficial to that district. I did not inspect the institution last year. The buildings at Bristol are not yet completed.

The following table shows the numbers of students resident in the training schools inspected last year, and the numbers who attended the examinations in the years 1850, 1851, and 1852:—

	Number resident.	Attended Christmas Examination.		
		1850.	1851.	1852.
Brighton - - -	18	-	13	11
Cheltenham - - -	53	32	37	43
Derby - - -	30	-	-	17
Home and Colonial - - -	156	43	66	81
Warrington - - -	34	20	20	22
Whitlands - - -	100	47	45	57
York and Ripon - - -	18	13	13	9
Total -	409	154	194	240

This table shows on the one hand, that there is a regular annual increase in the number of school teachers prepared in the various institutions, but on the other, that the supply falls very far short of the demand. It may not be possible to ascertain what number of teachers are actually required annually in this country, but there can be no doubt that a very small proportion of that number can be trained.

I proceed to consider the results of the annual examination in December 1851. In each subject it will be advisable, after stating the general and comparative proficiency of the candidates from the various institutions, to inquire what amount of knowledge ought to be insisted upon as a condition for a certificate, and to what extent it may be desirable to encourage the most intelligent students to pursue their studies.

Religious Knowledge.—The papers last year included, as usual, first, Questions on the history of the Old and New Testament, on the doctrinal, prophetic, and practical teaching of Holy Scripture; and, second, on the liturgy, formularies, and articles of our Church, and on a few leading and well known portions of ecclesiastical history.

The results were as follows :—

Holy Scripture.

—	No. of Candidates.	Satisfactory.	Not satisfactory.
Whitelands - -	45	32	13
Home and Colonial -	66	45	21
Warrington - -	20	13	7
York and Ripon - -	13	13	0
Salisbury - -	21	10	11
Cheltenham - -	37	11	26
Brighton - -	13	3	10
	215	127	88

Liturgy and Church History.

—	No. of Candidates.	Satisfactory.	Unsatisfactory.
Whitelands - -	45	10	35
Home and Colonial -	66	15	51
Warrington - -	20	7	13
York and Ripon - -	13	4	9
Salisbury - -	21	9	12
Cheltenham - -	37	10	27
Brighton - -	13	3	10
	215	58	157

The comparative efficiency of the religious instruction in the various institutions must not be estimated entirely by these results, since the candidates had not all been under training the same length of time. For instance, at the Home and Colonial, and Cheltenham, few had more than twelve months for preparation, while some candidates from other places had two or even three years' training, and several had previously obtained certificates of merit. But I do attach much importance to the following considerations, which are corroborated by, although they do not depend upon these, statistical results.

1. In the first place the number of certificates of merit (128), coincides so nearly with that of candidates who acquitted themselves in a satisfactory manner in the papers on Holy Scripture (124), as affords a fair presumption that the questions were not too difficult, and that the attainments of the students may be measured with tolerable fairness by their proficiency in this most important of all subjects. This accords with the statements which I have repeatedly made in conferences with committees of management and in reports laid before your Lordships.

2. Having examined the papers of the candidates very carefully, I am satisfied that it would be injudicious, as it is quite unnecessary to lower the standard of attainment. But I think it desirable to alter the arrangement of the paper. In the first three or four sections I would propose to set a greater variety of questions on those portions of Holy Scripture which every schoolmistress ought to know as having to teach her children; reserving for the supplementary section questions on the Epistles and other more abstruse or difficult subjects. A failure in the elementary part of this paper ought to be decisive.

3. The great difference between the proportion of satisfactory answers to the scriptural and liturgical paper shows how much more attention is devoted to the former, and how much more completely the subject is within

the student's reach. It is gratifying to observe the thoroughly scriptural character of the teaching in all the institutions, but it is nevertheless evident that some change of system either of examination or of training is desirable or necessary. For although a failure or incomplete success in a paper which includes questions on ecclesiastical history may be excusable, it is necessary that every mistress of a church school should be thoroughly acquainted with the catechism and prayer-book. The managers of all the institutions whom I have consulted, agree with me in holding that all questions on the former subject should be supplementary, and that success in the elementary sections should be made a condition of a certificate. I have prepared both papers in accordance with these views.

Grammar.—This paper has hitherto included elementary rules, parsing, &c., the derivation of words from other languages, a paraphrase, and questions on the English language and literature. The result last year stood thus:—

—	Satisfactory.	Unsatisfactory.	Good Spelling.
Whitlands - -	23	22	23
Home and Colonial - -	32	34	42
Warrington - -	14	6	10
York and Ripon -	5	8	5
Salisbury - -	4	17	8
Cheltenham - -	12	25	7
Brighton - -	2	11	9
	92	123	104

The correspondence between the spelling and grammar indicates the general adaptation of this paper to the qualifications of the candidates. But there have always been some very unsatisfactory phenomena in the written answers which I have looked over some years. The parsing is generally imperfect; few students possess much command over their language, or a clear insight into its construction; the success of several was owing to the pains they had taken to learn what is of very subordinate value, viz., the Latin and Anglo-Saxon roots found in the grammars, or the facts connected with the formation and transition of the English language, which, though interesting, are learned with little mental exertion and are not of much practical use. I think it necessary to repeat what I have stated in almost every report whether upon normal or elementary schools, that the English language is taught in a very unsatisfactory and inefficient system in most places. In the schools of Germany which I have visited this year, and on former occasions, the teachers make every lesson a practical exemplification of the use of language. They allow no answer to be incorrectly worded without interrupting the course of a lesson; they rapidly turn the phrase so as to impress upon the pupil's memory both the right form and the subject matter. This is much neglected in our country; and I have frequently found boys and girls of twelve to thirteen years old who have remained under instruction four or five years, able to read and write correctly, and to repeat all the rules of grammar, but unable to express the simplest ideas in tolerably correct English. This can only be remedied by training the teachers in the use as well as the principles of language. So far as the examination is concerned, I would henceforth recommend that the elementary sections should be confined to questions on the parsing of words and construction of sentences, and to a paraphrase from a good and not too difficult author. In the supplementary part scope may be given to etymology, and the history of our language and literature.

Arithmetic.

	Satisfactory.	Unsatisfactory.	Failure.
Whitlands - -	19	21	5
Home and Colonial -	20	36	10
Warrington - -	14	6	0
York and Ripon - -	2	9	2
Salisbury - -	7	10	4

The comparison of these numbers show that some improvement has been effected; the proportion of satisfactory papers having increased from 23·42 to 30·69 per cent. But the improvement is inconsiderable; and on looking over the results closely it does not appear, with the exception of Warrington, that this important subject has been taught with sufficient care, or on an effective system. It is quite clear that the thirty-six candidates who failed entirely, and the forty-seven whose papers were very imperfect, are not competent to instruct the first class of a tolerably good school, and ought not to undertake the education of pupil-teachers. The sixty whose papers are marked 'moderate' might do better on ordinary occasions; but they certainly do not possess that practical and accurate knowledge of the subject which should be considered indispensable in a schoolmistress.

I am happy to say that no difference of opinion exists among the managers of normal schools upon this subject. All of whom I saw this year concurred with me in my estimate of the importance of arithmetic, both as a normal study and a practical acquirement; all admitted that the present amount of attainment is insufficient, and that the questions proposed in 1851 were not too difficult. After a careful inquiry it was considered advisable in most institutions to modify the time-tables, and to allow from two to four hours more in the week for exercise. The best system would appear to be that which allows one or two hours for oral explanation and questioning upon the principles, and at least four hours for working examples. The general use of paper instead of slates conduces much to the neatness and accuracy of the work. It will not, perhaps, be necessary to make much alteration in this paper, although it will be an improvement to reserve the more difficult sums on interest, book-keeping, and vulgar fractions, and all the questions on decimals, for a supplementary section.

Geography.—This is the only subject in which there appears to be have been a falling-off. It may, however, be attributable in part to the difficulty of the questions, or to the higher standard fixed by the Inspector who reported upon the papers. I find that of 215 candidates only 34 obtained good marks, 107 moderate, 50 imperfect, and 24 failures. The papers from Cheltenham were very good, showing an extensive acquaintance with the facts, and a clear insight into the principles of this science.

I do not think it necessary to direct special attention to the comparative success of the candidates in this subject. It is clearly my impression that sufficient pains have been taken. The lectures which I have attended at the Home and Colonial and other institutions are generally remarkable for good arrangement, clear explanation, and variety of illustration. They have convinced me that the professors in some instances draw from large resources,

from the works of Malte Brun, Balbi, Humboldt, &c. Mr. Reiner and Mr. Knighton, at the Home and Colonial and Whitlands, possess an amount of knowledge which is rare even in collegiate teachers, nor have I noticed any deficiency in the governesses elsewhere. It is, however, not easy to ascertain the attainments of the candidates in a branch of knowledge which includes so great a variety of subjects, and is spread over so vast a surface. It will evidently be desirable to distinguish very rigorously between that amount of information which is necessary for all, and that extent of knowledge which, though advantageous under peculiar circumstances, may be dispensed with in the teacher of an elementary school. I would, therefore, propose that questions on the higher branches of physical geography and on remote and rarely visited countries, together with those branches of natural history which are connected with this science, should be placed in the supplementary section. If the questions proposed in that section should appear to be too difficult, I can safely assert that I have heard similar ones proposed and answered well by a large proportion of students in most institutions. Indeed, these subjects are so interesting that, far from fatiguing the pupils, they are regarded as a recreation, while the writings in which they are best treated have a tendency to elevate the character and to refine the intelligence of students.

English History.

	Satisfactory.	Unsatisfactory.

The proportion of good papers is quite as high as might have been reasonably anticipated. The papers from Warrington were remarkable for good sense and careful reading, and those from the Home and Colonial and Cheltenham deserve a very favourable notice. This result may be attributed partly to the interest of the subject and to the care with which it has been taught, and partly to the limitation of the principal questions to a particular epoch, viz., in 1850 the Tudor, and in 1851 to the Stuart dynasty. There appear to be good reasons for continuing this system, which is thoroughly approved by all the managers. They have agreed this year to confine the principal lectures to the history of England from the accession of George I. The students generally use the compendious histories of Gleig or Mrs. Markham as text books; but the teachers appear to take due pains to collect information upon the most interesting points connected with the progress of civilization and development of the nation, and to present the results in a condensed and well-arranged form. The elementary questions ought to be answered from the text-books, while the supplementary section should give an opportunity to the most intelligent and industrious students of showing the extent of their reading, and their ability in digesting and drawing just inferences from the facts.

Domestic Economy.—This paper included questions on the use and value of materials of clothing and articles of food, on the treatment of common complaints, and the duties of domestic servants. The results were as follows:—

—	Satisfactory.	Moderate.	Imperfect or Failure.
Whitelands - -	27	12	6
Home and Colonial -	39	26	1
Warrington - -	10	10	0
York and Ripon - -	3	10	0
Salisbury - -	5	16	0
Cheltenham - -	8	19	10
Brighton - -	5	5	3
	97	98	20

The proportion is nearly the same as in the preceding year, nearly fifty per cent. I am glad to observe that due attention is now given to this subject in many institutions. The ladies who superintend the domestic arrangements and general discipline usually instruct the students in the details of housekeeping, and some of them have prepared outlines of a course of lessons. It is probable that the papers do not show the comparative knowledge, much less the practical skill, of the candidates, but they are not therefore without value. There is scarcely any part of the examination in which good sense and habits of observation are so fully elicited; and the knowledge that questions will be set and the answers appreciated has a powerful effect upon the students. It impresses upon them the importance which is justly attached to their practical acquaintance with subjects of which every woman ought to know much, and upon which a well-trained schoolmistress ought to be a high authority. I do not consider it necessary to make any alteration in the paper at present. It is possible that a well-arranged and complete course of reading may hereafter be adopted, but no questions have hitherto been set, or ought to be set, which may not fairly be regarded as elementary.

Notes of Lessons.—The questions were not confined to a single paper. In each subject it is most important to direct the student's attention to the manner in which she should present the facts and inferences to the minds of children. Three sets were proposed this year: on religious principles, geography, or national history, and duties of servants. The following marks were given: 42 good or excellent; 87 fair; 74 moderate; and 12 imperfect or failure. The best papers in substance and arrangement came from the Home and Colonial, Brighton, Whitelands, and Cheltenham. In each of these institutions peculiar pains had been bestowed upon the subject, and a fair proportion of the notes were so good as to give unqualified satisfaction. It is gratifying to remark that the number of satisfactory papers (129) corresponds very nearly with those on Holy Scripture (128), and with the total number of certificates (124).

Needlework.—The candidates were requested to cut out and make up the right arm and neck of a shirt, (the size to be determined in each institution by the matron or superintendent,) and to complete the work without assistance in four hours. The work was afterwards examined and marked by an expert needlewoman, and the certificated mistress of a school of industry. The results stand thus:

Excellent or very good 68, fair 85, moderate 55, imperfect or failure 11. The best work was from Salisbury, Whitelands, and Cheltenham, but there is evidently a general improvement. It cannot be doubted that more time and pains have been given to needlework since it has been a regular subject of examination. This is quite in accordance with the views of all persons interested in the improvement of female schools.

The Art of Teaching.—As in former years, I have devoted much time and attention to this most important department of normal education. In the preceding pages I have noticed the state of the practising schools connected with the several institutions. I will now state briefly the observations which

occurred to myself and to those of my colleagues, whom I had the advantage of consulting this year on various questions of practical interest; especially on the progress which appears to be made by the students in the knowledge of their professional duties, and the ability to discharge those duties in a satisfactory manner.

1. It is evident from the papers on school-keeping, which I have examined carefully for many successive years, that in most institutions more hours are allotted weekly to this subject, and greater pains taken to inculcate clear principles and systematic methods of instruction, than was formerly the case in any, excepting the Home and Colonial training school. It will not be necessary to compare the marks given to the students; but it may be observed that they nearly correspond with proficiency attained in religious knowledge and in those other subjects which require good sense, right principles, and general intelligence. The following remarks suggested themselves to me last year, and have been corroborated by the results of the last examination. On the one hand, the answers to those questions which refer to the details of elementary instruction have lately been far more accurate and practical than formerly. The students have evidently been accustomed to notice and to describe the methods of instruction adopted in the practising schools. On the other hand, these answers have convinced me that there is an amount of indecision and vacillation in the application of elementary principles by the teachers of a large proportion of these institutions which is likely, unless a remedy be found, to produce very detrimental effects. There will always be a very considerable divergency of opinion between the managers of different institutions; and, although I am well aware of the great difficulties which that diversity occasions, especially in questions connected with the erection and arrangement of school buildings, I am ready to admit that the inconvenience is more than counterbalanced by the free development of opinion, and the increased energy of independent action. But that diversity which is necessary, and may be advantageous in different institutions, ought not to exist in them severally. Each training school ought to be conducted on a well-considered principle, and each subject of instruction ought to be taught upon an uniform and intelligible system. The time of the students is wasted, and their minds are thoroughly perplexed, when they have to choose between conflicting opinions, and to learn a variety of methods. The papers which I have examined, and the observations made by my colleagues and myself in many of the practising schools, prove that sufficient attention has not yet been given to this very practical and important point. It may be advisable this year to obtain a syllabus of the lessons given upon the details as well as the principles of school-keeping from all the training schools. The information thus elicited will be most advantageous to the managers of all similar institutions, and will be especially useful to those schoolmistresses who are intrusted with the education of pupil-teachers.

2. It appears doubtful whether the proportion of time passed by students in the practising schools, generally speaking, is sufficient to give them a thorough knowledge of their professional duties. Many students are so ignorant at the time of their admission that all their time is occupied with learning the rudiments in which they are expected to instruct the children placed under their charge; but I fear that the inducement which acts most powerfully upon the minds both of teachers and students is the anxiety to obtain a high certificate at the annual examination. When the students remain only one year under instruction it is scarcely possible to combine the two objects of mental cultivation and practical training. But even where they remain two full years it requires a strong sense of duty and great firmness in the managers to insist upon a fair apportionment of time to these distinct objects; nor indeed is it always easy to see what course can be pursued most advantageously to the institution and to the students, whose future prospects ought to be taken into consideration. This difficulty might have been foreseen; it is a natural result from a system of examination which

of necessity deals chiefly with intellectual attainments; but no pains should be spared to counteract a tendency which is undoubtedly much to be deplored. I am inclined to think that the exact time which, in the course of the year before the examination, has been passed by each student in the practising schools might be entered in the forms which they fill up at Christmas. A minimum time might be fixed, with the general consent of the training schools; and whatever the time might be, it should be taken into consideration, together with the Inspector's report upon the personal fitness of the candidate for the office of a schoolmistress. This is a point upon which it will be advantageous to collect the opinions of the committees of management in this year's tour of inspection.

3. In my next report I hope to present an account of the systems of instruction and school organization. At present it may be sufficient to state generally, that while the Pestalozzian system is effectively carried into execution by the Home and Colonial Society, and the simultaneous or collective methods, as organized by Mr. Stowe at Glasgow, are adopted at Cheltenham, the other institutions are conducted upon mixed principles, based for the most part upon the National or monitorial system, not, however, without modifications of less or greater importance in every instance.

Queen's scholars.—The managers in all cases report very favourably upon the qualifications and character of these young persons. They ought to give unqualified satisfaction. They must of necessity be superior in point of attainments to the generality of students at the time of their admission, most of whom, as I have frequently had occasion to remark, are unable to spell correctly, to work the elementary rules of arithmetic, or to answer the simplest questions on subjects of general information. They have moreover the advantage of a practical acquaintance with all details of school management, which should at once make them useful in the practising school, and give them facility in the composition of notes of lessons and school reports. I acknowledge that I am not satisfied with the results. The papers produced by a large proportion of the Queen's scholars at the two last examinations, 1851 and 1852, were not by any means such as might have been reasonably expected. In many instances they showed little improvement; in some they fell considerably below the standard of attainment which they had reached before their entrance. Some have failed in getting certificates; several have been placed in the third class. This is a fact that calls for inquiry; to whatever cause it may be attributable, that cause should be ascertained. It is my impression that the fault is principally in the students themselves; they may be elated with the distinction, and apt to imagine that they may dispense with further efforts. But it is a point to which it is right to direct the attention of the managers, and it may be advisable to lay before them the comparative results of the examination passed by each Queen's scholar at the beginning and at the end of each year.

Annual examinations.—It would be a great advantage to some of the training schools if the examination could take place twice instead of once in the year. The supply of pupil-teachers is much affected by the inconvenience of delay. The course of studies is interrupted by too frequent admissions; and if there were two examinations, most institutions would admit students only at those times. At present many students return from their schools to attend the Christmas examination; this is a serious expense to them, and very inconvenient to all parties. The increasing number of candidates will soon make such an arrangement almost necessary, in order to secure a speedy and accurate revision of their papers. It would also be advantageous to combine the inspection of the training, and especially of the practising schools, with that part of the examination which refers to the personal qualifications of the candidates.

I have the honor to be, &c.

To the Right Honorable

F. C. Cook.

The Lords of the Committee of Council on Education.

APPENDIX B.

EXAMINATION PAPERS USED IN THE EXAMINATIONS

• AT CHRISTMAS 1852.

N.B.—All your answers are to be written on this Paper; answers written on any other paper will not be looked over.

You are not to answer more than one question in each Section.

Before beginning your answers, you are to fill up the following Table, so far as it applies to you.

The Name of the Training School at which you are now being examined.	Your Christian Name and Surname in full, and the current Year of your Age.	Do you attend this Examination as— 1. A resident Student. 2. A Candidate for a Queen's Scholarship, and from what School. 3. A Teacher to be examined for a Certificate of Merit, and from what School.	If you are or have been a Student, state the Month and Year in which you entered this Training School, or the Month and Year in which you left it.
--	--	--	--

In order to limit as little as possible the opportunities by which peculiar talents may be exhibited, it is not perhaps desirable to prescribe which of the subjects of examination the candidates for Queen's scholarships shall be at liberty to select, further than to state strongly their Lordships' opinion that they should not attempt answers upon all the subjects.

The following subjects must not be wholly omitted by any candidate, viz.

- 1.—The Holy Scriptures, the Catechism, and the Liturgy of the Church of England (in schools connected with the Church of England).
- 2.—English History.
- 3.—Geography.
- 4.—Arithmetic (including Vulgar Fractions and Decimals).
- 5.—English Grammar and Composition.
- 6.—The Notes of a Lesson, or some observations on the practical duties of a teacher.

A candidate who answers in these subjects really well, may obtain an exhibition of £20 for one year.

A candidate who answers in the foregoing subjects really well, and also in one other subject, really well, (to be selected by himself out of those proposed to the candidates for certificates of merit, but with a preference on the part of my Lords for the three first books of Euclid,) may obtain an exhibition of £25 for one year.

If a candidate attempts a greater number of subjects, he will do so on his own responsibility. My Lords could not but be happy to find that he was able to answer in a greater number of subjects well; but the extent of the subjects attempted will not be accepted in lieu of mastery over those which are indispensable.

Candidates for Queen's scholarships in FEMALE training schools will not be required to answer questions in Vulgar Fractions or Decimals. For the higher exhibitions they will be at liberty to select one of the subjects proposed to female candidates for certificates of merit, such as Book-keeping, Biographical Memoirs, or Domestic Economy. Their Lordships would prefer a knowledge of some good manual upon the last-named subject, in connexion with which they will be prepared to give due weight to certificates from the Managers of the candidate's school, attesting her practical knowledge of household duties.

The exhibitions awarded to Females will be at the rate of two-thirds of those awarded to Males, viz. £13 6s. 8d. and £16 13s. 4d. instead of £20 and £25, to correspond with the different expense of boarding in training schools, for Males and Females respectively.

The first question in each section has been framed more especially with reference to candidate for Queen's scholarships.

HOLY SCRIPTURE.

Three hours allowed. Candidates must answer one question from each of the 1st four sections. Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

1. Give a brief account of the life and character of Samuel.
2. What relations of Moses are mentioned in Holy Scripture? Describe the characters of his brother and sister.
3. Name the kings of Judah, from Rehoboam to Jehosaphat, and the chief events in the reign of each.
4. In what respects did the second temple differ from the first? Describe the feelings of the Jews on its restoration.
5. Give instances of intercessory prayer, of solemn praise and thanksgiving, from the Old Testament.

1. Give texts and examples from Holy Scripture, to show the difference between *true*, *feigned*, and *imperfect* repentance, and state exactly the Scriptural meaning of the word.

2. Quote the most important prophecies which intimate the Divinity of the Messiah.

3. Show from prophecy, that the Jews ought to have expected that the Gentiles would be admitted into the Church of Christ.

Section 3.

1. Show the fulfilment of prophecy in the events of our Lord's birth and infancy.

2. What parables are related by St. Luke alone? Explain one of these parables.

3. Which of the Apostles were selected by our Lord to be witnesses of His transfiguration? On what other occasions were they thus chosen?

4. Give an account of the events narrated in the Acts of the Apostles between Pentecost and the conversion of Saul.

5. Describe the first journey of St. Paul with Silas.

Section 4.

1. Quote texts from the Epistles of St. Paul and St. Peter, which refer to the duties of subjects, servants, and masters. Illustrate these texts by examples from Scripture history.

2. Quote the chief texts in the Old and New Testament which refer to the education of children, and give examples of the effects of good and bad training.

3. Explain the meaning of the words atonement, propitiation, redemption, and justification, with texts.

4. Which epistles speak most fully of the resurrection of the dead, and the second coming of our Lord? Quote the chief passages.

Candidates may select one or more questions from this Section, and will receive marks according to the merit of the answers, but no answer to this part of the paper will be read if the answers to the first part be unsatisfactory.

SUPPLEMENTARY QUESTIONS.

1. What period of time elapsed between these events;—the creation, flood, call of Abraham, the Exodus, building of temple, restoration of Jews, birth of our Lord? Name the chief events of the last interval.

2. Trace the progressive revelation of a future state, in the Old Testament.

3. Show the fulfilment of prophecies relating to the posterity of Japhet, Ishmael, and Esau.

4. What are the spiritual characteristics of Messiah's people, as described in prophecy?

5. Against what nations did Nahum, Obadiah, and Ezekial prophesy? Show the fulfilment.

6. What books of Holy Scripture are illustrated by the monuments of Egypt and Nineveh? Give some instances.

7. Show the extent of St. Paul's labours, from the Acts and Epistles.

8. Give an analysis of the epistle to the Galatians.

9. Compare the arguments employed by St. Paul in addressing Gentile and Hebrew converts.

CATECHISM, LITURGY, AND CHURCH HISTORY.

Three hours allowed. Candidates must answer one question from each of the 1st four sections. Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

• Section 1.

Prepare the notes of a lesson on one of these subjects:—

Duty to Parents.

• The Baptismal Covenant.

• Preparation for the Lord's Supper.

Section 2.

1. What portions of the Old Testament are appointed for the lessons in Advent, Lent, and Easter? Why do these portions appear to have been selected?

2. For what days of the year are proper Psalms appointed? Show the propriety of the selection for any two occasions.

3. Of what subjects does the preface to the Prayer Book treat? What does it state concerning the use and abuse of ceremonies.

• Section 3.

State the doctrine of our Church, as expressed in the Articles, on one of these subjects, with Scriptural illustrations:—

Original Sin.

Sin after Baptism.

The Lord's Supper.

The sacrifice of Christ.

Section 4.

1. What persons were engaged in the compilation of the first English Prayer Book? In what points did it differ from the second?

2. Name the Martyrs in the Marian persecution, and give an account of Bishop Ridley.

3. When did these persons flourish, and for what were they severally remarkable,—Archbishops Usher, Grindal, Leighton; Bishops Hall, J. Taylor, and Wilson?

Candidates may select one or more questions from this Section, and will receive marks according to the merit of the answers, but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

SUPPLEMENTARY.

1. Name the chief ecclesiastics of the British and Anglo-Saxon period? On what points can any of them be shown not to have held Romish doctrines?

2. Give some account of Lanfranc, Anselm, and William of Wykeham.

3. Give some account of Papias, Polycarp, and Irenæus.

4. On what occasion was the famous letter of Pliny written? What does it prove of the doctrines and customs of primitive Christians?

5. What general councils are recognized by our Church? On what occasions were they severally held?

6. Show from history the gradual encroachments of the Papacy between the tenth and sixteenth centuries.

ARITHMETIC.

Three hours allowed. Candidates must answer one question from each of the first four sections. Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

1. Find the value of 907 articles at *1l. 17s. 6½d.* each.

2. What will be the rent of a house for 3 months, 2 weeks, and 4 days at *4l. 14s. 6d.* per month.

3. What will be the cost of painting a room at *1s. 6½d.* per square yard, whose height is 11 feet, width 15 feet, and length 18 feet 6 inches?

Section 2.

1. How much sugar can be bought for *11l. 5s.*, if 8 cwt. 3 qrs. 21 lbs. cost *4l. 9s. 4½d.*?

2. If $4\frac{1}{2}$ yards of silk cost *1l. 11s.*, what will be the cost of $40\frac{7}{8}$ yards?

3. If 30 cwt. are carried 15 miles for *5l. 8s. 9d.*, how far ought 80 cwt. to be carried for *29l.*?

Section 3.

1. Find the interest on *608l.* for 3 years, at *3l. 7s. 9½d.* per cent.?

2. If tea be purchased at *2s. 9d.* per lb., and sold at *3s. 4d.*, what is the gain per cent.?

3. At what rate will the interest on *102l. 10s.* amount to *12l. 13s. 8½d.* in $2\frac{1}{4}$ years?

Section 4.

1. Explain the terms numerator, denominator, proper and improper fractions, and reduce $\frac{1}{2}$, $\frac{5}{8}$, $\frac{7}{16}$, $\frac{3}{4}$, to their least common denominator.

2. Add $2\frac{1}{2}$, $\frac{5}{7}$, $6\frac{1}{12}$, $13\frac{1}{6}$; and reduce *3s. 7½d.* to the fraction of *5l.*

3. Multiply $15\frac{5}{8}$ by $109\frac{7}{8}$; and divide *61l. 4s. 7½d.* by $267\frac{3}{8}$.

4. In money transactions what is necessary besides a cash account, and why? What is meant by posting?

5. What are bills receivable? When received in payment of goods, how should they be entered?

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

SUPPLEMENTARY.

1. If 15*l.* 12*s.* pay 16 labourers for 18 days, how many labourers, at the same rate, will 3*l.* 2*s.* 5*d.* pay for 24 days.
2. Reduce 2*s.* 7*½d.* to the decimal of 3*l.*; and 2 hours 16 minutes to the decimal of a day.
3. Find the interest on 436*l.* 10*s.* for 3 years 8 months at 2*l.* 13*s.* 4*½d.* per cent. Work this by decimals.
4. Between 1801 and 1811 the population of Edinburgh increased by 24*½* per cent., and in the latter year it was 102,987. What was it in 1801?

ENGLISH GRAMMAR, LANGUAGE, AND LITERATURE.

Three hours allowed. Candidates must answer one question from each of the first three sections. Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

Write a paraphrase of one of the following passages, expressing the sense of each sentence in clear and simple prose:—

1. As ~~thus~~ the snows arise, and *foul*, and fierce,
All winter *drives* along the darken'd air;
In his own loose *revolving* fields, the swain
Disaster'd stands; ~~sets~~ other hills *ascend*,
Of unknown, joyless brow; and other *scenes*
Of horrid prospect, shag the trackless plain:
Nor finds ~~the~~ river, nor the forest, *hid*
Beneath the formless *wild*: but wanders on
From hill to dale, still more and more *astray*,
Impatient flouncing through the drifted *heaps*,
Strong with the thought of home; ~~the~~ thoughts of home
Rush on his nerves, and call their vigour forth
In many a vain attempt.—THOMSON.
2. How soon hath *time*, the subtle *thief* of youth,
Stol'n on his wing my three-and-twentieth year!
My *hasting* days fly on with full career,
But my late Spring no bud or blossom showeth.
Perhaps my semblance might deceive the truth
That I to manhood am arrived so near;
And inward ripeness doth much less appear,
That some more *timely happy spirits* endu'th.
Yet be it less or more, or soon or slow,
It shall be still in strictest measure even
To that same lot, however *mean* or high,
Towards *which* time leads me, and the will of heaven.
All is, if I have grace to use it so,
As ever in my great *task-master's* eye.—MILTON.

Section 2.

1. Parse the words printed in italics.
2. Analyse and explain the construction of the passage beginning "As thus," and ending with "the trackless plain."

Section 3.

1. Enumerate the various plural forms of nouns. Account for these forms—loaves, chiefs, kine, alms, peace, mice.
2. Classify the irregular verbs according to their forms.

3. Show the various modes by which nouns are formed from verbs.
4. Enumerate the derivative forms of adjectives, with the general meaning of each form.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

SUPPLEMENTARY QUESTIONS.

1. Give the meaning and derivation of these words—beadle, burgess, Bradburn, Copenhagen, dawn, Snowden, farewell, frog, gooseberry, Stonehenge, leasing, shire, Wales.
2. From what languages are these words derived, and how?—article, rebel, cadence, indented, docile, superfluous, horizon, elapse, mortify.
3. Enumerate the principal figures of syntax and rhetoric, with an example of each.
4. Explain the metre of these lines :—
 My right there is none to dispute.
 I can fly, or I can run
 Quickly to the green earth's end.
 Give examples of other principal metres used by English poets.
5. Who were the chief Anglo-Saxon writers? What is meant by Middle English? Give an example.
6. When did the following writers flourish? name the principal works of each :—Chaucer, Spenser, Addison, Pope, Thomson, Burke.
7. Give an analysis of any one great poem in the English language.

GEOGRAPHY AND NATURAL HISTORY.

Three hours allowed. Candidates must answer one question from each of the first four sections. Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

1. Draw an outline map of Scotland, or of Ireland, inserting the names of the sea-ports and rivers.
2. Where are these places situate, and for what are they remarkable—Chatham, Plymouth, Falmouth, Sunderland, Sheffield, Paisley, Belfast, Drogheda?
3. Name the British possessions in Europe, North America, and the West Indies. Describe the climate and productions of the West Indian Islands.

Section 2.

1. Name the islands adjoining Great Britain, and give some account of the most northerly.
2. Name the lakes of Great Britain, and describe the largest in England, Scotland, and Ireland respectively.
3. Enumerate the chief imports and exports of Great Britain, and give some account of their value and importance.

Section 3.

1. Draw an outline map of one of these countries, inserting the name of the chief cities and rivers ;—France, Italy, or Austria.
2. Name the six largest rivers of Europe, with the length of each ; and describe accurately the course of the Danube.
3. Name the chief mountains, lakes, and cities of Switzerland, and give some account of the glaciers.

Section 4.

1. Draw a map of Palestine, and describe briefly the climate and chief physical features.

2. Where are the following places situated: Astrachan, Samarcand, Hamadan, Philadelphia, Breslau, Toronto, Funchal, Mocha, Benares, Singapore, Aden?

3. Compare the heights of the mountains of England, Europe, South America, and Asia. Describe the scenery and climate of one group or chain of these mountains.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answer to this part of the paper will be read if the answers to the first part be unsatisfactory.

SUPPLEMENTARY PAPER.

1. Describe generally the mountain system of the old world.

2. Which are the chief Asiatic plains? Describe the Steppes.

3. Describe the tide waves of the Indian and Atlantic Oceans.

4. Describe the causes and effects of periodical rains. Compare the relative quantity of rain in different regions of Europe and Asia.

5. What causes determine physical climates? Illustrate each cause by reference to the map.

6. Give some account of the formation and appearance of coral islands.

7. Upon what law does the distribution of animals mainly depend? Enumerate the chief herbivorous mammalia, and name their localities.

9. What are the chief classes of plants? Name the zones of vegetation.

ENGLISH HISTORY.

Three hours allowed. Candidates must answer one question from each of the first four sections. Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

1. Name the chief events in the reign of John.

2. Give the dates and result of these battles,—Falkirk, Bannockburn, Evesham, and Bosworth.

3. Describe the character of Queen Elizabeth and the chief events in her reign.

Section 2.

1. What circumstances led to the accession of George I.? Trace his descent, and describe his character.

2. Give an account of the rebellion of 1715.

3. What foreign princes were contemporaries with George I.? Enumerate the chief events of his reign.

Section 3.

1. What were the chief events during the reign of Queen Anne?

2. Give an account of the events that followed the retreat of Charles Edward from Derby, until his escape to France.

3. Give an account of the expedition of General Wolf in 1759.

4. What names in art, science, and literature are most distinguished in the reign of George I. and II.?

Section 4.

1. Describe the death of Lord Chatham.
2. Describe the events (with dates) which led to the independence of the United States of North America.
3. Describe the character of Louis XVI. Name the chief actors in the French revolution.
4. Give an account of the slave trade as it occurs in English history.
5. What battles were fought by the Duke of Wellington in the Peninsula? Give an account of one of these battles.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

SUPPLEMENTARY.

1. Give a brief account of the customs and political institutions of the Anglo-Saxons in the ninth century.
2. When was the feudal system introduced? What were its chief characteristics?
3. Enumerate the inventions and discoveries since the fifteenth century which have had most effect in promoting the civilization of England.
4. Compare the domestic habits of the gentry, or of the peasantry, in the reigns of Elizabeth, James II., George II., and Victoria.
5. Enumerate the temporal benefits of the Reformation.
6. With what portions of English history are the following names associated.—Philip Augustus, Francis I., Charles V., Henry IV., Richelieu, Prince Eugene, Louis XIV.

ART OF TEACHING, SCHOOL MANAGEMENT, &c.

Three hours allowed. Candidates must answer one question from each of the first three sections. Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

1. How do you propose to teach the elementary sounds and signs of the English language? State your reasons.
2. What exercises are most useful in teaching children to speak correctly, and fluently?
3. By what exercises are children taught to distinguish colour, form, and place? What is the practical use of such exercises?

Section 2.

1. Describe accurately the proper position of a child's hands and body in a writing lesson. What habits should be guarded against in teaching to write on slates?
2. What exercises are best for spelling and simple composition?
3. In a mixed school of 70 children, between 6 and 12 years old, what lessons ought to be done at desks? What arrangement of such desks would you prefer, and why?

Section 3.

1. What assistance would you require to conduct a school of 80 girls? In what respect does the system of pupil-teachers, under the Minutes of 1846, affect the employment of monitors?
2. What are the peculiar advantages of a gallery? For what lessons would you employ it in an infant, a mixed, or a girls' school? Give the best dimensions and shape, with a drawing.

3. On what subjects, and to what extent, would you require exercises to be written by children out of school hours? What are the difficulties, and how can they be surmounted?

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

SUPPLEMENTARY.

Write an essay on one of these subjects:—

1. The relative duties of schoolmistresses and pupil-teachers.
2. The relation of schoolmistresses to the parents of children.
3. What dispositions, habits, and attainments ought to have been acquired by the daughter of a labouring man on her quitting school to go into service?

DOMESTIC ECONOMY.

(Three Hours allowed for this Paper.)

Section 1.

1. Is it more advantageous for a schoolmistress to purchase furniture, or to occupy furnished apartments? What furniture would she require? Calculate the expense.
2. What effect has the employment of women in charring, washing, or out-door labour upon their families?
3. What are the main points which a mechanic or labourer should look to in taking a house? What proportion should the rent bear to his earnings?

Section 2.

1. Give rules for the management of poultry; calculate the expense of keeping them, and the probable gain in the neighbourhood of London, or of any particular provincial town.
2. Enumerate leguminous plants, and succulent roots. State the best mode of preparing one of each kind.
3. Name the articles of food which are of most use in a sick room. Show the use of these in special complaints, or in convalescence.
4. What habits of self-denial would you recommend a young woman to practise in order to provide for old age? Calculate the saving that can be effected thereby.

Section 3.

1. Compare the price and durability of stockings knitted at home, or bought at a shop.
2. Specify the items, and calculate the cost of a young woman's outfit for a voyage to Australia.
3. What effect has the employment of girls in straw-plaiting and lace-making upon their moral habits, and the comfort of their homes?

Section 4.

1. Describe the precautions to be observed in cases of contagious or infectious complaints.
2. Describe the symptoms of measles, scarlet fever, and croup.
3. Enumerate the mineral or vegetable poisons which are likely to come in the way of children. What are the readiest and most effective antidotes?

Section 5.

4. Prepare the notes of a lesson on
The qualifications and duties of a sick nurse,
Parlour-maid, or
Plain cook.

MUSIC.

(Three Hours allowed for this Paper.)

DIVISION 1.

Excellence in these answers, if combined with high practical ability, will suffice for the highest class of certificates.

Section 1.

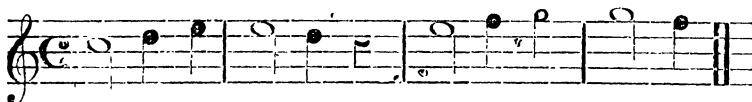

1. Write out the substance of a lesson on *beating time*, with examples of all the ordinary cases.

Section 2.

1. How is a very gradual increase or decrease of velocity or of loudness expressed? When a note is to be forced how is it distinguished?

2. How many sounds are there in a *tetrachord*? How many tetrachords are there in a major scale? Give the names of the sounds of the tetrachord.

3. What rules ought to be observed with regard to *the turn* in singing? Write out the following melody with a *direct* and with an *inverted turn* introduced.

Section 3.

1. Supposing that in a musical composition the time were to change from $\frac{C}{4}$ to $\frac{6}{4}$, what change would be required in the manner of beating? What would be the value of each of the beats in each case?

2. In what scale is the following passage written? State how you determine it.

3. What is meant by *Reading in Time*? Show how the following passage should be read in time.

SUPPLEMENTARY PAPER.

DIVISION 2.

Candidates may select one or more questions from this section, and will receive marks according to the merit of the answers; but no answers to this part of the paper will be read if the answers to the first part be unsatisfactory.

1. Explain, as you would to a class, what is meant by the terms *prime*, *harmonic chord*.

2. What rule is observed in arranging chords for more than and for fewer than four voices? On what principle is the rule based?

3. What are *sequences*? Explain the differences between *tonal* and *real sequences*.

4. Is there anything objectionable in the arrangement of the following chords?

5. In musical composition what relation ought to exist between the chords in order to produce the best effect?

6. Give a list of the *consonant* and *dissonant intervals*, distinguishing what are *anomalous*, *perfect*, and *imperfect*.

PERSPECTIVE.

1. Explain what is meant by a Perspective representation of an object.

Give such a representation of a right-angled triangle, when one of the sides which contain the right angle is vertical and the triangle is (1) above, (2) below the eye.

2. Define the following terms:—the intersection of the original plane, the parallel of the original plane, the vanishing point of a line, and the centre of the picture.

Illustrate your definitions by a diagram.

3. Make an accurate drawing of a cube, supposing the plane of the picture to be parallel to one of the sides, and the cube to be below the eye on the left.

Place upon it another cube of half the linear dimensions exactly over its centre.

4. Draw an accurate perspective representation of a square, the sides of which are parallel and perpendicular to the plane of the picture; having given the centre and distance of the picture, the side of the square, and the seat of one of its corners.

WELSH.

1. Translate into English one of the following passages:—

“Pan eisteddych i fwyta gyd â thy wysog, ystyria yn ddyfal beth sydd ger dy fron: a gosod gyllell ar dy geg, os byddi ddyn blysig. Na ddeisyf ie ddanteithion ef: canys bwyd twyllodrus ydyw. Nac ymfina i ymgyfoethogi: dod heibio dy synwyr dy hun. A beri di i’th lygaid ehedeg ar y peth nid yw? canys golud yn ddiau a gymmer adenydd, ac a eheda ymaith megis eryr tu a’r wybr.”

“Mor bellled ag y gellai golwg y llygad gyrhaeddyd, i’r dehauf i’r aswy, ac ym mlaen, nid oedd dim i’w weled ond yr un dorf yn ymsymmud. Rhessau hirion o asynod ac ychain, yn llwythog o bebyll duon, crochanau anferth, a llawrlenni amryliwlog; hen wragedd a hen wŷr, heb allu iawwyach gerdded,

yn glymmedig wrth bentwr o'ddodrefn teuluaid; babanod wedi gosod mewn cyfrwygydau, a'u pennau bychain wedi ei gwrthio allan drwy yr agoriadau culion, ac yn cael eu gwrthbwyso yr ochr arall i'r anifail gan fynnod neu * yn wedi eu clynnu a'u sicrhau. Y cyfryw ydoedd y dorf gynamysgliw, trwy yr hon yr oeddym i fyned am oriau lawer."

2. Parse, in full, the first period in whichever of the above passages you have translated.

3. Translate into Welsh one of the two following passages :—

"Take care that your children come punctually to school, and that they all have clean hands and faces. It is an old, but true, saying that 'Cleanliness is next to Godliness.' If, however, you wish your scholars to behave well in these respects, set them a good example yourself: an idle, careless, dirty teacher does almost as much harm as good in a school—no matter what may be his acquirements."

"This is a great and glorious land we live in; rich in many of the most precious gifts of Providence, and powerful, beyond what could have been expected, among the nations of the earth. The people, however, are torn by civil factions and religious dissensions: exposed to the extremes of misery and prosperity: fond of sensual enjoyment, notwithstanding their boasted spirituality; and easily deceived by designing men, notwithstanding their constant pretence to a more than ordinary share of common sense."

4. In this sentence—

"A gwybyddwch hyn, pe gwybuasai gwr y tŷ pa wŷliadwriaeth y deuai y lleidr, efe a wylasai, ac ni adawsai gloddio ei dŷ trwodd,"—explain, clearly, the reasons of *all* the initial mutations of letters. Why is "*pe*" used here instead of "*os*"?

5. Compare the grammatical treatment of the negative particles "*na*" and "*not*" in the Welsh and English languages.

*Special Report by Her Majesty's Inspector of Schools,
T. W. M. MARSHALL Esq., on the Roman Catholic Train-
ing School of St. Mary's, Hammersmith.*

MY LORDS,

January, 1853.

IN compliance with your instructions, I have visited the above institution, and proceed to offer some account of its constitution and existing state.

From its establishment in 1847 the *Catholic Poor School Committee* had recognized the indispensable necessity of establishing a training school for masters; but finding in England no institution conducted upon principles which they could accept as entirely satisfactory, they naturally turned to the continent of Europe. Acting under the advice of the ecclesiastical authorities, they selected as their model the establishment of the Abbé de Lamennais, which has rendered such signal services to education in the north-west of France, as well as in the French American islands.

After concerting measures with a view to the accomplishment of this design, they endeavoured to obtain a suitable site in the neighbourhood of London, and finally selected the premises known as Brook Green House, Hammersmith. This house was built at the end of the last century, expressly for a school, and had at one time accommodation for as many as seventy boarders.

Having secured this property, which is copyhold of the manor of Fulham, for the sum of 3,140*l.*, they proceeded, after consultation with the Secretary of the Committee of Council on Education, to make extensive alterations and additions. The rooms to be occupied by the Principal and Vice-Principal, and the dormitories, required no material change; but there have been added a chapel, refectory, lecture-room, and large kitchen, and, subsequently, a practising school, measuring sixty feet by twenty-six feet, exceedingly well furnished and arranged, besides three classrooms, washing and cloak rooms, the whole being surmounted by a capacious chamber partitioned into twenty sleeping apartments for students.

The garden attached to the house comprises three acres of land, bounded in its whole extent by a high brick wall. This has been laid out and arranged for the recreation of the students, well stocked with fruit trees, and yields ample food for the piggery and cowshed, which have been constructed upon an approved plan.

The premises were finally conveyed to trustees, namely, the Earl of Arundel and Surrey, the Earl of Shrewsbury,

the Honourable Charles Langdale, and Charles Towneley, Esq., M.P.

The first duty of these gentlemen was to secure the services of a competent Principal, whom they were fortunate enough to find in the Rev. John Melville Glenie, M.A. It was not until November 1851 that Mr. Glenie, whose high qualifications are recognized by all who are acquainted with him, entered actively upon his duties. An official examination was solicited at this time, not so much with a view to immediate success or profit, as to acquire for the students such practical experience of its nature as might enable them to guard against future failures.

I have a second time visited the institution in the month of December 1852, and with the assistance of the Principal, who kindly offered me every requisite information, I am now able to give some accounts of its present state, and of the principles upon which it is conducted.

The number of students actually in the house at this time is twenty-five. The greater part of the work in the house and garden being, however, performed by a few of the number, they cannot all be regarded as regular students. The pupil-teachers attached to the practising school also live entirely in the house, an arrangement which cannot but be exceedingly advantageous to them. The following time-table of the present course of studies has been communicated to me by the Principal :—

Lectures.	Monday.	Tuesday.	Wednesday.	Thursday.	Friday.	Saturday.
Principal, 9—10.	Religious Instruction, doctrinal and historical.	Education, Theory and Practice.	Religious Instruction, &c.	Education, &c.	Religious Instruction, &c.	Original Composition.
Masters, 11—12.	Arithmetic and Algebra.	Geometry and Mensuration.	Arithmetic, &c.	Geometry, &c.	Arithmetic, &c.	Geometry, &c.
Masters, 3—4.	Geography, Popular Astronomy, and Natural History.	French.	Geography, &c.	French.	Geography, &c.	} Half Holiday.
Principal, 6—7.	English Grammar and Literature.	History.	English Grammar, &c.	History.	English Grammar, &c.	
Masters, 7—8.	Music.	Drawing.	Music.	} Devotional Exercises.	Drawing.	Physics.
Masters, 8—9.	Writing.	Music.	Writing.		Writing.	Music.

The present occupations of the day succeed each other in the following order :

At	5 $\frac{1}{2}$	Rise.
"	6 — 7	Morning prayers, meditation, spiritual reading.
"	7 — 7 $\frac{1}{2}$	Assisting at mass.
"	7 $\frac{1}{2}$ — 8 $\frac{1}{2}$	Study.
"	8 $\frac{1}{2}$ — 9	Breakfast and recreation.
"	9 — 12	Lectures and study.
	12 — 12 $\frac{1}{2}$	Examination of conscience.
	12 $\frac{1}{2}$ — 12 $\frac{3}{4}$	Recreation.
	12 $\frac{3}{4}$ — 2	Dinner and recreation.
	2 — 5	Lectures and study.
	5 — 5 $\frac{1}{2}$	Religious exercises.
	5 $\frac{1}{2}$ — 6	Tea and recreation.
	6 — 7	Lecture.
	7 — 8	Music and drawing.
	8 — 8 $\frac{1}{2}$	Writing.
	8 $\frac{1}{2}$ — 9 $\frac{1}{2}$	Supper and recreation.
	9 $\frac{1}{2}$ — 10	Night prayers and bed.

SUMMARY.

Spiritual exercises	-	-	3 hours.	} 12 hours.
Lectures and study	-	-	8 "	
Music and drawing	-	-	1 "	
Meals and recreation	-	-	4 "	
Sleep and time for rising	-	-	8 "	

For the information contained in the above tables I am indebted to the Principal, by whom they were framed, and who reserves to himself the task of changing or modifying them, if in his judgment it should become expedient to do so. Upon the details which they exhibit it is unnecessary to make any comment. It will suffice to notice briefly what appeared to me the most characteristic features of the institution, and to state my opinion of the adequacy of the existing provision for training and instructing normal students, and for attaining the objects which should be aimed at in a normal school. The great exactness of the rural and religious discipline, and its visible effect upon the general character and deportment of the students, claims attention in the first place. Strict silence is observed everywhere throughout the day, except in times of recreation. All the meals are taken in common in the refectory in silence. The Lives of the Saints, or other spiritual books, are read aloud at dinner and supper by one of the students. They serve at the meals in turn, make their own beds, clean their own shoes, and sweep the lecture-room, class-room, dormitories, &c. They also work, from time to time, in the garden. On Sundays, days of obligation, and of other feasts, study is not obligatory; but special religious instruction is given to the students, bearing upon their peculiar vocation and future duties. It is impossible not to be struck with their obedience, humility, modesty, and

cheerfulness. The whole proceedings of the house seem to be founded upon the maxim that they who aspire to form the character of others should first prove their capacity for the task by having formed their own; and it is abundantly evident that in this essential work ample progress has already been made. The Principal appears to think that all other improvement depends upon this, and should be considered subordinate to it.

It is probable, indeed, that the exactness of religious discipline, to which I have alluded, and the peremptory requirement of a certain moral and religious character as a condition of admission, may tend to check the number of applicants, and thus delay the period at which the full complement of normal students can be obtained. This disadvantage, it is believed, will be more than counterbalanced by the superior dispositions which will be developed in teachers trained in such an institution; for it is generally admitted that the main hindrance to the usefulness of elementary teachers lies in the absence of purity and elevation of feeling and motive, in incompleteness of self-discipline, and in repugnance to those arduous sacrifices which their office involves, but which can only be inspired by the highest degree of patience and charity. To form these virtues should be, therefore, the primary object of those who direct a normal school, and they are rightly regarded as the essential conditions of success. Such institutions are evidently not designed to perpetuate a race of superficial, worldly, and self-indulgent teachers, from whose labours very small benefit can be expected, but rather to call into existence a new race of thoughtful, generous, and devoted men, fully comprehending their mission, and amply qualified to accomplish effectually its sacred and difficult duties. There is good reason to anticipate that such teachers will be formed in the institution of which I am speaking.

The Principal appears, however, to have come to the conclusion, that he cannot henceforth accept the evidence of personal virtue and religious dispositions as the *sole* condition of admission. He proposes to test also, by a suitable examination, the attainments, and intellectual capacity of all candidates who present themselves. A considerable number of the present students, who have embraced the calling of teachers solely from religious motives, are rather commencing than completing their education; and this is found to be a serious inconvenience. Such students, indeed, however highly qualified in some respects, are out of place in such an institution, which is not, and ought not to be, an elementary school.

Up to the present time no pupil-teacher, having completed his apprenticeship, has been a candidate for admission. Students of this class may, however, be expected at a later period. Only two pupil-teachers in Roman Catholic schools have as yet finished their training.

The teaching force is at this moment inadequate, the appointment of a Vice-Principal not having yet taken place. It is hoped that a gentleman possessing eminent qualifications will shortly be nominated to that office, when the Principal, who is now assisted by masters, will be able to delegate a portion of his duties.

The practising school is in an entirely satisfactory state. The higher division of students spend the whole of each Tuesday,—the lower division the whole of each Thursday,—in this school. They partly listen to the lessons given, receiving at the same time appropriate instructions and suggestions, —partly assume the charge of the classes. Their instructions are afterwards canvassed and corrected by the Principal. On the two days named the Principal catechises in the presence of the students, and gives instructions to the children to prepare them for approaching the sacraments, and in the practice of devotional exercises. Such instructions present a model for the most important of all the functions hereafter incumbent, in some measure, upon the students.

A fuller report is, perhaps, unnecessary with respect to an institution of recent origin, conducted hitherto under difficulties which are only now disappearing, and far from having as yet assumed the form which it is designed to impress upon it, and which it is evidently destined to reach. Much more has already been accomplished by the unaided labours of the Principal than could have been reasonably demanded in so short an interval, considering the peculiar difficulties with which he has had to contend, and with which it must be added he has contended with singular judgment and prudence. With the appointment of a competent Vice-Principal the only positive defect will be removed. The buildings and accommodation are all that can be desired. The refectory is thirty-eight feet by fifteen feet; lecture-room, thirty-six feet by fourteen feet six inches; classroom, nineteen feet by fifteen feet six inches. The chief dormitory is sixty feet by twenty-three feet; lofty, well ventilated; containing sixteen different compartments, suitably arranged and furnished, and four smaller rooms adjoining. The three other dormitories contain fifteen beds. The infirmary is twenty feet by eighteen feet six inches, sufficiently lofty, with infirmarian's room attached. The accommodation for the Principal and

Vice-Principal is ample. The chapel is suitable and appropriate, but small, and will soon be of inadequate dimensions, as the number of students is increasing. A new one is said to be in contemplation.

It is only necessary to add, that the complete eventual success of the institution is now fully secured, and that it is slowly but surely accomplishing a work which will effect most importantly the whole future character of elementary education in Catholic schools. It must be a source of extreme gratification to its founders to witness the results already obtained; and all who are interested in promoting education for the Catholic poor are fully justified in regarding it with hope and confidence. An institution conducted with so much wisdom, patience, and prudence cannot fail; and the character and qualifications of the Principal afford an ample guarantee that all which was aimed at in its establishment will be fully and effectually accomplished.

I have the honor to be, &c.

(Signed) T. W. M. MARSHALL.

To the Right Honorable

The Lords of the Committee of Council on Education.
